 - 1. Has successfully completed 80 hours classroom and laboratory training, applicable to the medical use of sodium iodide I-131 for procedures requiring a written directive; the training must include:
 - (i) Radiation physics and instrumentation;
 - (ii) Radiation protection;
 - (iii) Mathematics pertaining to the use and measurement of radioactivity;
 - (iv) Chemistry of radioactive material for medical use; and
 - (v) Radiation biology; and
 - 2. Has work experience, under the supervision of an authorized user who meets the requirements in Rule .05(26), (52), or (54), or equivalent Agreement State or Nuclear Regulatory Commission requirements. A

supervising authorized user, who meets the requirements of Rule .05(52)(b), must have experience in administering dosages as specified in Rule .05(52)(b)1.(ii)(VII)(ii); the work experience must involve:

- (i) Ordering, receiving, and unpacking radioactive materials safely and performing the related radiation surveys;
- (ii) Performing quality control procedures on instruments used to determine the activity of dosages and performing checks for proper operation for survey meters;
- (iii) Calculating, measuring, and safely preparing patient or human research subject dosages;
- (iv) Using administrative controls to prevent a misadministration involving the use of radioactive material;
- (v) Using procedures to contain spilled radioactive material safely and using proper decontamination procedures; and
- (vi) Administering dosages to patients or human research subjects that includes at least 3 cases involving the oral administration of greater than 1.22 gigabecquerel (33 millicurie) of sodium iodide I-131; and

3. Has obtained written attestation that the individual has satisfactorily completed the requirements in Rule .05(54)(c)1. and .05(54)(c)2. and is able to independently fulfill the duties as an authorized user for medical uses authorized under Rule .05(48). The written attestation must be signed by a preceptor authorized user, who meets the requirements in Rule .05(26), .05(52), or .05(54), or equivalent Agreement State or Nuclear Regulatory Commission requirements. The preceptor authorized user, who meets the requirements of Rule .05(52)(b), must have experience in administering dosages as specified in Rule .05(52)(b)1.(ii)(VII)(ii).

(54.1) Except as provided in Rule .05(26) the licensee shall require an authorized user for the parenteral administration requiring a written directive, to be a physician who:

- (a) Is an authorized user under Rule .05(52) for uses listed in .05(52)(b)1.(ii)(VII)(iii) or .05(52)(b)1.(ii)(VII)(iv), or equivalent Agreement State or Nuclear Regulatory Commission requirements; or
- (b) Is an authorized user under Rules .05(63), .05(84), or equivalent Agreement State or Nuclear Regulatory Commission requirements and who meets the requirements in .05(54.1)(d); or

- (c) Is certified by a medical specialty board whose certification process has been recognized by the Division, Nuclear Regulatory Commission or an Agreement State under Rules .05(63) or .05(84), and who meets the requirements in paragraph .05(54.1)(d).

- (d)
 - 1. Has successfully completed 80 hours of classroom and laboratory training, applicable to parenteral administrations, for which a written directive is required, of any beta emitter, or any photon-emitting radionuclide with a photon energy less than 150 keV, and/or parenteral administration of any other radionuclide for which a written directive is required. The training must include:
 - (i) Radiation physics and instrumentation;
 - (ii) Radiation protection;
 - (iii) Mathematics pertaining to the use and measurement of radioactivity;
 - (iv) Chemistry of byproduct material for medical use; and
 - (v) Radiation biology; and

 - 2. Has work experience, under the supervision of an authorized user who meets the requirements in Rules .05(26), .05(52), .05 (54.1) or equivalent Agreement State or Nuclear Regulatory Commission requirements, in the parenteral administration, for which a written directive is required, of any beta emitter, or any photon-emitting radionuclide with a photon energy less than 150 keV, and/or parenteral administration of any other radionuclide for which a written directive is required. A supervising authorized user who meets the requirements in Rule .05(52) or .05 (54.1) must have experience in administering dosages as specified in 05(52)(b)1.(ii)(VII)(iii) or .05(52)(b)1.(ii)(VII)(iv). The work experience must involve:
 - (i) Ordering, receiving, and unpacking radioactive materials safely, and performing the related radiation surveys;
 - (ii) Performing quality control procedures on instruments used to determine the activity of dosages, and performing checks for proper operation of survey meters;
 - (iii) Calculating, measuring, and safely preparing patient or human research subject dosages;

- (iv) Using administrative controls to prevent a medical event involving the use of unsealed byproduct material;
 - (v) Using procedures to contain spilled byproduct material safely, and using proper decontamination procedures; and
 - (vi) Administering dosages to patients or human research subjects, that include at least 3 cases involving the parenteral administration, for which a written directive is required, of any beta emitter, or any photon-emitting radionuclide with a photon energy less than 150 keV and/or at least 3 cases involving the parenteral administration of any other radionuclide, for which a written directive is required; and
3. Has obtained written attestation that the individual has satisfactorily completed the requirements in .05(54.1)(d)1. and (d)2. and is able to independently fulfill the radiation safety-related duties as an authorized user for the parenteral administration of unsealed radioactive material requiring a written directive.

The signed attestation must be obtained from either:

- (i) A preceptor authorized user, who meets the requirements in Rules .05(26), (52), (54.1) or equivalent Agreement State or Nuclear Regulatory Commission requirements and has experience in administering dosages in the same dosage category or categories (i.e., in Rule .05(52)(b)1.(ii)(VII)) as the individual requesting authorized user status; or
- (ii) A residency program director who affirms in writing that the consensus of the residency program faculty where at least one faculty member is an authorized user who meets the requirements in Rules .05(26), (52) or (54.1), or equivalent Agreement State or Nuclear Regulatory Commission requirements, have experience in administering dosages in the same dosage category or categories (i.e., in Rule .05(52)(b)1.(ii)(VII)) as the individual requesting authorized user status, and concurs with the attestation provided by the residency program director. The residency training program must be approved by the Residency Review Committee of the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada or the Council on Postdoctoral Training of the American

Osteopathic Association and must include training and experience specified in subparagraphs .05(54.1)(d)1. and 2.

Manual Brachytherapy

- (55) **Use of Sealed Sources for Manual Brachytherapy.** A licensee shall use only brachytherapy sources for therapeutic medical uses:
- (a) As approved in the Sealed Source and Device Registry for manual brachytherapy medical use. The manual brachytherapy sources may be used for manual brachytherapy uses that are not explicitly listed in the Sealed Source and Device Registry, but must be used in accordance with the radiation safety conditions and limitations described in the Sealed Source and Device Registry; or
 - (b) In research to deliver therapeutic doses for medical use in accordance with an active Investigational Device Exemption (IDE) application accepted by the U.S. Food and Drug Administration provided the requirements of Rule .05(21)(a) are met.
- (56) **Surveys After Source Implant and Removal.**
- (a) Immediately after implanting sources in a patient or a human research subject, the licensee shall perform a survey to locate and account for all sources that have not been implanted.
 - (b) Immediately after removing the last temporary implant source from a patient or a human research subject, the licensee shall make a survey of the patient or the human research subject with a radiation detection survey instrument to confirm that all sources have been removed.
 - (c) A licensee shall retain a record of the surveys in accordance with Rule .05(102).
- (57) **Brachytherapy Sources Inventory.**
- (a) A licensee shall maintain accountability at all times for all brachytherapy sources in storage or use.
 - (b) Promptly after removing sources from a patient or a human research subject, a licensee shall return brachytherapy sources to a secure storage area.
 - (c) A licensee shall maintain a record of the brachytherapy source accountability in accordance with Rule .05(103).
- (58) **Safety Instruction.** In addition to the requirements of Rule .07(3) of this Chapter:

(a) The licensee shall provide radiation safety instruction, initially and at least annually, to personnel caring for patients or human research subjects that are undergoing implant therapy and cannot be released in accordance with Rule .05(37). Instruction must be commensurate with the duties of the personnel and shall include the following:

1. Size and appearance of the brachytherapy sources;
2. Safe handling and shielding instructions;
3. Patient or human research subject control;
4. Visitor control, including both:
 - (i) Routine visitation of hospitalized individuals in accordance with Rule .03(5)(i)1.(i) of this Chapter; and
 - (ii) Visitation authorized in accordance with Rule .03(5)(i)2. of this Chapter; and
5. Notification of the Radiation Safety Officer, or his or her designee, and an authorized user if the patient or the human research subject dies or has a medical emergency. The licensee shall also notify the Division in accordance with Rule .05(119) if it is possible for any individual to receive exposures in excess of 5 millisievert (500 mrem) as a result of the deceased's body.

(b) A licensee shall retain a record of individuals receiving instruction in accordance with Rule .05(101).

(59) Safety Precautions for Patients or Human Research Subjects Receiving Brachytherapy.

(a) For each patient or human research subject that is receiving brachytherapy and cannot be released in accordance with Rule .05(37), a licensee shall:

1. Not place the patient or human research subject in the same room as an individual who is not receiving brachytherapy;
2. Visibly post the patient's or human research subject's room with a "Radioactive Materials" sign and note on the door or in the patient's or human research subject's chart where and how long visitors may stay in the patient's or human research subject's room.

(b) A licensee shall have emergency response equipment available near each treatment room to respond to a source that inadvertently becomes:

1. Dislodged from the patient; or
 2. Lodged within the patient following removal of the source applicators.
- (c) Radiation Safety Officer, or his designee, and the authorized user shall be notified immediately if the hospitalized patient or human research subject dies or has a medical emergency.

(60) Calibration Measurements of Brachytherapy Sealed Sources.

- (a) Prior to the first medical use of a brachytherapy sealed source on or after July 1, 2003, a licensee shall perform the following:
1. Determine the source output or activity using a dosimetry system that meets the requirements of Rule .05(72)(a);
 2. Determine source positioning accuracy within applicators; and
 3. Use published protocols accepted by nationally recognized bodies to meet the requirements of Rule .05(60)(a)1. and .05(60)(a)2.
- (b) A licensee may use measurements provided by the source manufacturer or by a calibration laboratory accredited by the American Association of Physicists in Medicine that are made in accordance with Rule .05(60)(a).
- (c) A licensee shall mathematically correct the outputs or activities determined in Rule .05(60)(a) of this section for physical decay at intervals consistent with 1.0 percent physical decay.
- (d) An authorized medical physicist shall perform or review the calculation measurements made pursuant to Rule .05(60)(a), (60)(b), or (60)(c).
- (e) Only an authorized medical physicist shall calculate the activity of each strontium-90 source that is used to determine the treatment times for ophthalmic treatments. The decay must be based on the activity determined in accordance with Rule .05(60)(a), (60)(b), and (60)(c).
- (f) A licensee shall retain a record of each calibration in accordance with Rule .05(104).
- (g) A licensee shall retain a record of decay calculations required by Rule .05(60)(e) in accordance with Rule .05(105).

- (61) Therapy-related Computer Systems.** The licensee shall perform acceptance testing on the treatment planning system in accordance with published protocols accepted by

nationally recognized bodies. At a minimum, the acceptance testing must include, as applicable, verification of:

- (a) The source-specific input parameters required by the dose calculation algorithm;
- (b) The accuracy of dose, dwell time, and treatment time calculations at representative points;
- (c) The accuracy of isodose plots and graphic displays; and
- (d) The accuracy of the software used to determine radioactive source positions from radiographic images.

(62) **Possession of Survey Instruments.** A licensee authorized to use manual brachytherapy sources shall possess a portable radiation detection survey instrument capable of detecting dose rates over the range of 1 microsievert (0.1 mrem) per hour to 500 microsievert (50 mrem) per hour, and a portable radiation measurement survey instrument capable of measuring dose rates over the range 10 microsievert (1 mrem) per hour to 10 millisievert (1,000 mrem) per hour. The instruments shall be operable and calibrated in accordance with Rule .05(30).

(63) **Training for Use of Manual Brachytherapy Sources.** Except as provided in Rule .05(26), the licensee shall require an authorized user of a manual brachytherapy source for the uses authorized under Rule .05(55) to be a physician who:

- (a) Is certified by a medical specialty board whose certification process has been recognized by the Division, an Agreement State or the Nuclear Regulatory Commission. (The names of board certifications that have been recognized by the Nuclear Regulatory Commission or an Agreement State will be posted on the NRC's Web page.) To have its certification process recognized, a specialty board shall require all candidates for certification to:
 - 1. Successfully complete a minimum of 3 years of residency training in a radiation oncology program approved by the Residency Review Committee of the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada or the Council on Postdoctoral Training of the American Osteopathic Association; and
 - 2. Pass an examination, administered by diplomates of the specialty board, that tests knowledge and competence in radiation safety, radionuclide handling, treatment planning, quality assurance, and clinical use of manual brachytherapy; or
- (b)
 - 1. Has completed a structured educational program in basic radionuclide handling techniques applicable to the use of manual brachytherapy sources that includes:

- (i) 200 hours of classroom and laboratory training in the following areas:
 - (I) Radiation physics and instrumentation;
 - (II) Radiation protection;
 - (III) Mathematics pertaining to the use and measurement of radioactivity; and
 - (IV) Radiation biology; and
 - (ii) 500 hours of work experience, under the supervision of an authorized user who meets the requirements in .05(26), (63) or equivalent Agreement State, or Nuclear Regulatory Commission requirements at a medical institution authorized to use byproduct material under Rule .05(55), involving:
 - (I) Ordering, receiving, and unpacking radioactive materials safely and performing the related radiation surveys;
 - (II) Checking survey meters for proper operation;
 - (III) Preparing, implanting, and removing brachytherapy sources;
 - (IV) Maintaining running inventories of material on hand;
 - (V) Using administrative controls to prevent a misadministration involving the use of radioactive material; and
 - (VI) Using emergency procedures to control radioactive material; and
2. Has completed three years of supervised clinical experience in radiation oncology, under an authorized user who meets the requirements in Rule .05(26), .05(63) or equivalent Agreement State or Nuclear Regulatory Commission requirements, as part of a formal training program approved by the Residency Review Committee for Radiation Oncology of the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada or the Council on Postdoctoral Training of the American Osteopathic Association. This experience may be obtained concurrently with the supervised work experience required by Rule .05(63)(b)1.(ii); and

3. Has obtained written attestation that the individual has satisfactorily completed the requirements in Rules .05(63)(b)1. and (63)(b)2. and is able to independently fulfill the radiation safety-related duties as an authorized user of manual brachytherapy sources for the medical uses authorized under in Rule .05(55).

The signed attestation must be obtained from either:

- (i) A preceptor authorized user, who meets the requirements in Rules .05(26) or (63), or equivalent Agreement State or Nuclear Regulatory Commission requirements and has experience in administering dosages in the same dosage category or categories (i.e., in Rule .05(52)(b)1.(ii)(VII)) as the individual requesting authorized user status; or
- (ii) A residency program director who affirms in writing that the consensus of the residency program faculty where at least one faculty member is an authorized user who meets the requirements in Rules .05(26) or (63), or equivalent Agreement State or Nuclear Regulatory Commission requirements, have experience in administering dosages in the same dosage category or categories (i.e., in Rule .05(52)(b)1.(ii)(VII)) as the individual requesting authorized user status, and concurs with the attestation provided by the residency program director. The residency training program must be approved by the Residency Review Committee of the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada or the Council on Postdoctoral Training of the American Osteopathic Association and must include training and experience specified in subparagraphs .05(63)(b)1. and 2.

(64) **Training for Ophthalmic Use of Strontium-90.** Except as provided in Rule .05(26), the licensee shall require an authorized user of a strontium-90 source for ophthalmic uses authorized under Rule .05(55) to be a physician who:

- (a) Is an authorized user under Rule .05(63) or equivalent Agreement State or Nuclear Regulatory Commission requirements; or,
- (b)
 1. Has completed 24 hours of classroom and laboratory training applicable to the medical use of strontium-90 for ophthalmic radiotherapy. The training must include:
 - (i) Radiation physics and instrumentation;

- (ii) Radiation protection;
 - (iii) Mathematics pertaining to the use and measurement of radioactivity; and
 - (iv) Radiation biology; and
 - 2. Supervised clinical training in ophthalmic radiotherapy under the supervision of an authorized user at a medical institution, clinic, or private practice, and that includes the use of strontium-90 for the ophthalmic treatment of five individuals. This supervised clinical training must involve:
 - (i) Examination of each individual to be treated;
 - (ii) Calculation of the dose to be administered;
 - (iii) Administration of the dose; and
 - (iv) Follow-up and review of each individual's case history; and
 - 3. Has obtained written attestation, signed by a preceptor authorized user, who meets the requirements in Rule .05(26), .05(63) or .05(64) or equivalent Agreement State or Nuclear Regulatory Commission requirements, that the individual has satisfactorily completed the requirements in Rule .05(64)(b)1. and 2., and is able to independently fulfill the radiation safety-related duties as an authorized user of strontium-90 for ophthalmic use.
- (c) Licensees who use strontium-90 for ophthalmic treatments must ensure that certain activities as specified in subparagraph .05(64)(d) are performed by either:
- 1. An authorized medical physicist; or
 - 2. An individual who:
 - (i) is identified as an ophthalmic physicist on a specific medical use license issued by the Commission or an Agreement State; permit issued by a Commission or Agreement State broad scope medical use licensee; medical use permit issued by a Commission master material licensee; or permit issued by a Commission master material licensee broad scope medical use permittee; and

- (ii) holds a master's or doctor's degree in physics, medical physics, other physical sciences, engineering, or applied mathematics from an accredited college or university; and
 - (iii) has successfully completed 1 year of full-time training in medical physics and an additional year of full-time work experience under the supervision of a medical physicist; and
 - (iv) Has documented training in:
 - (I) The creation, modification, and completion of written directives;
 - (II) Procedures for administrations requiring a written directive; and
 - (III) Performing the calibration measurements of brachytherapy sources as detailed in Rule (.05)(60).
- (d) The individuals who are identified in subparagraph .05(64)(c) must:
1. Calculate the activity of each strontium-90 source that is used to determine the treatment times for ophthalmic treatments. The decay must be based on the activity determined under Rule (.05)(60); and
 2. Assist the licensee in developing, implementing, and maintaining written procedures to provide high confidence that the administration is in accordance with the written directive. These procedures must include the frequencies that the individual meeting the requirements in subparagraph .05(64)(c) will observe treatments, review the treatment methodology, calculate treatment time for the prescribed dose, and review records to verify that the administrations were in accordance with the written directives.
- (e) Licensees must retain a record of the activity of each strontium-90 source in accordance with Rule (.05)(105).

Sealed Sources For Diagnosis

(65) Use of Sealed Sources and Medical Devices for Diagnosis.

- (a) A licensee must use only sealed sources that are not in medical devices for diagnostic medical uses if the sealed sources are approved in the Sealed Source and Device Registry for diagnostic medicine. The sealed sources may be used for

diagnostic medical uses that are not explicitly listed in the Sealed Source and Device Registry but must be used in accordance with the radiation safety conditions and limitations described in the Sealed Source and Device Registry.

- (b) A licensee must only use medical devices containing sealed sources for diagnostic medical uses if both the sealed sources and medical devices are approved in the Sealed Source and Device Registry for diagnostic medical uses. The diagnostic medical devices may be used for diagnostic medical uses that are not explicitly listed in the Sealed Source and Device Registry but must be used in accordance with the radiation safety conditions and limitations described in the Sealed Source and Device Registry.
- (c) Sealed sources and devices for diagnostic medical uses may be used in research in accordance with an active Investigational Device Exemption (IDE) application accepted by the U.S. Food and Drug Administration provided the requirements of Rule .05(20)(a) are met.

(66) **Training for Use of Sealed Sources for Diagnosis and Medical Devices for Diagnosis.** Except as provided in Rule .05(26), the licensee shall require the authorized user of a diagnostic sealed source for the use in a device authorized under Rule .05(65) to be a physician, dentist, or podiatrist who:

- (a) Is certified by a specialty board whose certification process includes all of the requirements in Rules .05(66)(c) and .05(66)(d) and whose certification has been recognized by an Agreement State or the Nuclear Regulatory Commission. (The names of board certifications that have been recognized by the Nuclear Regulatory Commission or an Agreement State will be posted on the NRC's Web page.); or
- (b) Is an authorized user for uses listed in Rule .05(44) or equivalent Agreement State or Nuclear Regulatory Commission requirements; or
- (c) Has had 8 hours of classroom and laboratory training in basic radionuclide handling techniques specifically applicable to the use of the device that includes:
 1. Radiation physics and instrumentation;
 2. Radiation protection;
 3. Mathematics pertaining to the use and measurement of radioactivity; and
 4. Radiation biology; and
- (d) Has completed training in the use of the device for the uses requested.

Photon-Emitting Remote Afterloader Units, Teletherapy Units, and Gamma Stereotactic Radiosurgery Units

(67) Use of Sealed Sources in a Remote Afterloader Unit, Teletherapy Unit, or Gamma Stereotactic Radiosurgery Unit.

- (a) A licensee must only use sealed sources:
 - 1. Approved and as provided for in the Sealed Source and Device Registry in photon emitting remote afterloader units, teletherapy units, or gamma stereotactic radiosurgery units to deliver therapeutic doses for medical uses: or
 - 2. In research involving photon-emitting remote afterloader units, teletherapy units, or gamma stereotactic radiosurgery units in accordance with an active Investigational Device Exemption (IDE) application accepted by the U.S. Food and Drug Administration provided the requirements of Rule .05(21)(a) are met.
- (b) A licensee must use photon-emitting remote afterloader units, teletherapy units, or gamma stereotactic radiosurgery units:
 - 1. Approved in the Sealed Source and Device Registry to deliver a therapeutic dose for medical use. These devices may be used for therapeutic medical treatments that are not explicitly provided for in the Sealed Source and Device Registry, but must be used in accordance with radiation safety conditions and limitations described in the Sealed Source and Device Registry; or
 - 2. In research in accordance with an active Investigational Device Exemption (IDE) application accepted by the FDA provided the requirements of Rule .05(21)(a) are met.

(68) Surveys of Patients and Human Research Subjects Treated with a Remote Afterloader Unit.

- (a) Before releasing a patient or a human research subject from licensee control, a licensee shall make a survey of the patient or the human research subject and the remote afterloader unit with a portable radiation detection survey instrument to confirm that the source(s) has been removed from the patient or human research subject and returned to the safe, shielded position.
- (b) A licensee shall retain a record of the surveys in accordance with Rule .05(102).

(69) Installation, Maintenance, Adjustment, and Repair.

- (a) Only a person specifically licensed by the Director, the Nuclear Regulatory Commission or an Agreement State shall install, maintain, adjust, or repair a remote afterloader unit, teletherapy unit, or gamma stereotactic radiosurgery unit that involves work on the source(s) shielding, the source(s) driving unit, or other electronic or mechanical component that could expose the source(s), reduce the shielding around the source(s), or compromise the radiation safety of the unit or the source(s).
- (b) Except for low dose-rate remote afterloader units, only a person specifically licensed by the Director, an Agreement State or the Nuclear Regulatory Commission shall install, replace, relocate, or remove a sealed source or source contained in other remote afterloader units, teletherapy units, or gamma stereotactic units.
- (c) For a low dose-rate remote afterloader unit, only a person specifically licensed by the Director, an Agreement State or the Nuclear Regulatory Commission, or an authorized medical physicist shall install, replace, relocate, or remove a sealed source(s) contained in the unit.
- (d) A licensee shall retain a record of the installation, maintenance, adjustment and repair done on remote afterloader units, teletherapy units, and gamma stereotactic radiosurgery units in accordance with Rule .05(106).

(70) Safety Procedures and Instructions for Remote Afterloader Units, Teletherapy Units, and Gamma Stereotactic Radiosurgery Units.

- (a) A licensee shall:
 - 1. Secure the unit, the console, the console keys, and the treatment room when not in use or when unattended;
 - 2. Permit only individuals approved by the authorized user, Radiation Safety Officer, or authorized medical physicist to be present in the treatment room during treatment with the source(s);
 - 3. Prevent dual operation of more than one radiation producing device in a treatment room, if applicable; and
 - 4. Develop, implement, and maintain written procedures for responding to an abnormal situation when the operator is unable to place the source(s) in the shielded position, or remove the patient or human research subject from the radiation field with controls from outside the treatment room. This procedure must include:
 - (i) Instructions for responding to equipment failures and the names of the individuals responsible for implementing corrective actions;

- (ii) The process for restricting access to and posting of the treatment area to minimize the risk of inadvertent exposure; and
 - (iii) The names and telephone numbers of the authorized users, the authorized medical physicist, and the Radiation Safety Officer to be contacted if the unit or console operates abnormally.
- (b) A copy of the procedures required by Rule .05(70)(a)4. must be physically located at the unit console.
- (c) A licensee shall post instructions at the unit console to inform the operator of:
 - 1. The location of the procedures required by Rule .05(70)(a)4.; and
 - 2. The names and telephone numbers of the authorized users, the authorized medical physicist, and the Radiation Safety Officer to be contacted if the unit or console operates abnormally.
- (d)
 - 1. Prior to the first use for patient treatment of a new unit or an existing unit with a manufacturer upgrade that affects the operation and safety of the unit, a licensee shall ensure that vendor operational and safety training is provided to all individuals who will operate the unit. The vendor operational and safety training must be provided by the device manufacturer or by an individual certified by the device manufacturer to provide the operational and safety training.
 - 2. A licensee shall provide operational and safety instructions initially and at least annually to all individuals who operate the unit at the facility, as appropriate to the individual's assigned duties. The instructions shall include instruction in:
 - (i) The procedures identified in Rule .05(70)(a)4.; and
 - (ii) The operating procedures for the unit.
- (e) A licensee shall ensure that operators, authorized medical physicists, and authorized users participate in drills of the emergency procedures, initially and at least annually.
- (f) A licensee shall retain a record of individuals receiving instruction required by Rule .05(70)(d), in accordance with Rule .05(101).
- (g) A licensee shall retain a copy of the procedures required by subparagraphs .05(70)(a)4. and (d)2.(ii).

(71) Safety Precautions for Remote Afterloader Units, Teletherapy Units, and Gamma Stereotactic Radiosurgery Units.

- (a) A licensee shall control access to the treatment room by a door at each entrance.
- (b) A licensee shall equip each entrance to the treatment room with an electrical interlock system that will:
 - 1. Prevent the operator from initiating the treatment cycle unless each treatment room entrance door is closed;
 - 2. Cause the source(s) to be shielded promptly when an entrance door is opened; and
 - 3. Prevent the source(s) from being exposed following an interlock interruption until all treatment room entrance doors are closed and the source(s) on-off control is reset at the console.
- (c) A licensee shall require any individual entering the treatment room to assure, through the use of appropriate radiation monitors, that radiation levels have returned to ambient levels.
- (d) Except for low-dose remote afterloader units, a licensee shall construct or equip each treatment room with viewing and intercom systems to permit continuous observation of the patient or the human research subject from the treatment console during irradiation.
- (e) For licensed activities where sources are placed within the patient's or human research subject's body, a licensee shall only conduct treatments which allow for expeditious removal of a decoupled or jammed source.
- (f) In addition to the requirements specified in Rule .05(71)(a) through (71)(e), a licensee shall:
 - 1. For low dose-rate, medium dose-rate, and pulsed dose-rate remote afterloader units, require:
 - (i) An authorized medical physicist and either an authorized user or a physician, under the supervision of an authorized user, who has been trained in the operation and emergency response for the unit to be physically present during the initiation of all patient treatments involving the unit; and
 - (ii) An authorized medical physicist and either an authorized user or an individual, under the supervision of an authorized user, who has been trained to remove the source applicator(s) in the event of an

emergency involving the unit, to be immediately available during continuation of all patient treatments involving the unit.

2. For high dose-rate remote afterloader unit, require:
 - (i) An authorized user and an authorized medical physicist to be physically present during the initiation of all patient treatments involving the unit; and
 - (ii) An authorized medical physicist and either an authorized user or a physician, under the supervision of an authorized user, who has been trained in the operation and emergency response for the unit, to be physically present during continuation of all patient treatments involving the unit.
 3. For gamma stereotactic radiosurgery units, require an authorized user and an authorized medical physicist to be physically present throughout all patient treatments involving the unit.
 4. Notify the Radiation Safety Officer, or his or her designee, and an authorized user as soon as possible, if the patient or human research subject has a medical emergency and, immediately, if the patient dies.
- (g) A licensee shall have emergency response equipment available near each treatment room, to respond to a source that inadvertently:
1. Remains in the unshielded position; or
 2. Lodges within the patient following completion of the treatment.

(72) Dosimetry Equipment.

- (a) Except for low dose-rate remote afterloader sources where the source output or activity is determined by the manufacturer, a licensee shall have a calibrated dosimetry system available for use. To satisfy this requirement, one of the following two conditions must be met:
 1. The system must have been calibrated using a system or source traceable to the National Institute of Standards and Technology (NIST) and published protocols accepted by nationally recognized bodies; or by a calibration laboratory accredited by the American Association of Physicists in Medicine (AAPM). The calibration must have been performed within the previous 2 years and after any servicing that may have affected system calibration; or

2. The system must have been calibrated within the previous 4 years; 18 to 30 months after that calibration, the system must have been inter-compared with another dosimetry system that was calibrated within the past 24 months by NIST or by a calibration laboratory accredited by the AAPM. The results of the inter-comparison must have indicated that the calibration factor of the licensee's system had not changed by more than 2 percent. The licensee may not use the inter-comparison result to change the calibration factor. When inter-comparing dosimetry systems to be used for calibrating sealed sources for therapeutic units, the licensee shall use a comparable unit with beam attenuators or collimators, as applicable, and sources of the same radionuclide as the source used at the licensee's facility.
- (b) The licensee shall have available for use a dosimetry system for spot-check output measurements, if applicable. To satisfy this requirement, the system may be compared with a system that has been calibrated in accordance with Rule .05(72)(a). This comparison must have been performed within the previous year and after each servicing that may have affected system calibration. The spot-check system may be the same system used to meet the requirement in Rule .05(72)(a).
 - (c) The licensee shall retain a record of each calibration, inter-comparison, and comparison in accordance with Rule .05(107).

(73) Full Calibration Measurements on Teletherapy Units.

- (a) A licensee authorized to use a teletherapy unit for medical use shall perform full calibration measurements on each teletherapy unit:
 1. Before the first medical use of the unit; and
 2. Before medical use under the following conditions:
 - (i) Whenever spot-check measurements indicate that the output differs by more than 5 percent from the output obtained at the last full calibration corrected mathematically for radioactive decay;
 - (ii) Following replacement of the source or following reinstallation of the teletherapy unit in a new location;
 - (iii) Following any repair of the teletherapy unit that includes removal of the source or major repair of the components associated with the source exposure assembly; and
 3. At intervals not exceeding 1 year.

- (b) To satisfy the requirement of Rule .05(73)(a), full calibration measurements must include determination of:
 - 1. The output within +/-3 percent for the range of field sizes and for the distance or range of distances used for medical use;
 - 2. The coincidence of the radiation field and the field indicated by the light beam localizing device;
 - 3. The uniformity of the radiation field and its dependence on the orientation of the useful beam;
 - 4. Timer accuracy and linearity over the range of use;
 - 5. On-off error; and
 - 6. The accuracy of all distance measuring and localization devices in medical use.

- (c) A licensee shall use the dosimetry system described in Rule .05(72)(a) to measure the output for one set of exposure conditions. The remaining radiation measurements required in Rule .05(73)(b)1. may be made using a dosimetry system that indicates relative dose rates.

- (d) A licensee shall make full calibration measurements required by Rule .05(73)(a) in accordance with published protocols accepted by nationally recognized bodies.

- (e) A licensee shall mathematically correct the outputs determined in Rule .05(73)(b)1. for physical decay for intervals not exceeding 1 month for cobalt-60, 6 months for cesium-137, or at intervals consistent with 1 percent decay for all other nuclides.

- (f) Full calibration measurements required by Rule .05(73)(a) and physical decay corrections required by Rule .05(73)(e) must be performed by the authorized medical physicist.

- (g) A licensee shall retain a record of each calibration in accordance with Rule .05(108).

(74) Full Calibration Measurements on Remote Afterloader Units.

- (a) A licensee authorized to use a remote afterloader unit for medical use shall perform full calibration measurements on each unit:
 - 1. Before the first medical use of the unit;
 - 2. Before medical use under the following conditions:

- (i) Following replacement of the source or following reinstallation of the unit in a new location outside the facility; and
 - (ii) Following any repair of the unit that includes removal of the source or major repair of the components associated with the source exposure assembly;
 3. At intervals not exceeding 1 quarter for high dose-rate, medium dose-rate, and pulsed dose-rate remote afterloader units with sources whose half-life exceeds 75 days; and
 4. At intervals not exceeding 1 year for low dose-rate remote afterloader units.
- (b) To satisfy the requirement of Rule .05(74)(a), full calibration measurements must include, as applicable, determination of:
1. The output within +/- 5 percent;
 2. Source positioning accuracy to within +/- 1 millimeter;
 3. Source retraction with backup battery upon power failure; and
 4. Length of the source transfer tubes;
 5. Timer accuracy and linearity over the typical range of use;
 6. Length of the applicators; and
 7. Function of the source transfer tubes, applicators, and transfer tube-applicator interfaces.
- (c) In addition to the requirements for full calibrations for low dose-rate remote afterloader units in Rule .05(74)(b), a licensee shall perform an autoradiograph of the source(s) to verify inventory and source(s) arrangement at intervals not exceeding one quarter.
- (d) A licensee shall use the dosimetry system described in Rule .05(72)(a) to measure the output.
- (e) A licensee shall make full calibration measurements required by Rule .05(74)(a) in accordance with published protocols accepted by nationally recognized bodies.

- (f) For low dose-rate remote afterloader units, a licensee may use measurements provided by the source manufacturer that are made in accordance with Rule .05(74)(a) through (74)(e).
- (g) A licensee shall mathematically correct the outputs determined in Rule .05(74)(b)1. of this section for physical decay at intervals consistent with 1 percent physical decay.
- (h) Full calibration measurements required by Rule .05(74)(a) and physical decay corrections required by Rule .05(74)(g) must be performed by the authorized medical physicist.
- (i) A licensee shall retain a record of each calibration in accordance with Rule .05(108).

(75) Full Calibration Measurements on Gamma Stereotactic Radiosurgery Units.

- (a) A licensee authorized to use a gamma stereotactic radiosurgery unit for medical use shall perform full calibration measurements on each unit:
 - 1. Before the first medical use of the unit;
 - 2. Before medical use under the following conditions:
 - (i) Whenever spot-check measurements indicate that the output differs by more than 5 percent from the output obtained at the last full calibration corrected mathematically for radioactive decay;
 - (ii) Following replacement of the sources or following reinstallation of the gamma stereotactic radiosurgery unit in a new location; and
 - (iii) Following any repair of the gamma stereotactic radiosurgery unit that includes removal of the sources or major repair of the components associated with the source assembly; and
 - 3. At intervals not exceeding 1 year, with the exception that relative helmet factors need only be determined before the first medical use of a helmet and following any damage to a helmet.
- (b) To satisfy the requirement of Rule .05(75)(a), full calibration measurements must include determination of:
 - 1. The output within +/-3 percent;
 - 2. Relative helmet factors;
 - 3. Isocenter coincidence;

4. Timer accuracy and linearity over the range of use;
 5. On-off error;
 6. Trunnion centricity;
 7. Treatment table retraction mechanism, using backup battery power or hydraulic backups with the unit off;
 8. Helmet microswitches;
 9. Emergency timing circuits; and
 10. Stereotactic frames and localizing devices (trunnions).
- (c) A licensee shall use the dosimetry system described in Rule .05(72)(a) to measure the output for one set of exposure conditions. The remaining radiation measurements required in Rule .05(75)(b)1. may be made using a dosimetry system that indicates relative dose rates.
- (d) A licensee shall make full calibration measurements required by Rule .05(75)(a) in accordance with published protocols accepted by nationally recognized bodies.
- (e) A licensee shall mathematically correct the outputs determined in Rule .05(75)(b)1. at intervals not exceeding 1 month for cobalt-60 and at intervals consistent with 1 percent physical decay for all other radionuclides.
- (f) Full calibration measurements required by Rule .05(75)(a) and physical decay corrections required by Rule .05(75)(e) must be performed by the authorized medical physicist.
- (g) A licensee shall retain a record of each calibration in accordance with Rule .05(108).

(76) Periodic Spot-Checks for Teletherapy Units.

- (a) A licensee authorized to use teletherapy units for medical use shall perform output spot-checks on each teletherapy unit once in each calendar month that include determination of:
1. Timer accuracy, and timer linearity over the range of use;
 2. On-off error;
 3. The coincidence of the radiation field and the field indicated by the light beam localizing device;

4. The accuracy of all distance measuring and localization devices used for medical use;
 5. The output for one typical set of operating conditions measured with the dosimetry system described in Rule .05(72)(b); and
 6. The difference between the measurement made in Rule .05(76)(a)5. and the anticipated output, expressed as a percentage of the anticipated output (i.e., the value obtained at last full calibration corrected mathematically for physical decay).
- (b) A licensee shall perform measurements required by Rule .05(76)(a) in accordance with procedures established by the authorized medical physicist. That individual need not actually perform the spot-check measurements.
- (c) A licensee shall have the authorized medical physicist review the results of each spot-check within 15 days. The authorized medical physicist shall promptly notify the licensee in writing of the results of each spot-check.
- (d) A licensee authorized to use a teletherapy unit for medical use shall perform safety spot-checks of each teletherapy facility once in each calendar month and after each source installation to assure proper operation of:
1. Electrical interlocks at each teletherapy room entrance;
 2. Electrical or mechanical stops installed for the purpose of limiting use of the primary beam of radiation (restriction of source housing angulation or elevation, carriage or stand travel and operation of the beam on-off mechanism);
 3. Source exposure indicator lights on the teletherapy unit, on the control console, and in the facility;
 4. Viewing and intercom systems;
 5. Treatment room doors from inside and outside the treatment room; and
 6. Electrically assisted treatment room doors with the teletherapy unit electrical power turned off.
- (e) If the results of the checks required in Rule .05(76)(d) indicate the malfunction of any system, a licensee shall lock the control console in the off position and not use the unit except as may be necessary to repair, replace, or check the malfunctioning system.

- (f) A licensee shall retain a record of each spot-check required by Rule .05(76)(a) and (76)(d), in accordance with Rule .05(109).

(77) Periodic Spot-Checks for Remote Afterloader Units.

- (a) A licensee authorized to use remote afterloader units for medical use shall perform spot-checks of each remote afterloader facility and on each unit:
 - 1. At the beginning of each day of use of a high dose-rate, medium dose-rate or pulsed dose-rate remote afterloader unit;
 - 2. Prior to each patient treatment with a low dose-rate remote afterloader unit; and
 - 3. After each source installation.
- (b) The licensee shall have the authorized medical physicist establish written procedures for performing the spot-checks required in Rule .05(77)(a). The authorized medical physicist need not actually perform the spot-check measurements.
- (c) A licensee shall have the authorized medical physicist review the results of each spot-check within 15 days. The authorized medical physicist shall notify the licensee as soon as possible in writing of the results of each spot-check.
- (d) To satisfy the requirements of Rule .05(77)(a), spot-checks must, at a minimum, assure proper operation of:
 - 1. Electrical interlocks at each remote afterloader unit room entrance;
 - 2. Source exposure indicator lights on the remote afterloader unit, on the control console, and in the facility;
 - 3. Viewing and intercom systems in each high dose-rate, medium dose-rate and pulsed dose-rate remote afterloader facility;
 - 4. Emergency response equipment;
 - 5. Radiation monitors used to indicate the source position;
 - 6. Timer accuracy;
 - 7. Clock (date and time) in the unit's computer; and
 - 8. Decayed source(s) activity in the unit's computer.

- (e) If the results of the checks required in Rule .05(77)(d) indicate the malfunction of any system, a licensee shall lock the control console in the off position and not use the unit except as may be necessary to repair, replace, or check the malfunctioning system.
- (f) A licensee shall retain a record of each check required by Rule .05(77)(d) in accordance with Rule .05(110).

(78) Periodic Spot-Checks for Gamma Stereotactic Radiosurgery Units.

- (a) A licensee authorized to use a gamma stereotactic radiosurgery unit for medical use shall perform spot-checks of each gamma stereotactic radiosurgery facility and on each unit:
 - 1. Monthly;
 - 2. At the beginning of each day of use; and
 - 3. After each source installation.
- (b) The licensee shall have the authorized medical physicist:
 - 1. Establish written procedures for performing the spot-checks required in Rule .05(78)(a); and
 - 2. Review the results of each spot-check required by Rule .05(78)(a)1. within 15 days of the check. The authorized medical physicist need not actually perform the spot-check measurements.
- (c) To satisfy the requirements of Rule .05(78)(a)1., spot-checks must, at a minimum:
 - 1. Assure proper operation of:
 - (i) Treatment table retraction mechanism, using backup battery power or hydraulic backups with the unit off;
 - (ii) Helmet microswitches;
 - (iii) Emergency timing circuits; and
 - (iv) Stereotactic frames and localizing devices (trunnions).
 - 2. Determine:
 - (i) The output for one typical set of operating conditions measured with the dosimetry system described in Rule .05(72)(b);

- (ii) The difference between the measurement made in Rule .05(78)(c)2.(i) of this section and the anticipated output, expressed as a percentage of the anticipated output (i.e., the value obtained at last full calibration corrected mathematically for physical decay);
 - (iii) Source output against computer calculation;
 - (iv) Timer accuracy and linearity over the range of use;
 - (v) On-off error; and
 - (vi) Trunnion centricity.
- (d) To satisfy the requirements of Rule .05(78)(a)2. and (78)(a)3., spot-checks must assure proper operation of:
1. Electrical interlocks at each gamma stereotactic radiosurgery room entrance;
 2. Source exposure indicator lights on the gamma stereotactic radiosurgery unit, on the control console, and in the facility;
 3. Viewing and intercom systems;
 4. Timer termination;
 5. Radiation monitors used to indicate room exposures; and
 6. Emergency off buttons.
- (e) A licensee shall arrange for prompt repair of any system identified in Rule .05(78)(c) that is not operating properly.
- (f) If the results of the checks required in Rule .05(78)(d) indicate the malfunction of any system, a licensee shall lock the control console in the off position and not use the unit except as may be necessary to repair, replace, or check the malfunctioning system.
- (g) A licensee shall retain a record of each check required by Rule .05(78)(c) and (78)(d) in accordance with Rule .05(111).

