Re: Solvents Recovery Service of New England ("SRSNE")  
in Southington, Connecticut (the "Site")

Dear Ms. Goldberg:

We are in receipt of your letter of November 13, 1992, advising that EPA has identified Miller Brewing Company, Fulton Container Division ("Fulton Container") as a potentially responsible party ("PRP") for the conditions at the Site. This letter is to advise you of our willingness to work with the other PRPs at the Site and contact has been made with Attorney Robert Kirsch of Hale & Dorr, one of the members of the PRP Steering Committee identified in your letter.

We have also reviewed the EPA documentation which indicates that Fulton Container sent 12,483 gallons to SRSNE's facility in Southington, Connecticut. In reviewing our documentation on our relationship with SRSNE, we note that the three SRSNE invoices (copies enclosed) indicate that a total of 3987 gallons were recovered as wash solvent. We have also enclosed copies of two SRSNE shipping orders which indicate that 77 drums of recycled product were returned for our use, and we assume they would have contained the 3987 gallons of recycled wash solvent.

In light of the foregoing, it would appear that the sum of 3987 gallons should be subtracted from the total manifested amount of 12,483 gallons to yield an adjusted gallonage amount of 8496. The adjusted figure would then be used as the gallonage amount for Fulton Container in this matter.

Ms. Marilyn K. Goldberg  
Page 2  
December 11, 1992

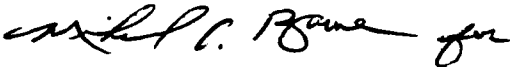

Our investigation into the proper gallonage amount is ongoing, but in view of the short time period in which EPA wanted feedback on its proposed volume figure, we thought it appropriate to provide you with the enclosures. We would appreciate EPA forwarding to us any documentation which it might have on this point as well.

In submitting this information to you for your review, we did not use Attachment II(B) of the packet materials forwarded to us because Paragraph 4(d) of the Attachment indicates that wastes that were recycled or returned to the generator could not be subtracted from the volume amount. The basis for this instruction was unclear -- if the material is not at the Site, it cannot be contributing to the reported need for the incurrence of response costs. As you know, we have only recently been identified as a PRP and if this point has already been addressed by EPA, we would appreciate your advising us of the basis for EPA's position.

If you have any questions, please direct them to our Plant Engineer, Michael A. Barone at (315) 598-0765. Please note that correspondence on this matter should also be directed to the following:

1. Garrett W. Reich, Esq.  
Senior Assistant General Counsel  
Miller Brewing Company
