INTRODUCTION

This document is the Index to the Administrative Record File compiled at the time of the signing of the Record of Decision for the Tansitor Electronics National Priorities List (NPL) site. Section I of the index cites site-specific documents, and Section II cites guidance documents used by EPA staff in selecting a response action at the site. **Site-specific documents in the Administrative Record File are in order by the Document Number included at the end of each citation.**

In Section I, documents identified in the Title as [Available in Records Center] are oversized reports and are separately available for review in the EPA Region I Records Center, by appointment only. Documents identified in the Title as [Confidential] are confidential documents that are available for judicial review, only.

The Remedial Investigation Report for the Tansitor Electronics, Inc. Superfund Site has been organized into two documents: the Phase 1A Site Characterization Report and the Phase 1B Report. The Phase 1A Report details the study area investigation, physical characteristics, nature, extent, transport, and fate of chemical constituents based on field work conducted during July 1991 to December 1991. The Phase 1B Report details similar data and results based on field work conducted during September 1992 to November 1992. The Phase 1B Report also provides a summary of Phase 1A results and summary and conclusions of the entire Remedial Investigation.

The Administrative Record File is available for public review, by appointment, at the EPA Region I Records Center in Boston, Massachusetts (telephone 617-573-5729) and at the Bennington Public Library, Silver Street, Bennington, Vermont, 05201.

Questions concerning this Administrative Record File should be addressed to the EPA Region I site manager.

An Administrative Record is required by the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended by the Superfund Amendments and Reauthorization Act (SARA).
