Brad,  
Confirmation of current acceptability is provided below.

-----  
Re: Northland Environmental, LLC (RID040098352)

Northland Environmental, LLC, 275 Allens Avenue, Providence, Rhode Island 02905 (RID040098352), having no relevant, current compliance issues, is acceptable at this time to receive CERCLA waste.

Disposal of any waste must be in accordance with all receiving facility policy and permit conditions.

Regards,  
Donald R. MacLeod

**Subject:** Off-Site Rule Request Form - Hows Corner

Kevin,  
Please see the attached Off-Site Rule Request Form for the disposal of spent GAC from the Hows Corner West Site in Plymouth, Maine. As discussed yesterday (01/07/2015) you are familiar with the site and would be considered the RPM.

To provide additional background, CES is conducting O&M at the Hows Corner West Superfund Site. We have elected to use a new contractor for the disposal of spent GAC generated as part of the water treatment taking place at the Site. The water treatment system at the Site remains in operation as it has been operated for several years. There have been no changes to the processes involved in treating the water. Monthly, influent and effluent water samples are collected and analyzed the contaminants of concern have not been revised for the Site. We do not collect samples of the spent GAC as part of our periodic sampling. Attached you will see a table indicating the results of the last (spent) GAC sample collected in 2012. The attached form identified Northland Environmental as the disposal destination in Providence, Rhode Island.

Based on the most recent water sampling, we should have two drums of spent carbon ready for disposal within the next two weeks.

Please let us know if you have any other questions or comments.

Thank you
