Re: Western Sand and Gravel Site

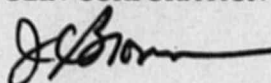

Dear Mr. Angell:

Olin has received a request from USEPA that transformers and associated electrical equipment be removed from the Western Sand and Gravel site. This equipment was disconnected by Blackstone Valley Electric in August, 1987 during closeout of the groundwater recirculation system; it is stored at Western Sand and Gravel south of the remediation (fenced) area. We were informed by Blackstone Valley Electric that the equipment is the property of the State and as such Blackstone Valley Electric could not remove it. As we requested of Mr. Felix Harvey of RIDEM in August, 1987, we would again like to pass along EPA's request that the State remove the equipment from the site.

If there are any questions regarding this matter, please call Robert McCaleb at 615/336-4073.

Sincerely,

OLIN CORPORATION
