**RE: Deep Bedrock Investigation Interim Report Deadline Extension
Coakley Landfill Superfund Site – Greenland and North Hampton, New Hampshire
NHDES Site #198712001**

Dear Mr. Hull,

CES, Inc. (CES) has prepared the following request for deadline extension of the Deep Bedrock Investigation Interim Report (Interim Report) on behalf of the Coakley Landfill Group (CLG). This request is being made in response to the United States Environmental Protection Agency's (USEPA) letter dated August 5, 2019. This letter was provided by the USEPA to document a response to meeting summary provided by the CLG detailing the May 15, 2019 meeting between the USEPA, New Hampshire Department of Environmental Services (NHDES), CLG, CES, and Sanborn Head and Associates.

The letter specified that the "CLG shall provide a technical memorandum (Tech Memo) by September 30, 2019, that details all the bedrock investigation actions completed up to the submission of the Tech Memo." The CLG is requesting an extension of the Interim Report deadline to November 18, 2019 to allow for the inclusion of groundwater analytical data from the recently installed deep bedrock monitoring well couplets. This data will result from sampling efforts being performed by CES beginning the week of September 30, 2019 as part of a routine biannual sampling effort at the Coakley Landfill Superfund Site.

If you have any questions regarding this submittal, please feel free to contact Christopher Buckman or Michael Deyling at (207) 795-6009.

Sincerely;

CES, Inc.
