DO NOT EDIT
For Esri use only

BERA Tissue Chemistry Data from Above Dundee Dam

Qualifier	Definition
J	estimated concentration
U	not detected at given concentration
N	tentative identification
EMPC	estimated maximum possible concentration
R	rejected
T(#)	partial sum where the number in parentheses indicates the number of constituent parameters missing from the sum
C	data refers to the first of two or more co-eluting congeners
C###	ure

BERA Surface Water Chemistry Data from Above Dundee Dam

Qualifier	Definition
J	estimated concentration
U	not detected at given concentration
N	tentative identification
EMPC	estimated maximum possible concentration
Z	estimated maximum possible concentration
R	rejected
T(#)	partial sum where the number in parentheses indicates the number of constituent parameters missing from the sum
C	data refers to the first of two or more co-eluting congeners
C###	number noted references the first of the co-eluting congeners

BERA Sediment Chemistry Data for the Regional Datasets

Qualifier	Definition
B	analyte detected in blank
C	result may be affected by interference
E	result outside calibration range
EMPC	estimated maximum possible concentration
J	estimated concentration
M	estimated concentration
N	tentative identification
R	rejected
U	not detected
V	blank corrected mercury data

BERA Tissue Chemistry Data for the Regional Dataset

Qualifier	Definition
B	indicates blank contamination
K	estimated maximum possible concentration
J	estimated concentration
L	not defined in source dataset
N	tentative identification
ND	not detected
R	rejected
U	not detected at given concentration

Complete list of taxa and abundance data from the Jamaica Bay dataset (REMAP, NCA)