(79) Additional Technical Requirements for Mobile Remote Afterloader Units.

- (a) A licensee providing mobile remote afterloader service shall:

1. Check survey instruments before medical use at each address of use or on each day of use, whichever is more frequent; and
 2. Account for all sources before departure from a client's address of use.
- (b) In addition to the periodic spot-checks required by Rule .05(77), a licensee authorized to use mobile afterloaders for medical use shall perform checks on each remote afterloader unit before use at each address of use. At a minimum, checks must be made to verify the operation of:
1. Electrical interlocks on treatment area access points;
 2. Source exposure indicator lights on the remote afterloader unit, on the control console, and in the facility;
 3. Viewing and intercom systems;
 4. Applicators, source transfer tubes, and transfer tube-applicator interfaces;
 5. Radiation monitors used to indicate room exposures;
 6. Source positioning (accuracy); and
 7. Radiation monitors used to indicate whether the source has returned to a safe shielded position.
- (c) In addition to the requirements for checks in Rule .05(79)(b), a licensee shall ensure overall proper operation of the remote afterloader unit by conducting a simulated cycle of treatment before use at each address of use.
- (d) If the results of the checks required in Rule .05(79)(b) indicate the malfunction of any system, a licensee shall lock the control console in the off position and not use the unit except as may be necessary to repair, replace, or check the malfunctioning system.
- (e) A licensee shall retain a record of each check required by Rule .05(79)(b) in accordance with Rule .05(112).

(80) Radiation Surveys.

- (a) In addition to the survey requirements in Rule .03(8) of this Chapter, a person licensed pursuant to Rule .05 shall make surveys to ensure that the maximum radiation levels and average radiation levels from the surface of the main source safe with the source(s) in the shielded position does not exceed the levels stated in the Sealed Source and Device Registry.

- (b) The licensee shall make the survey required by Rule .05(80)(a) at installation of a new source and following repairs to the source(s) shielding, the source(s) driving unit, or other electronic or mechanical component that could expose the source, reduce the shielding around the source(s), or compromise the radiation safety of the unit or the source(s).
- (c) A licensee shall retain a record of the radiation surveys required by Rule .05(80)(a) of this section in accordance with Rule .05(113).

(81) **Five-Year Inspection for Teletherapy and Gamma Stereotactic Radiosurgery Units.**

- (a) A licensee shall have each teletherapy unit and gamma stereotactic radiosurgery unit fully inspected and serviced during source replacement or at intervals not to exceed 5 years, whichever comes first, to assure proper functioning of the source exposure mechanism and other safety components.
- (b) This inspection and servicing may only be performed by persons specifically licensed to do so by the Director, an Agreement State or the Nuclear Regulatory Commission.
- (c) A licensee shall keep a record of the inspection and servicing in accordance with Rule .05(114).

(82) **Therapy-Related Computer Systems.** The licensee shall perform acceptance testing on the treatment planning system in accordance with published protocols accepted by nationally recognized bodies. At a minimum, the acceptance testing must include, as applicable, verification of:

- (a) The source-specific input parameters required by the dose calculation algorithm;
- (b) The accuracy of dose, dwell time, and treatment time calculations at representative points;
- (c) The accuracy of isodose plots and graphic displays;
- (d) The accuracy of the software used to determine radioactive source positions from radiographic images; and
- (e) The accuracy of electronic transfer of the treatment delivery parameters to the treatment delivery unit from the treatment planning system.

(83) **Possession of Survey Instruments.** A licensee authorized to use radioactive material in remote afterloader units, teletherapy units, and gamma stereotactic radiosurgery units shall possess a portable radiation detection survey instrument capable of detecting dose rates over the range of 1 microsievert (0.1 mrem) per hour to 500 microsievert (50

mrem) per hour, and a portable radiation measurement survey instrument capable of measuring dose rates over the range 10 microsievert (1 mrem) per hour to 10 millisievert (1,000 mrem) per hour. The instruments shall be operable and calibrated in accordance with Rule .05(30).

(84) **Training for Use of Remote Afterloader Units, Teletherapy Units, and Gamma Stereotactic Radiosurgery Units.** Except as provided in Rule .05(26), the licensee shall require an authorized user of a sealed source for a use authorized under Rule .05(67) to be a physician who:

(a) Is certified by a medical specialty board whose certification has been recognized by the Division, an Agreement State or the Nuclear Regulatory Commission, and who meets the requirements in .05(84)(c). (The names of board certifications that have been recognized by the Nuclear Regulatory Commission or an Agreement State will be posted on the NRC's web page.) To have its certification process recognized, a specialty board shall require all candidates for certification to:

1. Successfully complete a minimum of 3 years of residency training in a radiation therapy program approved by the Residency Review Committee of the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada or the Council on Postdoctoral Training of the American Osteopathic Association; and
2. Pass an examination, administered by diplomates of the specialty board, which tests knowledge and competence in radiation safety, radionuclide handling, treatment planning, quality assurance, and clinical use of stereotactic radiosurgery, remote afterloaders and external beam therapy; or

(b) 1. Has completed a structured educational program in basic radionuclide techniques applicable to the use of a sealed source in a therapeutic medical unit that includes:

(i) 200 hours of classroom and laboratory training in the following areas:

(I) Radiation physics and instrumentation;

(II) Radiation protection;

(III) Mathematics pertaining to the use and measurement of radioactivity; and

(IV) Radiation biology; and

- (ii) 500 hours of work experience, under the supervision of an authorized user who meets the requirements in Rule .05(26), .05(84) or equivalent Agreement State, or Nuclear Regulatory Commission requirements at a medical institution that is authorized to use radioactive materials in Rule .05(67), involving:
 - (I) Reviewing full calibration measurements and periodic spot checks;
 - (II) Preparing treatment plans and calculating treatment doses and times;
 - (III) Using administrative controls to prevent a misadministration involving the use of radioactive material;
 - (IV) Implementing emergency procedures to be followed in the event of the abnormal operation of the medical unit or console;
 - (V) Checking and using survey meters; and
 - (VI) Selecting the proper dose and how it is to be administered; and
- 2. Has completed three years of supervised clinical experience in radiation oncology, under an authorized user who meets the requirements in Rule .05(26), .05(84) or equivalent Agreement State or Nuclear Regulatory Commission requirements, as part of a formal training program approved by the Residency Review Committee for Radiation Oncology of the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada or the Council on Postdoctoral Training of the American Osteopathic Association. This experience may be obtained concurrently with the supervised work experience required by Rule .05(84)(b)1.(ii); and
- 3. Has obtained written attestation that the individual has satisfactorily completed the requirements in Rule .05(84)(b)1. and .05(84)(b)2., and .05(84)(c), and is able to independently fulfill the radiation safety-related duties as an authorized user of each type of therapeutic medical unit for which the individual is requesting authorized user status; and

The signed attestation must be obtained from either:

- (i) A preceptor authorized user, who meets the requirements in Rules .05(26), (84), or equivalent Agreement State or Nuclear Regulatory Commission requirements; or
 - (ii) A residency program director who affirms in writing that the consensus of the residency program faculty where at least one faculty member is an authorized user who meets the requirements in Rules .05(26), (84), or equivalent Agreement State or Nuclear Regulatory Commission requirements, and concurs with the attestation provided by the residency program director. The residency training program must be approved by the Residency Review Committee of the Accreditation Council for Graduate Medical Education or the Royal College of Physicians and Surgeons of Canada or the Council on Postdoctoral Training of the American Osteopathic Association and must include training and experience specified in subparagraphs .05(63)(b)1. and 2.
- (c) Has received training in device operation, safety procedures, and clinical use for the type(s) of use for which authorization is sought. This training requirement may be satisfied by satisfactory completion of a training program provided by the vendor for new users or by receiving training supervised by an authorized user or authorized medical physicist, as appropriate, who is authorized for the type(s) of use for which the individual is seeking authorization.

Other Medical Uses of Radioactive Material or Radiation from Radioactive Material

- (85) **Other Medical Uses of Radioactive Material or Radiation From Radioactive Material.** A licensee may use radioactive material or a radiation source approved for medical use that is not specifically addressed in Rule .05 if:
- (a) The applicant or licensee has submitted the information required by Rule .05(8)(b), (8)(c) and (8)(d); and
 - (b) The applicant or licensee has received written approval from the NRC or an Agreement State in a license and uses the material in accordance with the regulations and specific conditions the NRC or Agreement State considers necessary for the medical use of the material.

Records

- (86) **Records of Authority and Responsibilities for Radiation Protection Programs.**

- (a) A licensee shall retain a record of actions taken by the licensee's management in accordance with Rule .05(15)(a) for 5 years. The record must include a summary of the actions taken and a signature of licensee management.
 - (b) The licensee shall retain a current copy of the authorities, duties and responsibilities of the Radiation Safety Officer as required by Rule .05(15)(d), and a signed copy of the Radiation Safety Officer's agreement to be responsible for implementing the radiation safety program, as required by Rule .05(15)(b). The record must include the signature of the Radiation Safety Officer and licensee management.
 - (c) The minutes of each Radiation Safety Committee meeting held in accordance with Rule .05(15)(g) shall include:
 - 1. The date of the meeting;
 - 2. Members present;
 - 3. Members absent; and
 - 4. Summary of deliberations and discussions.
- (87) **Records of Radiation Protection Program Safety Changes.** A licensee shall retain a record of each radiation protection program change made in accordance with Rule .05(16)(a) for 5 years. The record must include a copy of the old and new procedures; the effective date of the change; and the signature of the licensee management that reviewed and approved the change.
- (88) **Records of Written Directives.** A licensee shall retain a copy of each written directive as required by Rule .05(19) for 3 years.
- (89) **Records of Misadministrations.** A licensee shall retain a record of misadministrations reported in accordance with Rule .05(115) for 3 years. The record must contain the licensee's name; names of the individuals involved; the social security number or other identification number if one has been assigned, of the individual who is the subject of the misadministration; a brief description of the event; why it occurred; the effect, if any, on the individual; the actions, if any, taken, or planned, to prevent recurrence; and, whether the licensee notified the individual (or the individual's responsible relative or guardian) and, if not, whether such failure to notify was based on guidance from the referring physician.
- (90) **Record of a Dose to an Embryo/Fetus or a Nursing Child.** A licensee shall retain a record of a dose to an embryo/fetus or a nursing child reported in accordance with Rule .05(116) for 3 years. The record must contain the licensee's name; names of all the individuals involved; social security number or other identification number if one has been assigned to the pregnant individual or nursing child who is the subject of the event;

a brief description of the event; why it occurred; the effect, if any, on the embryo/fetus or nursing child; the actions, if any, taken, or planned, to prevent recurrence; and whether the licensee notified the pregnant individual or mother (or the mother's or child's responsible relative or guardian) and, if not, whether such failure to notify was based on guidance from the referring physician.

- (91) **Records of Calibrations of Instruments Used to Measure the Activity of Unsealed Radioactive Material.** A licensee shall maintain a record of instrument calibrations required by Rule .05(29) for 3 years. The records must include the model and serial number of the instrument, the date of the calibration, the results of the calibration, and the name of the individual who performed the calibration.
- (92) **Records of Survey Instrument Calibrations.** A licensee shall maintain a record of instrument calibrations required by Rule .05(30) for 3 years. The record must include the model and serial number of the instrument, the date of the calibration, the results of the calibration, and the name of the individual who performed the calibration.
- (93) **Records of Dosages of Unsealed Radioactive Material for Medical Use.** A licensee shall maintain a record of dosage determinations required by Rule .05(31) for 3 years. The record must contain the radioactive drug; the patient's or human research subject's name, or identification number if one has been assigned; prescribed dosage; the determined dosage, or a notation that the total activity is less than 1.11 MBq (30 μ Ci); the date and time of the dosage determination; and the name of the individual who determined the dosage.
- (94) **Records of Possession of Sealed Sources and Brachytherapy Sources.** A licensee shall retain a record of the semi-annual physical inventory of sealed sources and brachytherapy sources required by Rule .05(33)(d) for 3 years. The inventory record must contain the model number of each source, and serial number if one has been assigned, the identity of each source radionuclide and its nominal activity, the location of each source, and the name of the individual who performed the inventory.
- (95) **Records of Surveys for Ambient Radiation Exposure Rate.** A licensee shall retain a record of each survey required by Rule .05(36) for 3 years. The record must include the date of the survey, the results of the survey, the instrument used to make the survey, and the name of the individual who performed the survey.
- (96) **Records of the Release of Individuals Containing Radioactive Drugs or Implants Containing Radioactive Material.**
 - (a) A licensee shall retain a record, signed by the authorized user, of the basis for authorizing the release of an individual, for 3 years after the date of release,
 - (b) A licensee shall retain a record, for 3 years after the date of release, that the instructions required by Rule .05(37)(b) were provided to a breast-feeding woman.

- (97) **Records of Administrative and Technical Requirements that Apply to the Provision of Mobile Services.**
- (a) A licensee shall retain a copy of the letter(s) that permits the use of radioactive material at a client's address of use, as required by Rule .05(9)(b), for 3 years after the last provision of service.
 - (b) A licensee shall retain the record of each survey required by Rule .05(38)(f) for 3 years. The record must include the date of the survey, the results of the survey, the instrument used to make the survey, and the name of the individual who performed the survey.
- (98) **Records of Decay-in-Storage.** A licensee shall maintain records of the disposal of licensed materials, as required by Rule .05(40), for 3 years. The record must include the date of the disposal, the survey instrument used, the background radiation level, the radiation level measured at the surface of each waste container, and the name of the individual who performed the survey.
- (99) **Records of Radionuclide Purity.** A licensee shall maintain a record of the radionuclide contaminant concentration tests required by Rule .05(45) for 3 years. The record must include, for each measured elution of radionuclide used to prepare a radioactive drug, the ratio of the measures expressed as kilobecquerel of contaminant per megabecquerel of desired radionuclide (microcurie/millicurie), or microgram of contaminant per megabecquerel of desired radionuclide (microgram/millicurie), the time and date of the measurement, and the name of the individual who made the measurement.
- (100) **Records of Training.** A licensee shall maintain records of training required by Rule .05(25) for 3 years after the last date an individual was authorized to act as a nuclear medicine technologist or radiation therapist at the licensee's facility.
- (101) **Records of Safety Instruction and Training.** A licensee shall maintain a record of safety instructions and training required by Rules .05(49), (58) and (70) for 3 years. The record must include a list of the topics covered, the date of the instruction or training, the name(s) of the attendee(s), and the name(s) of the individual(s) who provided the instruction.
- (102) **Records of Radiation Surveys of Patients and Human Research Subjects.** A licensee shall maintain a record of the surveys required by Rule .05(56) and (68) for 3 years. Each record must include the date and results of the survey, the survey instrument used, and the name of the individual who made the survey.
- (103) **Records of Brachytherapy Source Inventory.**
- (a) A licensee shall maintain a record of brachytherapy source accountability required by Rule .05(57) for 3 years.
 - (b) For temporary implants, the record must include:

1. The number and activity of sources removed from storage, the time and date they were removed from storage, the name of the individual who removed them from storage, and the location of use;
2. The number and activity of unused sources returned to storage, the time and date they were returned to storage, and the name of the individual who returned them to storage; and
3. The number and activity of temporarily implanted sources removed from the patient or human research subject, the time and date they were returned to storage, and the name of the individual who returned them to storage.

(c) For permanent implants, the record must include:

1. The number and activity of sources removed from storage, the date they were removed from storage, and the name of the individual who removed them from storage;
2. The number and activity of sources not implanted, the date they were returned to storage, and the name of the individual who returned them to storage; and
3. The number and activity of sources permanently implanted in the patient or human research subject.

- (104) **Records of Calibration Measurements on Brachytherapy Sources.** A licensee shall maintain a record of the calibrations on brachytherapy sources required by Rule .05(60) for 3 years after the last use of the source. The record must include the date of the calibration; the manufacturer's name, model number, and serial number for the source and the instruments used to calibrate the source; the source output or activity; source positioning accuracy within applicators; and the signature of the authorized medical physicist.
- (105) **Records of Decay of Strontium-90 Sources for Ophthalmic Treatments.** The licensee shall maintain a record of the activity of a strontium 90 source required by Rule .05(60) for the life of the source. The record must include the date and initial activity of the source as determined under Rule .05(60), and for each decay calculation, the date, and the source activity and the signature of the authorized medical physicist.
- (106) **Records of Installation, Maintenance, Adjustment, and Repair.** A licensee shall retain a record of the installation, maintenance, adjustment, and repair of remote afterloader units, teletherapy units, and gamma stereotactic radiosurgery units as required by Rule .05(69) for 3 years. For each installation, maintenance, adjustment

and repair, the record must include the date, description of the service, and name(s) of the individual(s) who performed the work.

(107) Records of Dosimetry Equipment.

- (a) A licensee shall retain a record of the calibration, inter-comparison, and comparisons of its dosimetry equipment done in accordance with Rule .05(72) for the duration of the license.
- (b) For each calibration, inter-comparison, or comparison, the record must include:
 - 1. The date;
 - 2. The manufacturer's name, model numbers and serial numbers of the instruments that were calibrated, inter-compared, or compared as required by Rule .05(72)(a) and (72)(b);
 - 3. The correction factor that was determined from the calibration or comparison or the apparent correction factor that was determined from an inter-comparison; and
 - 4. The names of the individuals who performed the calibration, inter-comparison, or comparison.

(108) Records of Teletherapy, Remote Afterloader, and Gamma Stereotactic Radiosurgery Full Calibrations.

- (a) A licensee shall maintain a record of the teletherapy, remote afterloader, and gamma stereotactic radiosurgery full calibrations required by Rule .05(73), (74) and (75) for 3 years.
- (b) The record must include:
 - 1. The date of the calibration;
 - 2. The manufacturer's name, model number, and serial number for the teletherapy, remote afterloader, and gamma stereotactic radiosurgery unit(s), the source(s), and instruments used to calibrate the unit;
 - 3. The results and assessments of the full calibrations;
 - 4. The results of the autoradiograph required for low dose-rate remote afterloader units; and
 - 5. The signature of the authorized medical physicist who performed the full calibration.

(109) Records of Periodic Spot-Checks for Teletherapy Units.

- (a) A licensee shall retain a record of each periodic spot-check for teletherapy units required by Rule .05(76) for 3 years.
- (b) The record must include:
 - 1. The date of the spot-check;
 - 2. The manufacturer's name, model number, and serial number for the teletherapy unit, source and instrument used to measure the output of the teletherapy unit;
 - 3. An assessment of timer linearity and constancy;
 - 4. The calculated on-off error;
 - 5. A determination of the coincidence of the radiation field and the field indicated by the light beam localizing device;
 - 6. The determined accuracy of each distance measuring and localization device;
 - 7. The difference between the anticipated output and the measured output;
 - 8. Notations indicating the operability of each entrance door electrical interlock, each electrical or mechanical stop, each source exposure indicator light, and the viewing and intercom system and doors; and
 - 9. The name of the individual who performed the periodic spot-check and the signature of the authorized medical physicist who reviewed the record of the spot-check.

(110) Records of Periodic Spot-Checks for Remote Afterloader Units.

- (a) A licensee shall retain a record of each spot-check for remote afterloader units required by Rule .05(77) for 3 years.
- (b) The record must include, as applicable:
 - 1. The date of the spot-check;
 - 2. The manufacturer's name, model number, and serial number for the remote afterloader unit and source;
 - 3. An assessment of timer accuracy;
 - 4. Notations indicating the operability of each entrance door electrical interlock, radiation monitors, source exposure indicator lights, viewing

and intercom systems, and clock and decayed source activity in the unit's computer; and

5. The name of the individual who performed the periodic spot-check and the signature of the authorized medical physicist who reviewed the record of the spot-check.

(111) Records of Periodic Spot-Checks for Gamma Stereotactic Radiosurgery Units.

- (a) A licensee shall retain a record of each spot-check for gamma stereotactic radiosurgery units required by Rule .05(78) for 3 years.
- (b) The record must include:
 1. The date of the spot-check;
 2. The manufacturer's name, model number, and serial number for the gamma stereotactic radiosurgery unit and the instrument used to measure the output of the unit;
 3. An assessment of timer linearity and accuracy;
 4. The calculated on-off error;
 5. A determination of trunnion centricity;
 6. The difference between the anticipated output and the measured output;
 7. An assessment of source output against computer calculations;
 8. Notations indicating the operability of radiation monitors, helmet microswitches, emergency timing circuits, emergency off buttons, electrical interlocks, source exposure indicator lights, viewing and intercom systems, timer termination, treatment table retraction mechanism, and stereotactic frames and localizing devices (trunnions); and
 9. The name of the individual who performed the periodic spot-check and the signature of the authorized medical physicist who reviewed the record of the spot-check.

(112) Records of Additional Technical Requirements for Mobile Remote Afterloader Units.

- (a) A licensee shall retain a record of each check for mobile remote afterloader units required by Rule .05(79) for 3 years.

- (b) The record must include:
 - 1. The date of the check;
 - 2. The manufacturer's name, model number, and serial number of the remote afterloader unit;
 - 3. Notations accounting for all sources before the licensee departs from a facility;
 - 4. Notations indicating the operability of each entrance door electrical interlock, radiation monitors, source exposure indicator lights, viewing and intercom system, applicators and source transfer tubes, and source positioning accuracy; and
 - 5. The signature of the individual who performed the check.

(113) Records of Surveys of Therapeutic Treatment Units.

- (a) A licensee shall maintain a record of radiation surveys of treatment units made in accordance with Rule .05(80) for the duration of use of the unit.
- (b) The record must include:
 - 1. The date of the measurements;
 - 2. The manufacturer's name, model number and serial number of the treatment unit, source, and instrument used to measure radiation levels;
 - 3. Each dose rate measured around the source while the unit is in the off position and the average of all measurements; and
 - 4. The signature of the individual who performed the test.

(114) Records of Five-Year Inspection for Teletherapy and Gamma Stereotactic Surgery Units.

- (a) A licensee shall maintain a record of the five-year inspections for teletherapy and gamma stereotactic radiosurgery units required by Rule .05(81) for the duration of use of the unit.
- (b) The record must contain:
 - 1. The inspector's radioactive materials license number;
 - 2. The date of inspection;

3. The manufacturer's name and model number and serial number of both the treatment unit and source;
4. A list of components inspected and serviced, and the type of service; and
5. The signature of the inspector.

Reports

(115) Reports and Notifications of Misadministrations.

- (a) Other than events that result from intervention by a patient or human research subject, a licensee shall report any event in which the administration of radioactive material or radiation from radioactive material, except permanent implant brachytherapy, results in:
 1. A dose that differs from the prescribed dose by more than 0.05 Sv (5 rem) effective dose equivalent, 0.5 Sv (50 rem) to an organ or tissue, or 0.5 Sv (50 rem) shallow dose equivalent to the skin; and either
 - (i) The total dose delivered differs from the prescribed dose by 20 percent or more;
 - (ii) The total dosage delivered differs from the prescribed dosage by 20 percent or more or falls outside the prescribed dosage range; or
 - (iii) The fractionated dose delivered differs from the prescribed dose, for a single fraction, by 50 percent or more.
 2. A dose that exceeds 0.05 Sv (5 rem) effective dose equivalent, 0.5 Sv (50 rem) to an organ or tissue, or 0.5 Sv (50 rem) shallow dose equivalent to the skin from any of the following:
 - (i) An administration of a wrong radioactive drug or the wrong radionuclide for brachytherapy procedures;
 - (ii) An administration of a radioactive drug containing radioactive material by the wrong route of administration;
 - (iii) An administration of a dose or dosage to the wrong individual or human research subject;
 - (iv) An administration of a dose or dosage delivered by the wrong mode of treatment; or
 - (v) A leaking sealed source.

3. A dose to the skin or an organ or tissue other than the treatment site that exceeds by:
 - (i) 0.5 Sv (50 rem) or more the expected dose to that site from the procedure if the administration had been given in accordance with the written directive prepared or revised before administration; and
 - (ii) 50 percent or more the expected dose to that site from the procedure if the administration had been given in accordance with the written directive prepared or revised before administration.

4. For permanent implant brachytherapy, the administration of byproduct material or radiation from byproduct material (excluding sources that were implanted in the correct site but migrated outside the treatment site) that results in:
 - (i) The total source strength administered differing by 20 percent or more from the total source strength documented in the post-implantation portion of the written directive;
 - (ii) The total source strength administered outside of the treatment site exceeding 20 percent of the total source strength documented in the post-implantation portion of the written directive; or
 - (iii) An administration that includes any of the following:
 - (I) The wrong radionuclide;
 - (II) The wrong individual or human research subject;
 - (III) Sealed source(s) implanted directly into a location discontinuous from the treatment site, as documented in the post-implantation portion of the written directive; or
 - (IV) A leaking sealed source resulting in a dose that exceeds 0.5 Sv (50 rem) to an organ or tissue.

- (b) A licensee shall report any event resulting from intervention of a patient or human research subject in which the administration of radioactive material or radiation from radioactive material results, or will result in, unintended permanent functional damage to an organ or a physiological system, as determined by a physician.

- (c) The licensee shall notify the Division by telephone no later than the next calendar day after discovery of the misadministration.

- (d) The licensee shall submit a written report to the Division within 15 days after discovery of the misadministration.
1. The written report must include:
 - (i) The licensee's name;
 - (ii) The name of the prescribing physician;
 - (iii) A brief description of the event;
 - (iv) Why the event occurred;
 - (v) The effect, if any, on the individual(s) who received the administration;
 - (vi) Actions, if any, that have been taken, or are planned, to prevent recurrence;
 - (vii) Certification that the licensee notified the individual (or the individual's responsible relative or guardian), and if not, why not; and
 2. The report may not contain the individual's name or any other information that could lead to identification of the individual.
- (e) The licensee shall provide notification of the misadministration to the referring physician and also notify the individual who is the subject of the misadministration no later than 24 hours after its discovery, unless the referring physician personally informs the licensee either that he or she will inform the individual or that, based on medical judgment, telling the individual would be harmful. The licensee is not required to notify the individual without first consulting the referring physician. If the referring physician or the affected individual cannot be reached within 24 hours, the licensee shall notify the individual as soon as possible thereafter. The licensee may not delay any appropriate medical care for the individual, including any necessary remedial care as a result of the misadministration, because of any delay in notification. To meet the requirements of this paragraph, the notification of the individual who is the subject of the misadministration may be made instead to that individual's responsible relative or guardian. If a verbal notification is made, the licensee shall inform the individual or appropriate responsible relative or guardian that a written description of the event can be obtained from the licensee upon request. The licensee shall provide such a written description if requested.

- (f) Aside from the notification requirement, nothing in this section affects any rights or duties of licensees and physicians in relation to each other, to individuals affected by the misadministration, or to that individual's responsible relatives or guardians.
- (g) A licensee shall retain a record of a misadministration in accordance with Rule .05(89). A copy of the record required under Rule .05(89) shall be provided to the referring physician if other than the licensee, within 15 days after discovery of the misadministration.

(116) Report and Notification of a Dose to an Embryo/Fetus or a Nursing Child.

- (a) A licensee shall report any dose to an embryo/fetus that is greater than 50 mSv (5 rem) dose equivalent that is a result of an administration of radioactive material or radiation from radioactive material to a pregnant individual unless the dose to the embryo/fetus was specifically approved, in advance, by the authorized user.
- (b) A licensee shall report any dose to a nursing child that was not specifically approved, in advance, by the authorized user, that is a result of an administration of radioactive material to a breast feeding individual that:
 - 1. Is greater than 50 mSv (5 rem) total effective dose equivalent; or
 - 2. Has resulted in unintended permanent functional damage to an organ or a physiological system, as determined by a physician.
- (c) The licensee shall notify by telephone the Division no later than the next calendar day after discovery of a dose to the embryo/fetus or nursing child that requires a report in Rule .05(116)(a) or (116)(b).
- (d) The licensee shall submit a written report to the Division within 15 days after discovery of a dose to the embryo/fetus or nursing child that requires a report in Rule .05(116)(a) or (116)(b).
 - 1. The written report must include:
 - (i) The licensee's name;
 - (ii) The name of the prescribing physician;
 - (iii) A brief description of the event;
 - (iv) Why the event occurred;
 - (v) The effect on the embryo/fetus or the nursing child;

- (vi) What actions, if any, have been taken, or are planned, to prevent recurrence; and
 - (vii) Certification that the licensee notified the pregnant individual or mother (or the mother's or child's responsible relative or guardian), and if not, why not.
2. The report must not contain the individual's or child's name or any other information that could lead to identification of the individual or child.
- (e) The licensee shall notify the referring physician and also notify the pregnant individual or mother, both hereafter referred to as the mother, no later than 24 hours after of discovery of an event that would require reporting under Rule .05(116)(a) or (116)(b), unless the referring physician personally informs the licensee either that he or she will inform the mother or that, based on medical judgment, telling the mother would be harmful. The licensee is not required to notify the mother without first consulting with the referring physician. If the referring physician or mother cannot be reached within 24 hours, the licensee shall make the appropriate notifications as soon as possible thereafter. The licensee may not delay any appropriate medical care for the embryo/fetus or for the nursing child, including any necessary remedial care as a result of the event, because of any delay in notification. To meet the requirements of this paragraph, the notification may be made to the mother's or child's responsible relative or guardian instead of the mother, when appropriate. If a verbal notification is made, the licensee shall inform the mother, or the mother's or child's responsible relative or guardian, that a written description of the event can be obtained from the licensee upon request. The licensee shall provide such a written description if requested.
 - (f) A licensee shall retain a record of a dose to an embryo/fetus or a nursing child in accordance with Rule .05(90). A copy of the record required under Rule .05(90) shall be provided to the referring physician, if other than the licensee, within 15 days after discovery of the event.
- (117) **Reports of Leaking Sources.** A licensee shall file a report with the Division within 5 days if a leakage test required by Rule .05(33) reveals the presence of 185 Bq (0.005 μ Ci) or more of removable contamination. The written report must include the model number and serial number if assigned, of the leaking source; the radionuclide and its estimated activity; the results of the test; the date of the test; and the action taken.
- (118) **Reports of Patient Departure Prior to Authorized Release.**

- (a) A licensee shall notify the Division by telephone immediately upon discovery that a patient or human research subject has departed from the licensee's facility without authorization under Rule .05(37)(a).
- (b) The licensee shall submit a written report to the Division within 30 days after discovery of the unauthorized departure. The written report must include:
 - 1. The licensee's name;
 - 2. The date and time of the unauthorized departure;
 - 3. The projected date and time when release would have occurred;
 - 4. The address of the patient's or human research subject's home or anticipated destination following departure;
 - 5. The radionuclide, chemical and physical form and calculated activity at time of release;
 - 6. The apparent reason(s) for the departure prior to authorized release; and
 - 7. A description of any changes in the licensee's patient release criteria or patient instructions that are designed to avoid a recurrence of such an event.

(119) Notification of Deceased Patients or Human Research Subjects Containing Radioactive Material.

- (a) The licensee shall notify the Division by telephone immediately upon discovery that a patient or human research subject containing radioactive material has died, and it is possible that any individual could receive exposures in excess of limits specified in Rule .03(5)(i) of this Chapter as a result of the deceased's body.
- (b) The licensee shall submit a written report to the Division within 30 days after discovery that the patient or human research subject referenced in (119)(a) has died. The written report must include:
 - 1. The licensee's name;
 - 2. The date of death;
 - 3. The radionuclide, chemical and physical form and calculated activity at time of death; and,
 - 4. The names (or titles) and address(es) of known individuals who might have received exposures exceeding 5 millisievert (500 mrem).

(120) **Report and Notification for an Eluate Exceeding Permissible Molybdenum-99, Strontium-82, and Strontium-85 Concentrations.**

- (a) The licensee shall notify by telephone the Georgia Department of Natural Resources, Environmental Protection Division and the distributor of the generator within 7 calendar days after discovery that an eluate exceeded the permissible concentration listed in 391-3-17-.05(45)(a) at the time of generator elution. The telephone report to the Georgia EPD must include the manufacturer, model number, and serial number (or lot number) of the generator; the results of the measurement; the date of the measurement; whether dosages were administered to patients or human research subjects, when the distributor was notified, and the action taken.
- (b) By an appropriate method listed in [391-3-17-.01\(13\)](#), the licensee shall submit a written report to Georgia Department of Natural Resources, Environmental Protection Division within 30 calendar days after discovery of an eluate exceeding the permissible concentration at the time of generator elution. The written report must include the action taken by the licensee; the patient dose assessment; the methodology used to make this dose assessment if the eluate was administered to patients or human research subjects; and the probable cause and an assessment of failure in the licensee's equipment, procedures or training that contributed to the excessive readings if an error occurred in the licensee's breakthrough determination; and the information in the telephone report as required by subparagraph .05(120)(a).

Rule 391-3-17-.06. Transportation of Radioactive Material.

(1) **General.**

- (a) **Purpose.** The Regulations in this Rule, 391-3-17-.06, establish requirements for packaging, preparation for shipment, and transportation of radioactive material.
- (b) **Scope.** This Rule applies to any licensee authorized by specific or general license issued by the Director, Agreement State, or NRC to receive, possess, use, or transfer licensed material to a carrier for transport of the material outside the site of usage as specified in the license, or transports that material on public highways or public access roads. No provision of this part authorizes possession of licensed material.

(2) **Requirement for License.** No person shall transport radioactive material or deliver radioactive material to a carrier for transport except as authorized in a general or specific license issued by the Director or as exempted in (4).

(3) **Definitions.** As used in this Rule, the following definitions apply:

- (a) "A₁" and "A₂" mean, respectively, the maximum activity of special form radioactive material (A₁) and the maximum activity of radioactive material, other than special form material, LSA, and SCO material (A₂), permitted in a Type A package.
- (b) "Carrier" means a person engaged in the transportation of passengers or property by land or water as a common, contract, or private carrier, or by civil aircraft.
- (c) "Certificate holder" means a person who has been issued a certificate of compliance or other package approval by the U.S. Nuclear Regulatory Commission.
- (d) "Certificate of Compliance (CoC)" means the certificate issued by the U.S Nuclear Regulatory Commission, which approves the design of a package for the transportation of radioactive material.
- (e) "Close reflection by water" means immediate contact by water of sufficient thickness for maximum reflection of neutrons.
- (f) "Closed transport vehicle" means a transport vehicle equipped with a securely attached exterior enclosure that during normal transportation restricts the access of unauthorized persons to the cargo space containing the radioactive material. The enclosure may be either temporary or permanent but shall limit access from top,

sides, and ends. In the case of packaged materials, it may be of the "see-through" type.

- (g) "Consignment" means each shipment of a package or groups of packages or load of radioactive material offered by a shipper for transport.
- (h) "Containment system" means the assembly components of the packaging intended to retain the radioactive material during transport.
- (i) "Conveyance" means:
 - 1. For transport by public highway or rail any transport vehicle or large freight container;
 - 2. For transport by water any vessel, or any hold, compartment, or defined deck area of a vessel including any transport vehicle on board the vessel; and
 - 3. For transport by any aircraft.
- (j) "Criticality Safety Index (CSI)" means the dimensionless number (rounded up to the next tenth) assigned to and placed on the label of a fissile material package, to designate the degree of control of accumulation of packages, overpacks or freight containers containing fissile material during transportation. Determination of the criticality safety index is described in 391-3-17-.06(11) and (12) and [10 CFR 71.59](#). The criticality safety index for an overpack, freight container, consignment or conveyance containing fissile material packages is the arithmetic sum of the criticality safety indices of all the fissile material packages contained within the overpack, freight container, consignment or conveyance.
- (k) "Deuterium" means deuterium and any deuterium compounds, including heavy water, in which the ratio of deuterium atoms to hydrogen atoms exceeds 1:5,000.
- (l) "DOT" means the U.S. Department of Transportation.
- (m) "Exclusive use" means the sole use of a conveyance by a single consignor and for which all initial, intermediate, and final loading and unloading are carried out in accordance with the direction of the consignor or consignee. The consignor and the carrier must ensure that any loading or unloading is performed by personnel having radiological training and resources appropriate for safe handling of the consignment. The consignor must issue specific instructions, in writing, for maintenance of exclusive use shipment controls, and include them with the shipping paper information provided to the carrier by the consignor.¹
- (n) "Fissile material" means the radionuclides uranium-233, uranium-235, plutonium-239, and plutonium-241, or any combination of these radionuclides. Fissile material means the fissile nuclides themselves, not material containing fissile

nuclides. Neither natural nor depleted uranium is fissile material.² Unirradiated natural uranium or depleted uranium that has been irradiated in thermal reactors only are not included in this definition. Certain exclusions from fissile material controls are provided in [10 CFR 71.15](#).

- (o) "Graphite" means graphite with a boron equivalent content less than five (5) parts per million and density greater than 1.5 grams per cubic centimeter.
- (p) "Indian Tribe" means an Indian or Alaska Native Tribe, band, nation, pueblo, village, or community that the Secretary of the Interior acknowledges to exist as an Indian Tribe pursuant to the Federally Recognized Indian Tribe List Act of 1994, [25 U.S.C. 479a](#).
- (q) "Licensed material" means byproduct, source, or special nuclear material received, possessed, used, or transferred under a general or specific license issued by the U.S. Nuclear Regulatory Commission or an Agreement State pursuant to the regulations in 10 CFR or this Chapter, respectively.
- (r) "Low specific activity material" means radioactive material with limited specific activity which is nonfissile or is excepted under 391-3-17-.06(4)(f), and which satisfies the descriptions and limits set forth below. Shielding materials surrounding the LSA material may not be considered in determining the estimated average specific activity of the package contents. The LSA material must be in one of three groups:
 - 1. LSA-I
 - (i) Uranium and thorium ores, concentrates of uranium and thorium ores, and other ores containing naturally occurring radionuclides that are intended to be processed for the use of these radionuclides; or
 - (ii) Natural uranium, depleted uranium, natural thorium or their compounds or mixtures, provided they are unirradiated and in solid or liquid form; or
 - (iii) Radioactive material, other than fissile material, for which the A_2 value is unlimited; or
 - (iv) Other radioactive material in which the activity is distributed throughout and the estimated average specific activity does not exceed 30 times the value for exempt material activity concentration determined in accordance with 391-3-17-.06(23).
 - 2. LSA-II
 - (i) Water with tritium concentration up to 20.0 Ci/L (0.8 TBq/liter); or

- (ii) Other radioactive material in which the activity is distributed throughout and the estimated average specific activity does not exceed 10^{-4} A₂/g for solids and gases, and 10^{-5} A₂/g for liquids.
3. LSA-III. Solids (e.g., consolidated wastes, activated materials), excluding powders, that satisfy the requirements of [10 CFR 71.77](#), in which:
- (i) The radioactive material is distributed throughout a solid or a collection of solid objects, or is essentially uniformly distributed in a solid compact binding agent (such as concrete, bitumen, ceramic, etc);
 - (ii) The radioactive material is relatively insoluble, or it is intrinsically contained in a relatively insoluble material, so that, even under loss of packaging, the loss of radioactive material per package by leaching, when placed in water for seven days, would not exceed 0.1 A₂; and
 - (iii) The estimated average specific activity of the solid, excluding any shielding material, does not exceed 2×10^{-3} A₂/g.
- (s) "Low toxicity alpha emitters" means natural uranium, depleted uranium, natural thorium; uranium-235, uranium-238, thorium-232, thorium-228 or thorium-230 when contained in ores or physical or chemical concentrates or tailings; or alpha emitters with a half-life of less than 10 days.
- (t) "Maximum normal operating pressure" means the maximum gauge pressure that would develop in the containment system in a period of one year under the heat condition specified in [10 CFR 71.71\(c\)\(1\)](#), in the absence of venting, external cooling by an ancillary system, or operational controls during transport.
- (u) "Natural thorium" means thorium with the naturally occurring distribution of thorium isotopes (essentially 100 weight percent thorium-232).
- (v) "Normal form radioactive material" means radioactive material that has not been demonstrated to qualify as "special form radioactive material."
- (w) "Nuclear waste" means a quantity of source, byproduct or special nuclear material³ required to be in US Nuclear Regulatory Commission-approved specification packaging while transported to, through or across a state boundary to a disposal site, or to a collection point for transport to a disposal site.

