New York, N. Y. 10278

Attention: Chris Cora

Dear Mr. Cora:

The following is the information you requested:

1. Locust Ave., Well No. 3, S-34522 was placed in service on 4/16/90, pumping at a rate of 1100 GPM.
2. Locust Ave., Well No. 1, S-20045 and Locust Ave., Well No. 2, S-22711 are awaiting the installation of pumps. I anticipate that these wells will be returned to service in about 2 weeks. Their pumping rate will be approximately 1000 GPM.

These wells will be operated on a normal rotation with the Magothy wells, 4 and 5. The use will depend on system demand. It could vary from a few hours every few days to 15 to 20 hours per day.

If I can be of further help, please do not hesitate to call.

Very truly yours,

Herman J. Miller
Superintendent
