Re: 150 Fulton Avenue Site Quarterly Ground Water Sampling  
Garden City Park, New York  
Remedial Investigation/Feasibility Study  
NYSDEC Site Registry # 130073  
ERM Job # 0001133

Dear Michael:

During the past five years, Environmental Resources Management, (ERM) has been conducting an extensive ground water investigation within Garden City as part of a Remedial Investigation/Feasibility Study related to the 150 Fulton Avenue Site (the Site). ERM has been working cooperatively with the Garden City Department of Public Works, and this investigation has included extensive drilling, sampling, and the installation of numerous ground water monitoring wells within residential areas of Garden City. This investigation has also included ERM's authorized access to other ground water monitoring wells within the area that are under the jurisdiction of the Nassau County Department of Public Works (NCDPW).

During the 10 September 2003 project meeting held at the Nassau County Department of Health Services (NCDH) offices in Mineola, the NCDH indicated a desire to split ground water samples from at least the MW-21 well cluster located approximately 1,200 upgradient of Garden City Supply Well Nos. N-07058 & N-08339. Please refer to the scaled air photo showing the areal extent of chlorinated volatile organic compounds (VOCs) in ground water sent to Mr. Robert Weitzman on 2 October 2003 for well locations.

In accordance with our recent telephone conversation, this letter is to inform NCDH that ERM will be collecting quarterly ground water samples from 11 select wells within Garden City on Monday, 15 December 2003 through Friday, 19 December 2003. The eleven wells are monitoring points within core portions of the tetrachloroethene-dominant plume emanating from the Site. Presented below is a summary of the wells to be sampled.

Mr. Michael Alarcon  
Nassau County Department of Health Services

Management

Well Local No.	Depth to Top of Screen	Depth to Bottom of Screen	Well Material	Well Diameter in Feet
GCP01	49	59	PVC	0.17
GCP01D	105	115	PVC	0.17
GCP08	50	60	PVC	0.17
GCP18S	39	54	PVC	0.17
GCP18D	113	123	PVC	0.17
GCP15S	36	56	PVC	0.33
MW15A	140	150	Steel	0.17
MW15B	351	361	Steel	0.17
MW21A	120	130	Steel	0.17
MW21B	330	340	Steel	0.17
MW21C	390	400	Steel	0.17

If you can identify the wells from which NCDH would like to obtain samples, we may be able to coordinate the sampling schedule so that the wells of interest are sampled in consecutive order.

Please call me at your earliest convenience so that we can coordinate this effort. My direct telephone number is (631) 756-8920.

Very truly yours,

Chris W. Wenczel