- (x) "Optimum interspersed hydrogenous moderation" means the presence of hydrogenous material between packages to such an extent that the maximum nuclear reactivity results.
- (y) "Package" means the packaging together with its radioactive contents as presented for transport.
 1. "Fissile material package or Type AF package, Type BF package, Type B(U)F package, or Type B(M)F package" means a fissile material packaging together with its fissile material contents.
 2. "Type A package" means a Type A packaging together with its radioactive contents. A Type A package is defined and must comply with the DOT regulations in 49 CFR Part 173.
 3. "Type B package" means a Type B packaging together with its radioactive contents. On approval, a Type B package design is designated by NRC as B(U) unless the package has a maximum normal operating pressure of more than 700 kPa (100 lb/in²) gauge or a pressure relief device that would allow the release of radioactive material to the environment under the tests specified in 10 CFR Part 71 (hypothetical accident conditions), in which case it will receive a designation B(M). B(U) refers to the need for unilateral approval of international shipments; B(M) refers to the need for multilateral approval of international shipments. There is no distinction made in how packages with these designations may be used in domestic transportation. To determine their distinction for international transportation, see DOT regulations in 49 CFR Part 173. A Type B package approved before September 6, 1983, was designated only as Type B. Limitations on its use are specified in .06(8).
- (z) "Packaging" means the assembly of components necessary to ensure compliance with the packaging requirements of this Rule. It may consist of one or more receptacles, absorbent materials, spacing structures, thermal insulation, radiation shielding, and devices for cooling or absorbing mechanical shocks. The vehicle, tie-down system, and auxiliary equipment may be designated as part of the packaging.
- (aa) "Regulations of the U.S. Department of Transportation" means the regulations in 49 CFR Parts 100-189 and Parts 390-397.
- (bb) "Regulations of the U.S. Nuclear Regulatory Commission" means the regulations in 10 CFR 71 for purposes of this Rule.
- (cc) "Special form radioactive material" means radioactive material that satisfies the following conditions:

1. It is either a single solid piece or is contained in a sealed capsule that can be opened only by destroying the capsule;
 2. The piece or capsule has at least one dimension not less than 5 millimeters (0.2 in.); and
 3. It satisfies the requirements specified by the Nuclear Regulatory Commission in [10 CFR 71.75](#). A special form encapsulation designed in accordance with the requirements of [10 CFR 71.4](#) in effect on June 30, 1983 (see 10 CFR 71, revised as of January 1, 1983), and constructed prior to July 1, 1985, may continue to be used. A special form encapsulation designed in accordance with the Nuclear Regulatory Commission requirements in [10 CFR 71.4](#) in effect on March 31, 1996 (see 10 CFR 71, revised as of January 1, 1996), and constructed prior to April 1, 1998, may continue to be used. A special form material that was successfully tested before September 10, 2015 in accordance with the requirements of [10 CFR 71.75\(d\)](#) in effect before September 10, 2015 may continue to be used. Any other special form must meet requirements of this definition applicable at the time of its design or construction.
- (dd) "Specific activity" of a radionuclide means the radioactivity of a radionuclide per unit mass of that nuclide. The specific activity of a material in which the radionuclide is essentially uniformly distributed is the radioactivity per unit mass of the material.
- (ee) "Spent nuclear fuel or Spent fuel" means fuel that has been withdrawn from a nuclear reactor following irradiation, has undergone at least one (1) year's decay since being used as a source of energy in a power reactor, and has not been chemically separated into its constituent elements by reprocessing. Spent fuel includes the special nuclear material, byproduct material, source material, and other radioactive materials associated with fuel assemblies.
- (ff) "Surface Contaminated Object (SCO)" means a solid object that is not itself classed as radioactive material, but which has radioactive material distributed on any of its surfaces. SCO must be in one of two groups with surface activity not exceeding the following limits:
1. SCO-I: A solid object on which:
 - (i) The non-fixed contamination on the accessible surface averaged over 300 cm² (or the area of the surface if less than 300 cm²) does not exceed 10⁻⁴ microcurie/cm² (4 Bq/cm²) for beta and gamma and low toxicity alpha emitters, or 10⁻⁵ microcurie/cm² (0.4 Bq/cm²) for all other alpha emitters;

- (ii) The fixed contamination on the accessible surface averaged over 300 cm^2 (or the area of the surface if less than 300 cm^2) does not exceed $1.0 \text{ microcurie/cm}^2$ ($4 \times 10^4 \text{ Bq/cm}^2$) for beta and gamma and low toxicity alpha emitters, or $0.1 \text{ microcurie/cm}^2$ ($4 \times 10^3 \text{ Bq/cm}^2$) for all other alpha emitters; and
- (iii) The non-fixed contamination plus the fixed contamination on the inaccessible surface averaged over 300 cm^2 (or the area of the surface if less than 300 cm^2) does not exceed $1.0 \text{ microcurie/cm}^2$ ($4 \times 10^4 \text{ Bq/cm}^2$) for beta and gamma and low toxicity alpha emitters, or $0.1 \text{ microcurie/cm}^2$ ($4 \times 10^3 \text{ Bq/cm}^2$) for all other alpha emitters.

2. SCO-II: A solid object on which the limits for SCO-I are exceeded and on which:

- (i) The non-fixed contamination on the accessible surface averaged over 300 cm^2 (or the area of the surface if less than 300 cm^2) does not exceed $10^{-2} \text{ microcurie/cm}^2$ (400 Bq/cm^2) for beta and gamma and low toxicity alpha emitters, or $10^{-3} \text{ microcurie/cm}^2$ (40 Bq/cm^2) for all other alpha emitters;
- (ii) The fixed contamination on the accessible surface averaged over 300 cm^2 (or the area of the surface if less than 300 cm^2) does not exceed $20 \text{ microcurie/cm}^2$ ($8 \times 10^5 \text{ Bq/cm}^2$) for beta and gamma and low toxicity alpha emitters, or $2 \text{ microcurie/cm}^2$ ($8 \times 10^4 \text{ Bq/cm}^2$) for all other alpha emitters; and
- (iii) The non-fixed contamination plus the fixed contamination on the inaccessible surface averaged over 300 cm^2 (or the area of the surface if less than 300 cm^2) does not exceed $20 \text{ microcurie/cm}^2$ ($8 \times 10^5 \text{ Bq/cm}^2$) for beta and gamma and low toxicity alpha emitters, or $2 \text{ microcurie/cm}^2$ ($8 \times 10^4 \text{ Bq/cm}^2$) for all other alpha emitters.

(gg) "Transport index" means the dimension-less number (rounded up to the next tenth) placed on the label of a package, to designate the degree of control to be exercised by the carrier during transportation. The transportation index is the number expressing the maximum radiation level in millirem per hour at 1 meter from the external surface of the package.

(hh) "Tribal official" means the highest ranking individual that represents Tribal leadership, such as the Chief, President, or Tribal Council leadership.

- (ii) "Type A package" means a packaging that, together with its radioactive contents limited to A_1 or A_2 as appropriate, meets the requirements of [49 CFR 173.410](#) and [173.412](#) and is designed to retain the integrity of containment and shielding required by this Rule under normal conditions of transport as demonstrated by the tests set forth in [49 CFR 173.465](#) or [173.466](#), as appropriate.
- (jj) "Type A quantity" means a quantity of radioactive material, the aggregate radioactivity of which does not exceed A_1 for special form radioactive material or A_2 for normal form radioactive material, where A_1 and A_2 are given in Table 4, "A₁ and A₂ Values for Radionuclides" or may be determined by procedures described in (23) of this Rule.
- (kk) "Type B package" is defined in Rule [391-3-17-.01\(2\)\(ttt\)](#).
- (ll) "Type B packaging" means a packaging designed to retain the integrity of containment and shielding when subjected to the normal conditions of transport and hypothetical accident test conditions set forth in 10 CFR Part 71.
- (mm) "Type B quantity" means a quantity of radioactive material greater than a Type A quantity.
- (nn) "Unirradiated uranium" means uranium containing not more than 2×10^3 Bq of plutonium per gram of uranium-235, not more than 9×10^6 Bq of fission products per gram of uranium-235, and not more than 5×10^{-3} grams of uranium-236 per gram of uranium-235.
- (oo) "Uranium-natural, depleted, enriched" means:
1. Natural uranium means uranium (which may be chemically separated) with the naturally occurring distribution of uranium isotopes (approximately 0.711 weight percent uranium-235, and the remainder by weight essentially uranium-238).
 2. Depleted uranium means uranium containing less uranium-235 than the naturally occurring distribution of uranium isotopes.
 3. Enriched uranium means uranium containing more uranium-235 than the naturally occurring distribution of uranium isotopes.
- (pp) "Contamination" means the presence of a radioactive substance on a surface in quantities in excess of 0.4 Bq/cm^2 ($1 \times 10^{-5} \text{ } \mu\text{Ci/cm}^2$) for beta and gamma emitters and low toxicity alpha emitters, or 0.04 Bq/cm^2 ($1 \times 10^{-6} \text{ } \mu\text{Ci/cm}^2$) for all other alpha emitters.
1. Fixed contamination means contamination that cannot be removed from a surface during normal conditions of transport

2. Non-fixed contamination means contamination that can be removed from a surface during normal conditions of transport

(4) Exemptions.

- (a) Common and contract carriers, freight forwarders, and warehousemen who are subject to the requirements of the U.S. Department of Transportation (DOT) in 49 CFR 170 through 189 or the U.S. Postal Service in the Postal Service Manual (Domestic Mail Manual), Section C-023.9.0, and the U.S. Postal Service, are exempt from the requirements of this Rule and as stated in [10 CFR 30.13](#) to the extent that they transport or store radioactive material in the regular course of their carriage for others or storage incident thereto. Common and contract carriers who are not subject to the requirements of the U.S. Department of Transportation or U.S. Postal Service are subject to (2) of this Rule and other applicable requirements of these Regulations.
- (b) Any licensee is exempt from the requirements of this Rule to the extent that the licensee delivers to a carrier for transport a package containing radioactive material having a specific activity not greater than 0.002 microcurie per gram (70 Bq/gm).
- (c) Any physician licensed by Georgia to dispense drugs in the practice of medicine is exempt from Rule .06 with respect to transport by the physician of licensed material for use in the practice of medicine. However, any physician operating under this exemption must be licensed under Rule .05.
- (d) A licensee is exempt from the requirements of Rule .06 with respect to shipment or carriage of the following low-level materials:
 1. Natural material and ores containing naturally occurring radionuclides that are either in their natural state, or have only been processed for purposes other than for the extraction of the radionuclides, and which are not intended to be processed for use of these radionuclides, provided the activity concentration of the material does not exceed 10 times the applicable radionuclide activity concentration values specified in Table 5 and 7.
 2. Materials for which the activity concentration is not greater than the activity concentration values specified in Table 5 and 7, or for which the consignment activity is not greater than the limit for an exempt consignment found in Table 5 and 7.
 3. Non-radioactive solid objects with radioactive substances present on any surfaces in quantities not in excess of the levels cited in the definition of contamination in 391-3-17-.06(3)(pp).

- (e) A licensee is exempt from the requirements of Rule .06, other than .06(5) and .06(17), with respect to shipment or carriage of the following packages, providing the packages do not contain any fissile material, or the material is exempt from classification as fissile material in .06(4)(f):
1. A package that contains no more than a Type A quantity of radioactive material;
 2. A package transported within the United States that contains no more than 20 Ci (0.74 TBq) of special form plutonium-244; or
 3. A package contains LSA or SCO radioactive material, provided that the LSA or SCO material has an external radiation dose of less than or equal to 1 rem/hr (10 mSv/hr) at a distance of 3 meters from the unshielded material or that the package contains only LSA-I or SCO-I material.
- (f) Fissile material meeting the requirements of at least one of the following six paragraphs in this part are exempt from classification as fissile material and from the fissile material package standards of [10 CFR 71.55](#) and [71.59](#), but are subject to all other requirements of this part, except as noted.
1. Individual package containing two (2) grams or less of fissile material.
 2. Individual or bulk packaging containing fifteen (15) grams or less of fissile material provided the package has at least 200 grams of solid nonfissile material for every gram of fissile material. Lead, beryllium, graphite, and hydrogenous material enriched in deuterium may be present in the package but must not be included in determining the required mass for solid nonfissile material.
 3. Low concentrations of solid fissile material commingled with solid nonfissile material, provided that (i) there is at least 2,000 grams of solid nonfissile material for every gram of fissile material, and (ii) there is no more than 180 grams of fissile material distributed within 360 kg of contiguous nonfissile material. Lead, beryllium, graphite, and hydrogenous material enriched in deuterium may be present in the package but must not be included in determining the required mass for solid nonfissile material.
 4. Uranium enriched in uranium-235 to a maximum of one (1) percent by weight, and with a total plutonium and uranium-233 content of up to one (1) percent of the mass of uranium-235, provided that the mass of any beryllium, graphite, and hydrogenous material enriched in deuterium constitutes less than five (5) percent of the uranium mass, and that the fissile material is distributed homogeneously and does not form a lattice arrangement within the package.

5. Liquid solutions of uranyl nitrate enriched in uranium-235 to a maximum of two (2) percent by mass, with a total plutonium and uranium-233 content not exceeding 0.002 percent of the mass of uranium, and with a minimum nitrogen to uranium atomic ratio (N/U) of 2. The material must be contained in at least a DOT Type A package.
6. Packages containing, individually, a total plutonium mass of not more than 1,000 grams, of which not more than twenty (20) percent by mass may consist of plutonium-239, plutonium-241, or any combination of these radionuclides.

(5) Transportation of Licensed Material.

- (a) Each licensee who transports licensed material outside the site of usage, as specified in a Division license, or where transport is on public highway, or public access road, or who delivers licensed material to a carrier for transport, shall:
 1. Comply with the applicable requirements, appropriate to the mode of transport, of the regulations of the US Department of Transportation (DOT).
 - (i) The licensee shall particularly note DOT regulations in the following areas:
 - (I) Packaging - 49 CFR Part 173, Subparts A and B and I.
 - (II) Marking and Labeling - 49 CFR Part 172: Subpart D, and §§ [49 CFR 172.400](#) through [172.407](#), §§ [172.436](#) through [172.440](#) of Subpart E.
 - (III) Placarding - 49 CFR Part 172: Subpart F, especially §§ 172.500 through 172.519, 172.556 and Appendices B and C.
 - (IV) Accident Reporting - 49 CFR Part 171: §§ 171.15 and [171.16](#).
 - (V) Shipping Papers and Emergency Information - 49 CFR Part 172, Subpart C and Subpart G.
 - (VI) Hazardous material employee training - 49 CFR Part 172: Subpart H.
 - (VII) Security Plans - 49 CFR Part 172: Subpart I.
 - (VIII) Hazardous material shipper/carrier registration - 49 CFR Part 107: Subpart G.

- (ii) The licensee shall also note DOT regulations pertaining to the following modes of transportation:
 - (I) Rail - 49 CFR Part 174, Subparts A through D and K.
 - (II) Air - 49 CFR Part 175.
 - (III) Vessel - 49 CFR Part 176, Subparts A through F and M.
 - (IV) Public Highway - 49 CFR Part 177 and Parts 390 through 397.

2. Assure that any special instructions needed to safely open the package are sent to or have been made available to the consignee in accordance with Rule [391-3-17-.03\(12\)\(f\)](#).

- (b) If, for any reason, the regulations of the DOT are not applicable to a shipment of licensed material, the licensee shall conform to the standards and requirements of 49 CFR Parts 170-189 appropriate to the mode of transport to the same extent as if the shipment was subject to the regulations.

(6) General Licenses for Carriers.

- (a) A general license is hereby issued to any common or contract carrier not exempt under (4) to receive, possess, transport, and store radioactive material in the regular course of their carriage for others or storage incident thereto, provided the transportation and storage is in accordance with the applicable requirements, appropriate to the mode of transport, of the DOT insofar as such requirements relate to the loading and storage of packages, placarding of the transporting vehicle, and incident reporting.⁴
- (b) A general license is hereby issued to any private carrier to transport radioactive material, provided the transportation is in accordance with the applicable requirements, appropriate to the mode of transport, of the DOT insofar as such requirements relate to the loading and storage of packages, placarding of the transporting vehicle, and incident reporting.
- (c) Persons who transport radioactive material pursuant to the general licenses in (6)(a) or (b) are exempt from the requirements of Rules [391-3-17-.03](#) and .07 to the extent that they transport radioactive material.

(7) General License: NRC-Approved Packages.

- (a) A general license is hereby issued to any licensee to transport, or to deliver to a carrier for transport, licensed material in a package for which a license, certificate

of compliance, or other approval has been issued by the U.S. Nuclear Regulatory Commission (NRC).

- (b) Each licensee issued a general license under .06(7)(a) shall:
 - 1. Possess a copy of the specific license, certificate of compliance, or other approval of the package and the drawings and other documents referenced in the approval relating to the use and maintenance of the packaging and to the actions to be taken prior to shipment;
 - 2. Comply with the terms and conditions of the license, certificate, or other approval by the Nuclear Regulatory Commission, as applicable, and the applicable requirements of this Rule;
 - 3. Submit in writing before the first use of the package to: ATTN: Document Control Desk, Director, Division of Fuel Management, Office of Nuclear Material Safety and Safeguards, using an appropriate method listed in [10 CFR 71.71\(a\)](#), the licensee's name and license number and the package identification number specified in the package approval.
- (c) This general license applies only to a licensee who has a quality assurance program required by the Georgia Department of Natural Resources Radioactive Materials Program satisfying the provisions of (22).
- (d) The general license in (7)(a) applies only when the package approval authorizes use of the package under this general license.
- (e) For a Type B or fissile material package the design of which was approved by NRC before April 1, 1996 the general license is subject to additional restrictions of [10 CFR 71.19](#).

(8) **[Reserved]**.

(9) **General License: DOT Specification Container.**

- (a) A general license is issued to any licensee of the Division to transport, or to deliver to a carrier for transport, licensed material in a specification container for fissile material or for a Type B quantity of radioactive material as specified in 49 CFR Parts 173 and 178.
- (b) This general license applies only to a licensee who:
 - 1. Has a copy of the specification;
 - 2. Complies with the terms and conditions of the specification and the applicable requirements of this Rule; and

3. Has a quality assurance program required by (22).

(c) The general license in (9)(a) is subject to the limitation that the specification container may not be used for a shipment to a location outside the United States, except by multilateral approval, as defined in DOT regulations at [49 CFR 173.403](#).

(10) General License: Use of Foreign-Approved Package.

(a) A general license is issued to any licensee of the Division to transport, or to deliver to a carrier for transport, licensed material in a package the design of which has been approved in a foreign national competent authority certificate which has been revalidated by the DOT as meeting the applicable requirements of [49 CFR 171.23](#).

(b) This general license applies only to international shipments.

(c) This general license applies only to a licensee who:

1. Has a copy of the applicable certificate, the revalidation, and the drawings and other documents referenced in the certificate relating to the use and maintenance of the packaging and to the actions to be taken prior to shipment;
2. Complies with the terms and conditions of the certificate and revalidation and with the applicable requirements of this Rule; and
3. Has a quality assurance program approved by the Georgia Department of Natural Resources, Environmental Protection Division, Radioactive Materials Program satisfying the requirements of (22).

(11) General License: Fissile Material, Limited Quantity per Package.

(a) A general license is hereby issued to any licensee to transport fissile material, or to deliver fissile material to a carrier for transport, if the material is shipped in accordance with this section. The material must be contained in a Type A package. The Type A package must also meet the DOT requirements of [49 CFR 173.417\(a\)](#).

(b) This general license applies only to a licensee who has a quality assurance program required by (22).

(c) This general license applies only when a package contains no more than a Type A quantity of fissile material and contains less than 500 grams total of beryllium, graphite, or hydrogenous material enriched in deuterium.

- (d) 1. This general license applies only to packages containing fissile material that are labeled with a Criticality Safety Index (CSI), defined as

$$CSI = 10 \left[\frac{\text{grams of } ^{235}\text{U}}{X} + \frac{\text{grams of } ^{233}\text{U}}{Y} + \frac{\text{grams of Pu}}{Z} \right]$$

where the values of X, Y, and Z used in the CSI equation must be taken from Tables 1 or 2, as appropriate. If Table 2 is used to obtain the value of X, then the values for the terms for uranium-233 and plutonium must be assumed to be zero. Table 1 values for X, Y, and Z must be used to determine the CSI if:

- i. Uranium-233 is present in the package;
 - ii. The mass of plutonium exceeds one (1) percent of the mass of uranium-235;
 - iii. The uranium is of unknown uranium-235 enrichment or greater than 24 weight percent enrichment; or
 - iv. Substances having a moderating effectiveness (i.e., an average hydrogen density greater than water) (e.g., certain hydrocarbon oils or plastics) are present in any form, except as polyethylene used for packing or wrapping.
2. In all cases, the Criticality Safety Index must be rounded up to one decimal place and may not exceed 10.0.
 3. For a shipment of multiple packages containing fissile material, the sum of the CSIs must be less than or equal to 50 (for shipment on a non-exclusive use conveyance) and less than or equal to 100 (for shipment on an exclusive use conveyance).

Table 1

Fissile Material	Fissile Material mass mixed with moderating substances having an average hydrogen density less than or equal to water (in grams)	Fissile Material mass mixed with moderating substances having an average hydrogen density greater than water ^(a) (in grams)
²³⁵ U (X)	60	38

^{233}U (Y)	43	27
^{239}Pu or ^{241}Pu (Z)	37	24

- (a) - When mixtures of moderating substances are present, the lower mass limits shall be used if more than 15 percent of the moderating substances has an average hydrogen density greater than water.

Table 2

Mass Limits for General License Packages Containing Uranium-235 of Known Enrichment

Uranium Enrichment in weight percent of ^{235}U not exceeding	Fissile Material mass of ^{235}U (X) (in grams)
24	60
20	63
15	67
11	72
10	76
9.5	78
9	81
8.5	82
8	85
7.5	88
7	90
6.5	93
6	97
5.5	102
5	108
4.5	114
4	120
3.5	132
3	150
2.5	180

2	246
1.5	408*
1.35	480*
1	1,020*
0.92	1,800*

*- Pursuant to the Division's agreement with the USNRC, jurisdiction extends only to 350 grams of uranium-235.

(12) General License: Plutonium-Beryllium Special Form Material.

- (a) A general license is hereby issued to any licensee to transport fissile material in the form of plutonium-beryllium (Pu-Be) special form sealed sources, or to deliver Pu-Be sealed sources to a carrier for transport, if the material is shipped in accordance with this section. The material must be contained in a Type A package. The Type A package must also meet the DOT requirements of [49 CFR 173.417\(a\)](#).
- (b) This general license applies only when all of the following requirements are met:
1. The package contains no more than a Type A quantity of radioactive material.
 2. The package contains less than 1,000 grams of plutonium, provided that: plutonium-239, plutonium-241, or any combination of these radionuclides, constitutes less than 240 grams of the total quantity of plutonium in the package.
- (c)
1. This general license applies only to packages that are labeled with a Criticality Safety Index, calculated by:

$$\text{CSI} = (10 / 24) \times (\text{grams } ^{239}\text{Pu} + \text{grams } ^{241}\text{Pu})$$
 where the CSI value is less than or equal to 100 and must be rounded up to the first decimal place.
 2. For a shipment of multiple packages containing Pu-Be sealed sources, the sum of the CSIs must be less than or equal to 50 (for shipment on a nonexclusive use conveyance) and less than or equal to 100 (for shipment on an exclusive use conveyance).

(d) The general license has a quality assurance program required by (22).

(13) **Assumptions as to Unknown Properties of Fissile Material.** When the isotopic abundance, mass, concentration, degree of irradiation, degree of moderation, or other pertinent property of fissile material in any package is not known, the licensee shall package the fissile material as if the unknown properties had credible values that will cause the maximum neutron multiplication.

(14) **External Radiation Standards For All Packages.**

(a) Except as provided in (14)(b), each package of radioactive materials offered for transportation must be designed and prepared for shipment so that under conditions normally incident to transportation the radiation level does not exceed 200 mrem/hr (2 mSv/hr) at any point on the external surface of the package, and the transport index does not exceed 10.

(b) A package that exceeds the radiation level limits specified in (14)(a) must be transported by exclusive use shipment only, and the radiation levels for such shipment must not exceed the following during transportation:

1. 200 mrem/hr (2 mSv/hr) on the external surface of the package, unless the following conditions are met, in which case the limit is 1,000 mrem/hr (10 mSv/hr):
 - (i) The shipment is made in a closed transport vehicle;
 - (ii) The package is secured within the vehicle so that its position remains fixed during transportation; and
 - (iii) There are no loading or unloading operations between the beginning and end of the transportation;
2. 200 mrem/hr (2 mSv/hr) at any point on the outer surface of the vehicle, including the top and underside of the vehicle; or in the case of a flat-bed style vehicle, at any point on the vertical planes projected from the outer edges of the vehicle, on the upper surface of the load or enclosure, if used, and on the lower external surface of the vehicle; and
3. 10 mrem/hr (0.1 mSv/hr) at any point two (2) meters (80 inches) from the outer lateral surfaces of the vehicle (excluding the top and underside of the vehicle); or in the case of a flat-bed style vehicle, at any point two (2) meters (6.6 feet) from the vertical planes projected by the outer edges of the vehicle (excluding the top and underside of the vehicle); and
4. 2 mrem/hr (0.02 mSv/hr) in any normally occupied space, except that this provision does not apply to private carriers, if exposed personnel under

their control wear radiation dosimetry devices in conformance with Rule [391-3-17-.03\(8\)\(b\)](#).

- (c) For shipments made under the provisions of (14)(b), the shipper will provide specific written instructions to the carrier for maintenance of the exclusive use shipment controls. The instructions must be included with the shipping paper information.
 - (d) The written instructions required for exclusive use shipments must be sufficient so that, when followed, they will cause the carrier to avoid actions that will unnecessarily delay delivery or unnecessarily result in increased radiation levels or radiation exposures to transport workers or members of the general public.
- (15) **Preliminary Determinations.** Prior to the first use of any packaging for the shipment of radioactive material:
- (a) The licensee shall ascertain that the determinations in [10 CFR 71.85\(a\) through \(c\)](#) have been made.
- (16) **Routine Determinations.** Prior to each shipment of licensed material, the licensee shall determine that:
- (a) The package is proper for the contents to be shipped;
 - (b) The package is in unimpaired physical condition except for superficial defects such as marks or dents;
 - (c) Each closure device of the packaging, including any required gasket, is properly installed and secured and free of defects;
 - (d) Any system for containing liquid is adequately sealed and has adequate space or other specified provision for expansion of the liquid;
 - (e) Any pressure relief device is operable and set in accordance with written procedures;
 - (f) The package has been loaded and closed in accordance with written procedures;
 - (g) For fissile material, any moderator or neutron absorber, if required, is present and in proper condition;
 - (h) Any structural part of the package which could be used to lift or tie down the package during transport is rendered inoperable for that purpose unless it satisfies design requirements specified by [10 CFR 71.45](#);

- (i) The level of non-fixed radioactive contamination on the external surfaces of each package offered for shipment is as low as reasonably achievable.
 1. The level of non-fixed radioactive contamination may be determined by wiping an area of 300 square centimeters of the surface concerned with an absorbent material, using moderate pressure, and measuring the activity on the wiping material. Sufficient measurements must be taken in the most appropriate locations to yield a representative assessment of the removable contamination levels. Except as provided in (16)(i)2., the amount of radioactivity measured on any single wiping material, when averaged over the surface wiped, must not exceed the limits given in Table 3 at any time during transport. Other methods of assessment of equal or greater efficiency may be used. When other methods are used, the detection efficiency of the method used must be taken into account and in no case may the removable contamination on the external surfaces of the package exceed 10 times the limits listed in Table 3.
 2. In the case of packages transported as exclusive use shipments by rail or highway only, the non-fixed radioactive contamination at any time during transport must not exceed 10 times the levels prescribed in (16)(i)1. The levels at the beginning of transport must not exceed the levels in (16)(i)1.;

Table 3

Maximum Permissible limits			
Contaminant	$\mu\text{Ci}/\text{cm}^2$	dpm/cm^2	Bq/cm^2
Beta-/gamma-emitting radionuclides; and low toxicity alpha emitters.....	10^{-5}	22	0.4
All other alpha-emitting radionuclides.....	10^{-6}	2.2	0.04

- (j) External radiation levels around the package and around the vehicle, if applicable, will not exceed 200 millirem per hour (2 mSv/hr) at any point on the external surface of the package at any time during transportation. The transport index shall not exceed 10.
- (k) For package transported as exclusive use by rail, highway, or water, radiation levels external to the package may exceed the limits specified in (16)(j). but shall not exceed any of the following:

1. 200 millirem per hour (2 mSv/hr) on the accessible external surface of the package unless the following conditions are met, in which case the limit is 1,000 millirem per hour (10 mSv/hr):
 - (i) The shipment is made in a closed transport vehicle,
 - (ii) Provisions are made to secure the package so that its position within the vehicle remains fixed during transportation, and
 - (iii) There are no loading or unloading operations between the beginning and end of the transportation;
 2. 200 millirem per hour (2 mSv/hr) at any point on the outer surface of the vehicle, including the top and underside of the vehicle, or, in the case of a flat-bed style vehicle with a personnel barrier⁵, at any point on the vertical planes projected from the outer edges of the vehicle, on the upper surface of the load (or enclosure, if used), and on the lower external surface of the vehicle;
 3. 10 millirem per hour (0.1 mSv/hr) at any point 2 meters from the vertical planes represented by the outer lateral surfaces of the vehicle; or in the case of a flat-bed style vehicle, at any point 2 meters from the vertical planes projected from the outer edges of the vehicle; and
 4. 2 millirem per hour (0.02 mSv/hr) in any normally occupied positions of the vehicle, except that this provision does not apply to private motor carriers when persons occupying these positions are provided with special health supervision, personnel radiation exposure monitoring devices, and training in accordance with [391-3-17-.07\(3\)](#) of this Chapter; and
 - (l) A package must be prepared for transport so that in still air at 100 degrees Fahrenheit (38 degrees Celsius) and in the shade, no accessible surface of a package would have a temperature exceeding 122 degrees Fahrenheit (50 degrees Celsius) in a nonexclusive use shipment or 185 degrees Fahrenheit (85 degrees Celsius) in an exclusive use shipment. Accessible package surface temperatures shall not exceed these limits at any time during transportation.
 - (m) A package may not incorporate a feature intended to allow continuous venting during transport.
- (17) **Air Transport of Plutonium.** Notwithstanding the provisions of any general licenses and notwithstanding any exemptions stated directly in this Rule or included indirectly by citation of the DOT regulations, as may be applicable, the licensee shall assure that plutonium in any form is not transported by air, or delivered to a carrier for air transport, unless:

- (a) The plutonium is contained in a medical device designed for individual human application;
 - (b) The plutonium is contained in a material in which the specific activity is not greater than the activity concentration values for plutonium as specified in Table 7, and in which the radioactivity is essentially uniformly distributed;
 - (c) The plutonium is shipped in a single package containing no more than an A2 quantity of plutonium in any isotope or form and is shipped in accordance with (5); or
 - (d) The plutonium is shipped in a package specifically authorized, in the certificate of compliance, issued by the Nuclear Regulatory Commission, for the shipment of plutonium by air and the licensee requires, through special arrangement with the carrier, compliance with [49 CFR 175.704](#), the US Department of Transportation regulations applicable to the air transport of plutonium.
- (18) **Opening instructions.** Before delivery of a package to a carrier for transport, the licensee shall ensure that any special instructions needed to safely open the package have been sent to, or otherwise made available to, the consignee for the consignee's use in accordance with Rule [391-3-17-.03\(12\)\(f\)](#).
- (19) **Shipment Records.** Each licensee shall maintain for a period of three years after shipment a record of each shipment of licensed material not exempt under (4), showing, where applicable:
- (a) Identification of the packaging by model number;
 - (b) Verification that there were no significant defects in the packaging, as shipped;
 - (c) Volume and identification of coolant;
 - (d) Type and quantity of licensed material in each package, and the total quantity of each shipment;
 - (e) Date of the shipment;
 - (f) Name and address of the transferee;
 - (g) Address to which the shipment was made; and
 - (h) Results of the determinations required by (16) and the conditions of the package approval.
 - (i) The licensee shall make available to the Division for inspection, upon reasonable notice, all records required by this part. Records are only valid if stamped, initialed, or signed and dated by authorized personnel, or otherwise authenticated.

- (j) The licensee shall maintain sufficient written records to furnish evidence of the quality of packaging. The records to be maintained include results of the determinations required by 391-3-17-.06(15) and [10 CFR 71.85](#); design, fabrication, and assembly records; results of reviews, inspections, tests, and audits; results of monitoring work performance and materials analyses; and results of maintenance, modification, and repair activities. Inspection, test, and audit records must identify the inspector or data recorder, the type of observation, the results, the acceptability, and the action taken in connection with any deficiencies noted. These records must be retained for 3 years after the life of the packaging to which they apply.
 - (k) For each item of irradiated fissile material -
 - 1. Identification by model number and serial number;
 - 2. Irradiation and decay history to the extent appropriate to demonstrate that its nuclear and thermal characteristics comply with license conditions; and
 - 3. Any abnormal or unusual condition relevant to radiation safety;
 - (l) For fissile packages and for Type B packages, any special controls exercised.
- (20) **Reports.** The licensee shall report to the Division within 30 days:
- (a) Any instance in which there is significant reduction in the effectiveness of any authorized packaging during use; and
 - (b) Details of any defects with safety significance in the packaging after first use, with the means employed to repair the defects and prevent their recurrence.
- (21) **Advance Notification of Transport of Nuclear Waste.**
- (a) As specified in paragraphs (b), (c), and (d) of this section, each licensee shall provide advance notification to the governor of a State, or the governor's designee⁶, of the shipment of licensed material, within or across the boundary of the State, before the transport, or delivery to a carrier, for transport, of licensed material outside the confines of the licensee's plant or other place of use or storage.
 - 1. As specified in paragraphs (b), (c), and (d) of this section, after June 11, 2013, each licensee shall provide advance notification to the Tribal official of participating Tribes referenced in paragraph (d)3.(iii) of this section, or the official's designee, of the shipment of licensed material, within or across the boundary of the Tribe's reservation, before the transport, or delivery to a carrier, for transport, of licensed material outside the confines of the licensee's plant or other place of use or storage.

- (b) Advance notification is also required when:
1. The licensed material is required to be in Type B packaging for transportation;
 2. The licensed material is being transported into, within, or through, a state en route to a disposal facility or to a collection point for transport to a disposal facility; and
 3. The quantity of licensed material in a single package exceeds the least of the following:
 - (i) 3000 times the A1 value of the radionuclides as specified in Table 7, for special form radioactive material;
 - (ii) 3000 times the A2 value of the radionuclides as specified in Table 7 for normal form radioactive material; or
 - (iii) 27,000 Ci (1000 TBq);
- (c) Each advance notification required by .06(21)(a) shall contain the following information:
1. The name, address, and telephone number of the shipper, carrier, and receiver of the shipment;
 2. A description of the nuclear waste contained in the shipment as required by [49 CFR 172.202](#) and [172.203\(d\)](#);
 3. The point of origin of the shipment and the seven-day period during which departure of the shipment is estimated to occur;
 4. The seven-day period during which arrival of the shipment at state boundaries or Tribal reservation boundaries is estimated to occur;
 5. The destination of the shipment, and the seven-day period during which arrival of the shipment is estimated to occur; and
 6. A point of contact with a telephone number for current shipment information.
- (d) Procedures for Submitting Advance Notification:
1. The notification required by .06(21)(a) shall be made in writing to the office of each appropriate governor, or governor's designee, to the office of each appropriate Tribal official or Tribal official's designee, and to the Division.

2. A notification delivered by mail must be postmarked at least seven days before the beginning of the seven-day period during which departure of the shipment is estimated to occur.
 3. A notification delivered by any other means than mail must reach the office of the governor or of the governor's designee or the Tribal official or Tribal official's designee at least four days before the beginning of the seven-day period during which departure of the shipment is estimated to occur.
 - (i) [Reserved]
 - (ii) The list of governor's designees and Tribal official's designees of participating Tribes will be published annually in the Federal Register on or about June 30th to reflect any changes in information.
 - (iii) A list of the names and mailing addresses of the governors' designees and Tribal officials' designees of participating Tribes, including telephone and mailing addresses of Tribal official's designees, is available on the NRC Web site at:
<https://scp.nrc.gov/special/designee.pdf>.
 4. A copy of the notification shall be retained by the licensee for three years.
- (e) A licensee who finds that schedule information previously furnished to a governor or governor's designee or a Tribal official or Tribal official's designee, in accordance with this section, will not be met, shall telephone a responsible individual in the office of the governor of the State or of the governor's designee or the Tribal official or the Tribal official's designee and inform that individual of the extent of the delay beyond the schedule originally reported. The licensee shall maintain a record of the name of the individual contacted for three years.
- (f) Each licensee who cancels a nuclear waste shipment for which advance notification has been sent shall send a cancellation notice to the governor of each State or to the governor's designee previously notified, each Tribal official or to the Tribal official's designee previously notified, and to the Division.
1. The licensee shall state in the notice that it is a cancellation and identify the advance notification that is being cancelled. The licensee shall retain a copy of the notice as a record for 3 years.

(22) Quality Assurance Requirements.

This paragraph describes quality assurance requirements applying to design, purchase, fabrication, handling, shipping, storing, cleaning, assembly, inspection, testing, operation, maintenance, repair, and modification of components of packaging that are important to safety. As used in this paragraph, "quality assurance" comprises all those planned and systematic actions necessary to provide adequate confidence that a system or component will perform satisfactorily in service. Quality assurance includes quality control, which comprises those quality assurance actions related to control of the physical characteristics and quality of the material or component to predetermined requirements. Each licensee is responsible for satisfying the quality assurance requirements that apply to its use of a packaging for the shipment of licensed material subject to this subpart.

- (a) Unless otherwise authorized by the Division, each licensee shall establish, maintain, and execute a quality assurance program to verify by procedures such as checking, auditing, and inspection that deficiencies, deviations, and defective material and equipment relating to the shipment of packages containing radioactive material are promptly identified and corrected.
- (b) The licensee shall identify the material and components to be covered by the quality assurance program.
- (c) Each licensee shall document the quality assurance program by written procedures or instructions and shall carry out the program in accordance with those procedures throughout the period during which packaging is used.
- (d) Prior to the use of any package for the shipment of radioactive material, each licensee shall obtain approval by the Division of its quality assurance program.
- (e) The licensee shall maintain sufficient written records to demonstrate compliance with the quality assurance program. Records of quality assurance pertaining to the use of a package for shipment of radioactive material shall be maintained for a period of three years after shipment.
- (f) Radiography containers. A program for transport container inspection and maintenance limited to radiographic exposure devices, source changers, or packages transporting these devices and meeting the requirements of rule [391-3-17-.04\(11\)\(d\) and \(e\)](#) or equivalent NRC or Agreement State requirement, is deemed to satisfy the requirements of 391-3-17-.06(7) and .06(22)(g).
- (g) Establishment of program. Each licensee shall establish, maintain, and execute a quality assurance program satisfying each of the applicable criteria of 391-3-17-.06(22) and satisfying any specific provisions that are applicable to the licensee's activities including procurement of packaging. The licensee shall execute the

applicable criteria in a graded approach to an extent that is commensurate with the quality assurance requirement's importance to safety.

(h) Approval of program.

1. Before the use of any package for the shipment of licensed material subject to this paragraph, each licensee shall obtain Division approval of its quality assurance program. Using an appropriate method listed in 391-3-17-.06(22), each licensee shall file a description of its quality assurance program, including a discussion of which requirements of this subpart are applicable and how they will be satisfied, by submitting the description to: Georgia Department of Natural Resources/Environmental Protection Division, Radioactive Materials Program, at 4244 International Parkway, Suite 120, Atlanta, Georgia 30354.

(i) Quality Assurance Organization

1. The licensee shall be responsible for the establishment and execution of the quality assurance program. The licensee may delegate to others, such as contractors, agents, or consultants, the work of establishing and executing the quality assurance program, or any part of the quality assurance program, but shall retain responsibility for the program. These activities include performing the functions associated with attaining quality objectives and the quality assurance functions.
2. The quality assurance functions are:
 - (i) Assuring that an appropriate quality assurance program is established and effectively executed; and
 - (ii) Verifying, by procedures such as checking, auditing, and inspection, that activities affecting the functions that are important to safety have been correctly performed.

(j) Changes to Quality Assurance Programs

1. Each quality assurance program approval holder shall submit, in accordance with the requirements of [391-3-17-.01\(13\)](#) and 391-3-17-.06(19), a description of a proposed change to its Georgia Department of Natural Resources Radioactive Materials Program approved quality assurance program that will reduce commitments in the program description as approved by the Georgia Department of Natural Resources Radioactive Materials Program. The quality assurance program approval holder shall not implement the change before receiving Georgia Department of Natural Resources Radioactive Materials Program approval.

(i) The description of a proposed change to the Georgia Department of Natural Resources Radioactive Materials Program approved quality assurance program must identify the change, the reason for the change, and the basis for concluding that the revised program incorporating the change continues to satisfy the applicable requirements of 391-3-17-.06(22).

(ii) [Reserved]

2. Each quality assurance program approval holder may change a previously approved quality assurance program without prior Georgia Department of Natural Resources Radioactive Materials Program approval, if the change does not reduce the commitments in the quality assurance program previously approved by the Georgia Department of Natural Resources Radioactive Materials Program. Changes to the quality assurance program that do not reduce the commitments shall be submitted to the Georgia Department of Natural Resources Radioactive Materials Program every 24 months, in accordance with [391-3-17-.01\(13\)](#). In addition to quality assurance program changes involving administrative improvements and clarifications, spelling corrections, and non-substantive changes to punctuation or editorial items, the following changes are not considered reductions in commitment:

(i) The use of a quality assurance standard approved by the Georgia Department of Natural Resources Radioactive Materials Program that is more recent than the quality assurance standard in the applicant's current quality assurance program at the time of the change;

(ii) The use of generic organizational position titles that clearly denote the position function, supplemented as necessary by descriptive text, rather than specific titles, provided that there is no substantive change to either the functions of the position or reporting responsibilities;

(iii) The use of generic organizational charts to indicate functional relationships, authorities, and responsibilities, or alternatively, the use of descriptive text, provided that there is no substantive change to the functional relationships, authorities, or responsibilities;

(iv) The elimination of quality assurance program information that duplicates language in quality assurance regulatory guides and quality assurance standards to which the quality assurance program approval holder has committed to on record; and

- (v) Organizational revisions that ensure that persons and organizations performing quality assurance functions continue to have the requisite authority and organizational freedom, including sufficient independence from cost and schedule when opposed to safety considerations.
3. Each quality assurance program approval holder shall maintain records of quality assurance program changes.

(k) Quality Assurance Records

1. The licensee shall maintain sufficient written records to describe the activities affecting quality. These records must include changes to the quality assurance program as required by 391-3-17-.06(22)(j), the instructions, procedures, and drawings required by [10 CFR 71.111](#) to prescribe quality assurance activities, and closely related specifications such as required qualifications of personnel, procedures, and equipment. The records must include the instructions or procedures that establish a records retention program that is consistent with applicable regulations and designates factors such as duration, location, and assigned responsibility. The licensee shall retain these records for 3 years beyond the date when the licensee last engage in the activity for which the quality assurance program was developed. If any portion of the quality assurance program, written procedures or instructions is superseded, the licensee shall retain the superseded material for 3 years after it is superseded.

