Stephanie Dehnhard  
Remedial Project Manager  
DE/MD Section  
United States Environmental Protection Agency  
Region III  
841 Chestnut Building  
Philadelphia, PA 19107

File Number: C2701.

In accordance with our conversation of 23 July 1992, we are herein transmitting sections of the Quality Assurance Project Plan (QAPP) for the Remedial Investigation/Feasibility Study at the Tyler Refrigeration Pit Superfund Site. These sections were revised to address the 8 July 1992 comments made by Jeffrey Dodd of the Central Regional Laboratory upon review of the third revision of the QAPP, dated 19 June 1992. The following are enclosed per agreement reached in our discussion of 23 July 1992: 1) Table 4-1 of the QAPP, revised to present 2-40 mL vials as the collection requirement for volatile in solid samples and 3-40 mL vials for volatiles in aqueous matrices; 2) Section 9 of the QAPP, revised 19 June 1992; 3) Figure 12-2 of the QAPP, revised 27 July 1992 and 4) Figures 5-4, 5-9, and Table 8-1 of the geotechnical laboratory's Comprehensive Quality Assurance Plan.

Please call me at (215) 524-3895 should you have any questions or comments concerning this information.

Sincerely,

Shawne M. Rodgers  
Quality Assurance Coordinator
