EPA RESOLUTION - AMERICAN THERMOSTAT

The Village Board accepts in principle having the EPA hook up to our water system and construct a water line in order to provide water to approximately 43 homes affected by ground water contamination from American Thermostat provided the following conditions are met:

1. The Town of Catskill forms a water district and makes provisions to collect for us any delinquent water bills from this district, and
2. No other hookups on this line will be allowed, nor can one household subdivide their water to others, and
3. The EPA contribute monies to upgrade our water system in accordance with our formula for such hookup. The amount of this contribution is about \$400,000, and
4. That our Village engineers see all plans and specifications for this project prior to work beginning on this project, and
5. All improvements and additions to our water system becomes the property of the Village of Catskill.

I certify that this is a true and exact copy
of a resolution passed by the Board of Trustees on
May 8, 1990.

Carolyn Pardy