(23) Determination of A_1 and A_2 .

- (a) Values of A_1 and A_2 for individual radionuclides, which are the bases for many activity limits elsewhere in these regulations, are given in Table 4. The curie (Ci) values specified are obtained by converting from the Terabecquerel (TBq) value. The curie values are expressed to three significant figures to assure that the difference in the TBq and Ci quantities is one tenth of one percent or less. Where values of A_1 or A_2 are unlimited, it is for radiation control purposes only. For nuclear criticality safety, some materials are subject to controls placed on fissile material.
- (b)
1. For individual radionuclides whose identities are known but are not listed in Table 4, the A_1 and A_2 values contained in Table 5 may be used. Otherwise, the licensee shall obtain prior Division approval of the A_1 and A_2 values for radionuclides not listed in Table 4, before shipping the material
 2. For individual radionuclides whose identities are known but are not listed in Table 7, the exempt material activity concentration and exempt consignment activity values contained in Table 5 may be used. Otherwise, the licensee shall obtain prior Division approval of the exempt material

activity concentration and exempt consignment activity values for radionuclides not listed in Table 7, before shipping the material.

- (c) In calculations of A_1 and A_2 for a radionuclide not in Table 4, a single radioactive decay chain, in which radionuclides are present in their naturally occurring proportions, and in which no daughter nuclide has a half-life either longer than 10 days, or longer than that of the parent nuclide, shall be considered as a single radionuclide, and the activity to be taken into account, and the A_1 and A_2 values to be applied shall be those corresponding to the parent nuclide of that chain. In the case of radioactive decay chains in which any daughter nuclide has a half-life either longer than ten days, or greater than that of the parent nuclide, the parent and those daughter nuclides shall be considered as a mixture of different nuclides.
- (d) Mixtures of radionuclides.
1. For mixture of radionuclides whose identities and respective activities are known, following conditions apply:

- (i) For a special form radioactive material, the maximum quantity transported in a Type A package is as follows:

$$\sum_i \frac{B(i)}{A_1(i)} \leq 1$$

where $B(i)$ is the activity of radionuclide i in special form, and $A_1(i)$ is the A_1 value for radionuclide i .

- (ii) For normal form radioactive material, the maximum quantity transported in a Type A package is as follows:

$$\sum_i \frac{B(i)}{A_2(i)} \leq 1$$

where $B(i)$ is the activity of radionuclide i in normal form, and $A_2(i)$ is the A_2 value for radionuclide i .

- (iii) If the package contains both special and normal form radioactive material, the activity that may be transported in a Type A package is as follows:

$$\sum_i \frac{B(i)}{A_1(i)} + \sum_j \frac{C(j)}{A_2(j)} \leq 1$$

where $B(i)$ is the activity of radionuclide i as special form radioactive material, $A_1(i)$ is the A_1 value for radionuclide i , $C(j)$ is the activity of radionuclide j as normal form radioactive material, and $A_2(j)$ is the A_2 value for radionuclide j .

- (iv) Alternatively, the A_1 value for mixtures of special form material may be determined as follows:

A_1 for mixture =

$$\frac{1}{\sum_i \frac{f(i)}{A_1(i)}}$$

where $f(i)$ is the fraction of activity for radionuclide i in the mixture and $A_1(i)$ is the appropriate A_1 value for radionuclide i .

- (v) Alternatively, the A_2 value for mixtures of normal form material may be determined as follows:

A_2 for mixture =

$$\frac{1}{\sum_i \frac{f(i)}{A_2(i)}}$$

where $f(i)$ is the fraction of activity for radionuclide i in the mixture and $A_2(i)$ is the appropriate A_2 value for radionuclide i .

- (e) The exempt activity concentration for mixtures of radionuclides may be determined as follows:

Exempt activity concentration for mixture =

$$\frac{1}{\sum_i \frac{f(i)}{[A](i)}}$$

where $f(i)$ is the fraction activity concentration of radionuclide i in the mixture and $[A](i)$ is the activity concentration for exempt material containing radionuclide i .

- (f) The activity limit for an exempt consignment for mixtures of radionuclides may be determined as follows:

Exempt consignment activity limit for mixture =

$$\frac{1}{\sum_i \frac{f(i)}{A(i)}}$$

where f(i) is the fraction of activity of radionuclide i in the mixture and [A] is the activity limit for exempt consignments for radionuclide i.

- (g)
1. When the identity of each radionuclide is known, but the individual activities of some of the radionuclides are not known, the radionuclides may be grouped, and the lowest A₁ or A₂ value, as appropriate, for the radionuclides in each group may be used in applying formulas above. Groups may be based on the total alpha activity and the total beta/gamma activity when these are known, using the lowest A₁ or A₂ values for the alpha emitters and beta/gamma emitters.
 2. When the identity of each radionuclide is known, but the individual activities of some of the radionuclides are not known, the radionuclides may be grouped, and the lowest [A] (activity concentration for exempt material) or A (activity limit for exempt consignment) value, as appropriate, for the radionuclides in each group may be used in applying the formulas in paragraph 391-3-17-.06(23). Groups may be based on the total alpha activity and the total beta/gamma activity when these are known, using the lowest [A] or A values for the alpha emitters and beta/gamma emitters, respectively.

Table 4- A₁ and A₂ VALUES FOR RADIONUCLIDES

Symbol of radionuclide	Element and atomic number	A ₁ (TBq)	A ₁ (Ci) ^b	A ₂ (TBq)	A ₂ (Ci) ^b	Specific activity

^a A₁ and/or A₂ values include contributions from daughter nuclides with half-lives less than 10 days as listed in Table 4-A.

^bThe values of A₁ and A₂ in Curies (Ci) are approximate and for information only; the regulatory standard units are Terabecquerels (TBq).

^c The activity of Ir-192 in special form may be determined from a measurement of the rate of decay or a measurement of the radiation level at a prescribed distance from the source.

^d These values apply only to compounds of uranium that take the chemical form of UF₆, UO₂F₂ and UO₂(NO₃)₂ in both normal and accident conditions of transport.

^e These values apply only to compounds of uranium that take the chemical form of UO₃, UF₄, UCl₄ and hexavalent compounds in both normal and accident conditions of transport.

^f These values apply to all compounds of uranium other than those specified in notes (d) and (e) of this table.

^g These values apply to unirradiated uranium only.

^h A₂ = 0.74 TBq (20 Ci) for Mo-99 for domestic use.

TABLE 5 - GENERAL VALUES FOR A₁ AND A₂

Contents	A ₁		A ₂		Activity concentration for exempt material (Bq/g)	Activity concentration for exempt material (Ci/g)	Activity limits for exempt consignments (Bq)	Activity limits for exempt consignments (Ci)
	(TBq)	(Ci)	(TBq)	(Ci)				

Only beta or gamma emitting radionuclides are known to be present	1×10^{-1}	2.7×10^0	2×10^{-2}	5.4×10^{-1}	1×10^1	2.7×10^{-10}	1×10^4	2.7×10^{-7}
Alpha emitting nuclides, but no neutron emitters, are known to be present ^a	2×10^{-1}	5.4×10^0	9×10^{-5}	2.4×10^{-3}	1×10^{-1}	2.7×10^{-12}	1×10^3	2.7×10^{-8}
Neutron emitting nuclides are known to be present or no relevant data are available	1×10^{-3}	2.7×10^{-2}	9×10^{-5}	2.4×10^{-3}	1×10^{-1}	2.7×10^{-12}	1×10^3	2.7×10^{-8}

^a If beta or gamma emitting nuclides are known to be present, the A₁ value of 0.1 TBq (2.7 Ci) should be used.

TABLE 6 - ACTIVITY-MASS RELATIONSHIPS FOR URANIUM

Uranium Enrichment ¹ wt % U-235 present	Specific Activity	
	TBq/g	Ci/g
0.45	1.8×10^{-8}	5.0×10^{-7}
0.72	2.6×10^{-8}	7.1×10^{-7}
1	2.8×10^{-8}	7.6×10^{-7}
1.5	3.7×10^{-8}	1.0×10^{-6}
5	1.0×10^{-7}	2.7×10^{-6}
10	1.8×10^{-7}	4.8×10^{-6}
20	3.7×10^{-7}	1.0×10^{-5}
35	7.4×10^{-7}	2.0×10^{-5}
50	9.3×10^{-7}	2.5×10^{-5}
90	2.2×10^{-6}	5.8×10^{-5}

93	2.6×10^{-6}	7.0×10^{-5}
95	3.4×10^{-6}	9.1×10^{-5}

¹ The figures for uranium include representative values for the activity of the uranium-234 that is concentrated during the enrichment process.

Table 7 - EXEMPT MATERIAL ACTIVITY CONCENTRATIONS AND EXEMPT CONSIGNMENT ACTIVITY LIMITS FOR RADIONUCLIDES

Rule 391-3-17-.07. Notices, Instructions, and Reports To Workers: Inspection and Investigations.

- (1) **Purpose and Scope.** This Rule, 391-3-17-.07, establishes requirements for notices, instructions, and reports by licensees to individuals engaged in activities under a license and options available to such individuals in connection with Division inspections of licensees to ascertain compliance with the provisions of the Act and Regulations, Orders, and licenses issued thereunder regarding radiological working conditions. The Regulations in this Rule apply to all persons who receive, possess, use, own, or transfer sources of radiation licensed by the Director pursuant to Rules [391-3-17-.02](#), .04, .05, .08, and .09.
- (2) **Posting of Notices to Workers.**
 - (a) Each licensee shall post current copies of the following documents:
 1. This Rule and Rule [391-3-17-.03](#) of this Chapter;
 2. The license, license conditions and documents incorporated into the license by reference and amendments thereto;
 3. The operating procedures applicable to activities under the license; and
 4. Any notice of violation involving radiological working conditions, proposed imposition of civil penalty, or Order issued pursuant to this Chapter, and any response from the licensee.
 - (b) If posting of a document specified in (2)(a)1., 2., or 3. of this Rule is not practicable, the licensee may post a notice which describes the document and states where it may be examined.
 - (c) Division's form "Notice to Employees" shall be posted by each licensee.

- (d) Division documents posted pursuant to (2)(a)4. of this Rule shall be posted within 5 working days after receipt of the documents from the Division; the licensee's response, if any, shall be posted within five working days after dispatch from the licensee. Such documents shall remain posted for a minimum of five working days or until action correcting the violation has been completed, whichever is later.
- (e) Documents, notices, or forms posted pursuant to (2) of this Rule shall appear in a sufficient number of places to permit individuals engaged in work under the license to observe them on the way to or from any particular work location to which the document applies, shall be conspicuous and shall be replaced if defaced or altered.

(3) Instructions to Workers.

- (a) All individuals who in the course of employment are likely to receive in a year an occupational dose in excess of 100 mrem (1 mSv) shall be:
 - 1. Kept informed of the storage, transfer, or use of sources of radiation in the licensee's facility;
 - 2. Instructed in the health protection problems associated with exposure to radiation or radioactive material to the individual and potential offspring, in precautions or procedures to minimize exposure, and in the purposes and functions of protective devices employed;
 - 3. Instructed in, and instructed and required to observe, to the extent within the workers' control, the applicable provisions of this Chapter and the license for the protection of personnel from exposures to radiation or radioactive material;
 - 4. Instructed of their responsibility to report promptly to the licensee any condition which may constitute, lead to, or cause a violation of the Act, this Chapter, and the license or unnecessary exposure to radiation or radioactive material;
 - 5. Instructed in the appropriate response to warnings made in the event of any unusual occurrence or malfunction that may involve exposure to radiation or radioactive material; and
 - 6. Advised as to the radiation exposure reports which workers shall be furnished pursuant to (4) of this Rule.
- (b) In determining those individuals subject to the requirements of (3)(a) above, licensees must take into consideration assigned activities during normal and abnormal situations involving exposure to radiation or radioactive material which can reasonably be expected to occur during the life of the facility. The extent of

these instructions shall be commensurate with potential radiological health protection problems present in the workplace.

(4) Notifications and Reports to Individuals.

- (a) Radiation exposure data for an individual and the results of any measurements, analyses, and calculations of radioactive material deposited or retained in the body of an individual, when required by Rule [391-3-17-.03\(8\)\(b\)](#) of this Chapter, shall be reported to the individual as specified in (4) of this Rule. The information reported shall include data and results obtained pursuant to this Chapter, Orders, or license conditions, as shown in records maintained by the licensee pursuant to this Chapter. Each notification and report shall:
1. Be in writing;
 2. Include appropriate identifying data such as the name of the licensee, the name of the individual, and the individual's identification number, preferably social security number;
 3. Include the individual's exposure information; and
 4. Contain the following statement: "This report is furnished to you under the provisions of Rule 391-3-17-.07. You should preserve this report for further reference."
- (b) Each licensee shall furnish to each worker annually a written report of the worker's dose as shown in records maintained by the licensee pursuant to Rule [391-3-17-.03\(14\)\(g\)](#) of this Chapter. The licensee shall provide an annual report to each individual monitored under .03(8)(b) of the dose received in that monitoring year if:
1. The individual's occupational dose exceeds 1 mSv (100 mrem) TEDE or 1 mSv (100 mrem) to any individual organ or tissue; or
 2. The individual requests his or her annual dose report.
- (c) Each licensee shall furnish a written report of a worker's exposure to sources of radiation at the request of the worker formerly engaged in activities controlled by the licensee. The report shall include the dose record for each year the worker was required to be monitored pursuant to Rule [391-3-17-.03\(8\)\(b\)](#). Such report shall be furnished within 30 days from the date of the request, or within 30 days after the dose of the individual has been determined by the licensee, whichever is later. The report shall cover the period of time that the worker's activities involved exposure to sources of radiation and shall include the dates and locations of work under the license in which the worker participated during this period.

- (d) When a licensee is required pursuant to Rule [391-3-17-.03\(15\)\(b\), \(c\), and \(d\)](#) of this Chapter to report to the Division any exposure of an individual to radiation or radioactive material, the licensee shall also provide the individual a report on his or her exposure data included in the report to the Division. Such reports shall be transmitted at a time not later than the transmittal to the Division.
- (e) At the request of a worker who is terminating employment with the licensee in work involving exposure to radiation or radioactive material, during the current year, each licensee shall provide at termination to each such worker, or to the worker's designee, a written report regarding the radiation dose received by that worker from operations of the licensee during the current year or fraction thereof. If the most recent individual monitoring results are not available at that time, a written estimate of the dose shall be provided together with a clear indication that this is an estimate.

(5) Presence of Representatives of Licensees and Workers During Inspection.

- (a) Each licensee shall afford to the Division at all reasonable times opportunity to inspect materials, activities, facilities, premises, and records pursuant to this Chapter.
- (b) During an inspection, Division inspectors may consult privately with workers as specified in (6) of this Rule. The licensee may accompany Division inspectors during other phases of an inspection.
- (c) If, at the time of inspection, an individual has been authorized by the workers to represent them during Division inspections, the licensee shall notify the inspectors of such authorization and shall give the workers' representative an opportunity to accompany the inspectors during the inspection of physical working conditions.
- (d) Each workers' representative shall be routinely engaged in work under control of the licensee and shall have received instructions as specified in (3) of this Rule.
- (e) Different representatives of the licensee and workers may accompany the inspectors during different phases of an inspection if there is no resulting interference with the conduct of the inspection. However, only one workers' representative at a time may accompany the inspectors.
- (f) With the approval of the licensee and the workers' representative, an individual who is not routinely engaged in work under control of the licensee, for example, a consultant to the licensee or to the workers' representative, shall be afforded the opportunity to accompany Division inspectors during the inspection of physical working conditions.
- (g) Notwithstanding the other provisions of (5) of this Rule, Division inspectors are authorized to refuse to permit accompaniment by any individual who deliberately

interferes with a fair and orderly inspection. With regard to areas containing information classified by an agency of the U.S. Government in the interest of national security, an individual who accompanies an inspector may have access to such information only if authorized to do so. With regard to any area containing proprietary information, the workers' representative for that area shall be an individual previously authorized by the licensee to enter that area.

(6) Consultation with Workers During Inspections.

- (a) Division inspectors may consult privately with workers concerning matters of occupational radiation protection and other matters related to applicable provisions of this Chapter and the license to the extent the inspectors deem necessary for the conduct of an effective and thorough inspection.
- (b) During the course of an inspection, any worker may bring privately to the attention of the inspectors, either orally or in writing, any past or present condition which the worker has reason to believe may have contributed to or caused any violation of the Act, this Chapter, or license conditions, or any unnecessary exposure of an individual to sources of radiation under the licensee's control. Any such notice in writing shall comply with the requirements of (7)(a) of this Rule.
- (c) The provisions of (6)(b) of this Rule shall not be interpreted as authorization to disregard instructions pursuant to (3) of this Rule.

(7) Requests by Workers for Inspections

- (a) Any worker or representative of workers believing that a violation of the Act, this Chapter, or license conditions exists or has occurred in work under a license with regard to radiological working conditions in which the worker is engaged may request an inspection by giving notice of the alleged violation to the Division's Radioactive Materials Program. Any such notice shall be in writing, shall set forth the specific grounds for the notice, and shall be signed by the worker or representative of the workers. A copy shall be provided to the licensee by the Division no later than at the time of inspection except that, upon the request of the worker giving such notice, such worker's name and the name of individuals referred to therein shall not appear in such copy or on any record published, released, or made available by the Division, except for good cause shown.
- (b) If, upon receipt of such notice, the Division determines that the complaint meets the requirements set forth in (7)(a) of this Rule, and that there are reasonable grounds to believe that the alleged violation exists or has occurred, an inspection shall be made as soon as practicable to determine if such alleged violation exists or has occurred. Inspections pursuant to (7) of this Rule need not be limited to matters referred to in the complaint.

- (c) No licensee or contractor or subcontractor of a licensee shall discharge or in any manner discriminate against any worker because such worker has filed any complaint or instituted or caused to be instituted any proceeding under this Chapter or has testified or is about to testify in any such proceeding or because of the exercise by such worker on behalf of such worker or others of any option afforded by this Rule.

(8) Inspections Not Warranted; Informal Review

- (a) If the Division's Radioactive Materials Program determines, with respect to a complaint under (7) of this Rule, that an inspection is not warranted because there are no reasonable grounds to believe that a violation exists or has occurred, the Radioactive Materials Program shall notify the complainant in writing of such determination. Such determination shall be without prejudice to the filing of a new complaint meeting the requirements of (7)(a) of this Rule. The complainant may obtain review of such determination by submitting a written statement of position with the Director of the Environmental Protection Division. The Division will provide the licensee with a copy of such statement by certified mail, excluding, at the request of the complainant, the name of the complainant. The licensee may submit an opposing written statement of position to the Director of the Environmental Protection Division who will provide the complainant with a copy of such statement by certified mail.
- (b) Upon the request of the complainant, the Director of the Environmental Protection Division may hold an informal conference in which the complainant and the licensee may orally present their views. An informal conference may also be held at the request of the licensee, but disclosure of the identity of the complainant will be made only following receipt of written authorization from the complainant. After considering all written and oral views presented, the Director of the Environmental Protection Division shall affirm, modify, or reverse the determination of the Manager of Radioactive Materials Program, and furnish the complainant and the licensee a written notification of the decision and the reason for it.

Rule 391-3-17-.08. Regulation and Licensing of Naturally-Occurring Radioactive Materials (NORM).

- (1) **Purpose.** This Rule, 391-3-17-.08, establishes radiation protection standards for the possession, use, transfer, and disposal of naturally-occurring radioactive materials (NORM) not subject to regulation under the Atomic Energy Act of 1954, as amended. All numbered and lettered references within this Rule refer to parts of this Rule, unless stated otherwise.
- (2) **Scope.**
 - (a) This Rule applies to any person who engages in the extraction, mining, storage, beneficiating, processing, use, transfer, or disposal of NORM in such a manner as to alter the chemical properties or physical state of the NORM or its potential exposure pathways to humans.
 - (b) This Rule addresses the introduction of NORM into products in which neither the NORM nor the radiation emitted from the NORM is considered to be beneficial to the products. The manufacture and distribution of products containing NORM in which the NORM and/or its associated radiation(s) is considered to be a beneficial attribute are licensed under the provisions of Rule .02 of this Chapter.
 - (c) This Rule also addresses waste management and disposal standards.
- (3) **Definitions.** As used in this Rule, the following definitions apply:
 - (a) "Beneficial attribute" or "Beneficial to the product" means that the radioactivity of the product is necessary to the use of the product.
 - (b) "Beneficiating" means the processing of materials for the purpose of altering the chemical or physical properties to improve the quality, purity, or assay grade.
 - (c) "General environment" means the total terrestrial, atmospheric, and aquatic environments outside sites within which any activity, operation, or process authorized by a general or specific license issued under this Rule is performed.
 - (d) "Naturally-occurring radioactive material" (NORM) means any nuclide which is radioactive in its natural physical state (i.e., not man-made), but does not include byproduct, source, or special nuclear material.
 - (e) "Product" means something produced, made, manufactured, refined, or beneficiated.
 - (f) "Recycling" means a process by which materials that have served their intended use are collected, separated, or processed and returned to use in the form of raw materials in the production of new products. Recycling shall not include the use of a material in a manner that constitutes disposal in accordance with Rule .03(12).

- (g) "Technologically-enhanced" means the chemical properties or physical state of natural sources of radiation have been altered or the potential exposure pathways of natural sources of radiation to humans have been altered.
- (h) "Working Level" (WL) means any combination of short-lived radon decay products in one liter of air that will result in the ultimate emission of alpha particles with a total energy of 130 billion electron volts ($2.1 \times 10^{-8}\text{J}$).

(4) Exemptions.

- (a) Persons who receive, possess, use, process, store, transfer, commercially distribute, or dispose of NORM are exempt from the requirements of this Chapter if the materials contain or are contaminated by concentrations of:
 1. Either:
 - (i) 30 picocuries (1.11 Bq) per gram or less of technologically-enhanced radium-226 or radium-228 in soil, averaged over any 100 square meters and averaged over the first 15 centimeters of soil below the surface, provided that the radon emanation rate is less than 20 pCi (.74 Bq) per square meter per second, or
 - (ii) 30 pCi (1.11 Bq) per gram or less of technologically-enhanced radium-226 or radium-228 in media other than soil, provided that the radon emanation rate is less than 20 pCi (.74 Bq) per square meter per second;
 2. Either:
 - (i) 5 pCi (.185 Bq) per gram or less of technologically-enhanced radium-226 or radium-228 in soil, averaged over any 100 square meters and averaged over the first 15 centimeters of soil below the surface, in which the radon emanation rate is equal to or greater than 20 pCi (.74 Bq) per square meter per second, or
 - (ii) 5 pCi (.185 Bq) per gram or less of technologically-enhanced radium-226 or radium-228 in media other than soil, in which the radon emanation rate is equal to or greater than 20 pCi (.74 Bq) per square meter per second; or
 3. Either:
 - (i) 150 pCi (5.55 Bq) or less per gram of any other NORM radionuclide in soil, averaged over any 100 square meters and averaged over the first 15 centimeters of soil below the surface, provided that these concentrations are not exceeded at any time, or

- (ii) 150 pCi (5.55 Bq) or less per gram of any other NORM radionuclide in media other than soil, provided that these concentrations are not exceeded at any time.
- (b) Persons who receive products or materials containing NORM distributed in accordance with a specific license issued by the Director pursuant to (12)(c) are exempt from this Chapter.
- (c) The manufacturing, commercial distribution, use, and disposal of the following products/materials are exempt from the requirements of this Chapter:
 - 1. Potassium and potassium compounds which have not been isotopically enriched in the radionuclide K-40;
 - 2. Brazil nuts; and
 - 3. Byproducts from fossil fuel combustion (bottom ash, fly ash, and flue-gas emission control byproducts);
 - 4. Materials used for building and highway construction, industrial processes, sand blasting, metal casings, or other material containing NORM, in which the radionuclide content has not been concentrated to levels higher than found in its natural state.
- (d) The wholesale and retail distribution (including custom blending), possession, and use of the following products/materials are exempt from the requirements of this Chapter:
 - 1. Phosphate and potash fertilizer;
 - 2. Phosphogypsum for agricultural uses; and
 - 3. Materials used for building and highway construction, industrial processes, sand blasting, metal casings, or other material containing NORM, in which the radionuclide content has not been concentrated to levels higher than found in its natural state.
- (e) The possession, storage, transportation, commercial distribution, and use of natural gas and natural gas products and crude oil and crude oil products as a fuel are exempt from the requirements of this Chapter. The distribution of natural gas and crude oil and the manufacturing and distribution of natural gas and crude oil products are exempt from the specific license requirements of this Rule but are subject to the general license requirements in (7), (8), and (9).

- (f) Materials in the recycling process, including scale or residue not otherwise exempted, and other equipment containing NORM are exempt from the requirements of this Rule if the maximum radiation exposure level does not exceed 50 microroentgens per hour including the background radiation level at any accessible point.
- (g) Possession of produced waters from crude oil and natural gas production is exempt from the requirements of this Rule if the produced waters are reinjected in a well approved by the Division or if the produced waters are discharged under the authority of the Division.

(5) Radiation Survey Instruments.

- (a) Radiation survey instruments used to determine exemptions pursuant to (4)(f) and radiation survey instruments used to make surveys in accordance with (7) shall be able to measure from 1 microroentgen per hour through at least 500 microroentgens per hour.
- (b) Radiation survey instruments used to make surveys required by this Rule shall be calibrated, appropriate, and operable.
- (c) Each radiation survey instrument shall be calibrated:
 - 1. By a person licensed by the Director, another Agreement State or by the U.S. Nuclear Regulatory Commission to perform such service;
 - 2. At energies appropriate for the licensee's use;
 - 3. At intervals not to exceed 12 months, and after each instrument servicing other than battery replacement; and
 - 4. To demonstrate an accuracy within plus or minus 20 percent using a reference source provided by a person authorized pursuant to (5)(c)1.
- (d) Records of these calibrations shall be maintained for Division inspection for 5 years after the calibration date.

(6) Effective Date. The provisions and requirements of this Rule shall take effect upon March 26, 1994, and shall apply to all facilities or sites owned or controlled by a person on that date. Products distributed and disposals made prior to that date are not subject to the provisions of this Rule.

(7) General License.

- (a) A general license is hereby issued to mine, extract, receive, possess, own, use, store, transfer, process, and dispose of NORM not exempted in (4) without regard

to quantity. This general license does not authorize the manufacturing or commercial distribution of products containing NORM in concentrations greater than those specified in (4) nor the disposal of wastes from other persons.

- (b) Facilities and equipment contaminated with NORM in excess of the levels set forth in the Appendix of this Rule shall not be released for unrestricted use. The decontamination of equipment and facilities shall be performed only by persons specifically licensed by the Director to conduct such work. Each general licensee shall establish written procedures for the evaluation (or screening) of equipment, components, and facilities prior to release for unrestricted use to ensure that the levels in this Appendix are not exceeded.
- (c) No person shall transfer land for unrestricted use where the concentration of radium-226 or radium-228 in soil averaged over any 100 square meters exceeds the background level by more than:
 - 1. 5 pCi/g (185 Bq/kg), averaged over the first 15 cm of soil below the surface; and
 - 2. 15 pCi/g (555 Bq/kg), averaged over 15 cm thick layers of soil more than 15 cm below the surface.
- (d) The handling or processing by a general licensee of NORM-contaminated materials not otherwise exempted from these Rules for the purpose of recycling is authorized by the Division if the radiation level 18 inches from the NORM-contaminated material does not exceed 2 millirem per hour.
- (e) Equipment contaminated with NORM in excess of the levels set forth in the Appendix of this Rule may be released for maintenance and/or overhaul provided the recipient is specifically licensed to perform the activity on contaminated equipment.
- (f) The decontamination of equipment, facilities, and land, as described in (10)(b), shall only be performed by persons specifically licensed by the Director to conduct such work.
- (g) Transfer of NORM
 - 1. The transfer of NORM not exempt from this Chapter from one general licensee to another general licensee may be authorized by the Division if:
 - (i) The equipment and facilities contaminated with NORM are to be used by the recipient for the same purpose or at the same time,

- (ii) The transfer of control or ownership of land contaminated with NORM includes an annotation in the deed records to indicate the presence of NORM,
- (iii) The materials being transferred are ores or raw materials for processing or refinement, or
- (iv) The material being transferred is in the recycling process.

- 2. Transfers made under (7)(g)1. do not relieve the general licensee who makes the transfer from the responsibilities of assessing the extent of NORM contamination or material present, evaluating the hazards of the NORM, informing the general licensee receiving the NORM of these assessments and evaluations, and maintaining records required by this Chapter.

(8) **Protection of Workers and the General Population During Operations.** Each person subject to a general license in (7) or to a specific license shall conduct operations in compliance with the standards for radiation protection set forth in Rules .03 and .07 of this Chapter, except for disposal, which shall be governed by (9).

(9) **Disposal and Transfer of Waste for Disposal.**

- (a) Each person subject to the general license in (7) or a specific license shall manage and dispose of wastes containing NORM:
 - 1. In accordance with the applicable requirements of the U.S. Environmental Protection Agency for disposal of such wastes;
 - 2. In a manner equivalent to the requirements for uranium and thorium byproduct materials in 40 CFR 192;
 - 3. By transfer of the wastes for disposal to a land disposal facility licensed by the U.S. Nuclear Regulatory Commission or an Agreement State; or
 - 4. In accordance with alternate methods authorized by the Division upon application or upon the Division's initiative.
- (b) Records of disposal, including manifests, shall be maintained pursuant to the provisions of Rule .03 of this Chapter.
- (c) Transfers of waste containing NORM for disposal shall be made only to a person specifically authorized to receive such waste.

(10) **Specific Licenses.**

- (a) Unless otherwise exempted under the provisions of (4) or licensed under the provisions of Rule .02 of this Chapter, the manufacturing and commercial distribution of any material or product containing NORM shall be specifically licensed pursuant to the requirements of this Rule or pursuant to equivalent regulations of the U.S. Nuclear Regulatory Commission or another Agreement State.
- (b) Persons conducting the following activities involving equipment or facilities contaminated with NORM in excess of the levels set forth in the Appendix of this Rule or land contaminated in excess of the limits set forth in (7)(c) shall be specifically licensed pursuant to the requirements of this Rule:
 - 1. Decontamination of equipment, facilities, and land; or
 - 2. Disposal or storage of the resulting waste.

(11) Filing Application for Specific Licenses.

- (a) Applications for specific licenses shall be filed in a manner and on a form prescribed by the Division.
- (b) The Division may at any time after the filing of the original application, and before the expiration of the license, require further statements in order to enable the Division to determine whether the application should be granted or denied or whether a license should be modified or revoked.
- (c) Each application shall be signed by the applicant or licensee or a person duly authorized to act for and on behalf of the licensee.
- (d) An application for a specific license may include a request for a license authorizing one or more activities.
- (e) In an application, the applicant may incorporate by reference information contained in previous applications, statements, or reports filed with the Division provided such references are clear and specific by page and paragraph.
- (f) Applications and documents submitted to the Division may be made available for public inspection pursuant to the open records act, O.C.G.A. Section [50-18-70](#), et seq., except that the Division may withhold any document or part thereof from public inspection if disclosure of its contents is not required by law.

(12) Requirements for the Issuance of Specific Licenses.

- (a) An application for a specific license will be approved if the Division determines that:

1. The applicant is qualified by reason of training and experience to use the NORM in question for the purpose requested in accordance with these Rules in such a manner as to minimize danger to public health and safety, the environment, or property;
2. The applicant's proposed equipment, facilities, and procedures are adequate to minimize danger to public health and safety, the environment, and property;
3. The issuance of the license will not be inimical to the health and safety of the public;
4. The applicant satisfied any applicable special requirement in this Rule;
5. The applicant has met the financial surety requirements of (21); and
6. The applicant has appointed a qualified Radiation Safety Officer (RSO). The applicant, through the RSO, shall ensure that Radiation Safety activities are being performed in accordance with approved procedures and regulatory requirements in the daily operation of the applicant's program.
 - (i) The Radiation Safety Officer shall:
 - (I) Investigate overexposures, accidents, spills, losses, thefts, unauthorized receipts, uses, transfers, and disposals, and other deviations from approved radiation safety practices. The RSO shall have the authority to assume control and implement corrective actions, including shut down of operations when emergency or unsafe conditions exist.
 - (II) Have a thorough knowledge of the licensee's management policies and administrative procedures.
 - (III) Implement policies and procedures for:
 - I. Keeping an inventory record of radioactive material;
 - II. Using radioactive material safely and in accordance with the ALARA philosophy;
 - III. Taking emergency action if control of radioactive material is lost;
 - IV. Performing periodic radiation surveys;

- V. Performing checks and calibrations of survey instruments and other safety equipment;
- VI. Disposing of radioactive material;
- VII. Training personnel who work in or frequent areas where radioactive material is used or stored; and
- VIII. Keeping a copy of all records and reports required by the Regulations, a copy of this Chapter, a copy of each licensing request, the license and its amendments, and the written policy and procedures required by the Regulations.

- (ii) The RSO's qualifications shall be submitted to the Division and shall include:
 - (I) Possession of a high school diploma or a certificate of high school equivalency based on the GED test;
 - (II) Completion of the training and testing requirements of the activities for which the license application is submitted; and
 - (III) Training and experience necessary to supervise the Radiation Safety aspects of the licensed activity.

- (b) An application for a specific license to decontaminate equipment, land, or facilities contaminated with NORM in excess of the levels set forth in (4), (7)(c), or the Appendix of this Rule, as applicable, and to dispose of the resulting waste will be approved if:
 - 1. The applicant satisfies the general requirements specified in (12)(a); and
 - 2. The applicant has adequately addressed the following items in the application:
 - (i) Procedures and equipment for monitoring and protection of workers;
 - (ii) An evaluation of the radiation levels and concentrations of contamination expected during normal operations;

- (iii) Operating and emergency procedures, including procedures for waste reduction and quality assurance of items released for unrestricted use; and
 - (iv) Method of disposing of the NORM removed from contaminated equipment, facilities, and/or land.

- (c) An application for a specific license to manufacture and/or distribute products or materials containing NORM to persons exempted from this Chapter pursuant to (4)(b) will be approved if:
 - 1. The applicant satisfied the general requirements specified in (12)(a);
 - 2. The NORM is not contained in any food, beverage, cosmetic, drug, or other commodity designed for ingestion or inhalation by, or application to, a human being without approval by the U.S. Food and Drug Administration; and
 - 3. The applicant submits sufficient information relating to the design, manufacture, prototype testing, quality control procedures, labeling or marking, and conditions of handling, storage, use, and disposal of the NORM material or product to demonstrate that the material or product will meet the safety criteria set forth in (13). The information shall include:
 - (i) A description of the material or product and its intended use or uses;
 - (ii) The type, quantity, and concentration of NORM in each material or product;
 - (iii) The chemical and physical form of the NORM in the material or product, and changes in chemical and physical form that may occur during the useful life of the material or product;
 - (iv) An analysis of the solubility in water and body fluids of the NORM in the material or product;
 - (v) The details of manufacture and design of the material or Rule product relating to containment and shielding of the NORM and other safety features under normal and severe conditions of handling, storage, use, reuse, and disposal of the material or product;
 - (vi) The type and degree of access of human beings to the material or product during normal handling, use, and disposal;

- (vii) The total quantity of NORM expected to be distributed annually in the material or product;
 - (viii) The expected useful life of the material or product;
 - (ix) The proposed method of labeling or marking each unit of the material or product with identification of the manufacturer and/or initial transferor of the product and the radionuclide(s) and quantity of NORM in the material or product;
 - (x) The procedures for prototype testing of the material or product to demonstrate the effectiveness of the containment, shielding, and other safety features under both normal and severe conditions of handling, storage, use, reuse, and disposal;
 - (xi) The results of the prototype testing of the material or product, including any change in the form of the NORM contained in it, the extent to which the NORM may be released to the environment, any change in radiation levels, and any other changes in safety features;
 - (xii) The estimated external radiation doses and dose commitments relevant to the safety criteria in (13) and the basis for such estimates;
 - (xiii) A determination that the probabilities with respect to doses referred to in (13) meet the safety criteria;
 - (xiv) The quality control procedures to be followed in the production of production lots of the material or product, and the quality control standards the material or product will be required to meet; and
 - (xv) Any additional information, including experimental studies and tests, required by the Division to facilitate a determination of the radiation safety of the material or product.
- (d) Notwithstanding the provisions of (13)(b), the Director may deny an application for a specific license if the end uses of the product are frivolous or cannot be reasonably foreseen.

(13) Safety Criteria for Specific Licenses.

An applicant for a specific license under (12)(c) shall demonstrate that the product is designed and will be manufactured so that:

- (a) In normal use, handling, storage, and disposal, the dose to any individual likely to be exposed to radiation from the material or product will not exceed the limits set forth in Rule .03 of this Chapter.
- (b) In normal use, disposal, handling, and storage, it is unlikely that the radon released from the material or product will result in an increase in the average radon concentration in air of more than 0.4 picocurie (.0148 Bq) per liter.
- (c) It is unlikely that there will be a significant reduction in the effectiveness of the containment, shielding, or other safety features of the material or product from wear and abuse likely to occur in normal handling and use of the material or product during its useful life.

(14) Issuance of Specific Licenses.

- (a) Upon a determination that an application meets the requirements of the Act and Rules of the Division, the Director will issue a specific license authorizing the proposed activity in such form and containing such conditions and limitations as it deems appropriate or necessary.
- (b) The Director may incorporate in any license at the time of issuance, or thereafter by amendment, such additional requirements and conditions with respect to the licensee's receipt, possession, use, and transfer of NORM subject to this Rule as it deems appropriate or necessary in order to:
 - 1. Minimize danger to public health and safety, to property, and to the environment;
 - 2. Require such reports, require the keeping of such records, and to provide for such inspections of activities under the license as may be appropriate or necessary; and
 - 3. Prevent loss or theft of NORM subject to this Rule.

(15) Conditions of Specific Licenses Issued Under (12).

- (a) General Terms and Conditions
 - 1. Each license issued pursuant to this Rule shall be subject to all the provisions of the Act, now or hereafter in effect, and to all Rules, Regulations, and Orders of the Director.

2. No license issued or granted under this Rule and no right to possess or utilize NORM granted by any license issued pursuant to this Rule shall be transferred, assigned, or in any manner disposed of, either voluntarily or involuntarily, directly or indirectly, through transfer of control of any license to any person unless the Division shall, after securing full information, find that the transfer is in accordance with the provisions of the Act, and shall give its consent in writing.
 3. Each person licensed by the Director pursuant to this Rule shall confine use and possession of the NORM licensed to the locations and purposes authorized in the license.
 4. Each person licensed by the Director pursuant to this Rule is subject to the license provisions of (8) and (9).
 5. Notification
 - (i) Each licensee shall notify the Division in writing, immediately following the filing of a voluntary or involuntary petition for bankruptcy under the Chapters of Title 11 (Bankruptcy) of the United States Code (11 U.S.C.) by or against:
 - (I) A licensee;
 - (II) An entity [as that term is defined in [11 U.S.C. 101\(14\)](#)] controlling a licensee or listing the license or licensee as property of the estate; or
 - (III) An affiliate [as that term is defined in [11 U.S.C. 101\(2\)](#)] of the licensee.
 - (ii) This notification must indicate:
 - (I) The bankruptcy court in which the petition for bankruptcy was filed; and
 - (II) The date of the filing of the petition.
- (b) Quality Control, Labeling, and Reports of Transfer. Each person listed under (12)(c) shall:
1. Carry out adequate control procedures in the manufacture of the material or product to assure that each production lot meets the quality control standards approved by the Division;

2. Label or mark each unit so that the manufacturer, processor, producer, or initial transferor of the material or product and the NORM in the material or product can be identified; and
3. Maintain records identifying, by name and address, each person to whom NORM is transferred for use under (4)(b) or the equivalent regulations of the U.S. Nuclear Regulatory Commission or another Agreement State and stating the kinds, quantities, and uses of the NORM transferred. An annual summary report stating the total quantity of each radionuclide transferred under the specific license shall be filed with the Division. Each report shall cover the year ending December 31, and shall be filed within 30 days thereafter. If no transfers of NORM have been made pursuant to (13)(c) during the reporting period, the report shall so indicate.

(16) Expiration and Termination of Specific Licenses.

- (a) Except as provided in (17)(b) and (16)(d)6., each specific license shall expire at the end of the specified day in the month and year stated therein.
- (b) Each licensee shall notify the Division immediately, in writing, and request termination of the license when the licensee decides to terminate all activities involving NORM authorized under the specific license or when the licensee decides to terminate a licensed location. This notification and request for termination of the license must include the reports and information specified in (16)(d)4. The licensee is subject to the provisions of (16)(d) and (16)(e), as applicable.
- (c) No less than 30 days before the expiration date specified in a specific license, the licensee shall either:
 1. Submit an application for license renewal under (17), or
 2. Notify the Division in writing, under (16)(b), if the licensee decides to discontinue all activities involving NORM.
- (d) If the licensee terminates a licensed location, or if a licensee does not submit an application for license renewal under (17), the licensee shall on or before the expiration date specified in the specific license:
 1. Terminate use of NORM;
 2. Remove NORM contamination to the extent practicable;
 3. Properly dispose of the NORM; and

4. Submit a report of the disposal of NORM and radiation survey(s) to confirm the absence of NORM or to establish the levels of residual NORM contamination. The licensee shall, as appropriate:
 - (i) Report levels of radiation in units of microrads (μGy) per hour of beta and gamma radiation at one centimeter and gamma radiation at one meter from surfaces and report levels of radioactivity in units of disintegrations per minute (or microcuries or becquerels) per 100 square centimeters removable and fixed on surfaces, microcuries (becquerels) per milliliter in water, and picocuries per gram (Bq/kg) in contaminated solids such as soils or concrete; and
 - (ii) Specify the instrument(s) used and certify that each instrument is properly calibrated and tested.
 5. If no radioactivity attributable to activities conducted under the license is detected, the licensee shall submit a certification that no detectable NORM contamination was found. If the Division determines that the information submitted under (16)(d)2. and (16)(d)4. is adequate and surveys confirm the findings, the Director will notify the licensee in writing that the license is terminated.
 6. If detectable levels of residual NORM attributable to activities conducted under the license are found, the specific license continues in effect beyond the expiration date, if necessary, with respect to possession of residual NORM until the Director notifies the licensee in writing that the license is terminated. During this time, the licensee is subject to the provisions of (16)(e). In addition to the information submitted under (16)(d)4., the licensee shall submit a plan, if appropriate, for decontaminating the location(s) and disposing of the residual NORM.
- (e) Each licensee who possesses residual NORM under (16)(d)6., following the expiration date specified in the specific license, shall:
1. Be limited to actions involving NORM related to preparing the location(s) for release for unrestricted use; and
 2. Continue to control entry to restricted areas until the location(s) is (are) suitable for release for unrestricted use and the Director notifies the licensee in writing that the license is terminated.

