

COVID Community Update

March 2020

Public participation is essential to the success of EPA's community involvement program. If you have any questions, please contact:

Pat Seppi
EPA Community Involvement
Coordinator

Klimcsak.raymond@epa.gov

As we continue to adjust to the evolving COVID-19 situation, EPA is taking the necessary steps to ensure that decisions about ongoing cleanup activities at Superfund sites are made with the health and safety of communities, EPA staff, state and tribal partners, and contractors as the priority.

At the Sherwin Williams site, work will continue on outdoor properties. We will be periodically reassessing this decision moving forward. Sherwin Williams and their contractors have been in constant contact with EPA, and we will continue to assess our work as the COVID-19 situation continues. EPA will continue to work closely with state and local health officials, and all partners and stakeholders, to make determinations about site work based on guidance from the Centers for Disease Control and Prevention (CDC).

It's important to know that EPA maintains its ability to respond to environmental emergencies at Superfund sites, or in any situation where we are called upon to protect human health and the environment by responding to releases of chemical, oil, radiological, biological, and other hazardous materials.

For more information on Sherwin Williams/Hilliards Creek, please visit:

In May 2017, EPA established a task force to restore the Superfund program to its rightful place at the center of the Agency's core mission to protect health and the environment.