(17) Renewal of Specific Licenses.

- (a) Applications for renewal of specific licenses shall be filed in accordance with (11).

- (b) In any case in which a licensee, not less than 30 days prior to the expiration of an existing specific license, has filed an application in proper form for renewal or for a new specific license authorizing the same activities, such existing license shall not expire until final action by the Director.
- (18) **Amendment of Specific Licenses at Request of Licensee.** Applications for amendment of a license shall be filed in accordance with (11) and shall specify the respects in which the licensee desires the license to be amended and the grounds for such amendment.
- (19) **Action on Applications to Renew and Amend Specific Licenses.** In considering an application by a licensee to renew or amend the specific license, the Division will apply the criteria set forth in (12).
- (20) **Reciprocal Recognition of Licenses.**

Subject to this Chapter, any person who holds a specific license from the U.S. Nuclear Regulatory Commission or another Agreement State, and issued by the agency having jurisdiction where the licensee maintains an office for directing the licensed activity and at which radiation safety records are normally maintained, is hereby granted a general license to conduct the activities authorized in such licensing document within this State for a period not in excess of 180 days in any calendar year provided that:

- (a) The licensing document does not limit the activity authorized by such document to specified installations or locations;
- (b) The out-of-state licensee notifies the Division in writing at least 3 days prior to engaging in such activity. Such notification shall indicate the location, period, and type of proposed possession and use within the State, and shall be accompanied by a copy of the pertinent licensing document. If, for a specific case, the 3-day period would impose an undue hardship on the out-of-state licensee, the licensee may, upon application to the Division, obtain permission to proceed sooner. The Division may waive the requirement for filing additional written notifications during the remainder of the calendar year following the receipt of the initial notification from a person engaging in activities under the general license provided in (20)(a);
- (c) The out-of-state licensee complies with all applicable Rules of the Division and with all the terms and conditions of the licensing document, except any such terms and conditions which may be inconsistent with applicable Rules of the Division;
- (d) The out-of-state licensee supplies such other information as the Division may request; and

- (e) The out-of-state licensee shall not transfer or dispose of NORM possessed or used under the general license provided in (20)(a) except by transfer to a person:
 - 1. Specifically licensed by the Director to receive such NORM; or
 - 2. Exempt from the requirements for a license for such NORM under (4).

(21) Financial Surety Arrangements for Specific Licenses.

- (a) Each licensee or applicant for a specific license under (12) shall post with the Director financial surety, or security, according to the requirements of Rule .02(8)(g), of this Chapter to ensure the protection of the public health and safety, property, and the environment in the event of abandonment, default, or other inability or unwillingness of the licensee to meet the requirements of the Act and this Chapter. Financial surety arrangements shall:
 - 1. Consist of surety bonds, cash deposits, certificates of deposit, government securities, irrevocable letters or lines of credit, or any combination of these.
 - 2. Be in an amount sufficient to meet the applicant's or licensee's obligations under the Act and this Chapter and shall be based upon Division-approved cost estimates.
 - 3. Be established prior to issuance of the specific license or the commencement of operations to assure that sufficient funds will be available to carry out the decontamination and decommissioning of the facility.
 - 4. Be continuous for the duration of the license and for a period coincident with the applicant/licensee's responsibility under the Act and this Chapter.
 - 5. Be available in Georgia subject to judicial process and execution in the event required for the purposes set forth.
 - 6. Be established within 90 days of April 1, 1994, for licenses in effect on that date.
- (b) No later than 90 days after the licensee notifies the Division that decontamination and decommissioning have been completed, the Division shall determine if these have been conducted in accordance with this Chapter and the conditions of the specific license. If the Division finds that the requirements have been met, the Director shall direct the return or release of the licensee's security in full plus any accumulated interest. If the Division finds that the requirements have not been met, the Division will notify the licensee in writing of the steps necessary for compliance.

(22) **Modification and Revocation of Licenses.**

- (a) The terms and conditions of all licenses shall be subject to amendment, revision, or modification or the license may be suspended or revoked by reason of amendments to the Act, by reason of rules or Regulations promulgated by the Board, and Orders issued by the Director.
- (b) Any license may be revoked, suspended, or modified, in whole or in part, for any material false statement in the application or any material false statement of fact required under provisions of the Act or this Chapter, or because of conditions revealed by such application or statement of fact or any report, record, or inspection or other means which would warrant the Director to refuse to grant a license on an original application, or for violation of, or failure to observe, any of the terms and conditions of the Act, of the license, or of any Rule, Regulation, or Order of the Director.
- (c) Except in cases of willfulness or those in which the public health, interest, or safety requires otherwise, no license shall be modified, suspended, or revoked unless, prior to the institution of proceedings therefor, facts or conduct which may warrant such action shall have been called to the attention of the licensee in writing and the licensee shall have been accorded an opportunity to demonstrate or achieve compliance with all lawful requirements.

APPENDIX

ACCEPTABLE SURFACE CONTAMINATION LEVELS FOR NORM

NUCLIDE ^a	AVERAGE ^{bcf}	MAXIMUM ^{bdf}	REMOVABLE ^{bcef}
U-nat, U-235, and associated products (including Po-210), except Ra-226, Th-230, Ac-227, and Pa-231	5,000 dpm	15,000 dpm	11,000 dpm
Transuranics, Ra-226, Ra-228, Th-230, Th-228 Pa-231, Ac-227	alpha/100 cm ²	alpha/100 cm ²	alpha/100 cm ²
Beta-/gamma-emitters (nuclides with decay modes other than alpha emission or spontaneous fission, including Pb-210), except others noted above.	100 dpm/100 cm ²	300 dpm/100 cm ²	20 dpm/100 cm ²
	5,000 dpm beta, gamma/100 cm ²	15,000 dpm beta, gamma/100 cm ²	1,000 dpm beta, gamma/100 cm ²

^a Surfaces contaminated with alpha- and beta-emitting naturally-occurring radionuclides may be surveyed with a detector that responds to both types of radiation. The same method may be employed when evaluating wipe samples for removable contamination.

^b As used in this table, dpm (disintegrations per minute) means the rate of emission by naturally-occurring radioactive material as determined by correcting the counts per minute observed by an appropriate detector for background, efficiency, and geometric factors associated with the instrumentation using a ratemeter or scaler and detector appropriate for the type and energy of emissions being monitored. The detector shall be capable of responding to alpha, beta, and/or gamma radiation.

^c Measurements of average contamination level should not be averaged over more than one square meter. For objects of less surface area, the average should be derived for each object.

^d The maximum contamination level applies to an area of not more than 100 cm².

^e The amount of removable radioactive material per 100 cm² of surface area should be determined by wiping that area with dry filter or soft absorbent paper, applying moderate pressure, and assessing the amount of radioactive material on the wipe with an appropriate instrument of known efficiency. When removable contamination on objects of less surface area is determined, the pertinent levels should be reduced proportionally and the entire surface should be wiped.

^f All surveys and efficiency determinations shall be made with the detector's active surface no greater than 1 centimeter from the surface being surveyed, wipe being analyzed, or source being used. A scaler must be used when evaluating wipe samples and count times must be sufficient to detect 10 percent of the applicable limit with 95 percent confidence that the activity would be detected.

^g Notwithstanding the levels in the table above, equipment containing NORM shall not exceed a maximum radiation exposure level of 50 microroentgens per hour, including the background radiation level at any accessible point.

Rule 391-3-17-.09. Licensing and Radiation Safety Requirements for Irradiators.

(1) Purpose and scope.

- (a) This Rule, 391-3-17-.09, contains requirements for the issuance of a license authorizing the use of sealed sources containing radioactive materials in irradiators used to irradiate objects or materials using gamma radiation. This Rule also contains radiation safety requirements for operating irradiators. The requirements of this Rule are in addition to other requirements of this Chapter. In particular, the provisions of Rules [391-3-17-.02](#), .03, and .07 apply to applications and licenses subject to this Rule. Nothing in this Rule relieves the licensee from complying with other applicable Federal, State, and local regulations governing the siting, zoning, land use, and building code requirements for industrial facilities.
- (b) The Regulations in this Rule apply to panoramic irradiators that have either dry or wet storage of the radioactive sealed sources and to underwater irradiators in which both the source and the product being irradiated are under water. Irradiators whose dose rates exceed 500 rads (5 Grays) per hour at one meter from the radioactive sealed sources in air or in water, as applicable for the irradiator type, are covered by this Rule.
- (c) This Rule does not apply to self-contained dry-source-storage irradiators (those in which both the source and the areas subject to irradiation are contained within a device and are not accessible by personnel), medical radiology or teletherapy, radiography (the irradiation of materials for nondestructive testing purposes), gauging, or open-field (agricultural) irradiations.
- (d) Any sealed source licensed pursuant to this Rule shall have a solubility equal to or less than the solubility of cobalt-60 metal in water.

(2) Definitions.

- (a) "Annually" means once every 12 calendar months or no later than the last day of the same calendar month of the following year.
- (b) "Doubly encapsulated sealed source" means a sealed source in which the radioactive material is sealed within a capsule and that capsule is sealed within another capsule.
- (c) "Irradiator" means a facility that uses radioactive sealed sources for the irradiation of objects or materials.

- (d) "Irradiator operator" means an individual who has successfully completed the training and testing described in (5)(a) of this Rule and is authorized by the terms of the license to operate the irradiator without a supervisor present.
- (e) "Large irradiator" means an irradiator where radiation dose rates exceeding 500 rads (5 Grays) per hour exist at one meter from the sealed radioactive sources in air or in water, as applicable for the irradiator type, but does not include irradiators in which both the sealed source and the area subject to irradiation are contained within a device and are not accessible to personnel.
- (f) "Panoramic dry-source-storage irradiator" means an irradiator in which the irradiations occur in air in areas potentially accessible to personnel and in which the sources are stored in shields made of solid materials. The term includes beam-type dry-source-storage irradiators in which only a narrow beam of radiation is produced for performing irradiations.
- (g) "Panoramic irradiator" means an irradiator in which the irradiations are done in air in areas potentially accessible to personnel. The term includes beam-type irradiators.
- (h) "Panoramic wet-source-storage irradiator" means an irradiator in which the irradiations occur in air in areas potentially accessible to personnel and in which the sources are stored under water in a storage pool.
- (i) "Pool irradiator" means any irradiator at which the sources are stored or used in a pool of water including panoramic wet-source-storage irradiators and underwater irradiators.
- (j) "Product conveyor system" means a system for moving the product to be irradiated to, from, and within the area where irradiation takes place.
- (k) "Radiation room" means a shielded room in which irradiations take place. Underwater irradiators do not have radiation rooms.
- (l) "Radiation Safety Officer" means an individual with responsibility for the overall Radiation Safety Program at the facility.
- (m) "Sealed source" means any byproduct material that is used as a source of radiation and is encased in a capsule designed to prevent leakage or escape of the byproduct material.
- (n) "Seismic area" means any area where the probability of a horizontal acceleration in rock of more than 0.3 times the acceleration of gravity in 250 years is greater than ten percent, as designated by the U.S. Geological Survey.

- (o) "Solubility of one liquid or solid in another" means the mass of a substance contained in the solution which is in equilibrium with an excess of the substance.
- (p) "Underwater irradiator" means an irradiator in which the sources always remain shielded under water and humans do not have access to the sealed sources or the space subject to irradiation without entering the pool.

(3) Specific Licensing Requirements.

- (a) Application for a specific license.
 - 1. A person, as defined in Rule [391-3-17-.01](#) may file an application for a specific license authorizing the use of sealed sources in large irradiators in accordance with Rule [.02](#) of this Chapter.
 - 2. A separate license is required for each large irradiator, radiation room, or underwater irradiator.
- (b) Specific licenses for large irradiators. The Director will approve an application for a specific license for the use of licensed material in an irradiator if the applicant meets the requirements contained in this section.
 - 1. The applicant shall satisfy the general requirements specified in Rule [391-3-17-.02](#) and the requirements contained in this Rule.
 - 2. The applicant shall describe its training for irradiator operators that shall include, at a minimum, the following:
 - (i) A minimum of 40 hours of classroom training;
 - (ii) A minimum of 160 hours of on-the-job training;
 - (iii) Safety reviews;
 - (iv) The means the applicant will use to test each operator's understanding of and ability to comply with the Division's Rules and licensing requirements and the irradiator operating and emergency procedures; and
 - (v) Minimum training and experience of personnel who may provide training.
 - 3. The applicant shall submit an outline or summary of the written operating and emergency procedures listed in this Rule that describes the radiation safety aspects of the procedures.

4. The application shall describe the organizational structure for managing the irradiator, specifically the radiation safety responsibilities or authorities. In particular, the application must specify who, within the management structure, has the authority to stop unsafe operations. The applicant shall also describe the training and experience required for the position of Radiation Safety Officer.
5. The application must include a description of the access control system required by (4)(b) of this Rule, the radiation monitors required by (4)(e) of this Rule, the method of detecting leaking sources required by (5)(e) of this Rule including the sensitivity of the method, and a diagram of the facility that shows the locations of all required interlocks and radiation monitors.
6. The applicant shall provide assurance that any radioactive source not used in the irradiation process shall be removed from the irradiator pool and disposed of or returned to the manufacturer.
7. If the applicant intends to perform leak testing of dry-source-storage sealed sources, the applicant shall establish procedures for leak testing and submit a description of these procedures to the Division for approval. The procedures must include the following:
 - (i) Instruments to be used;
 - (ii) Methods of performing the analysis; and
 - (iii) Pertinent experience of the individual who analyzes the samples.
8. If licensee personnel are to load or unload sources, the applicant shall describe the qualifications and training of the personnel and the procedures to be used. If the applicant intends to contract for source loading or unloading at his facility, the loading or unloading must be done by an organization specifically licensed by the Director, an Agreement State, or the U.S. Nuclear Regulatory Commission to load or unload irradiator sources.
9. The applicant shall perform the following operational tests to ensure proper functioning of all equipment and safety devices before the irradiator is loaded with sources:
 - (i) Interlock and radiation safety systems;
 - (ii) Pool integrity and plumbing;
 - (iii) Source rack mechanical positioning system;

- (iv) Source rack movement and position sensing systems;
- (v) Source rack electrical control system;
- (vi) Uninterruptible electrical power supply for radiation monitoring warning systems;
- (vii) Fire protection system;
- (viii) Emergency systems for returning a stuck source rack into the pool;
- (ix) Systems used for transferring sources to and from transport vehicles; and
- (x) Product conveyor system.

10. The applicant shall describe the operational inspection and maintenance program, including the frequency of the checks required by (5)(f) of this Rule.
11. The roof plug opening or removable shielding providing access for the loading and removal of sources shall be large enough to accommodate the largest applicable transportation cask.

(c) The applicant shall not begin construction of a new irradiator facility prior to the issuance of a license by the Director. As used in this section, the term "construction" includes the construction of any portion of the permanent irradiator structure on the site but does not include: engineering and design work, purchase of site, site surveys or soil testing, site preparation, site excavation, and other similar tasks. Any activities undertaken prior to the issuance of license with respect to the requirements of this Chapter shall be at the risk of the applicant and have no bearing on the issuance of a license in accordance with this Chapter.

(d) Applications for exemptions.

1. The Director may, upon application of any interested person or upon its own initiative, grant any exemptions from the requirements in this Rule that it determines are authorized by law and will not endanger public health, safety, or property.
2. Any application for a license or for an amendment of a license authorizing use of a teletherapy-type unit for irradiation of materials or objects may include proposed alternatives for the requirements of this Rule. The Division will approve the proposed alternatives if the applicant provides

adequate rationale for the proposed alternatives and demonstrates that they are likely to provide an adequate level of safety for workers and the public.

(e) Request for written statements.

1. After the filing of the original application, the Division may request further information necessary to enable the Director to determine whether the application should be granted or denied.
2. Each license is issued with the condition that the licensee will, at any time before expiration of the license, upon the Division's request, submit written statements or other sufficient information to enable the Director to determine whether the license should be modified, suspended, or revoked.

(4) Design and Performance Requirements for Irradiators.

(a) Performance criteria for sealed sources.

1. Requirements. Sealed sources installed after January 1, 1994:
 - (i) Must have a certificate of registration issued under [10 CFR 32.210](#);
 - (ii) Must be doubly encapsulated;
 - (iii) Must use radioactive material that is as nondispersible as practical and that is as insoluble as practical if the source is used in a wet-source-storage or wet-source-change irradiator;
 - (iv) Must be encapsulated in a material resistant to general corrosion and to localized corrosion, such as 316L stainless steel or other material with equivalent resistance if the sources are for use in irradiator pools; and
 - (v) In prototype testing of the sealed source, must have been leak tested and found leak-free after each of the following tests:
2. Temperature. The test source must be held at 40°C for 20 minutes, 600°C for 1 hour, and then be subjected to a thermal shock test with a temperature drop from 600°C to 20°C within 15 seconds.
3. Pressure. The test source must be twice subjected for at least 5 minutes to an external pressure (absolute) of 2 million newtons per square meter.
4. Impact. A 2-kilogram steel weight, 2.5 centimeters in diameter, must be dropped from height of 1 meter onto the test source.

5. Vibration. The test source must be subjected 3 times for 10 minutes each to vibrations sweeping from 25 hertz to 500 hertz with a peak amplitude of 5 times the acceleration of gravity. In addition, each test source must be vibrated for 30 minutes at each resonant frequency found.
6. Puncture. A 50-gram weight and pin, 0.3 centimeter pin diameter, must be dropped from a height of 1 meter onto the test source.
7. Bend. If the length of the source is more than 15 times larger than the minimum cross-sectional dimension, the test source must be subjected to a force of 2000 newtons at its center equidistant from two support cylinders, the distance between which is 10 times the minimum cross-sectional dimension of the source.

(b) Access control.

1. Each entrance to a radiation room at a panoramic irradiator must have a door or other physical barrier to prevent inadvertent entry of personnel if the sources are not in the shielded position. Product conveyor systems may serve as barriers as long as they are reliable and consistently function as a barrier. It must not be possible to move the sources out of their shielded position if the door or barrier is open. Opening the door or barrier while the sources are exposed must cause the sources to return promptly to their shielded position. The personnel entrance door or barrier must have a lock that is operated by the same key used to move the sources. The doors and barriers must not prevent any individual in the radiation room from leaving.
2. Each entrance to a radiation room at a panoramic irradiator must have an independent backup access control to detect personnel entry while the sources are exposed. Detection of entry while the sources are exposed must cause the sources to return to their full shielded position and must also activate a visible and audible alarm to make the individual entering the room aware of the hazard. The alarm must also alert at least one other individual who is onsite of the entry. That individual shall be trained in how to respond to the alarm and prepared to promptly render or summon assistance.
3. A radiation monitor must be provided to detect the presence of high radiation levels in the radiation room of a panoramic irradiator before personnel entry. The monitor must be integrated with personnel access door locks to prevent room access when radiation levels are high. Attempted personnel entry while the monitor measures high radiation levels must activate the alarm described in (4)(b)2. of this Rule. The monitor may be located in the entrance (normally referred to as the maze) but not in the direct radiation beam.

4. Before the sources move from their shielded position in a panoramic irradiator, the source control must automatically activate conspicuous visible and audible alarms to alert people in the radiation room that the sources will be moved from their shielded position. The alarms must give individuals enough time to leave the room before the sources leave the shielded position.
5. Each radiation room at a panoramic irradiator must have a clearly visible and readily accessible control that would allow an individual in the room to make the sources return to their fully shielded position.
6. Each radiation room of a panoramic irradiator must contain a control that prevents the sources from moving from the shielded position unless the control has been activated and the door or barrier to the radiation room has been closed with a present time after activation of the control.
7. Each entrance to the radiation room of a panoramic irradiator and each entrance to the area within the personnel access barrier of an underwater irradiator must have a sign bearing the radiation symbol and the words, "Caution (or danger) radioactive material." Panoramic irradiators must also have a sign stating "Very High radiation area," but the sign may be removed, covered, or otherwise made inoperable when the sources are fully shielded.
8. If the radiation room of a panoramic irradiator has roof plugs or other movable shielding, it must not be possible to operate the irradiator unless the shielding is in its proper location. This requirement may be met by interlocks that prevent operation if the shield is not placed properly or by an operating procedure requiring inspection including documentation of inspection, of shielding before operation.
9. Panoramic irradiators shall not operate if the requirements in (4)(b) of this Rule are not met.
10. Underwater irradiators must have a personnel access barrier around the pool, which must be locked to prevent access when the irradiator is not attended. Only operators and facility management may have access to keys to the personnel access barrier. There must be an intrusion alarm to detect unauthorized entry when the personnel access barrier is locked. Activation of the intrusion alarm must alert an individual (not necessarily onsite) who is prepared to respond or summon assistance.

(c) Shielding.

1. The radiation dose rate in areas that are normally occupied during operation of a panoramic irradiator may not exceed 2 millirems (0.02 millisievert) per hour at any location 30 centimeters or more from the wall of the room when the sources are exposed. The dose rate must be averaged over an area not to exceed 100 square centimeters having no linear dimension greater than 20 cm. Areas where the radiation dose rate exceeds 2 millirems (0.02 millisievert) per hour must be locked, roped off, or posted and not entered without written approval or in the physical presence of the Radiation Safety Officer.
2. The radiation dose at 30 centimeters over the edge of the pool of a pool irradiator may not exceed 2 millirems (0.02 millisievert) per hour when the sources are in the fully shielded position.
3. The radiation dose rate at 1 meter from the shield of a dry-source-storage panoramic irradiator when the source is shielded may not exceed 2 millirems (0.02 millisievert) per hour and at 5 centimeters from the shield must not exceed 20 millirems (0.02 millisievert) per hour.

(d) Fire protection.

1. The radiation room at a panoramic irradiator must have heat and smoke detectors. The detectors must activate an audible alarm. The alarm must be capable of alerting a person who is prepared to summon assistance promptly. The sources must automatically become fully shielded if a fire is detected.
2. The radiation room at a panoramic irradiator must be equipped with a fire extinguishing system capable of extinguishing a fire without the entry of personnel into the room. The system for the radiation room must have a shut-off valve to control flooding into unrestricted areas.

(e) Radiation monitors.

1. Irradiators with automatic product conveyor systems must have a radiation monitor with an audible alarm located to detect loose radioactive sources that are carried toward the product exit. If the monitor detects a source, an alarm must sound and product conveyors must stop automatically. The alarm must be capable of alerting an individual in the facility who is prepared to summon assistance. Underwater irradiators in which the product moves within an enclosed stationary tube are exempt from the requirements of this paragraph.
2. For pool irradiators, the licensee shall provide a means to detect radioactive contamination in pool water each day the irradiator operates. The means

may be either an on-line radiation monitor on the pool water purification system or an analysis of pool water. If the licensee uses an on-line radiation monitor, the detection of above normal background radiation levels must activate the alarm. The alarm set-point must be set as low as practical, but high enough to avoid false alarms. If a false alarm due to background radiation occurs, the alarm set-point must be increased. Activation of the alarm must automatically cause the water purification system to shut off. However, the licensee may reset the alarm set-point to a higher level if necessary to operate the pool purification system to clean up contamination in the pool as specifically provided in written emergency procedures.

3. Underwater irradiators that are not in a shielded radiation room must have a radiation monitor over the pool to detect abnormal radiation levels. The monitor must have an audible alarm and a visible indicator at entrances to the personnel access barrier around the pool. The audible alarm may have a manual shut-off. The alarm must be capable of alerting an individual who is prepared to respond promptly.

(f) Control of source movement.

1. The mechanism that moves the sources of a panoramic irradiator must require a key to actuate. Actuation of the mechanism must cause an audible signal to indicate that the sources are leaving the shielded position. Only one key may be in use at any time, and only operators or facility management may possess it. The key must be attached to a portable radiation survey meter by a chain or cable. The lock for source control must be designed so that the key may not be removed if the sources are in an unshielded position. The door to the radiation room must require the same key.
2. The console of a panoramic irradiator must have a source position indicator that indicates when the sources are in the fully shielded position, when they are in transit, and when the sources are exposed.
3. The control console of a panoramic irradiator must have an emergency control that promptly returns the sources to the shielded position.
4. Each control for a panoramic irradiator must be clearly marked as to its function.

(g) Irradiator pools.

1. For licenses initially issued after January 1, 1994, irradiator pools must either:

- (i) Have a water-tight stainless steel liner or a liner metallurgically compatible with other components in the pool; or
 - (ii) Be constructed so that there is a low likelihood of substantial leakage and have a surface designed to facilitate decontamination. In either case, the licensee shall have a method to safely store the sources during repairs of the pool.
2. For licenses initially issued after January 1, 1994, irradiator pools must have no outlets more than 0.5 meter below the normal low water level that could allow water to drain out of the pool. Pipes that have intakes more than 0.5 meter below the normal low water level and that could act as siphons must have siphon breakers to prevent the siphoning of pool water.
 3. A means must be provided to replenish water losses from the pool.
 4. A visible indicator must be provided in a clearly visible location to indicate the pool water level is below the normal low water level or above the normal high water level.
 5. Irradiator pools must be equipped with a purification system designed to be capable of maintaining the water during normal operation at a conductivity of 20 micromhos per centimeter or less and with a clarity so that the sources can be seen clearly.
 6. A physical barrier, such as a railing or cover, must be used around or over irradiator pools during normal operation to prevent personnel from accidentally falling into the pool. The barrier may be removed during maintenance, inspection, and service operations.
 7. If long-handled tools or poles are used in irradiator pools, the radiation dose rate on the handling areas of the tools may not exceed 2 millirems (0.02 millisievert) per hour.

(h) Source rack protection.

If the product to be irradiated moves on a product conveyor system, the source rack and the mechanism that moves the rack must be protected by a barrier or guides to prevent products and product carriers from hitting or touching the rack or mechanism.

(i) Power failures.

1. If electrical power at a panoramic irradiator is lost for longer than 10 seconds, the sources must automatically return to the shielded position.
2. The lock on the door of the radiation room of a panoramic irradiator shall not be deactivated by a power failure.
3. During a power failure, the area of any irradiator where sources are located may be entered only when using an operable and calibrated radiation survey meter.

(j) Design requirements.

Irradiators whose construction begins after January 1, 1994, must meet the design requirements of this section.

1. **Shielding.** For panoramic irradiators, the licensee shall design shielding walls to meet generally accepted building code requirements for reinforced concrete and design the walls, wall penetrations, and entranceways to meet the radiation shielding requirements of (4)(c) of this Rule. If the irradiator will use more than 5 million Curies (1.85×10^{17} becquerels) of activity, the licensee shall evaluate the effects of heating of the shielding walls by the irradiator sources.
2. **Foundations.** For panoramic irradiators, the licensee shall design the foundation, with consideration given to soil characteristics, to ensure that it is adequate to support the weight of the facility shield walls.
3. **Pool integrity.** For pool irradiators, the licensee shall design the pool to assure that it is leak resistant, that it is strong enough to bear the weight of the pool water and shipping casks, that a dropped cask would not fall on sealed sources, that all outlets or pipes meet the requirements of (4)(c)2. of this Rule, and that metal components are metallurgically compatible with other components in the pool.
4. **Water handling system.** For pool irradiators, the licensee shall verify that the design of the water purification system is adequate to meet the requirements of (4)(g) of this Rule. The system must be designed so that water leading from the system does not drain to unrestricted areas without being monitored.
5. **Radiation monitors.** For all irradiators, the licensee shall evaluate the location and sensitivity of the monitor to detect sources carried by the product conveyor system as required by (4)(e)1. of this Rule. The licensee shall verify that the product conveyor is designed to stop before a source on

the product conveyor would cause a radiation overexposure to any person. For pool irradiators, if the licensee uses radiation monitors to detect contamination under (5)(e)2. of this Rule, the licensee shall verify that the design of radiation monitoring systems to detect pool contamination includes sensitive detectors located close to where contamination is likely to concentrate.

6. Source rack. For pool irradiators, the licensee shall verify that there are no crevices on the source or between the source and source holder that would promote corrosion on a critical area of the source. For panoramic irradiators, the licensee shall determine that source rack drops due to loss of power will not damage the source rack and that source rack drops due to failure of cables (or alternate means of support) will not cause loss of integrity of sealed sources. For panoramic irradiators, the licensee shall review the design of the mechanism that moves the sources to assure that the likelihood of a stuck source is low and that, if the rack sticks, a means exists to free it with minimal risk to personnel.
7. Access control. For panoramic irradiators, the licensee shall verify from the design and logic diagram that the access control system will meet the requirements of (4)(b) of this Rule.
8. Fire protection. For panoramic irradiators, the licensee shall verify that the number, location, and spacing of the smoke and heat detectors are appropriate to detect fires and that the detectors are protected from mechanical and radiation damage. The licensee shall verify that the design of the fire extinguishing system provides the necessary discharge patterns, densities, and flow characteristics for complete coverage of the radiation room and that the system is protected from mechanical and radiation damage.
9. Source return. For panoramic irradiators, the licensee shall verify that the source rack will automatically return to the fully shielded position if offsite power is lost for more than 10 seconds.
10. Seismic. For panoramic irradiators to be built in seismic areas, the licensee shall design the reinforced concrete radiation shields to retain their integrity in the event of an earthquake by designing to the seismic requirements of an appropriate source such as American Concrete Institute Standard ACI 318-89, "Building Code Requirements for Reinforced Concrete," Chapter 21, "Special Provisions for Seismic Design," or local building codes, if current.

11. Wiring. For panoramic irradiators, the licensee shall verify that electrical wiring and electrical equipment in the radiation room are selected to minimize failures due to prolonged exposure to radiation.
12. Product carriers. For irradiators utilizing product carriers, the basic design of the carrier shall prevent the carrier from opening or coming into contact with the source rack or protective barrier. The basic design shall be submitted to the Division for approval.
13. Floor penetrations. All floor penetrations, including expansion joints, floor joints, and drains, shall not allow the uncontrolled release of water, which has not been analyzed for its radioactive content, from the radiation room.
14. Lift mechanisms. The lift mechanisms for the source rack and source transport cask must be designed for working and breaking strength to safely lift a source transport cask and sources into and out of the irradiator pool.
15. Ventilation. All radiation rooms in a panoramic irradiator shall be maintained under negative pressure. Any exhaust from radiation rooms shall be through a high-efficiency nuclear air cleaning system. This system shall consist of standard roughing and absolute (HEPA) filters that have been tested in line in accordance with and has met the requirements of ANSI N510.

(k) Construction monitoring and acceptance testing.

The requirements of (4)(k) of this Rule must be met for irradiators whose construction begins after January 1, 1994. Additionally, the requirements for shielding, (4)(k)1., foundations, (4)(k)2., pool integrity, (4)(k)3., and wiring, (4)(k)11. of this Rule must be certified by a registered professional engineer. The requirements must be met prior to loading sources.

1. Shielding. For panoramic irradiators, the licensee shall monitor the construction of the shielding to verify that its construction meets design specifications and generally accepted building code requirements for reinforced concrete.
2. Foundations. For panoramic irradiators, the licensee shall monitor the construction of the foundations to verify that their construction meets design specifications.
3. Pool integrity. For pool irradiators, the licensee shall verify that the pool meets design specifications and shall test the integrity of the pool. The

licensee shall verify that outlets and pipes meet the requirements of (4)(f)2. of this Rule.

4. Water handling system. For pool irradiators, the licensee shall verify that the water purification system, the conductivity meter, and the water level indicators operate properly.
5. Radiation monitors. For all irradiators, the licensee shall verify the proper operation of the monitor to detect sources carried on the product conveyor system and the related alarms and interlocks required by (4)(e)1. of this Rule. For pool irradiators, the licensee shall verify the proper operation of the radiation monitors and the related alarm, if used, to meet (4)(e)2. of this Rule. For underwater irradiators, the licensee shall verify the proper operation of the over-the-pool monitor, alarms, and interlocks required by (4)(e)2. of this Rule.
6. Source racks. For panoramic irradiators, the licensee shall test the movement of the source racks for proper operation prior to source loading; testing must include source rack lowering due to simulated loss of power. For all irradiators with product conveyor systems, the licensee shall observe and test the operation of the conveyor system to assure that the requirements in (4)(h) of this Rule are met for protection of the source rack and the mechanism that moves the rack; testing must include tests of any limit switches and interlocks used to protect the source rack and mechanism that moves the rack from moving product carriers.
7. Access control. For panoramic irradiators, the licensee shall test the completed access control system to assure that it functions as designed and that all alarms, controls, and interlocks work properly.
8. Fire protection. For panoramic irradiators, the licensee shall test the ability of the heat and smoke detectors to detect a fire, to activate alarms, and to cause the source rack to automatically become fully shielded. The licensee shall test the operability of the fire extinguishing system.
9. Source return. For panoramic irradiators, the licensee shall demonstrate that the source racks can be returned to their fully shielded positions without offsite power.
10. Computer systems. For panoramic irradiators that use a computer system to control the access control system, the licensee shall verify that the access control system will operate properly if offsite power is lost and shall verify that the computer has security features that prevent an irradiator operator from commanding the computer to override the access control system when it is required to be operable.

11. Wiring. For panoramic irradiators, the licensee shall verify that the electrical wiring and electrical equipment that were installed meet the design specifications.

(5) Operation of Irradiators.

(a) Training.

1. Before an individual is permitted to operate an irradiator without a supervisor present, the individual must be instructed in the following:
 - (i) The fundamentals of radiation protection applied to irradiators (including the differences between external radiation and radioactive contamination, units of radiation dose, Division's dose limits, why large radiation doses must be avoided, how shielding and access controls prevent large doses, how an irradiator is designed to prevent contamination, the proper use of survey meters and personnel dosimeters, other radiation safety features of an irradiator, and the basic function of the irradiator);
 - (ii) The requirements of this Rule and Rule [391-3-17-.07](#) that are applicable to the irradiator;
 - (iii) The operation of the irradiator;
 - (iv) Those operating and emergency procedures listed in (5)(b) of this Rule that the individual is responsible for performing; and
 - (v) Case histories of accidents or problems involving irradiators.
2. Before an individual is permitted to operate an irradiator without a supervisor present, the individual shall pass a written test on the instruction received, consisting primarily of questions based on the licensee's operating and emergency procedures that the individual is responsible for performing and other operations necessary to safely operate the irradiator without supervision.
3. Before an individual is permitted to operate an irradiator without a supervisor present, the individual must have received on-the-job training or simulator training in the use of the irradiator as described in the license application. The individual shall also demonstrate the ability to perform those portions of the operating and emergency procedures that he or she is to perform.

4. The licensee shall conduct safety reviews for irradiator operators at least annually. The licensee shall give each operator a brief written test on the information. Each safety review must include, to the extent appropriate, each of the following:
 - (i) Changes in operating and emergency procedures since the last review, if any;
 - (ii) Changes in Regulations and license conditions since the last review, if any;
 - (iii) Reports on recent accidents, mistakes, or problems that have occurred at irradiators, if any;
 - (iv) Relevant results of inspections of operator safety performance;
 - (v) Relevant results of the facility's inspection and maintenance checks;
and
 - (vi) A drill to practice an emergency or abnormal event procedure.
5. The licensee shall evaluate the safety performance of each irradiator operator at least annually to ensure that the Regulations, license conditions, and operating and emergency procedures are followed. The licensee shall discuss the results of the evaluation with the operator and shall instruct the operator on how to correct any mistakes or deficiencies observed.
6. Individuals who will be permitted unescorted access to the radiation room of the irradiator or the area around the pool of an underwater irradiator, but who have not received the training required for operators and the Radiation Safety Officer, shall be instructed and tested in any precautions they should take to avoid radiation exposure, and procedures or parts of procedures listed in (5)8. of this Rule that they are expected to perform or comply with, and their proper response to alarms required in this Rule. Tests may be oral.
7. Individual who must be prepared to respond to alarms required by (4)(b)2., (4)(b)10., (4)(d)1., (4)(e)1., and (5)(e)2. of this Rule shall be trained and tested on how to respond. Each individual shall be retested at least once a year. Tests may be oral.

(b) Operating and emergency procedures.

1. The licensee shall have and follow written operating procedures for the following:

- (i) Operation of the irradiator, including entering and leaving the radiation room;
 - (ii) Use of personnel dosimeters;
 - (iii) Surveying the shielding of panoramic irradiators;
 - (iv) Monitoring pool water for contamination while the water is in the pool and before release of pool water to unrestricted areas;
 - (v) Leak testing of sources;
 - (vi) Inspection and maintenance checks required by (5)(f) of this Rule;
 - (vii) Loading, unloading, and repositioning sources, if the operations will be performed by the licensee; and
 - (viii) Inspection of movable shielding required by (4)(b)8. of this Rule, if applicable.
2. The licensee shall have and follow emergency or abnormal event procedures, appropriate to the irradiator type, for the following:
- (i) Source stuck in the unshielded position;
 - (ii) Personnel overexposures;
 - (iii) A radiation alarm from the product exit portal monitor or pool monitor;
 - (iv) Detection of leaking sources, pool contamination, or alarm cause by contamination of pool water;
 - (v) A low or high water level indicator, an abnormal water loss, or leakage from the source storage pool;
 - (vi) A prolonged loss of electrical power;
 - (vii) A fire alarm or explosion in the radiation room;
 - (viii) An alarm indicating unauthorized entry into the radiation room, area around the pool, or another alarm area;

(ix) Natural phenomena, including an earthquake, tornado, flooding, or other phenomena as appropriate for the geographical location of the facility; and

(x) The jamming of the automatic conveyor system.

3. The licensee may revise operating and emergency procedures without Division approval only if all of the following conditions are met:

(i) The revisions do not reduce the safety of the facility,

(ii) The revisions are consistent with the outline or summary of procedures submitted with the license application,

(iii) The revisions have been reviewed and approved by the Radiation Safety Officer, and

(iv) The users or operators are instructed and tested on the revised procedures before they are put into use.

(c) Personnel monitoring.

1. Irradiator operators shall wear a personnel monitoring device while operating a panoramic irradiator or while in the area around the pool of an underwater irradiator. The personnel monitoring device processor must be capable of detecting high energy photons in the normal and accident dose ranges. Each personnel monitoring device must be assigned to and worn only by one individual. Film Badges must be replaced at least monthly and all other personnel monitoring devices must be processed at least quarterly.

2. Other individuals who enter the radiation room of a panoramic irradiator shall wear a dosimeter, which may be a pocket dosimeter. For groups of visitors, only two people who enter the radiation room are required to wear dosimeters. If pocket dosimeters are used to meet the requirements of this paragraph, a check of their response to radiation must be done at least annually. Acceptable dosimeters must read within plus or minus 30 percent of the true radiation dose.

(d) Radiation surveys.

1. A radiation survey of the area outside the shielding of the radiation room of a panoramic irradiator must be conducted with the sources in the exposed position before the facility starts to operate. A radiation survey of the area above the pool of pool irradiators must be conducted after the sources are

loaded but before the facility starts to operate. Additional radiation surveys of the shielding must be performed at intervals not to exceed 3 years and before resuming operations after addition of new sources or any modification to the radiation room shielding or structure that might increase dose rate.

2. If the radiation levels specified in (4)(c) of this Rule are exceeded, the facility must be modified to comply with the requirements of (4)(c) of this Rule.
3. Portable radiation survey meters must be calibrated at least annually to an accuracy of ± 20 percent of the gamma energy of the sources in use. The calibration must be done at two points on each scale or, for digital instruments, at one point per decade over the range that will be used. Portable radiation survey meters must be of a type that does not saturate and read zero at high radiation dose rates.
4. Water from the irradiator pool, other potentially contaminated liquids, and sediments from pool vacuuming must be monitored for radioactive contamination before release to unrestricted areas. Radioactive concentrations must not exceed those specified in 10 CFR Part 20, Table 2, Column 2 or Table 3 of Appendix B, "Annual Limits on Intake (ALIs) and Derived Air Concentrations (DACs) of Radionuclides for Occupational Exposure; Effluent Concentrations; Concentrations for Release to Sewerage".
5. Before releasing resins for unrestricted use, they must be monitored before release in an area with a background level of less than 0.5 millirem (0.005 millisievert) per hour. The resins may be released only if the survey does not detect radiation levels above background radiation levels. The survey meter used must be capable of detecting radiation levels of 0.5 millirem (0.005 millisievert) per hour.

(e) Detection of leaking sources.

1. Each dry-source-storage sealed source must be tested for leakage at intervals not to exceed six months using a leak test kit or method approved by the Division, an Agreement State, or the U.S. Nuclear Regulatory Commission. In the absence of a certificate from a transferor that a test has been made within the six months before the transfer, the sealed source may not be used until tested. The test must be capable of detecting the presence of 0.005 microcurie (200 becquerels) of radioactive material and must be performed by a person approved by the Division, an Agreement State, or the U.S. Nuclear Regulatory Commission to perform the test.

2. For pool irradiators, sources may not be put into the pool unless the licensee tests the sources for leaks or has a certificate from a transferor that a leak test has been done within the six months before the transfer. Water from the pool must be checked for contamination each day the irradiator operates. The check may be done either by using a radiation monitor on a pool water circulating system or by analysis of a sample of pool water. If a check for contamination is done by analysis of a sample of pool water, the results of the analysis must be available within 24 hours. If the licensee uses a radiation monitor on a pool water circulating system, the detection of above normal radiation levels must activate an alarm. The alarm set-point must be set as low as practical, but high enough to avoid false alarms. The licensee may reset the alarm set-point to a higher level if necessary to operate the pool water purification system to clean up contamination in the pool if specifically provided for in written emergency procedures.
3. If a leaking source is detected, the licensee shall arrange to remove the leaking source from service and have it decontaminated, repaired, or disposed of by the Division, Agreement State, or U.S. Nuclear Regulatory Commission licensee that is authorized to perform these functions. The licensee shall promptly check its personnel, equipment, facilities, and irradiated product for radioactive contamination. No product may be shipped until the product has been checked and found free of contamination. If a product has been shipped that may have been inadvertently contaminated, the licensee shall arrange to locate and survey that product for contamination. If any personnel are found to be contaminated, decontamination must be performed promptly. If contaminated equipment, facilities, or products are found, the licensee shall arrange to have them decontaminated or disposed of by the Division, U.S. Nuclear Regulatory Commission, or Agreement State licensee that is authorized to perform these functions. If a pool is contaminated, the licensee shall arrange to clean the pool until the contamination levels do not exceed the appropriate concentration in Table 2, Column 2, Appendix B to 20.1001 to 20.2401 of 10 CFR 20.

(f) Inspection and maintenance.

1. The licensee shall perform inspection and maintenance checks that include, as a minimum, each of the following at the frequency specified in the license or license application:
 - (i) Operability of each aspect of the access control system required by (4)(b) of this Rule.
 - (ii) Functioning of the source position indicator required by (4)(f) of this Rule.

- (iii) Operability of the radiation monitor for radioactive contamination in pool water required by (5)(e)2. of this Rule using a radiation check source, if applicable.
 - (iv) Operability of the over-the-pool radiation monitor at underwater irradiators as required by (4)(e)3. of this Rule.
 - (v) Operability of the product exit monitor required by (4)(e)1. of this Rule.
 - (vi) Operability of the emergency source return control required by (4)(e)3. of this Rule.
 - (vii) Leak-tightness of systems through which pool water circulates (visual inspection).
 - (viii) Operability of the heat and smoke detectors and extinguisher system required by (4)(d) of this Rule (but without turning extinguishers on).
 - (ix) Operability of the means of pool water replenishment required by (4)(g)3. of this Rule.
 - (x) Operability of the indicators of high and low pool water levels required by (4)(g)4. of this Rule.
 - (xi) Operability of the intrusion alarm required by (4)(b)10. of this Rule, if applicable.
 - (xii) Functioning and wear of the system, mechanism, and cables used to raise and lower sources.
 - (xiii) Condition of the barrier to prevent products from hitting the sources or source mechanism as required by (4)(h) of this Rule.
 - (xiv) Amount of water added to the pool to determine if the pool is leaking.
 - (xv) Electrical wiring on required safety systems for radiation damage.
 - (xvi) Pool water conductivity measurements and analysis as required by (5)(g)2. of this Rule.
2. Malfunctions and defects found during inspection and maintenance checks must be repaired without undue delay.

(g) Pool water purity.

1. The pool water purification system must be run sufficiently to maintain the conductivity of the pool water below 20 micromhos per centimeter under normal circumstances. If pool water conductivity rises above 20 micromhos per centimeter, the licensee shall take prompt actions to lower the pool water conductivity, and shall take corrective actions to prevent future recurrences.
2. The licensee shall measure the pool water conductivity frequently enough, but not less than weekly, to assure that the conductivity remains below 20 micromhos per centimeter. Conductivity meters must be calibrated at least annually.

(h) Attendance during operation.

1. Both an irradiator operator and at least one other individual, who is trained on how to respond and prepared to promptly render or summon assistance if the access control alarm sounds, shall be present onsite:
 - (i) Whenever the irradiator is operated using an automatic product conveyor system; and
 - (ii) Whenever the product is moved into or out of the radiation room when the irradiator is operated in a batch mode.
2. At a panoramic irradiator at which static irradiations (no movement of the product) are occurring, a person who has received the training on how to respond to alarms described in (5)(a)7. of this Rule must be onsite.
3. At an underwater irradiator, an irradiator operator must be present at the facility whenever the product is moved into or out of the pool. Individuals who move the product into or out of the pool of an underwater irradiator need not be qualified as irradiator operators; however, they must have received the training described in (5)(a)6. and 7. of this Rule. Static irradiations may be performed without a person present at the facility.
4. Irradiator operators shall not be on duty more than 12 hours in any 24-hour period without at least 8 hours uninterrupted rest, unless an emergency exists and prior authorization has been given by the Division.

(i) Entering and leaving the radiation room.

1. Upon first entering the radiation room of a panoramic irradiator after an irradiation, the irradiator operator shall use a survey meter to determine that the source has returned to its fully shielded position. The operator shall

check the functioning of the survey meter with a radiation check source while entering the radiation room. The survey meter must be of a type that does not saturate and read zero at high radiation dose rates.

2. Before exiting from and locking the door to the radiation room of a panoramic irradiator prior to a planned irradiation, the irradiator operator shall:
 - (i) Visually inspect the entire radiation room to verify that no one else is in it; and
 - (ii) Activate a control in the radiation room that permits the sources to be moved from the shielded position only if the door to the radiation room is locked within a preset time after setting the control.
3. During a power failure, the area around the pool of an underwater irradiator may not be entered without using an operable and calibrated radiation survey meter unless the over-the-pool monitor required by (4)(e)3. of this Rule is operating with backup power.

(j) Irradiation of explosive or flammable materials.

1. Irradiation of explosive material is prohibited unless the licensee has received prior written authorization from the Division. Authorization will not be granted unless the licensee can demonstrate that detonation of the explosive would not rupture the sealed sources, injure personnel, damage safety systems, or cause radiation overexposures of personnel.
2. Irradiation of more than small quantities of flammable material (flash point below 140°F) is prohibited in panoramic irradiators unless the licensee has received prior written authorization from the Division. Authorization will not be granted unless the licensee can demonstrate that a fire in the radiation room could be controlled without damage to sealed sources or safety systems and without radiation overexposures of personnel.

(6) Records.

(a) Records and retention periods.

The licensee shall maintain the following records at the irradiator for the periods specified:

1. A copy of the license, license conditions, documents incorporated into a license by reference, and amendments thereto until superseded by new

documents or until the Director terminates the license for documents not superseded.

2. Records of each individual's training, tests, and safety reviews provided to meet the requirements of (5)(a)1., 2., 3., 4., 5., and 7. of this Rule for 3 years after the evaluation.
3. Records of the annual evaluations of the safety performance of irradiator operators required by (5)(a)5. of this Rule for 3 years after the evaluation.
4. A copy of the current operating and emergency procedures required by (5)(b) of this Rule until superseded or the Director terminates the license. Records of the Radiation Safety Officer's review and approval of changes in procedures as required by (5)(b)3.iii of this Rule are to be retained for 3 years from the date of the change.
5. Personnel monitoring results required by (5)(c) of this Rule shall be retained until the Director terminates each pertinent license requiring the record. Upon termination of the license, the licensee shall permanently store records on Division Form, "Occupational Radiation Exposure History", or equivalent, or shall make provisions with the Division for transfer to the Division.
6. Records of radiation surveys required by (5)(d) of this Rule for three years from the date of the survey.
7. Records of radiation survey meter calibrations required by (5)(d) of this Rule and pool water conductivity meter calibrations required by (5)(g)2. of this Rule until three years from the date of calibration.
8. Records of the results of leak tests required by (5)(e)1. of this Rule and the results of contamination checks required by (5)(e)2. of this Rule for three years from the date of each test.
9. Records of inspection and maintenance checks required by (5)(f) of this Rule for three years.
10. Records of major malfunctions, significant defects, operating difficulties or irregularities, and major operating problems that involve required radiation safety equipment for three years after repairs are completed.
11. Records of the receipt, transfer, and disposal of all licensed sealed sources for three years after the transfer or disposal of the sealed source.

12. Records of the design checks required by (4)(j) of this Rule and the construction control checks as required by (4)(k) of this Rule until the license is terminated. The records must be signed and dated. The title or qualification of the person signing must be included.
13. Records related to decommissioning of the irradiator as required by Rule [391-3-17-.02\(8\)\(g\)8.](#)

(b) Reports.

1. In addition to the reporting requirements in other Rules of this Chapter, the licensee shall report the following events if not reported under other Rules of this Chapter:
 - (i) Source stuck in an unshielded position.
 - (ii) Any fire or explosion in a radiation room.
 - (iii) Damage to the source racks.
 - (iv) Failure of the cable or drive mechanism used to move the source racks.
 - (v) Inoperability of the access control system.
 - (vi) Detection of a radiation source by the product exit monitor.
 - (vii) Detection of radioactive contamination attributable to licensed radioactive material.
 - (viii) Structural damage to the pool liner or walls.
 - (ix) Abnormal water loss or leakage from the source storage pool.
 - (x) Pool water conductivity exceeding 100 micromhos (100 μ S) per centimeter.
2. The report must include a telephone report within 24 hours and a written report within 30 days as described in Rule [391-3-17-.03\(14\)\(b\).](#)

Rule 391-3-17-.10. Administration.

- (1) Scope. The provisions of this Rule, 391-3-17-.10, shall apply to the administrative procedures required by this Chapter.
- (2) Administration.
 - (a) Administrative Examination of Applications. Applications for the issuance of a license, amendment of a license at the request of the holder, and renewal of a license will be given a docket or other identifying number for administrative examination. The applicant may be required to submit additional information and may be requested to confer in formally regarding the application. The Division will give to others such notice of the filing of applications as is required under the applicable provisions of this Chapter and such additional notices as it deems appropriate.
 - (b) Effect of Timely Renewal Application. In the case of an application for renewal, if the licensee has made application for the renewal of an existing license at least 30 days prior to its expiration date, the license shall not be deemed to have expired until such application shall have been determined.
 - (c) Filing of Papers. Unless otherwise specified, papers required to be filed with the Division shall be filed with the Environmental Protection Division, Radioactive Materials Program, 4244 International Parkway, Suite 120 Atlanta, Georgia 30354. Papers required to be filed with the Division shall be deemed filed upon actual receipt with the Division at the location specified. Unless otherwise specified, the filing, when by mail, shall upon actual receipt be deemed complete as of the date of deposit in the mail. Papers may be filed at the Division's offices in Atlanta, Georgia.
 - (d) Payment of Fees. All licensees shall remit annual fees in accordance with Table 1, the Radioactive Materials License Fee Schedule. Annual fee payments for general and specific licenses are due before the end of the calendar year for the following calendar year. New licensees shall be in voiced for annual fees at a prorated rate. Such fees shall be due and payable thirty (30) days after the invoice date. Fees for applications for specific licenses, and annual fees for reciprocity applicants, shall accompany the request. An application fee must accompany renewal applications that are submitted after a license has expired. Licensees with fees which are delinquent shall not have any request for amendment or renewal of their licenses, except in the interest of public health and safety, honored by the Division until such fees are paid in full or a payment plan has been accepted by the Division.

Table 1

Radioactive Materials License Fee Schedule

License Category	Fee Category	New License Application Fee	Annual Fee, Nominal	Annual Fee, Small Entity [See subparagraph (e)]	Annual Fee, Lower Tier [See subparagraph (f)]
Medical Teletherapy	A.1.a	\$3,256.00	\$6,623.00	\$2,026.50	\$1,212.75
Stereotactic Radio surgery (i.e., Gamma Knife)	A.1.b	\$3,256.00	\$6,623.00	\$2,026.50	\$1,212.75
Broad Medical	A.10	\$3,145.00	\$17,057.00	\$4,550.00	\$3,736.25
Eye Applicators	A.11	\$999.00	\$3,182.00	\$1,982.75	\$1,169.00
Source Material	A.12	\$1,998.00	\$4,588.00	\$435.75	\$435.75
Depleted Uranium	A.12	\$222.00	\$666.00	\$266.00	\$266.00
Institutional Medical-Mult. Use (Including HDR)	A.2.a	\$999.00	\$3,182.00	\$3,150.00	\$2,336.25
Institutional Medical-Mult. Use	A.2.b	\$999.00	\$3,182.00	\$1,982.75	\$1,169.00
Institutional Medical-Mult. Use (diagnostic only)	A.2.c	\$999.00	\$3,182.00	\$1,750.00	\$936.25
Institutional Medical-Single Use (therapy only)	A.3	\$999.00	\$3,182.00	\$1,982.75	\$1,169.00
Private Practice (Therapy-HDR)	A.4.a	\$999.00	\$3,182.00	\$3,150.00	\$2,336.25

Private Practice (Limited Therapy)	A.4.b	\$999.00	\$3,182.00	\$1,982.75	\$1,169.00
Private Practice (Diagnostic Only)	A.4.c	\$999.00	\$3,182.00	\$1,837.50	\$1,023.75
Private Practice (Veterinary)	A.4.d	\$555.00	\$1,813.00	\$1,750.00	\$936.25
In-Vitro Specific Licenses	A.5	\$555.00	\$1,813.00	\$1,470.00	\$831.25
In-Vitro General Licenses	A.6	\$0.00	\$100.00	\$100.00	\$100.00
Bone Mineral Analyzers	A.7	\$999.00	\$3,182.00	\$1,750.00	\$936.25
Nuclear Pharmacy	A.8.a.1	\$2,405.00	\$6,253.00	\$3,990.00	\$3,176.25
Medical Manufacturer for Distribution	A.8.a.2	\$2,405.00	\$6,253.00	\$2,357.25	\$1,543.50
Medical Distribution or Redistribution Only (sealed sources)	A.8.b.1	\$1,885.72	\$3,717.19	\$1,692.25	\$878.50
Medical Distribution or Redistribution Only (GL)	A.8.b.2	\$407.00	\$1,184.00	\$1,184.00	\$691.25
Mobile Nuclear Medicine	A.9.a	\$999.00	\$3,182.00	\$2,275.00	\$1,461.25
Mobile HDR	A.9.b	\$999.00	\$3,182.00	\$2,275.00	\$1,461.25
Special Nuclear Material (sealed sources in devices)	B.1.a	\$481.00	\$1,332.00	\$1,036.00	\$572.25
Special Nuclear Material (power sources in devices)	B.1.b	\$925.00	\$2,701.00	\$990.50	\$526.75

Special Nuclear Material (other)	B.2	\$925.00	\$2,701.00	\$1,895.25	\$1,081.50
Pacemaker, By product or SNM -- Medical Inst	B.3	\$999.00	\$3,182.00	\$1,895.25	\$1,081.50

Reciprocity	K.	appropriate nominal annual fee (eligible for Small Entity/Lower Tier)			

(e) **Small Entity**

The size standards for Georgia small entities are as follows:

1. A small business is a business with annual receipts of \$3.5 million or less except private practice physicians for which the standard is annual receipts of \$ million or less.
2. A small organization is a not-for-profit organization which is independently owned and operated and has annual receipts of \$3.5 million or less.
3. Small governmental jurisdictions are governments of cities, counties, towns, school districts, or special districts with a population of less than 50,000.
4. A small educational institution is one that is (1) supported by a qualifying small governmental jurisdiction, or (2) one that is not state or publicly supported and has 500 employees or less.

(f) **Small Entity Lower Tier**

Small businesses and not-for-profit organizations with annual receipts of less than \$250,000 and small governmental jurisdictions with populations of less than 20,000 qualify for the lower tier small entity fee.

(3) Penalties.

- (a) Any person who engages in any of the following conduct shall be guilty of a misdemeanor as found in O.C.G.A. Section [31-13-13](#):
 1. Hindering, obstructing, or otherwise interfering with any representative of the Department in the discharge of his official duties in making inspections or impounding radioactive materials as provided in Code Section [31-13-5](#) and [31-13-11](#) respectively; or
 2. Violating the provisions of Code Section [31-13-7](#) (permits for disposal of radioactive waste; bonding of permittees), or any Rule or Regulation promulgated there under; or
 3. Violating the provisions of Code Section [31-13-12](#) (Prohibited Uses of Sources of Radiation).

- (b) Any person who submits any false statements or writings, concealment of facts, and fraudulent documents in matters within the jurisdiction of the Division shall be guilty of a felony as found in O.C.G.A. Section [16-10-20](#):
 1. A person who knowingly and willfully falsifies, conceals, or covers up by any trick, scheme, or device a material fact; makes a false, fictitious, or fraudulent statement or representation; or makes or uses any false writing or document, knowing the same to contain any false, fictitious, or fraudulent statement or entry, in any matter within the jurisdiction of the Division shall, upon conviction thereof, be punished by a fine of not more than \$1,000.00 or by imprisonment for not less than one nor more than five years, or both.

- (c) Any person who:
 1. Violates any licensing provision of this 31-13-1, et.seq., or any Rule, Regulation, or Order issued under 31-13-1, et. seq., or any term, condition, or limitation of any license issued under this Chapter; or
 2. Commits any violation for which a license may be revoked under rules or regulations issued pursuant to this 31-13-1, et. seq., may be subject to a civil penalty, to be imposed by the Division, not to exceed \$10,000.00. If any violation is a continuing one, each day of such violation shall constitute a separate violation for the purpose of computing the applicable civil penalty.

3. If a violation is found to exist during an inspection or visit and is then found to exist on a subsequent inspection or visit, there shall arise a but table presumption that the violation continued throughout the period of time between the initial inspection or visit and the subsequent inspection or visit.
- (d) Whenever the Division proposes to subject a person to the imposition of a civil penalty, it shall notify such person in writing:
 1. Setting forth the date, facts, and nature of each act or omission with which the person is charged.
 2. Specifically identifying the particular provision or provisions of the Code section, Rule, Order, or license condition involved in the violation; and
 3. Advising of each penalty which the Division proposes to impose and its amount.
 - (e) Such written notice shall be sent by registered or certified mail by the Division to the last known address of such person. The person so notified shall be granted an opportunity to show in writing, within ten days from receipt of such notice, why such penalty should not be imposed. The notice shall also advise such person that upon failure to pay the civil penalty subsequently determined by the Division, if any, the penalty may be collected by civil action.
 - (f) Upon receipt of a written response from the person so notified, alleging that a penalty should not be imposed, the Director shall consider the response and make a final decision on the appropriateness and amount of the penalty. The Division may, at its discretion, conduct an onsite inspection in order to make a final decision. In making this decision, the Director may, as deemed appropriate by the Director, consider such factors as: errors concerning the amount or nature of the penalty, corrective action taken by the licensee, and approved disposal of radioactive material by the licensee.
 - (g) The Division shall inform the licensee of its final decision by registered or certified mail to the last known address of the licensee. Within 10 days of receipt of the Division's final determination concerning the civil penalty, the licensee may request an administrative hearing pursuant to the Georgia Administrative Procedure Act, O.C.G.A. [50-13-1](#), et. seq.

Subject 391-3-18. RULES FOR CERTIFICATION OF ENVIRONMENTALLY SENSITIVE PROPERTY.

Rule 391-3-18-.01. Purpose.

The purpose of these rules is to establish the procedures for certification of environmentally sensitive property for purposes of ad valorem taxation for conservation use, in accordance with O.C.G.A. Sec. [48-5-7.4\(a\)\(2\)](#). These rules are also designed to complement the Department of Revenue's Rules for Conservation Use Property, Chapter 560-11-6.

Rule 391-3-18-.02. Definitions.

All terms used in this rule chapter shall be interpreted in accordance with the definitions as set forth in O.C.G.A. Sec. [48-5-7.4](#) and Rule Chapter 560-11-6.

- (1) "Department" means the Georgia Department of Natural Resources.
- (2) "Maintenance in its natural condition" means to manage the land in such a manner that would not ruin, erode, harm, damage, or spoil the nature, distinctiveness, identity, appearance, utility or function that originally characterized the property as environmentally sensitive under O.C.G.A. Section [48-5-7.4\(a\)\(2\)](#).
- (3) "Primary use" means the principal use to which the property is devoted, as distinct from an incidental, occasional, intermediate or temporary use for some other purpose not detrimental to or in conflict with its primary purpose.

Amended: F. July 22, 2019; eff. August 11, 2019.

Rule 391-3-18-.03. Environmentally Sensitive Property.

- (1) Environmentally sensitive property includes real property that meets the definition of one or more categories of paragraph (2) and where the primary use of such property is:
 - (a) for categories (2)(a) through (2)(f), maintenance in its natural condition; or
 - (b) for categories (2)(a) through (2)(c), enhancing the water quality of surface or ground waters; or
 - (c) for category (2)(g), controlling or abating pollution of surface or ground waters by storm water runoff or otherwise enhancing the water quality of surface or ground waters.
- (2) In accordance with O.C.G.A. § [48-5-7.4\(a\)\(2\)](#), the categories of environmentally sensitive property are:
 - (a) Mountainous Terrain, defined as any land area 1,000 feet or more above the lowest elevation of the county in which such area is located that has a percentage slope of 25 percent or greater, including the crests, summits, and ridge tops which lie at elevations higher than any such area;
 - (b) Wetland areas that are determined by the United States Army Corps of Engineers to be wetlands under their jurisdiction pursuant to Section 404 of the federal Clean Water Act, as amended, or wetland areas that are depicted or delineated on maps

compiled by the Department or the United States Fish and Wildlife Service pursuant to its National Wetlands Inventory Program;

- (c) Significant groundwater recharge areas as identified on maps or data compiled by the Department;
- (d) Undeveloped barrier islands or portions thereof as provided for in the federal Coastal Barrier Resources Act, as amended;
- (e) Habitats certified by the Department as containing species that have been listed as either endangered or threatened under the federal Endangered Species Act of 1973, as amended;
- (f) River or stream corridors or buffers which shall be defined as those undeveloped lands which are:
 - 1. Adjacent to rivers and perennial streams that are within the 100 year flood plain as depicted on official maps prepared by the Federal Emergency Management Agency; or
 - 2. Within buffer zones adjacent to rivers or perennial streams, which buffer zones are established by law or local ordinance and within which land-disturbing activity is prohibited; and
- (g) Constructed storm-water wetlands of the free-water surface type certified by the Department under O.C.G.A. § [12-2-4\(k\)](#) and approved for such use by the local governing authority.

History. Original Rule entitled "Environmentally Sensitive Lands" adopted. F. Feb. 7, 1992; eff. Feb. 27, 1992.

Amended: New title "Environmentally Sensitive Property." F. July 22, 2019; eff. August 11, 2019.

Rule 391-3-18-.04. Procedures for Certification of Environmentally Sensitive Property.

- (1) Property owners who wish to have all or portions of their property certified as environmentally sensitive for tax assessment purposes must submit the information set forth below using an application form provided by the Department.
 - (a) The qualifying property must be owned by an entity meeting the ownership requirements of O.C.G.A. § [48-5-7.4\(a\)\(1\)\(C\)](#).

- (b) The application for certification must include a property map or survey providing the total acreage of the owner's property and showing the property boundaries. The total acreage and boundaries should correspond to the records maintained by the county tax assessor.
 - (c) The application for certification must also include a map identifying those portions of the property that the applicant believes meets one or more of the categories in paragraphs (3) through (9).
- (2) In order for the Department to verify the primary use of those portions of the property identified in paragraph (1)(c), the property owner must provide a written statement regarding the primary use of those portions of the property. Where appropriate, the Department may also require photographic documentation.
- (a) Where the primary use is maintenance in its natural condition, as defined in [391-3-18.02\(2\)](#), the written statement should indicate how long those portions of the property have been undisturbed and how they have been and will be managed. The written statement should include as much historical information as is available to the property owner.
 - (b) Where the primary use is enhancing the water quality of surface or ground waters, the written statement should describe how the use of those portions of the property enhance the water quality of surface or ground waters. Any measures being taken to reduce, control or eliminate pollution should be described.
 - (c) For the constructed storm water wetlands category of paragraph (9), the applicant should provide a signed statement from an authorized employee or agent of the local governing authority that, pursuant to Rule [560-11-6-04\(5\)](#), they have inspected the site and determined that the property is being used for controlling or abating pollution of surface or ground waters of this state by storm-water runoff or by otherwise enhancing the water quality of surface or ground waters.
- (3) **Mountainous Terrain.** For this category, the property owner must provide:
- (a) a map showing the elevations on the property and indicating the areas of the property that meet or exceed the minimum elevations for that county that are designated on the application form provided by the Department;
 - (b) an identification on the map of the areas above the minimum elevations where the percentage slope is 25 percent or greater, measured as the difference in elevation between two points 500 feet apart divided by the horizontal distance between those two points; and
 - (c) an identification on the map of any crests, summits, or ridge tops that lie at elevations higher than the areas identified in (b); and

- (d) the total acreage of those portions of the property identified under (b) and (c).
- (4) **Wetlands.** For this category, the property owner must provide one of the following:
- (a) A map identifying those portions of the property containing wetlands, as depicted on maps compiled by the U.S. Fish and Wildlife Service pursuant to its National Wetlands Inventory Program, and the total acreage for those portions of the property containing wetlands. The Fish and Wildlife Service maintains an online Wetlands Mapper tool that depicts wetlands included in the National Wetlands Inventory.
 - (b) A map identifying those portions of the property containing wetlands, as depicted on maps compiled by the Department, and the total acreage for those portions of the property containing wetlands.
 - (c) A map identifying those portions of the property containing wetlands, as determined by the United States Army Corps of Engineers pursuant to a jurisdictional determination completed under Section 404 of the federal Clean Water Act, and the total acreage for those portions of the property containing wetlands. An expired jurisdictional determination will be considered, as long as the property owner can attest that the area included in the jurisdictional determination has not been disturbed.
- (5) **Significant groundwater recharge areas.** For this category, the property owner must provide a map identifying those portions of the property containing significant groundwater recharge areas, as depicted on the digital version of Hydrologic Atlas 18 (HA-18) that is available from the Department, and the total acreage for those portions of the property.
- (6) **Undeveloped barrier islands.** For this category, the property owner must provide a map identifying those portions of the property that are identified as undeveloped barrier islands by the federal Coastal Barrier Resources Act, as amended, and the total acreage for those portions of the property. The U.S. Fish and Wildlife Service maintains an online Coastal Barrier Resources System Mapper tool that depicts the undeveloped barrier islands identified in the Act.
- (7) **Habitats for federal endangered or threatened species.** For this category, the property owner must make a site-specific request to the Department for information regarding the occurrence of federal endangered or threatened species on those portions of the property that are and will remain undisturbed. The property owner should follow the instructions for making a site-specific request that are included on the application form provided by the Department.
- (8) **River or stream corridors or buffers.** For this category, the property owner must provide a map identifying the undeveloped areas of the property that meet the requirements of (a) or (b) and the total acreage for those portions of the property.

- (a) Undeveloped areas adjacent to rivers and perennial streams that are within the 100 year flood plain, as depicted on maps prepared by the Federal Emergency Management Agency. The Department maintains an online Georgia Flood Map Program that identifies 1% annual chance flood zones that correspond to the 100 year flood plain.
 - (b) Undeveloped areas within buffer zones adjacent to rivers or perennial streams, which buffer zones are established under the Erosion and Sedimentation Act, O.C.G.A. Secs. [12-7-1](#) et seq., or by local ordinance. Where the buffer zone is established by local ordinance, the property owner should include a reference to the applicable local ordinance.
- (9) **Constructed storm water wetlands.** For this category, the property owner must provide a plat of the property prepared by a licensed land surveyor, in accordance with Rule [560-11-6.03\(e\)](#), showing the location and measured area of the constructed storm water wetlands.

(2) **Definitions.** Unless otherwise defined in this chapter, the definition of all terms included in the HSRA, O.C.G.A. [12-8-90](#) et seq., as amended, the Georgia Hazardous Waste Management Act (HWMA) O.C.G.A. § [12-8-60](#) et seq., as amended, and in the Rules for Hazardous Waste Management, Section [391-3-11-.02](#), shall have the same meaning in this chapter. When used in this chapter, the following terms shall have the meaning given below:

- (a) *Approved analytical test method* means SW-846 test methods that have been promulgated, recommended, or otherwise approved by USEPA, or methods approved for use by the Division;
- (b) *Conditionally exempt small quantity generator* means a hazardous waste generator who generates 220 pounds or less of hazardous waste in one month;
- (c) *Defined release* means any release which is an event which has a known duration of less than 30 consecutive days, which has a known source, and which involves quantities that are known or can be estimated;
- (d) *Detection limit* means the practical quantitation limit (PQL), defined as the lowest concentration, for an approved analytical test method and for a given sample matrix, at which the quantity of a regulated substance can be measured with a stated degree of confidence under routine laboratory operating conditions;
- (e) *Final receiving facility* means a receiving facility that receives a hazardous waste and from which that hazardous waste will not be reshipped for further off-site management;
- (f) *Free product* means any non-aqueous phase liquid that contains a regulated substance and that has accumulated at a groundwater surface, has pooled above a low permeability boundary in an aquifer, or can move freely in the aquifer;
- (g) *Ground water* means any subsurface water that is in a zone of saturation;
- (h) *Large quantity generator* means a hazardous waste generator who generates 2.2 pounds or more of acute hazardous waste or 2200 pounds or more of hazardous waste in one month;
- (i) *Non-residential property* means any real property or portion of a property not currently being used for human habitation or for other purposes with a similar potential for human exposure, at which activities have been or are being conducted that can be categorized in one of the 1987 Standard Industrial Classification (SIC) major groups 01- 97 inclusive (except the four-digit codes 4941, 8051, 8059, 8062-3, 8069, 8211, 8221-2, 8351, 8661, and 9223). Non-residential property includes all of the contiguous block(s) and lot(s) controlled by the same owner or operator that are vacant land, or that are used in conjunction with such business. For leased properties, non-residential property includes the leasehold and any external tank, surface impoundment, septic system, or any other structure, vessel, contrivance, or

unit that provides, or is utilized for the management of regulated substances to or from the leasehold;

- (j) *Off-site management* means the movement of hazardous waste beyond the property boundary of the facility where it was generated for disposal, incineration, treatment, storage, burning for energy recovery, recycling and/or reuse at a receiving facility;
- (k) *On-site management* means the disposal, incineration, treatment, storage, burning for energy recovery, recycling and/or reuse of self-generated hazardous waste by any large quantity generator before it is shipped for off-site management or discharged from an outfall regulated under the Georgia Water Quality Control Act;
- (l) *Out-of-state generator* means any generator outside the State of Georgia that ships hazardous waste to a receiving facility located within the State of Georgia;
- (m) *Receiving facility* means a facility that receives hazardous waste for disposal, incineration, treatment, storage, burning for energy recovery, recycling and/or reuse;
- (n) *Regulated substance* means any substance defined in the Hazardous Waste Management Act, O.C.G.A. § [12-8-62](#), by the terms "hazardous waste" or "hazardous constituent," or any substance defined in the Hazardous Site Response Act, O.C.G.A. § [12-8-92](#), as "hazardous substance" (all such regulated substances are listed in Appendix I of this Chapter);
- (o) *Release* means any intentional or unintentional act or omission resulting in the spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment, including without limitation the abandonment or discarding of barrels, containers, and other closed receptacles, of any hazardous waste, hazardous constituent, or hazardous substance; provided however, that such term shall not include any release which results in exposure to persons solely within a workplace, with respect to a claim which such persons may assert against the employer of such persons; emissions from the engine exhaust of any motor vehicle, rolling stock, aircraft, vessel, or pipeline pumping station; or the normal application of fertilizer;
- (p) *Reportable quantity* means the amount of any released regulated substance which causes a site to meet the criteria for listing on the Hazardous Site Inventory pursuant to the screening method provided in Appendix II of this Chapter;
- (q) *Reshipped for further off-site management* means when a receiving facility has received hazardous waste and where such hazardous waste has undergone disposal, incineration, treatment, storage, recycling and/or reuse at that receiving facility and the receiving facility subsequently signs the manifest accompanying

such hazardous waste to send it to another receiving facility where it will undergo further disposal, incineration, treatment, storage, burning for energy recovery, recycling and/or reuse;

- (r) *Residential property* means any property that does not exclusively meet the definition of non-residential property. In addition to recognized residential use, it also includes property used for establishments classified by those SIC codes that are excepted from the definition herein of "non-residential". Also, a portion of non-residential property that is used in part for residential activities, such as a day care center, is defined as residential;
- (s) *Responsible party* means any person who has contributed or who is contributing to a release, as defined at O.C.G.A. [12-8-92\(9\)](#);
- (t) *Self-generated hazardous waste* means hazardous waste generated by a large quantity generator or a small quantity generator;
- (u) *Shipped for off-site management* means when a generator signs the manifest accompanying a hazardous waste shipment bound for a receiving facility where it will undergo disposal, incineration, treatment, storage, burning for energy recovery, recycling and/or reuse at that facility;
- (v) *Site* means that portion of the owner's contiguous property and any other owner's property affected by a release exceeding a reportable quantity;
- (w) *Small quantity generator* means a hazardous waste generator who generates greater than 220 pounds but less than 2200 pounds of hazardous waste in one month;
- (x) *Soil* means any unconsolidated earth material, together with any unconsolidated plant or animal matter or foreign material that has become incorporated into it, that either consists of, remains within, or comes to be deposited on, native soil or regolith;
- (y) *Source material* means any material that includes or contains regulated substances that act or may likely act as a reservoir for migration of regulated substances to groundwater, soil, surface water, or air, or acts as a source for direct exposure;
- (z) *Ton of hazardous waste* means a standard short ton (2000 pounds) including any fraction thereof;
- (aa) *Wastewater* means any self-generated hazardous waste that undergoes on-site management in a wastewater treatment facility prior to its discharge from an outfall that is regulated under the Georgia Water Quality Control Act.

- (3) **Number and gender.** As used in this chapter, words in the singular also include the plural and words in the masculine gender also include the feminine and vice versa, as the case may require.
- (4) **Submittal of documents.** All information required to be submitted to the Director pursuant to this Chapter shall be submitted in such form as may be prescribed by the Director including the submittal of information in electronic format.

Rule 391-3-19-.03. Hazardous Waste Management and Hazardous Substance Reporting Fees.

- (1) **Exclusions.** Hazardous waste generated by the following is exempted from the hazardous waste management fees required by this section:
 - (a) Conditionally exempt small quantity generators;
 - (b) Corrective action required by an order, permit, or approved closure plan issued pursuant to the Georgia Hazardous Waste Management Act, O.C.G.A. § [12-8-60](#) *et seq.*, as amended;
 - (c) Corrective action required by an order of the Director pursuant to the Hazardous Site Response Act, O.C.G.A. § [12-8-90](#) *et seq.*, as amended; and
 - (d) Response actions required under the federal Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended.
- (2) **Fees for off-site management of hazardous wastes.** The requirements of this subsection are applicable to generators that ship self-generated hazardous waste for off site management.
 - (a) For the purpose of determining the tonnage of hazardous waste shipped for off-site management to which the fees of this subsection apply, the generator shall use the amount recorded on the manifest accompanying each hazardous waste shipment expressed in tons. These amounts shall be measured by methods that provide an

accurate and precise measurement of the weight in tons of each shipment received by the final receiving facility.

1. Small quantity generators. Each small quantity generator shall pay an annual fee to the Division of \$115.00. Small quantity generators are not subject to any other provisions of this section regarding hazardous waste management fees; they may, however, be subject to the provisions regarding hazardous substance reporting fees.
 2. Receiving facilities that are large quantity generators. Receiving facilities that are large quantity generators are subject to the requirements of this subsection only with respect to self-generated hazardous wastes.
 3. Large quantity generators. Each large quantity generator shall pay an annual fee to the Division as provided for in O.C.G.A. § [12-8-95.1\(a\)](#).
 - (i) Determination of applicable fee. Each large quantity generator shall determine which off-site management fee as provided for in O.C.G.A. § [12-8-95.1\(a\)\(1\)](#) is applicable for each ton of hazardous waste which has been shipped for off-site management based upon the method of off site management that waste undergoes at the final receiving facility. When a large quantity generator ships a ton of hazardous waste for off-site management and pays the applicable fee of this subsection, that large quantity generator shall not pay any additional fees for any further off-site management of that hazardous waste. For each ton of hazardous waste shipped for off-site management, each large quantity generator shall pay the applicable fee of this subsection for the calendar year in which such shipment for off-site management occurred.
- (3) **Fees for on-site management of hazardous wastes.** The requirements of this subsection are applicable to large quantity generators whose self-generated wastes undergo on-site management and which are not ultimately shipped for off-site management. For each ton of hazardous waste that undergoes on-site management and which is not ultimately shipped for off-site management, each large quantity generator shall pay to the Division per calendar year the applicable fee as provided for in O.C.G.A. § [12-8-95.1\(a\)\(2\)](#). When a ton of hazardous waste undergoes more than one form of on site management the large quantity generator shall determine which fee in this subsection is applicable based upon the final method of on-site management that waste undergoes. For each ton of hazardous waste which undergoes on-site management and which is ultimately shipped for off-site management, the large quantity generator shall not pay the applicable on-site management fee of this subsection but shall instead pay the applicable off-site management fee as required by subsection 391-3-19-.03(2). For the purpose of determining the tonnage of hazardous waste managed on-site, each large quantity generator shall employ direct measurement or other techniques that provide a precise and

accurate determination of the tonnage of hazardous waste undergoing on-site management. Each large quantity generator shall pay the applicable fee of this subsection for the on-site management of that hazardous waste for the calendar year in which such on-site management occurred.

- (a) For the purposes of this subsection, a generator who generates wastewater that is a hazardous waste shall not be required to count said wastewater in determining its generator status. However, if a generator determines that it is a large quantity generator, even without counting its hazardous waste wastewater, the generator shall pay the applicable fees on those wastewaters. For the purposes of this section, dilution of wastewater that is a hazardous waste shall be considered to be treatment and subject to the fees applicable to treated or stored hazardous waste.
- (4) **Fees for hazardous waste received from out-of-state generators.** The requirements of this subsection are applicable to receiving facilities that receive hazardous waste from an out-of-state generator. For each ton of hazardous waste received by a receiving facility from an out-of-state generator, the receiving facility shall pay to the Division the applicable fee as provided for in O.C.G.A. § [12-8-95.1\(a\)\(3\)](#).
- (a) For the purpose of determining the tonnage of hazardous waste received to which the fees of this section apply, the receiving facility shall use the amount recorded on the manifest accompanying each hazardous waste shipment expressed in tons. These amounts shall be measured by methods that provide an accurate and precise measurement of the weight in tons of each shipment received by the receiving facility.
 - (b) Each receiving facility shall determine which fee in this subsection is applicable for each ton of hazardous waste received from an out-of-state generator based upon the method of management that waste undergoes at the final receiving facility. When a receiving facility receives a ton of hazardous waste from an out-of-state generator and pays the applicable fee in this subsection that receiving facility shall not pay the off-site management fee in subsection 391-3-19-.03(2). For each ton of hazardous waste received by a receiving facility from an out-of-state generator, the receiving facility shall pay to the Division the applicable fee of this subsection for the calendar year in which such waste was received.
- (5) **Fees for hazardous substance reporting.** The requirements of this subsection are applicable to each person required to report pursuant to Section 313 of Title III of the federal Superfund Amendments and Reauthorization Act of 1986 (SARA), with the exception of persons specified in 391-3-19-.03(5)(c).
- (a) Each person required to report pursuant to Section 313 of Title III of SARA shall pay O.C.G.A. § [12-8-95.1\(a\)\(4\)](#), for each reporting facility with such payments being due to the Division not later than July 1 of the following year.
 - (b) All hazardous substance reporting fees due on July 1 of each year shall be based on the hazardous substances reported for the preceding calendar year on US EPA

Toxic Chemical Release Inventory Form R and/or Form A, or any other such document as may hereafter be designed, prescribed or required by the US EPA for reporting pursuant to Section 313 of Title III of SARA. In order to calculate the fee required by this section, the total of all releases listed on all such Forms or documents submitted by the same facility for the preceding calendar year shall be used. Any item for which reporting is required on said Forms or documents and which meets the definition of a release as defined by this Chapter shall be counted towards the total of all releases, except those items specifically excluded by this section.

- (c) Persons who report pursuant to Section 313 of Title III of SARA shall not be required to pay the hazardous substance reporting fees required by this section for the following facilities:
 - 1. Facilities which report only for substances not defined as regulated substances under Rule [391-3-19-.02](#); and
 - 2. Facilities which report only for petroleum fuels, lubricants, and hydraulic fluids and components thereof that are defined as regulated substances under Rule [391-3-19-.02](#).
- (6) Partial waivers of hazardous waste management and hazardous substance reporting fees.**
- (a) The Director may, in his sole discretion, upon receipt of a request for a partial waiver, grant a waiver of up to 25% of the hazardous waste management and hazardous substance reporting fees required by this section which are owed by a facility for the prior calendar year. In deciding whether to grant a waiver to persons who are large quantity generators of hazardous waste or who are required to report releases pursuant to Section 313 of SARA Title III, the Director may consider whether the facility has reduced the amount of hazardous waste generated or the amount of releases reported pursuant to Section 313 of SARA Title III.
 - (b) No waiver shall be granted to any facility which is in violation of any Act, Rule, regulation, permit, or order subject to the enforcement authority of EPD.
 - (c) No facility which owes delinquent hazardous waste management or hazardous substance reporting fees shall be granted a waiver.
 - (d) No facility shall be granted a waiver of fees for more than three years.
- (7) Payment of hazardous waste management and hazardous substance reporting fees.**
- (a) Payment due date. All hazardous waste management fees required by this section shall be paid to the Division not later than July 1 following the calendar year in which they were managed on site, shipped for off-site management or received

from an out-of-state generator. All hazardous substance reporting fees shall be paid to the Division not later than July 1 following the year for which a report is filed. Persons who make payments of fees required by this section later than thirty (30) days after the due date specified in this subsection shall pay a penalty of fifteen percent (15%) of the balance due and shall pay interest on the unpaid balance at the rate imposed by law for delinquent taxes due to the state.

- (b) Hazardous waste management fee record. The payment of hazardous waste management fees required by this section shall be accompanied by such forms and other supporting information as may be prescribed by the Director. Any large quantity generator or receiving facility required to pay a fee under this Section shall maintain a written hazardous waste management fee record of the total amount, in tons, of hazardous waste managed on-site, shipped for off-site management or received from an out-of-state generator during the calendar year. Completed Hazardous Waste Management Fee Records shall be submitted to the Hazardous Sites Response Program by no later than March 31 of each year.
1. The hazardous waste management fee record shall provide a description of the method used to measure the amount of hazardous waste that is of sufficient detail to demonstrate that such method provides an accurate and precise measurement.
 2. For hazardous waste shipped for off-site management or received from an out-of-state generator, the hazardous waste management fee record shall include the following information:
 - (i) Manifest number for each shipment;
 - (ii) Date of each shipment or receipt;
 - (iii) Name and EPA identification number of the designated facility, final receiving facility and the generator for each shipment; and
 - (iv) By EPA hazardous waste number and method of management at the designated facility and the final receiving facility (i.e., incineration or disposal, treatment or storage, burning for energy recovery, recycling or reuse), the tons of hazardous waste for each shipment and the total tons of hazardous waste for the calendar year.
- (c) Signatories to the hazardous waste management fee record. The hazardous waste management fee record shall be signed no later than March 31 of each year by the following:
1. For a corporation: By a responsible corporate officer. For the purpose of this section, a responsible corporate officer means a president, secretary, treasurer, or vice-president of the corporation in charge of a principal

business function, or any other person who performs similar policy- or decision making functions for the corporation, or the manager of one or more manufacturing, production or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding \$25 million (in second-quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures; or

2. For a partnership or sole proprietorship: by a general partner or the proprietor, respectively; or
3. For a municipality, State, Federal, or other public agency: by either a principal executive officer or ranking elected official. For purposes of this section, a principal executive officer of a Federal agency includes the chief executive officer of the agency, or a senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency (e.g., Regional Administrators of EPA); or
4. By a duly authorized representative of that person. A person is a duly authorized representative only if the authorization is made in writing by a person described in this subsection and the authorization specifies either an individual or a position having responsibility for overall operation of the regulated facility or activity such as the position of plant manager, operator of a well or a well field, superintendent, or position of equivalent responsibility. (A duly authorized representative may thus be either a named individual or any individual occupying a named position).

- (d) Certification. Any person signing the hazardous waste management fee record required under this subsection shall make the following certification:

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

- (e) Availability, retention, and disposition of the hazardous waste management fee record. Each large quantity generator and receiving facility shall keep a copy of the signed hazardous waste management fee record required by this subsection, including any supporting information used to complete the record, for a period of

three years from the end of the calendar year for which the record was completed. The hazardous waste management fee record and all supporting information shall be furnished upon request, and made available at all reasonable times for inspection by any representative of the Division. The retention period for all records required under this subsection may be extended at the request of the Director and is extended automatically during the course of any proceedings initiated by the Director pursuant to this subsection.

Rule 391-3-19-.04. Release Notification.

- (1) **No duty to sample prior to notification.** Rule 391-3-19-.04(4) requires an owner of real property to notify the Director when a release described in Rule 391-3-19-.04(3) is discovered. An owner of real property is not required to sample prior to such notification. However, any owner of real property where a release has occurred shall furnish to the Director any information which that person may have or reasonably obtain which is relevant to the release when requested by the Director.
- (2) **Exclusions.** The following are excluded from the notification requirements of this section:
 - (a) Any release that, within 30 days of the owner's discovery or of the effective date of these rules, whichever is later, no longer meets any criterion for notification under Rule 391-3-19-.04(3);
 - (b) Any defined release which is being cleaned-up under emergency response authorities other than the Hazardous Site Response Act where the person responsible for the cleanup remains in compliance with instructions given by the Division or by an on-scene coordinator under the NCP, such exclusion to expire 180 days after the date upon which the release began if at or after that time any of the criteria of Rule 391-3-19-.04(3) are met;
 - (c) Emissions regulated under the Georgia Air Quality Control Act, O.C.G.A. § [12-9-1](#) *et seq.*;

- (d) Releases of substances regulated under the Georgia Asbestos Safety Act, O.C.G.A. § [12-2-1](#) et seq., except for releases at inactive disposal sites that are not in compliance with the performance standards in [40 CFR 61.153](#);
- (e) Point source discharges that are regulated under the Georgia Water Quality Control, O.C.G.A. § [12-5-20](#) et seq.;
- (f) Releases of a pesticide which has been registered under the Georgia Pesticide Control Act, O.C.G.A. § [2-7-50](#) et seq., when the release consists solely of the use of said pesticide in a manner consistent with its label or labeling;
- (g) Releases regulated solely under the Georgia Underground Storage Tank Act, O.C.G.A. § [12-13-1](#) et seq.;
- (h) Releases of any petroleum-based fuel, lubricant, or hydraulic fluid;
- (i) Releases consisting of treatment or disposal in a unit that is regulated, a permit issued, or rules promulgated, pursuant to the Georgia Hazardous Waste Management Act, O.C.G.A. § [12-8-60](#) et seq., the Georgia Solid Waste Management Act, O.C.G.A. § [12-8-20](#) et seq., or the Georgia Water Quality Control Act, O.C.G.A. § [12-5-20](#) et seq., provided the Director has been informed, in accordance with requirements in such permit or rules, of any discovery that such releases exceed standards permitted by these statutes and the rule promulgated pursuant to these statutes;
- (j) Releases arising from the use of a commercial product that has been manufactured and sold for household use which is used by a private individual in a manner consistent with and incidental to the manufacturer's recommended use of the product;
- (k) Releases arising from the application to soil of fertilizers, liming materials, or soil amendments (unless any are used in a manner constituting disposal as defined and regulated in the Rules for Hazardous Waste Management, Chapter 391-3-11);
- (l) Release of naturally-occurring radionuclides described in [40 CFR 302.6\(c\)](#);
- (m) Direct radiation and/or releases of radionuclides regulated by the Division under the Georgia Radiation Control Act, O.C.G.A. § 31-13 et seq., or by the U.S. Nuclear Regulatory Commission, or any successor agency, under the Atomic Energy Act of 1954, as amended;
- (n) Any release to ground water that is discovered solely as a result of detection within a public drinking water system being monitored in accordance with the Rules for Safe Drinking Water, Chapter 391-3-5, provided that the Director is informed of such detection in accordance with the aforementioned Rules; and

- (o) Releases that arise from land-disturbing activities involving the extraction and stockpiling of ores and mineral, or involving the removal, stockpiling, and replacement of overburden materials, at any mine permitted under the Georgia Surface Mining Act, O.C.G.A., § [12-4-70](#) et seq.
 - (p) Any release to soil reported to the Division by a prospective purchaser pursuant to the Georgia Brownfield Act, O.C.G.A. [12-8-200](#) et seq., unless the Director's approval of the corrective action plan or concurrence with the certification of compliance has been suspended or revoked.
- (3) **Release requiring notification.** Any of the following releases, when discovered, are releases that require notification under Rule 391-3-19-.04(4), unless excluded under Rule 391-3-19-.04(2):
- (a) Releases to ground water. A release of a regulated substance which causes the concentration in ground water to exceed concentrations given in Table 1 of Appendix III, or for those substances not listed, the highest concentration of any of the following: the detection limit, Secondary Maximum Contaminant levels for Drinking Water listed in Rule 391-3-5, or background;
 - (b) Releases to soil. A release of a regulated substance which causes the concentration in soil to exceed a concentration in Appendix I; or
 - (c) Other releases. The discarding or abandonment of a regulated substance in barrels, drums, other containers, tanks, or other storage or transportation vessels, in process units, or in waste management units which have neither a permit nor interim status under the Georgia Hazardous Waste Management Act, O.C.G.A. § [12-8-60](#) et seq., the Georgia Solid Water Management Act, O.C.G.A. § [12-8-20](#) et seq., or the Georgia Water Quality Control Act, O.C.G.A. § [12-5-20](#) et seq.
- (4) **Notification requirements.** Within 30 days of discovery by the property owner of a release which requires notification under Rule 391-3-19-.04(3), the property owner shall notify the Director of the release on such forms as specified by the Director. Upon the request of the Director, the property owner shall provide other such information as may be needed to ensure that the criteria of Rule [391-3-19-.05\(1\)](#) may be accurately evaluated. At the owner's option, the owner may complete the worksheets found in Appendix II of this Chapter to make a preliminary determination that a release may exceed a reportable quantity. If said worksheets indicate that a release exceeding a reportable quantity may have occurred, the owner may submit the information required under Rule [391-3-19-.05\(2\)](#) along with the worksheets in lieu of the above notification. In addition, the owner may petition the Director at the time of notification requesting a 90 day deferment of the Director's listing determination pursuant to Rule [391-3-19-.05\(1\)](#) in order to obtain additional samples, perform a removal, or take other remedial actions, to be followed by submittal of an amended notification. The deferment petition must specify interim measure for any suspected immediate health threat.

Rule 391-3-19-.05. Reporting of Releases exceeding Reportable Quantities and Listing of Sites on the Hazardous Site Inventory.

- (1) **Listing on the Hazardous Site Inventory.** The Director shall list a site on the Hazardous Site Inventory if the Director determines that a release exceeding a reportable quantity has occurred or that a release poses a danger to human health and the environment. A determination that a release exceeding a reportable quantity has occurred shall be made in accordance with the method in Appendix II.
- (2) **Release reporting.** If the Director determines that a release exceeding a reportable quantity has occurred, he shall notify the property owner in writing of his finding. If the Director determines that a release exceeding a reportable quantity has not occurred, he shall likewise issue such determination in writing. Within 45 days of the receipt of the Director's written determination that a release exceeding a reportable quantity has occurred, the property owner shall submit the following information unless such information has already been submitted pursuant to Rule [391-3-19-.04\(4\)](#):
 - (a) Name, mailing address, and telephone number of the site's property owner, lessee, tenant, or facility owner or operator;
 - (b) Street address of the site or, if a numbered street address is not available, a location descriptor;
 - (c) An original of the most current topographic map of scale 1:24,000 produced by the United States Geological Survey, with the geographic center of the site identified;
 - (d) A description of the property boundaries in the vicinity of the site, by legal description, survey plat, tax map, or other means;
 - (e) A chemical name, taken from appendix I, of each regulated substance released at the site which independently meets the notification criteria in Rule [391-3-19-.04\(3\)](#);
 - (f) A general description of the nature of the release and the location of areas affected by the release or by its subsequent migration, both within and beyond the original site's property boundaries;
 - (g) If known, the source, quantity, and the date of the regulated substance released;

- (h) Suspected or known date and quantity of each release at the site;
 - (i) Suspected or known source of each release at the site and the known or estimated extent of the area contaminated by said release or by its subsequent migration, both within and beyond the site's property boundaries;
 - (j) A summary of actions taken to investigate, clean up, or otherwise remediate the site;
 - (k) A statement which identifies the criteria of Rule [391-3-19-.04\(3\)](#) by which the property owner determined that a release which requires notification has occurred.
- (3) **Notification under CERCLA 103(c).** A property owner that has previously notified EPA under Section 103(c) of CERCLA may satisfy the requirements of Rule 391-3-19-05(2) by submitting a copy of the 103(c) notice together with the topographic map referenced in Rule 391-3-19-.05(2)(c).
- (4) **Removal of sites from the Hazardous Site Inventory.** The Director shall remove a site or an individual property at a site from the Hazardous Site Inventory if any of the following apply:
- (a) The Director determines that it did not have a release which either exceeded a reportable quantity or posed a danger to human health or the environment at the time of listing the site on the Hazardous Site Inventory.
 - (b) The Director determines, that the site or individual property meets Type 1, Type 2, Type 3, Type 4, or Type 5 risk reduction standards of Rule [391-3-19-.07](#), and when required, the property owner has complied with Rule [391-3-19-.08\(4\)](#) or Rule [391-3-19-.08\(7\)](#).

History. Original Rule entitled "Reporting of Releases Exceeding Reportable Quantities and Listing of Sites on the Hazardous Site Inventory" adopted. F. Jan 31, 1994; eff. February 20, 1994.

Amended: F. Jul. 1, 1994; eff. July 21, 1994.

Amended: F. Sep. 24, 2014; eff. Oct. 14, 2014.

[Rule 391-3-19-.06. Corrective Action.](#)

- (1) **Applicability.** The requirements of Rule 391-3-19-.06 apply to any person who is a responsible party at a site listed on the Hazardous Site Inventory except as otherwise provided for in Rule 391-3-19-.06(7).
- (2) **Classification of sites on the Hazardous Site Inventory.** Upon listing a site on the Hazardous Site Inventory, the Director shall designate the site or any individual property

at the site as Class II unless or until he determines that it should be designated as Class I, Class III, Class IV, or Class V pursuant to Rule 391-3-19-.06(2)(a) through (d):

- (a) Class I applies to any site or any individual property at a site which:
1. Includes the source of a release to a groundwater drinking water supply that has caused, or is likely to cause, human exposure through drinking water to concentrations of a regulated substance that exceed any of the Type 1 groundwater criteria described in Rule [391-3-19-.07\(6\)\(b\)](#);
 2. Has had a release which continues to add contaminants to soil, water, or air, or that continues to expand in area or volume;
 3. Has had a release of a regulated substance that results in or is likely to result in any of the following:
 - (i) Bioaccumulation of a regulated substance in flora or fauna that causes adverse toxicological effects or that results in the need to recommend that human consumption be limited;
 - (ii) Adverse acute or chronic effects to domestic animals, fish, shellfish, or wildlife;
 4. Includes an abandoned facility where the potential for exposure to a regulated substance is not controlled through on-site management;
 5. Has been classified as Class I pursuant to Rule 391-3-19-.06(6)(b)(4) or (c); or
 6. Does not meet any other criteria of Rule 391-3-19-.06(2)(a) but the Director has determined that it nevertheless poses a danger to human health or the environment.
- (b) Class III applies to any site or individual property at a site which has been listed on the Hazardous Site Inventory (but not classified as Class IV pursuant to Rule 391-3-19-.06(2)(c) and which and has been determined by the Director to be in compliance with the Type 3, Type 4 or Type 5 risk reduction standards of Rule [391-3-19-.07](#).
- (c) Class IV applies to any site or individual property at a site which has been listed on the Hazardous Site Inventory and at which corrective action as described in Rule 391-3-19-.06(7)(a) is being conducted or has been completed.
- (d) Class V applies to any site or individual property at a site which has been listed on the Hazardous Site Inventory for which the Director has made a determination pursuant to Rule 391-3-19-.06(6)(b)5 that the site has had a known release needing corrective action and at which corrective action is being performed in

compliance with a corrective action plan approved by the Director which will bring the site into compliance with the risk reduction standards. If the Director determines that corrective action is not being performed in compliance with the approved corrective action plan, the site may be reclassified to Class I.

(3) Compliance status report.

- (a) Any person who is a responsible party for a site on the Hazardous Site Inventory shall submit to the Director a compliance status report that documents the current status of the site with regard to the risk reduction standards of Rule [391-3-19-.07](#) for all regulated substances associated with each release at the site. The Director shall in writing request the submittal of said report and specify a deadline for submittal based on a priority for submittal to be determined by the Director.
- (b) The report required by Rule 391-3-19-.06(3)(a) shall, at a minimum, include the items enumerated below for all regulated substances associated with each release at the site, unless otherwise stated in writing by the Director. This report should be compiled on the basis of site conditions which exist after the completion of any voluntary corrective action taken by the responsible party prior to the submittal of the report. Reports on previous investigations or remedial activities required under other laws or regulations or undertaken voluntarily should be incorporated into the compliance status report when possible.
 1. A description of each known source which has contributed or is contributing to a release including:
 - (i) Source name, number or other descriptor;
 - (ii) Location of source on a map of scale of 1 inch = 200 feet or less;
 - (iii) Name of each regulated substance released from each source;
 - (iv) Chronology of each source of a release; and
 - (v) If a source is an engineered structure or a waste management unit, a description of the function, design, dimensions, capacity and operation of the source, including as-built construction drawings where available.
 2. If a release involves soil contamination, a complete definition of the horizontal and vertical extent of such soil contamination. Satisfactory evidence of a complete definition of the horizontal and vertical extent of soil contamination shall consist of an appropriate number of data points at sufficient locations with concentrations that demonstrate compliance with Type 1 or Type 2 risk reduction standards or that reflect background concentrations. An acceptable determination of background concentrations

shall be made from samples that are representative of soil conditions not affected by a release of a regulated substance. In support of the definition of the extent of soil contamination the compliance report shall describe the following:

- (i) General approach used;
 - (ii) Analytical parameters selected and rationale for selection;
 - (iii) Location of all sampling points by sample identification number on a map with scale of 1 inch = 200 feet or less and, where applicable, on vertical cross-sections of appropriate number and scale;
 - (iv) Sampling and analysis procedures including but not limited to:
 - (I) Sampling equipment and collection techniques;
 - (II) Field analytical or measurement techniques including make and model of equipment and calibration schedule and type;
 - (III) Sample handling and preservation techniques;
 - (IV) Equipment decontamination procedures;
 - (V) Chain-of-custody procedures; and
 - (VI) Laboratory analytical techniques, including references to the analytical methods used, if standard, or in cases where standard analytical techniques do not exist, descriptions of the analytical methods used, including quality assurance and quality control procedures utilized;
 - (v) A description of any statistical procedures used to evaluate data;
 - (vi) Procedures used to establish background soil concentrations; and
 - (vii) Narrative and tabular summary of all pertinent field data and the results of all final laboratory analyses that are supported by sufficient quality assurance/quality control data to validate the results.
3. If a release involves groundwater contamination, a complete definition of the horizontal and vertical extent of groundwater contamination. Satisfactory definition of the horizontal and vertical extent of groundwater contamination shall consist of an appropriate number of data points at sufficient locations with concentrations below those listed in Table 1 of

Appendix III or, for those substances not listed, the highest concentration of any of the following: the detection limit, Secondary Maximum Contaminant levels for Drinking Water listed in Rule 391-3-5, or background. An acceptable determination of background concentrations shall be made from samples that are representative of groundwater conditions not affected by a release of a regulated substance. The compliance status report shall, at a minimum, describe the following:

- (i) Analytical parameters selected and rationale for selection;
- (ii) A description of the methods used to characterize subsurface geology;
- (iii) A description of the methods used to characterize horizontal and vertical groundwater gradients, flow rates, and flow directions;
- (iv) A description of the methods used to determine hydraulic conductivities and other pertinent hydrogeological characteristics, including a description of any slug and/or aquifer pumping tests;
- (v) A description of groundwater monitoring well locations, and their installation and construction methods, including:
 - (I) A map with scale of 1 inch = 200 feet or less depicting all existing well locations including a survey of each well's surface reference point and the elevation of its top-of-casing;
 - (II) Type of well casing material;
 - (III) Description of well-intake design including screen slot size and length, filter pack materials and length, and method of filter pack emplacement;
 - (IV) Method used to seal the well from the surface and any other features designed to prevent or minimize downward migration of contaminants along the well annulus; and
 - (V) Description of the methods and procedures used to develop the wells;
- (vi) Description of all sampling and analysis procedures used, including at a minimum:
 - (I) Procedures and timing for measuring groundwater elevations for each sampling event;

- (II) Well evacuation procedures including volume evacuated prior to sampling;
 - (III) Sample withdrawal techniques, sampling equipment and materials (tubing, rope, pump, etc.);
 - (IV) Sample handling and preservation techniques;
 - (V) Procedures for decontaminating sampling equipment between samples and sampling events;
 - (VI) Chain-of-custody procedures for all phases of sample management; and
 - (VII) Laboratory analytical techniques, including references to the analytical methods used, if standard, or in cases where standard analytical techniques do not exist, descriptions of the analytical methods used, including quality assurance and quality control procedures utilized.
- (vii) A description of procedures used to determine background groundwater quality which is representative of ground water not affected by a release;
 - (viii) A map with scale of 1 inch = 200 feet or less depicting the horizontal extent of contamination;
 - (ix) A map with scale of 1 inch = 200 feet or less depicting the potentiometric surface of ground water;
 - (x) Maps and vertical cross-sections of appropriate scale depicting concentrations for all contaminants superimposed upon site stratigraphic features and monitoring wells; and
 - (xi) Narrative and tabular summary of all pertinent field data and the results of all final laboratory analyses that are supported by sufficient quality assurance/quality control data to validate the results.
4. A description of any human or environmental receptors who may have been or could be potentially exposed to a release at the site.

5. A description of all properties which are part of the site including the address and location of such property, its legal description, and the property owner's name, address and telephone number.
6. The name, address and telephone number of any other person who may be a responsible party for the site and a description of the type and amount of regulated substances such party may have contributed to a release.
7. A summary of any previous actions taken to eliminate, control, or minimize any potential risk at the site, including actions taken to comply with the risk reduction standards of Rule [391-3-19-.07](#).
8. If the responsible party certifies pursuant to Rule 391-3-19-.06(4)(c) that the site is not in compliance with any of the risk reduction standards of Rule [391-3-19-.07](#), the compliance status report may include a proposed corrective action plan that describes the corrective action that the responsible party has determined is necessary to achieve compliance with the applicable risk reduction standards of Rule [391-3-19-.07](#).
9. If the responsible party certifies pursuant to Rule 391-3-19-.06(4)(c) that the site is in compliance with the Type 3, Type 4 or Type 5 risk reduction standards of Rule [391-3-19-.07](#), the compliance status report may include a proposed corrective action plan that describes the continuing actions that the responsible party has determined are necessary to achieve or maintain compliance with the Type 3, Type 4 or Type 5 risk reduction standards.
10. Attached to the front of the compliance status report, a concise statement of the findings of the report presented in plain language, immediately followed by the certification required pursuant to Rule 391-3-19-.06(4)(a).

(4) Certification of compliance with risk reduction standards.

- (a) The compliance status report required by Rule 391-3-19-.06(3) shall include a compliance status certification regarding the responsible party's own determination as to the status of a site or any individual property at a site with regard to the applicable risk reduction standards of Rule [391-3-19-.07](#) for all regulated substances evaluated by the compliance status report.
- (b) The compliance status certification shall be signed by the applicable person described in Items 1 through 4 of Rule [391-3-19-.03\(7\)\(c\)](#). Where the compliance status report is submitted for two or more cooperating responsible parties, the certification may be signed by a duly authorized representative of said responsible parties, "duly authorized" having the same meaning as in Item 4 of Rule [391-3-19.03\(7\)\(c\)](#).

- (c) Any person signing the certification of compliance required under Rule 391-3-19-.06(4) shall make the following certification:

I certify under penalty of law that this report and all attachments were prepared under my direction in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations. Based on my review of the findings of this report with respect to the risk reduction standards of the Rules for Hazardous Site Response, Rule [391-3-19-.07](#), I have determined that [(choose either of the following statements): 1) This site/property is in compliance with Type 1, Type 2, Type 3, Type 4, or Type 5 risk reduction standards (specify lowest numbered Type that applies, or all applicable types if more than one Type is applicable) or 2) This site/property is not in compliance with any Type risk reduction standards.].

(5) Public participation.

- (a) Within 7 days after submitting to the Director the compliance status report required pursuant to Rule 391-3-19-.06(3), the responsible party who submits the report shall publish a notice in the legal organ of the local governments in whose jurisdiction the site is located, announcing that such report is available for inspection by the general public. The public notice must include:
1. The name, address and location of the site as it appears on the Hazardous Site Inventory, and, if the plan applies to less than the full site, the street address and owner's name for applicable properties;
 2. The following statement: "*The Georgia Environmental Protection Division, Department of Natural Resources, State of Georgia (EPD) has placed this site on the Hazardous Site Inventory pursuant to its authority under the Hazardous Site Response Act and Rules promulgated thereunder. As required by the Rules for Hazardous Site Response, the responsible party for this site was required to investigate the site and submit a compliance status report to EPD summarizing the results of that investigation. EPD is currently reviewing the compliance status report to determine if corrective action is needed for regulated substances that have been released at this site. Before EPD decides whether corrective action is needed, the public has the opportunity to review the compliance status report and provide comments to EPD about the report.*";

3. Announcement of a 30-day public comment period beginning on the date of the published notice, and the name, address and telephone number of an EPD contact person to whom written or oral comments can be made;
 4. Name, address and telephone number of the responsible party or its designated contact person; and
 5. Location where the report may be viewed and copied.
- (b) Within 7 days after submitting to the Director a proposed corrective action plan, or any subsequent revisions thereof, the responsible party who submits the plan shall publish a notice in the legal organ of the local governments in whose jurisdiction the site is located, announcing that such plan is available for inspection by the general public. The public notice must include:
1. The name, address and location of the site as it appears on the Hazardous Site Inventory, and, if the plan applies to less than the full site, the street address and owner's name for applicable properties;
 2. The following statement: *"The Georgia Environmental Protection Division, Department of Natural Resources, State of Georgia (EPD) has placed this site on the Hazardous Site Inventory pursuant to its authority under the Hazardous Site Response Act and Rules promulgated thereunder. The Director of EPD has determined that this site needs corrective action and has required the responsible party for this site to submit to EPD a proposed corrective action plan that describes the corrective action the responsible party has determined is necessary to comply with the risk reduction standards of EPD's Rules for Hazardous Site Response. Before EPD decides whether to approve this proposed corrective action plan, the public has the opportunity to review the proposed corrective action and provide comments to EPD about the plan."*;
 3. Announcement of a 30-day public comment period beginning on the date of the published notice, and the name, address and telephone number of an EPD contact person to whom written or oral comments can be made;
 4. Name, address and telephone number of the responsible party or its designated contact person; and
 5. Location where the plan may be viewed and copied.
- (c) Where a proposed corrective action plan is submitted at the same time as the compliance status report required under Rule 391-3-19-.06(3), the same procedures as described under Items (a) and (b) above shall be followed, but with the substitution of the following statement for that given in Item (2):

"The Georgia Environmental Protection Division, Department of Natural Resources, State of Georgia (EPD) has placed this site on the Hazardous Site Inventory pursuant to its authority under the Hazardous Site Response Act and Rules promulgated thereunder. As required by the Rules for Hazardous Site Response, the responsible party for the site was required to investigate the site and submit a compliance status report to EPD summarizing the results of that investigation. The responsible party has submitted to EPD, along with the compliance status report, a proposed corrective action plan that describes the corrective action the responsible party has determined is necessary to comply with the risk reduction standards of EPD's Rules for Hazardous Site Response. Before EPD decides whether to approve the proposed corrective action plan, the public has the opportunity to review the compliance status report and proposed corrective action and provide comments to EPD about the report and plan."

- (d) Within 15 days after publishing the public notice required by Rule 391-3-19-.06(5)(a), (b), or (c), the responsible party shall provide the Director with an exact copy of the public notice as it appeared in the paper.
 - (e) Within 7 days after submitting to the Director either the compliance status report required pursuant to Rule 391-3-19-.06(3), or a proposed corrective action plan, the responsible party shall provide to the county government in the county in which the site is located and to the government of any city in whose jurisdictions the site is located a written notice providing the same information required in Rule 391-3-19-.06(5)(a), (b), or (c) as applicable.
 - (f) Upon making a determination pursuant to Rule 391-3-19-.06(6) or upon determining that a proposed corrective action plan should be approved, the Director shall publish notice of such determination in the legal organ of the local governments in whose jurisdiction the site is located.
- (6) **Determination of the need for corrective action.** Rule 391-3-19-.06(6) applies to any site or individual property at a site listed on the Hazardous Site Inventory.
- (a) Any site or individual property at a site that is classified on the Hazardous Site Inventory as Class I, Class III, Class IV or Class V pursuant to Rule 391-3-19-.06(2) shall also be designated by the Director as having a known release needing corrective action.
 - (b) For any site or individual property at a site listed on the Hazardous Site Inventory, the Director shall review the compliance status certification required by Rule 391-3-19-.06(4) and do the following:
 - 1. If the responsible party certifies that the site or an individual property at the site is in compliance with the Type 1 or Type 2 risk reduction standards of Rule [391-3-19-.07](#), and the Director concurs with that certification, the

Director shall designate the site or property as not needing further action and shall remove the site or property from the Hazardous Site Inventory in accordance with Rule [391-3-19-.05\(4\)](#).

2. If the responsible party certifies that the site or an individual property at the site is in compliance with the Type 3 or Type 4 risk reduction standards of Rule [391-3-19-.07](#), and the Director concurs with that certification, the Director shall designate the site or property on the Hazardous Site Inventory as having a known release needing corrective action, reclassify it as Class III, and state on the Inventory that corrective action shall presently consist of those activities needed to maintain compliance with the Type 3 or Type 4 risk reduction standards, including the property notices of Rule [391-3-19-.08\(1\) and \(2\)](#). Upon compliance with Rule [391-3-19-.08\(4\)](#), the Director shall remove the site or property from the Hazardous Site Inventory in accordance with Rule [391-3-19-.05\(4\)](#).
3. If the responsible party certifies that the site or an individual property at the site is in compliance with the Type 5 risk reduction standards of Rule [391-3-19-.07](#), and the Director concurs with that certification, the Director shall designate the site or property on the Hazardous Site Inventory as having a known release needing corrective action, reclassify it as Class III, and state on the Inventory that corrective action shall presently consist of those activities needed to maintain compliance with the Type 5 risk reduction standards, including the property notices of Rule [391-3-19-.08\(1\), \(2\), and \(7\)](#). Upon compliance with Rule [391-3-19-.08\(7\)](#), the Director shall remove the site or property from the inventory.
4. If the responsible party certifies that the site or an individual property at the site is not in compliance with any of the risk reduction standards of Rule [391-3-19-.07](#), the Director shall reclassify the site as a Class I site and designate the site on the Hazardous Site Inventory as having a known release needing corrective action, whereupon the owner of any property at the site which is not independently in compliance with Type 1 or Type 2 risk reduction standards shall make the property notices required by Rule [391-3-19-.08\(1\) and \(2\)](#). If the site or an individual property at the site is a Class V site and the Director determines corrective action is not being conducted in accordance with the approved corrective action plan, the Director may reclassify the site as a Class I site and designate the site in the Hazardous Site Inventory as having a known release needing corrective action, whereupon the owner of any property at the site which is not independently in compliance with Type 1 or Type 2 risk reduction standards shall make the property notices required by Rule [391-3-19-.08\(1\) and \(2\)](#).

5. If the responsible party certifies that the site or an individual property at the site is not in compliance with any of the risk reduction standards of Rule [391-3-19-.07](#), but corrective action is being performed in compliance with a corrective action plan approved by the Director which will bring the site into compliance with the risk reduction standards, the Director shall reclassify the site or individual property as a Class V site and designate the site or individual property on the Hazardous Site Inventory as having a known release needing corrective action. Upon making such designation, the Director shall also state that corrective action is being performed in compliance with a corrective action plan approved by the Director that will bring the site or individual property into compliance with the risk reduction standards. Upon such designation being made, the owner of any property at the site which is not independently in compliance with Type 1 or Type 2 risk reduction standards shall make the property notices required by Rule [391-3-19-.08\(1\) and \(2\)](#) to the extent that such notices have not already been made.
- (c) The Director may reclassify a site or an individual property at a site listed on the Hazardous Site Inventory from Class II to Class I, and designate the site or property as having a known release needing corrective action, if:
1. The responsible party fails to submit or fails to agree to submit the compliance status report within the time specified in Rule 391-3-19-.06(3)(a); or
 2. The compliance status report is deficient with respect to the requirements of Rule 391-3-19-.06(3)(b) and the Director has notified the responsible party in writing of such deficiencies and the responsible party has failed to correct such deficiencies by a deadline to be specified by the Director in writing; or
 3. The responsible party certifies pursuant to Rule 391-3-19-.06(4) that the site or an individual property at the site is not in compliance with any of the applicable risk reduction standards of Rule [391-3-19-.07](#); or
 4. The Director does not concur with the responsible party's certification made pursuant to Rule 391-3-19-.06(4) that the site or an individual property at the site is in compliance with the applicable risk reduction standards of Rule [391-3-19-.07](#).
- (d) Upon making a determination pursuant to Rule 391-3-19-.06(6)(a) through (c) that a site has a known release needing corrective action, the Director shall provide the responsible party, and the owner of each property at the site which continues not to comply with either Type 1 or Type 2 risk reduction standards of Rule [391-3-19-.07](#), with written notice of such determination, including a statement concerning the requirements of Rule [391-3-19-.08](#).

- (e) If the Director determines pursuant to Rule 391-3-19-.06(6)(b) that a site or an individual property at a site listed as Class I or Class V on the Hazardous Site Inventory subsequently comes into compliance with the risk reduction standards of Rule [391-3-19-.07](#), the Director shall reclassify such site or property in accordance with the provisions of Items 1 through 3 of Rule 391-3-19-.06(6)(b), except that the deed notice provisions of Rule [391-3-19-.08\(1\) and \(2\)](#) need not be repeated.
- (f) Notwithstanding a previous determination of the Director made pursuant to Rule 391-3-19-.06(6)(a) through (e), the Director may reclassify a site or an individual property at a site listed on the Hazardous Site Inventory as necessary to protect human health and the environment.

(7) Other corrective actions.

- (a) The requirements of Rule 391-3-19-.06(3) through (5) do not apply to any person who is a responsible party for any of the following at a site or individual property listed on the Hazardous Site Inventory unless Rule 391-3-19-.06(7)(b) applies:
 - 1. Corrective action required by an order of the Director executed before the effective date of these Rules pursuant to O.C.G.A. § [12-8-71\(b\)](#) of the Hazardous Waste Management Act;
 - 2. Corrective action required by an order of the Director executed before the effective date of these Rules pursuant to O.C.G.A. § [12-8-96\(a\)](#) of HSRA;
 - 3. Remedial actions conducted in accordance with a Record of Decision (ROD) under the NCP (referenced at [40 CFR 300.430\(f\)\(5\)](#));
 - 4. Remedial actions where compliance is demonstrated with applicable cleanup standards promulgated under the federal Toxic Substances Control Act;
 - 5. Corrective action required by a hazardous waste management facility permit issued by the Director which contains conditions requiring corrective action in accordance with O.C.G.A. § [12-8-66\(e\)](#) of the Hazardous Waste Management Act; or
 - 6. Corrective action and assessment monitoring required by a solid waste handling permit or an order issued by the Director pursuant to the Comprehensive Solid Waste Management Act.
 - 7. Removal actions conducted under the NCP, if the Director determines that additional action is not needed to protect human health and the environment.
- (b) Any site or individual property at which corrective action as described in Rule 391-3-19-.06(7)(a) is being conducted or has been completed shall be presumed to

be in compliance with Type 5 of the risk reduction standards of Rule [391-3-19-.07\(10\)](#) upon its listing on the Hazardous Site Inventory, and the requirements of Rule 391-3-19-.06(3) through (5) do not apply to any person who is a responsible party at such site unless:

1. The responsible party elects to certify compliance with other than Type 5 risk reduction standards of Rule [391-3-19-.07](#), in which case the site or property shall remain on the Hazardous Site Inventory as Class IV until the Director reclassifies it in accordance with 391-3-19-.06(6);
 2. The Director determines that such corrective action fails to protect human health and the environment and that additional corrective action is necessary to comply with the risk reduction standards of Rule [391-3-19-.07](#), in which case the Director may reclassify the site or property in accordance with Rule 391-3-19-.06(6)(f); or
 3. The Director determines that such corrective action fails to meet the Type 5 risk reduction standards of Rule [391-3-19-.07\(10\)](#), in which case the Director may reclassify the site or property pursuant to 391-3-19-.06(6)(f).
- (c) For any site described in Rule 391-3-19-.06(7)(a)(5) that is not also described by Item 1, 2, or 3 of Rule 391-3-19-.06(7)(b), the property notice requirements of Rule [391-3-19-.08\(1\) and \(2\)](#) shall not apply until the Director makes a determination that corrective action is needed pursuant to the Rules for Hazardous Waste Management, Chapter 391-3-11.

Rule 391-3-19-.07. Risk Reduction Standards.

- (1) **Purpose and Scope.** Rule 391-3-19-.07 specifies the information and procedures necessary to demonstrate compliance with requirements under HSRA for corrective action for all regulated substance releases at a site or individual property at a site listed on the Hazardous Site Inventory. All risk reduction standards will, when implemented, provide adequate protection of human health and the environment. Compliance with these requirements does not preclude the requirement to comply with any stricter standards that may be applicable under other state or federal laws or regulations. These risk reduction

standards may be applicable, relevant, or appropriate requirements for remedial actions under the NCP.

- (2) **Derivation of health-based criteria.** For a regulated substance that poses a risk to humans the cleanup standards shall be calculated as required under Rules 391-3-19-.07(6), (7), (8), (9) and (10) based on an excess lifetime cancer risk of 1×10^{-5} and a hazard quotient of 1.0 for non-carcinogens. For a regulated substance that poses a risk of both cancer and one or more adverse health effects other than cancer, the standards shall be derived for the most sensitive effect.
 - (a) The standards for groundwater shall be determined using Equation 1 (cancer effects) or Equation 2 (non-cancer risk effects) from RAGS, Part B for ingestion, as modified using RAGS, Part E for dermal contact, and RAGS, Part F for inhalation exposures.
 - (b) The standards for soil shall be determined using Equation 6 (cancer effects) or Equation 7 (non-cancer risk effects) from RAGS, Part B for ingestion, as modified using RAGS, Part E for dermal contact, and RAGS, Part F for inhalation exposures.
 - (c) For mutagenic carcinogens, the standards shall be derived using the age dependent adjustment factors in Table 3 of Appendix III.
- (3) **Completion of corrective action.** A required corrective action shall be considered complete when it is demonstrated that the site or individual property at a site meets any or a combination of the applicable risk reduction standards described in Rule 391-3-19-.07.
- (4) **Corrective action considerations.** For corrective action to be in compliance with these standards, the following elements must be addressed where applicable:
 - (a) The corrective action shall, at a minimum, provide for the removal and/or treatment of free product to the extent practicable, including considerations such as mobility and recoverability.
 - (b) No soil remaining in place under Type 1, 2, 3, or 4 risk reduction standards shall exhibit the hazardous waste characteristics of ignitability, corrosivity, or reactivity as defined in 40 CFR 261.53(b)(1) through (3).
 - (c) The corrective action shall not allow exposure to concentrations which would cause food chain contamination, damage to soils or to biota in the soils which could impair the use of soils for agricultural or silvicultural purposes, adverse effects on vegetation or wildlife, or the accumulation of vapors in buildings or other structures which pose a threat to human health or the environment.
 - (d) The corrective action shall protect waters of the State from releases that would cause surface water to experience concentrations of regulated substances in excess of any general criterion specified in the Georgia Rules and Regulations for Water

Quality Control at [391-3-6-.03\(5\)](#) or, if concentration values are not provided in said Rules, concentrations at levels that exhibit acute toxicity to aquatic life as demonstrated pursuant to protocols established by the Director.

- (e) If the detection limit and/or the background concentration for a regulated substance is greater than the concentration specified in any risk reduction standard, the greater of the detection limit or background shall be used for determining compliance with the applicable risk reduction standard. "Detection limit" in this context implies the non-fraudulent use of an approved analytical test method that is appropriate for the particular application. Background shall be determined from samples taken from media that are unaffected by a release. Background determinations may consider anthropogenic sources and may also be based on regional background studies accepted by the Division. For radionuclides, background means background radioactivity.
- (5) **Multiple property sites.** For sites consisting of more than one property, the Type risk reduction standard that shall apply to each individual property at that site shall be based upon the applicable use scenario for each individual property, i.e., residential or nonresidential.
- (6) **Criteria for Type 1 standards.**
- (a) Type 1 standards provide for regulated substance concentrations that pose no significant risk on the basis of standardized exposure assumptions and defined risk levels for residential properties. To comply with these standards, source materials must be removed or decontaminated to the Type 1 media criteria.
 - (b) Criteria for groundwater. At any point within groundwater that has been affected by a release, concentrations of regulated substances in groundwater samples shall not exceed concentrations given in Table 1 of Appendix III or, for those substances not listed, the background or detection limit concentration.
 - (c) Criteria for soil. Concentrations at any point above the uppermost groundwater zone in soil that has been affected by a release shall not exceed the concentrations given in Table 2 of Appendix III or, for those substances not listed, the least of the concentrations from Items 1 and 2 below:
 - 1. Concentrations which will not cause contamination of groundwater at levels which exceed Type 1 groundwater criteria, determined as the highest of the soil concentrations in Items (i) and (ii) below:
 - (i) Soil concentrations in Appendix I, excluding any values given in square brackets;
 - (ii) Soil concentrations determined using the equation and default parameters provided in Table 4 of Appendix III. A dilution

attenuation factor of 20 may be used unless the Division determines that another value is appropriate to protect human health and the environment.

2. The lesser of soil concentrations calculated in accordance with Rule 391-3-19-.07(2) using standard residential exposure assumptions in Table 3 of Appendix III.

[Note: Where concentrations are non-calculable under Items 1 or 2 above, the soil criterion shall be the higher of the background or detection limit concentrations.]

(7) Criteria for Type 2 standards.

- (a) Type 2 standards provide for regulated substance concentrations that pose no significant risk on the basis of a site-specific risk assessment for residential land use. To comply with these standards, source materials must be removed or decontaminated to the Type 2 media criteria.
- (b) Criteria for groundwater. At any point within any groundwater that has been affected by a release, concentrations of regulated substances in groundwater must not exceed the lesser of the values calculated in accordance with Rule 391-3-19-.07(2) using site-specific exposure factors for the residential use scenario. For those substances for which neither calculation can be made, the standard shall be the higher of concentrations in Table 1 of Appendix III, background concentrations, or detection limit concentrations.
- (c) Criteria for soil. Concentrations above the uppermost groundwater zone in soil that has been affected by a release shall not exceed the least of the concentrations in Items 1 through 3 below, or, for those substances for which none of the calculations can be made, the highest of the concentrations in Table 2 of Appendix III, background concentrations, or detection limit concentrations:
 1. Concentrations which will not cause contamination of groundwater at levels which exceed Type 1 or 2 groundwater criteria, whichever is higher, at a point of exposure defined as any point at which a drinking water well could be installed. These soil concentrations may be determined using a laboratory test and/or fate-and-transport model accepted by the Division. Other site-specific information, such as the age of the release and groundwater concentration trends, may be accepted by the Division to demonstrate that soil concentrations are protective of groundwater criteria.

2. The lesser of soil concentrations calculated in accordance with Rule 391-3-19-.07(2) using site-specific exposure factors for the residential use scenario.
 3. For lead, soil concentrations at the site must not exceed those concentrations that would cause a resident 6-year old child (averaged across preceding 84 months) to have a probability of no greater than 5% of a blood lead level greater than 10 ug/dL as determined by the IEUBK model using site-specific exposure assumptions, including the ingestion of site groundwater as drinking water and the probability of subsurface soils being brought to the land surface. The soil criterion at Item 1 above shall also apply to the Type 2 standard for lead.
- (d) Soil Averaging. For soil contaminated with regulated substances at sites where a Type 2 standard is being sought, exposure area averaging using methods recognized by USEPA and approved by the Division may be used to demonstrate that cumulative cancer and non-cancer risks are in compliance with soil criteria derived pursuant to Rule 391-3-19-.07(7)(c). These exposure area averaging methods may include statistical analysis of discrete sampling results or composite sampling methods.
- (e) More stringent criteria may be established for a site than are specified under Rule 391-3-19-.07(7)(b) and (c) if the Director or the responsible party determines that it is necessary to protect human health or the environment.

(8) Criteria for Type 3 standards.

- (a) Type 3 standards provide for regulated substance concentrations that pose no significant risk on the basis of standardized exposure assumptions and defined risk levels for the non-residential use scenario. To comply with Type 3 standards, source materials must be removed or decontaminated to the Type 3 media criteria.
- (b) Type 3 standards are not applicable to residential properties. Type 3 standards are applicable where the responsible party documents that the activities being conducted on the property satisfy the definition for non-residential property at Rule [391-3-19-.02\(2\)](#).
- (c) Criteria for groundwater. At any point within groundwater that has been affected by a release, concentrations of regulated substances in groundwater shall not exceed the MCL or, for those substances not listed, the lesser of concentrations calculated in accordance with Rule 391-3-19-.07(2) using standard non-residential exposure assumptions in Table 3 of Appendix III. If no MCL exists and the calculations cannot be made, the groundwater standard shall be the higher of concentrations in Table 1 of Appendix III, background concentrations or detection limit concentrations.

(d) Criteria for soils.

1. Concentrations at any point above the uppermost groundwater zone in soil that has been affected by a release shall not exceed the concentrations described in Item 1 of Rule 391-3-19-.07(6)(c), based on Type 3 groundwater criteria.
2. Concentrations in surface soil (soil within one foot of the land surface) shall meet the criteria of Item 1 above and shall not exceed the lesser of the values calculated in accordance with Rule 391-3-19-.07(2) using standard nonresidential exposure assumptions in Table 3 of Appendix III. If the calculations cannot be made, the surface soil criterion shall be equal to the criterion of Item 1 above. In no event shall compliance with the surface soil criteria be achieved by applying one foot of clean soil onto the original land surface.
3. Concentrations in subsurface soil (soil greater than 1 foot from the land surface) shall meet the criterion of Item 1 above and shall not exceed the lesser of the values calculated in accordance with Rule 391-3-19-.07(2) using standard excavation worker exposure assumptions accepted by the Division. If the calculations cannot be made, the subsurface soil criterion shall be equal to the criterion of Item 1 above.
4. For lead, the standard is 400 mg/kg.

(9) **Criteria for Type 4 standards.**

- (a) Type 4 standards provide for regulated substance concentrations that pose no significant risk on the basis of a site-specific risk assessment for non-residential land use. To comply with Type 4 standards, source materials must be removed or decontaminated to the Type 4 media criteria.
- (b) Type 4 standards are not applicable to residential properties. Type 4 standards are applicable where the responsible party documents that the activities being conducted on the property satisfy the definition for non-residential property at Rule [391-3-19-.02\(2\)](#) and documents that a monitoring program or an environmental covenant executed in accordance with Rule [391-3-19-.08\(7\)](#) will assure continued compliance with the Type 4 standards.
- (c) Criteria for groundwater. Concentrations of regulated substances in groundwater must not exceed, at any point that is not otherwise subject to site-specific groundwater use restrictions in accordance with Rule [391-3-19-.08\(7\)](#), the lesser of the values calculated in accordance with Rule 391-3-19-.07(2) using site-specific exposure factors for the non-residential use scenario. For those substances for which neither calculation can be made, the standard shall be the higher of

concentrations in Table 1 of Appendix III, background concentrations, or detection limit concentrations.

1. If groundwater use restrictions are utilized, groundwater contaminated with regulated substances in excess of appropriate Type 1 through 4 standards must not migrate beyond the limits of the institutional controls. The responsible party shall demonstrate that such migration will not occur or implement groundwater monitoring to ensure that migration is not occurring, unless the Division determines that monitoring is not needed.
- (d) Criteria for soil. Concentrations in soil that has been affected by a release shall not exceed the relevant criteria listed below, or, for those substances for which none of the concentrations can be calculated, the highest of concentrations in Table 2 of Appendix III, background concentrations, or detection limit concentrations:
1. Concentrations in soil above the uppermost groundwater zone shall not cause contamination of groundwater at levels which exceed Type 3 or 4 groundwater concentration criteria, whichever is higher, at a point of exposure defined as any point at which a drinking water well could be installed. These soil concentrations may be determined using a laboratory test and/or fate-and-transport model accepted by the Division. Other site-specific information, such as the age of the release and groundwater concentration trends, may be accepted by the Division to demonstrate that soil concentrations are protective of groundwater criteria.
 2. Concentrations in surface soil shall meet the criteria of Item 1 above and shall not exceed the lesser of the values calculated in accordance with Rule 391-3-19-.07(2) using site-specific exposure factors for the nonresidential use scenario. The depth of soil considered surface soil may be based upon site-specific exposure factors approved by the Director, or assumed to be soil within one foot of the land surface. In no event shall compliance be achieved by applying clean soil or any other barrier onto surface soil.
 - (i) For lead, surface soil concentrations at the site must not exceed concentrations that are determined by the procedures described in Appendix IV. In cases where children frequent the site, soil concentrations may be determined pursuant to Rule 391-3-19-.07(9)(f).
 3. Concentrations in subsurface soil (soils extending to a specified excavation depth approved by the Director) shall meet the criterion of Item 1 above and shall not exceed the lesser of the values calculated in accordance with Rule 391-3-19-.07(2) using site-specific excavation worker exposure factors approved by the Director. If the calculations cannot be made, the subsurface soil criterion shall be equal to the criterion of Item 1 above.

- (i) For lead, subsurface soil concentrations at the site must not exceed concentrations that are determined by the procedures described in Appendix IV, using site-specific excavation worker exposure factors approved by the Director.
- (e) Soil Averaging. For soil contaminated with regulated substances at sites where a Type 4 standard is being sought, exposure area averaging using methods recognized by USEPA and approved by the Division may be used to demonstrate that cumulative cancer and non-cancer risks are in compliance with soil criteria derived pursuant to Rule 391-3-19-.07(9)(d). These exposure area averaging methods may include statistical analysis of discrete sampling results or composite sampling methods.
- (f) More stringent criteria may be established for a site than are specified under Rule 391-3-19-.07(9)(c) and (d) if the Director or the responsible party determines that it is necessary to protect human health or the environment.

(10) Criteria for Type 5 Standards.

- (a) Type 5 standards allow, in those instances where application of Type 1-4 standards is not appropriate under present circumstances, the use of measures to control the regulated substances or the property where the regulated substances are located. Such measures may consist of engineering controls such as construction of a fence, placement of a cap, installation of a slurry wall, or stabilization/ solidification/fixation of the waste or waste residues. Under Type 5 standards, removal, decontamination, or treatment are used where appropriate to remove the principal threats at a site. The responsible party has the burden of being able to demonstrate to the satisfaction of the Director that the particular mix of removal, decontamination, treatment and/or control measures is appropriate to eliminate or abate present and future threats to human health and the environment. Institutional controls should not be substituted for active remedial measures unless such active measures are determined not to be practicable.
- (b) Compliance with Type 5 standards requires long-term monitoring and maintenance, as appropriate for implemented remedial measures, plus a restrictive covenant provided in accordance with Rule [391-3-19-.08\(7\)](#).
- (c) Compliance with Type 5 standards requires that Type 1, 2, 3, or 4 risk reduction standards, as applicable, be met beyond the boundary of the area for which compliance with Type 5 standards are sought whenever implementation of remedial measures is complete.

(d) Remedial measures designed to achieve compliance with Type 5 standards shall be consistent with the general requirements of Rule 391-3-19-.07(10)(a) and meet all the following performance criteria:

1. Carcinogens. For carcinogens, the measures shall be expected to permanently prevent exposures which exceed the upper bound on an estimated excess cancer risk of 10^{-5} for individual carcinogenic substances and individual exposure pathways. The cumulative excess cancer risk for multiple carcinogenic substances and exposure pathways shall not be greater than 10^{-5} .
2. Systemic toxicants. For systemic toxicants, the measures shall be expected to permanently prevent exposures which exceed the dose to which the human population (including sensitive subgroups) could be exposed on a daily basis without appreciable risk of deleterious effect during a lifetime. Exposures shall not exceed a hazard quotient of one or a hazard index of one. The hazard quotient is the ratio of a single systemic toxicant exposure level for a specified time period to a reference dose for that systemic toxicant derived from the same time period. The hazard index is the sum of the hazard quotients for a single or multiple systemic toxicants which affect the same target organ, or which act by the same method of toxicity through single or multiple media exposure pathways.
3. Air. The measures shall be expected to permanently assure that any emission from the contamination being addressed under these rules does not cause ambient atmospheric concentrations to exceed the lowest of the following concentrations:
 - (i) NESHAP and NAAQ Standards, and other applicable federal and state standards and guidelines of the USEPA and EPD.
 - (ii) For residential exposure conditions, concentrations that satisfy Items 1 and 2 of Rule 391-3-19-.07(10)(d) above at exposure points located both at the property boundary and within the contaminated area.
 - (iii) For non-residential exposure conditions, either OSHA permissible exposure limits, threshold limit values or other criteria applicable to an industrial exposure setting within the property boundary, and concentrations that satisfy Items 1 and 2 of Rule 391-3-19-.07(10)(d) at the property boundary.
4. Groundwater. At a minimum, for all Type 5 cases, free product shall be removed and/or treated to the extent practicable, including considerations such as mobility and recoverability. For groundwater contaminated with regulated substances that the responsible party demonstrates is not

appropriate to remove or treat to the Type 1-4 standards, the criteria under Items (i) and (ii) below shall be met.

(i) If all source material and soil is removed, or treated to concentrations that are protective of groundwater as specified in Rule 391-3-19-.07(6)(c)1., (7)(c)1., (8)(d)1., (9)(d)1., whichever are applicable, the responsible party shall implement engineering controls, institutional controls, and monitoring for groundwater, unless the Director determines that they are not needed, to ensure:

(I) Groundwater contaminated with regulated substances in excess of the Type 1 through 4 standards will not migrate beyond the limits of the engineering controls, institutional controls and monitoring;

(II) Regulated substances in groundwater will not increase in concentration or toxicity in excess of Type 1 through 4 standards at the limits of engineering and institutional controls and monitoring; and

(III) Exposure to regulated substances in groundwater in concentrations exceeding the Type 1 through 4 standards will not occur.

(ii) If all source material and soil is not removed or treated to concentrations that are protective of groundwater as specified in Rule 391-3-19-.07(6)(c)1., (7)(c)1., (8)(d)1., or (9)(d)1., whichever are applicable, the Director may require the removal or treatment of groundwater at the hydraulically downgradient limit of the engineering controls used to control source material and soil to prevent or eliminate the horizontal and vertical migration of regulated substances in excess of the Type 1 through 4 standards beyond the hydraulically downgradient limit of such engineering controls. Beyond the engineering controls for source material and soil, the responsible party shall implement engineering controls, institutional controls and monitoring for groundwater, unless the Director determines that they are not needed, to ensure that the criteria specified in Items 4. (i)(I)-(III) above are met.

5. Soil. For soil contaminated with regulated substances at sites where a Type 5 standard is being sought, exposure area averaging using methods recognized by USEPA and approved by the Director may be used to demonstrate compliance with soil criteria derived pursuant to this section, provided the engineering and institutional controls for soil will

permanently maintain exposure conditions consistent with those used to calculate such criteria.

- (e) More stringent criteria may be established for a site than are specified under 391-3-19-.07(10)(d) if the Director or the responsible party determines that it is necessary to protect human health or the environment.

Rule 391-3-19-.08. Property Notices.

- (1) **Notices of private property instruments.** This Rule applies to the owner of any property that is included in a site which is listed on the Hazardous Site Inventory and which has been designated as needing corrective action pursuant to Rule [391-3-19-.06\(6\)](#). The requirements of this paragraph do not apply to the owner of any property at the site where the Director concurs with a demonstration that the property complies, independently of other properties at the site, with either Type 1 or Type 2 risk reduction standards.
 - (a) From and after the date any owner receives written notice from the Director under Rule [391-3-19-.06\(6\)\(d\)](#) that property of such owner that is listed on Hazardous Site Inventory has been designated as needing corrective action, the owner of any such property shall include the following notice in any warranty deed, mortgage, security deed, lease, rental agreement, or other instrument that is thereafter given or caused to be given by the property owner which creates an interest in or grants a use of the property:

"This property has been listed on the state's hazardous site inventory and has been designated as needing corrective action due to the presence of hazardous wastes, hazardous constituents, or hazardous substances regulated under state law. Contact the property owner or the Georgia Environmental Protection Division for further information concerning this property. This notice is provided in compliance with the Georgia Hazardous Site Response Act."

[Note: The term "instrument that is thereafter given or caused to be given by the property owner which creates an interest in or grants a use of the property" does not include options or contracts to purchase real property.]

- (b) Rule 391-3-19-.08(1)(a) shall not apply after filing of the affidavit referred to in Rule 391-3-19-.08(6).
- (2) **Affidavit in county deed records.** No later than forty five (45) days from the date the Director issues the written notice pursuant to Rule [391-3-19-.06\(6\)\(d\)](#) that a property or part thereof listed on the Hazardous Site Inventory has been designated as needing corrective action, the owner of any such property shall cause to be prepared an affidavit of such fact in recordable form as set forth in O.C.G.A. § [44-2-20](#) and shall file such affidavit with the clerk of the superior court of each county in which the real property or any part thereof lies. Such affidavit shall be recorded in the clerk's deed records pursuant to O.C.G.A. § [44-2-20](#). Such affidavit shall include the statement provided in Rule 391-3-19-.08(1). The requirements of this paragraph do not apply to the owner of any property where the Director concurs with a demonstration that the property complies, independently of other properties at the site, with either Type 1 or Type 2 risk reduction standards.
- (3) **Petitions for hearing.** The notices required by Rule 391-3-19-.08(1) and (2) shall be stayed if the property owner files a petition for a hearing in accordance with O.C.G.A. Section [12-8-73](#) within thirty (30) days of the date the Director issues the written notice pursuant to Rule [391-3-19-.06\(6\)\(d\)](#) that the site upon which the property is located needs corrective action.
- (4) **Documentation of property notices.** Within thirty (30) days after the recorded affidavit required by Rule 391-3-19-.08(2) is returned by the county clerk to the property owner, the property owner shall submit a copy of such recorded affidavit to EPD.
- (5) **Director's affidavit in county deed records.** Where ownership or control of any real property at a site subject to Rule 391-3-19-.08(1) and (2) is involuntarily acquired by a unit of state or local government through bankruptcy, tax delinquency, abandonment, or other circumstances in which the government involuntarily acquires title by virtue of its function as sovereign, the Director shall give thirty (30) days notice to any person who owned, operated, or otherwise controlled activities at the property immediately beforehand that the property is subject to the requirements of Rule 391-3-19-.08 and that, barring said person's contest under Rule 391-3-19-.08(3), the Director shall prepare and file the notice referenced in Rule 391-3-19-.08(2).
- (6) **Subsequent affidavits.** If, subsequent to the filing of the initial affidavit referenced in Rule 391-3-19-.08(2), the Director determines that no further action is needed, and the property is removed from the Hazardous Site Inventory pursuant to Rule [391-3-19-.05\(4\)](#), the Director shall notify the property owner in writing of such determination whereupon the property owner may file an additional affidavit with the clerk of superior court attaching a copy of such determination, which shall be restricted to the following declaration:

"This property was listed on the state's hazardous site inventory (HSI) and was designated as needing corrective action. The property has since been determined to meet the delisting requirements of Section [391-3-19-.05\(4\)](#) of the Rules for Hazardous Site Response, and it has been removed from the HSI. A copy of the determination is attached hereto, and no further action is required except as noted to maintain compliance. The notice requirements of O.C.G.A. § [12-8-97](#) no longer apply to this property and prior notices given under this code section are no longer in effect. The property owner or the Georgia Environmental Protection Division may be contacted for further information concerning this property. This notice is provided in compliance with the Georgia Hazardous Site Response Act."

- (7) **Environmental covenants.** The owner of any property at which Type 3, 4 or 5 risk reduction standards of Rule [391-3-19-.07\(8\)](#), [\(9\)](#), or 10) are being used shall, upon the request of the Director, execute an environmental covenant for such property as provided for in O.C.G.A. § [44-16-1](#) et seq. The covenant shall be recorded with the clerk of superior court for the county in which the property is located, and a copy shall be provided to any zoning or land use planning authority that has jurisdiction over the property. Such restrictions shall run with the land and be binding on the owner's successors and assigns.
- (a) If the Director determines subsequent to the execution and recording of the covenant that the property is in compliance with Type 1 or 2, risk reduction standards and removes the property from the Hazardous Site Inventory, the Director shall so notify the property owner whereupon the covenant may be terminated.
- (b) The covenant may include, but not necessarily be limited to, provisions to accomplish the following:
1. Prohibit activities on the property that may substantially interfere with a remedial action, operation and maintenance, long-term monitoring, or other measures necessary to ensure the integrity of the remedial action.
 2. Prohibit activities that may result in human exposures above those specified for residential scenarios in Rule [391-3-19-.07\(6\)](#) and [\(7\)](#) or for nonresidential scenarios at Rule [391-3-19-.07\(8\)](#) and [\(9\)](#), whichever scenario is applicable, and activities that would result in the release of a regulated substance which has been remedied in accordance with Rule [391-3-19-.07\(10\)](#).
 3. Allow the Director to enforce the restrictions set forth in the covenant by legal action in a court of appropriate jurisdiction.
 4. Require the installation and maintenance of a permanent marker that denotes a Type 5 restriction.

5. Describe uses of the property that are prohibited.

Rule 391-3-19-.09. Funding to State and Local Governments from the Hazardous Waste Trust Fund.

- (1) **Purpose and Scope.** This Rule applies to the use of the Hazardous Waste Trust Fund to finance the state and local share of costs associated with the investigation, remediation, post-closure care and maintenance of sites placed on the National Priorities List pursuant to the federal Comprehensive Environmental Response, Compensation and Liability Act of 1980, and on the Hazardous Site Inventory pursuant to the Hazardous Site Response Act. For the purposes of this Rule, *state* means any agency, board, bureau, commission or authority of the State of Georgia. For the purposes of this Rule, *local government* means any county or municipality or consolidated city-county government, any local solid waste management authority, or any regional solid waste management authority, or any regional solid waste management authority created pursuant to O.C.G.A. § [12-8-53](#) of the Comprehensive Georgia Solid Waste Management Act.
- (2) **Eligibility Requirements.** A state or local government may be eligible to receive financial assistance from the Hazardous Waste Trust Fund under this section for eligible costs described in Rule 391-3-19-.09(4)(a) provided that the state or local government meets all the following eligibility requirements:
 - (a) the site for which financial assistance is requested is a solid waste handling facility as defined by Rule [391-3-4-.01\(67\)](#) of the Rules for Solid Waste Management and is listed on the National Priorities List or the Hazardous Site Inventory;
 - (b) the Director has notified the state or local government in writing that they are a responsible party for the site;
 - (c) the state or local government has entered into a contract with the Director which describes the financial assistance provided and the activities for which the monies shall be used;
 - (d) the state or local government has established and maintains an accounting system in accordance with the Governmental Accounting Standards Board (GASB);

- (e) the state or local government has adopted an authorizing resolution; and
 - (f) the state or local government has submitted to the Director a completed application for financial assistance on forms as provided by the Director.
 - (g) the state or local government has submitted to the Director a written statement of the percentage of total costs associated with the actions described in Rule 391-3-19-.09(4)(a) for which a state or local government is liable. Such statement shall also include a description of how such percentage was determined including the results of negotiations with any other responsible parties for the site.
- (3) **Financial Assistance.** A state or local government that meets all the eligibility requirements described in Rule 391-3-19-.09(2) may receive financial assistance from the Hazardous Waste Trust Fund as described in Rule 391-3-19-.09(3)(a), (b) and (c). However, total payment of eligible costs from the Hazardous Waste Trust Fund shall in no event exceed \$2,000,000 per site.
- (a) For state or local governments that have been designated as a responsible party for a site, and that are not the owner of the site, the Director may pay up to 50% of the first \$500,000 of eligible costs, as described in Rule 391-3-19-.09(4)(a), and up to 25% of all eligible costs exceeding \$500,000.
 - (b) For state or local governments, excluding counties or municipal corporations, that have been designated as a responsible party for a site, and that are the owner of the site, the Director may pay up to 50% of the first \$500,000 of eligible costs, as described in Rule 391-3-19-.09(4)(a), and up to 25% of all eligible costs exceeding \$500,000.
 - (c) For counties or municipal corporations that have been designated as a responsible party for a site and that own or operate such site, the Director shall pay 100% of the first \$500,000 of eligible costs, as described in Rule 391-3-19-.09(4)(a), and may pay up to 50% of all eligible costs exceeding \$500,000.
 - (d) In the event that the unencumbered balance of the Hazardous Waste Trust Fund falls below \$4.0 million, the Director may suspend the provision of financial assistance to state and local governments as described herein.
- (4) **Eligible Costs.** Eligible costs are the percentage of the total costs associated with the actions described in Rule 391-3-19-.09(4)(a) for sites described in Section 391-3-19-.09(2)(a) for which a state or local government may seek financial assistance pursuant to Rule 391-3-19-.09(2).
- (a) Only the costs associated with the following actions eligible for payment:
 1. Completion and submittal of a compliance status report as required by Rule [391-3-19-.06\(3\)](#);

2. Certification of compliance with the risk reduction standards as required by Rule [391-3-19-.06\(4\)](#);
3. Compliance with the public participation requirements required by Rule [391-3-19-.06\(5\)](#);
4. Corrective action required by an order of the Director issued pursuant to O.C.G.A. § [12-8-96](#) of the Hazardous Site Response Act.;
5. Response required by an order of the EPA Regional Administrator issued pursuant to Sections 104 and 106 of CERCLA. For the purposes of this section, the term *response* shall have the same meaning as that used in section 101(25) of CERCLA;
6. Post-closure care not required by Section [391-3-4-.12](#) of the Rules for Solid Waste Management but which may be required by the Director under an order issued pursuant to the Hazardous Site Response Act; or
7. Corrective action and assessment monitoring required by a solid waste handling permit or an order by the Director pursuant to the Comprehensive Solid Waste Management Act.

(b) The following costs are not eligible for payment:

1. Purchase or routine maintenance of equipment of a durable nature that is expected to have a period of service of one (1) year or more after being put into use site without material impairment of its physical condition, unless the applicant can be adequately demonstrate that the equipment was a total loss and that the loss occurred during the activities for which reimbursement is being requested;
2. Materials or supplies not purchased specifically for the activities for which reimbursement is being requested;
3. Administrative costs associated with filing an application for funding from the Hazardous Waste Trust Fund;
4. Employee salaries and out-of-pocket expenses normally provided for in the applicant's operating budget (i.e.; meals, fuel) and employee fringe benefits;
5. Medical expenses incurred as a result of activities at the site;
6. Legal expenses;
7. Other expenses which the Director determines are not directly related to the investigation, redemption, post-closure care and maintenance of the site;

8. Costs arising as a result of claims for damages filed by third parties against the state or local government or its agents;
 9. Costs resulting from releases that occur as a result of violations of state or federal laws, rules or regulations; and
 10. Post-closure care required solely by Section [391-3-4-.12](#) of the Rules for Solid Waste Management.
 11. Any costs described in Rule 391-3-19-.09(4)(a) for sites where the state or local government becomes the owner or operator after the site is listed on the Hazardous Site Inventory or the National Priorities List.
 12. Any costs described in Rule 391-3-19-.09(4)(a) for sites where the state or local government had knowledge at the time of becoming the owner or operator that a release of a regulated substance had occurred at such site.
- (5) **Application Procedures.** Any state or local government that meets the eligibility requirements under Section 391-3-19-.09(2) and that is seeking financial assistance from the Hazardous Waste Trust Fund shall submit an application on forms as may be approved by the Director.
- (a) The Director may determine that an application is incomplete and shall notify the applicant that additional information is required before the application may be further processed or approved.
 - (b) The Director must approve an application prior to the expenditure of funds from the Hazardous Waste Trust Fund under this Section.

Appendix (391-3-19) I. REGULATED SUBSTANCES AND SOIL CONCENTRATIONS THAT TRIGGER NOTIFICATION.

The following table of contains all substances that are regulated under this chapter and includes all chemicals and chemical categories listed in the following three sources: (A) "List of Hazardous Substances and Reportable Quantities," 40 CFR Part 302, Table 302.4; (B) "List of Extremely Hazardous Substances and Their Threshold Planning Quantities," 40 CFR Part 355; and (C) "Hazardous Constituents," 40 CFR Part 261, Appendix VIII. The column labeled

"Source" indicates which of the above sources lists a particular substance. The column labeled "CAS No." provides the number assigned to the substance by the Chemical Abstracts Service Registry (negative numbers are those arbitrarily assigned by EPD for use in administering this chapter). The table is sorted alphanumerically by chemical name; many substances are listed several times under synonyms.

Soil concentrations that trigger notification requirements (NCs), for the purposes of the Rule [391-3-19-.04\(3\)\(b\)](#), are those given in the last column of the table. Non-numeric symbols in the NC column are explained in the legend at the end of the table. Concentrations are on a dry-weight total soil basis unless specifically indicated otherwise. Where a release involves multiple regulated substances and/or where a regulated substance can meet more than one listing, all relevant substance listing must be considered in determining whether an NC has been exceeded. If the concentration in the soil sample exceeds an NC for any listing, a notifiable condition exists. Whether or not a notifiable soil concentration has been exceeded is independent of the number of contributing releases or the number of contributing substances.

CAS #	Source	Regulated Substances	NC (mg/kg)
92875	AC	(1,1'-Biphenyl)-4,4'-diamine	DL/.05

LEGEND:

aE-b Scientific notation for a number, e.g. "4E-5" means 4×10^{-5} , which equals 0.00004.

[] Default value based on federal reportable quantities from Sources A and B.

DL An NC for the substance shall be the detection limit as defined in this chapter.

DL(P) An NC for the substance shall be the detection limit as defined in this chapter because the substance is elsewhere classified as an acute hazardous waste.

DL/ The detection limit as defined in this chapter shall be an NC, unless the detection limit is lower than the number following the slash, in which case the numerical value shall supplant the detection limit as an NC.

/BG The numerical value preceding the slash shall be an NC, unless the background concentration is greater, in which case the background value shall supplant the numerical value as an NC.

§ An NC for this substance has not been established either because a hazard of exposure to the substance is improbable from a contaminated soil context or because a hazard exists only the contexts covered by Rule [391-3-19-.04\(3\)\(c\)](#).

(a)-(q) Applicable NCs shall be the NC for the elemental form of each metal given below. For those substances which are compounds meeting more than one listing (e.g., lead arsenate) or which are not specifically listed in the table but which are described by one or more general categories (e.g., mercuric dichromate -- "mercury compounds, n.o.s." and "chromium compounds, n.o.s."), all applicable NCs must be considered.

(a) arsenic 41 (mg/kg)

(b) antimony 10/BG

(c) barium 500/BG

(d) beryllium 3/BG

(e) cadmium 39

(f) chromium 1200

(g) cobalt 25/BG

(h) copper 1500

(i) lead 400

(j) mercury 17

(k) nickel 420

(L) selenium 36

(m) silver 10/BG

(n) thallium 10/BG

(p) vanadium 100/BG

(q) zinc 2800

(r) NCs shall be that for "Cyanides {CN anion}" and that for any other applicable listing.

(s) The NC for this substance shall be that given for "PCBs".

(t) The NC for this substance shall be the 2,3,7,8-TCDD Toxic Equivalent, which is the NC for 2,3,7,8-TCDD divided by the Toxic Equivalency Factor shown in braces.

(u) Releases shall be reported if the concentration of the substance in the soil is such that the soil meets the ignitability criteria of [40 CFR 261.21\(a\)\(2\)](#).

(v) Releases shall be reported if the concentration of this substance in the soil is such that the soil exhibits a pH less than 2 or greater than 12.5 respectively.

(w) Releases shall be reported if a contaminated soil has any of the properties by which solid wastes are determined to exhibit the characteristic of reactivity in [40 CFR 261.23\(a\)](#).

(x) An NC shall be that for the substance in parentheses.

(y) For radionuclides, releases shall be reported if the direct ionizing radiation (exposure rate), as measured one (1) meter above the soil surface, is greater than fifty (50) microroentgens per hour ($\mu\text{R/hr}$) above the local background level, or the measured radionuclide concentration in soil is sufficient to deliver a dose to any individual of 25 millirem per year (mrem/yr) Committed Effective Dose Equivalent (CEDE) or 75 mrem/yr Committed Dose Equivalent (CDE) to any organ.

(z) NCs for this hazardous waste shall be all NCs for each hazardous constituent which is a basis for listing the waste, as defined by 40 CFR Part 261 Appendix VII.

Appendix (391-3-19) II. REPORTABLE QUANTITIES SCREENING METHOD.

This Appendix describes the method that will be used by the Director to determine if a release exceeds a reportable quantity. If the Reportable Quantities Screening Method (RQSM) indicates that a release exceeds a reportable quantity, the property owner will be required to report the release in accordance with Rule [391-3-19-.05](#) and the site will be listed on the Hazardous Site Inventory.

Sites that exceed a threshold score for either or both of the two pathways are considered to have had a release that exceeds a reportable quantity. The threshold score for the "groundwater" pathway is 10.0 and the threshold score for the "on-site-exposure" pathway is 20.0.

GEORGIA ENVIRONMENTAL PROTECTION DIVISION

REPORTABLE QUANTITIES SCREENING METHOD

FOR

(Name of Site)

(City) (State)

SCORED BY: _____ ON: _____

Threshold

GROUNDWATER PATHWAY SCORE () 10

ON-SITE PATHWAY SCORE () 20

GROUNDWATER

A. Has a release to groundwater occurred? Known Suspected Potential Future

(45) (10) (5)

If A=45, then go to D

B. Route Characteristics

1b. Susceptibility Rating: Higher Average Lower

(6) (3) (0)

2b. Physical State: Stable Unstable Powder, Liquid, Gas,

Solid Solid Ash Sludge

(0) (1) (2) (3)

C. Containment: Very Good Good Fair Poor

(0) (1) (2) (3)

D. Release Characteristics

1d. Regulated Substance:

2d. Toxicity: None (0) Low (1) (2) (4) (8) (16) High

3d. Quantity: Threshold (1) (2) (3) (4) (5) (6) (7) (8) Very Large

E. Targets

1e. Exposure to groundwater release:

Known release MCL, and known human exposure MCL.....(25)

Known release MCL, and suspected human exposure.....(20)

Known release, no MCL exists, and known human exposure.....(18)

Known release, MCL, and known human exposure MCL.....(15)

Known release, no MCL exists, and suspected human exposure.....(12)

Suspected release and human exposure suspected.....(8)

Known release MCL, but no human exposure suspected.....(4)

Known release, no MCL exists, and no human exposure suspected.....(3)

Suspected release but no human exposure suspected.....(2)

Potential future release.....(1)

Known release less than MCL.....(0)

(only one choice allowed)

2e. Distance to well or spring (miles): 1/2 1/2 to 11 to 22 to 33

(16) (9) (4) (1) (0)

THE GROUNDWATER PATHWAY SCORE (S_{gw}) IS CALCULATED AS FOLLOWS:

$$S_{gw} = M \times (2d + 3d) \times (1e + 2e) / 442.8$$

Where: $M = A + ((1b + 2b) \times C)$

If $A = 45$ then $M = 45$

If $2d$ is unknown, then $2d=4$

If $3d$ is unknown, then $3d=4$

If $1e$ includes known or suspected human exposure, $2e = 16$

If $1e = 0$ then $2e = 1$

Note: The denominator of 442.8 normalizes the groundwater score to a value between 0 and 100.

ON-SITE EXPOSURE

A. Access to site: Inaccessible Limited Access Unlimited Access

(0) (2) (4)

B. Has there been a release: Yes Suspected No

(25) (15) (0)

C. Containment

Very Good Poor

Soil Releases: (0) (1) (2) (3) (4) (5)

or

Aboveground releases: (0) (1) (2) (3)

D. Release Characteristics

1d. Regulated Substance: _____

2d. Toxicity: None (0) Low (1) (2) (4) (8) (16) High

3d. Quantity: Threshold (1) (2) (3) (4) (5) (6) (7) (8) Very Large

E. Targets

1e. Distance (feet) to 300301 to 10001001 to 30003001 to 52801 mile nearest resident (8) (6) (4)
(2) (1)

individual

2e. Is there an on-site sensitive environment? YesNo

(1) (0)

THE ON-SITE PATHWAY SCORE (S_0) IS CALCULATED AS FOLLOWS:

$$S_0 = A \times (B + C) \times (2d + 3d) \times (1e + 2e) / 259.2$$

If A or B = 0, the $S_0 = 0$

If 2d is unknown, then 2d = 4

If 3d is unknown, then 3d = 4

Note: The denominator of 259.2 normalizes the score to a value between 0 and 100.

(a) For the purposes of Rule [391-3-19-.07](#), all polychlorinated dibenzodioxins and dibenzofurans are collectively considered as one substance, expressed as an equivalent concentration of 2,3,7,8-tetrachlorodibenzo-*p*-dioxin (TCDD), based on the Toxicity Equivalency Factor approach described in "Recommended Toxicity Equivalence Factors (TEFs) for Human Health Risk Assessments of 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin and Dioxin-Like Compounds", U.S. Environmental Protection Agency, December 2010. Where concentrations only of homologous groups are known (isomer-specific data are not available), the Division must be consulted to determine an appropriate method for determining 2,3,7,8-TCDD equivalents.

Table 2. Type 1 Soil Criteria

Regulated Substance Analyte	Concentration (mg/kg)
Antimony	5.4
Arsenic	20
Barium	1600
Beryllium	63
Cadmium	7.5
Chromium	100
Copper	920
Lead	270
Mercury	2.1
Nickel	510
Selenium	5.2
Silver	16
Thallium	1
Zinc	7500

Table 3: Standard Default Exposure Factors for Risk Reduction Standard Calculations

The default exposure factors presented in this table must be utilized for Type 1 and Type 3 risk reduction standard (RRS) calculations. For toxicity assessment, EPD adopts EPA's Office of Solid Waste and Emergency Response (OSWER) recommended hierarchy of toxicity information (OSWER Directive 9285.7-53, 2003). Note that EPA uses this toxicity data hierarchy for the Regional Screening Level (RSL) tables. If a value for only one of the two variables in a variable pair (RfD_o/RfC or SF_o/IUR) is not available for a substance, the term containing that variable in an equation can be omitted or equated to zero. If neither value is available for a variable pair, a concentration cannot be calculated with the RAGS equations unless an appropriate surrogate compound is available for use in assessing its risk. Appropriately selected surrogate compounds may be utilized for regulated substances without toxicity values as accepted by the Division. Dermal toxicity values are to be derived in accordance with the methods described in this table. The risk equations and methodology for deriving the RRS are prescribed in the U.S. EPA's RSL User's Guide.

U.S. EPA. Regional Screening Levels (RSL) for Chemical Contaminants at Superfund Sites. Generic Tables (as amended)

^b Age-Dependent Adjustment Factors (ADAFs) are to be applied to all regulated substances having a mutagenic mode of action for carcinogenesis when assessing cancer risks from early life exposures (16 years of age). Such substances are denoted by "M" in the "Mutagen" column of U.S. EPA's Regional Screening Level (RSL) table. For a child resident (0-6 years), the appropriate ADAF adjustment factor for cancer risk estimation is 32 {i.e., $ED_{mut} \times ADAF$ or [(2

years x 10) + (4 years x 3)]}. For adults, the ADAF adjustment factor is 40 {i.e., [10 years (age 6-16 years) x 3] + [10 years (age 16-26 years) x 1]}.

^c For the commercial/industrial worker, the dermal exposure time while bathing/showering was assumed to be equivalent to that of the child resident given the infrequent occurrence of this event in an occupational setting.

^d Use of EPA's default oral relative bioavailability factors must be utilized when deriving the Type 1 and 3 RRS for soil and does not apply to groundwater. For groundwater, the oral bioavailability factor is 1 (assumed bioavailability of 100%). Site-specific bioavailability assessments for arsenic, lead and other compounds (e.g., PAHs) may be conducted as part of the Type 2 and Type 4 RRS for soil using in vitro and/or in vivo bioavailability test methods approved by EPA. However, note that in the absence of in vivo data, in vitro bioaccessibility on a subset of soil samples is required prior to use in risk assessment. For lead, EPA assumes a default RBA value of 0.6 (60%) in both the ALM and IEUBK models. RBA should not substitute or be confused with the absolute bioavailability values in these models.

Table 4: Equation and Default Values for Calculating Soil Concentrations Pursuant to Rule [391-3-19-.07\(6\)\(c\)\(1\)](#) and [391-3-19-.07\(8\)\(d\)\(1\)](#)

Appendix (391-3-19) IV. STANDARD ADULT LEAD MODEL (ALM) FOR SOIL.

U.S. EPA's Adult Lead Model provided in this appendix applies to the protection of industrial workers at nonresidential sites at which it can be demonstrated that children are not now exposed, nor will become exposed, to lead in soil or soil-derived dust at the site. U.S. EPA's ALM attempts to protect against elevated blood lead (PbB) levels in the unborn fetus of women who spend considerable time at the site. Protection of the PbB of a hypothetical fetus ensures that any other human receptor at the site will be adequately protected.

The ALM ultimately involves two equations. Equation 1 establishes the average adult PbB level that is protective of the fetus, which is an input to Equation 2. Equation 2 calculates the target soil cleanup level for no more than 5% probability that fetal PbB exceeds the target PbB and the concentration that would generate the average adult PbB level indicated in Equation 1.

EQUATION 1

$$\text{PbB} = \text{PbB}_{\text{fetal},0.95} / R * \text{GSD}^{1.645}$$

EQUATION 2

$$C_s = \left(\left[\left(\frac{PbB_{fetal,0.95}}{R * (GSD_i^{1.645})} \right) * PbB_o \right] - (IR_s * AF_s)^{-1} / BKS F * (EF/AT) \right)$$

Exposure Variable	Description of Exposure Variable	Units	GSD_i and PbB_o from Analysis of NHANES 2007-2012
PbB _{fetal, 0.95}	95 th percentile PbB in fetus	µg/dL	5
R _{fetal/maternal}	Fetal/maternal PbB ratio	--	0.9
BKSF	Biokinetic Slope Factor	µg/dL per µg/day	0.4
GSD _i	Geometric standard deviation PbB	--	1.8
PbB _o	Baseline PbB	µg/dL	0.6
IR _s	Soil ingestion rate (including soil-derived indoor dust)	g/day	0.05 ^a
AF _{s, D}	Absorption fraction (same for soil and dust)	--	0.12
EF _{s, D}	Exposure frequency (same for soil and dust)	days/year	219 ^a
AT _{s, D}	Averaging time (same for soil and dust)	days/year	365
C_s	Soil Lead Target Concentration where PbBt = 5 µg/dL	mg/kg	calculated

^a Any proposed site-specific value is subject to approval by the Division and should be protective of current and future exposure conditions at a site.

Shaded cells - Based on U.S. EPA May 17, 2017 GSD_i and PbB_o updated estimates (using data from NHANES 2009-2014) for the ALM and IEUBK. These values should be amended based on updates by the U.S. EPA Technical Review Workgroup for Lead - Adult Lead Committee.

History. Amended: F. Sep. 5, 2018; eff. Sept. 25, 2018.

Subject 391-3-20. ENHANCED INSPECTION AND MAINTENANCE.

Rule 391-3-20-.01. Definitions.

The following terms as used in these rules shall have the meaning hereinafter respectively ascribed, except that to the extent terms are not defined in these rules, the Act's definitions control; and provided that definitions within any subsequent rule or subdivision thereof, which

are expressly made applicable to the rule or subdivision within which they appear, shall apply for purposes of such specific rule or subdivision thereof.

- (a) "Act" means O.C.G.A. § [12-9-40](#) et seq., as amended, "The Georgia Motor Vehicle Emission Inspection and Maintenance Act."
- (b) "Biometrics" means the automated recognition of individuals by means of unique physical characteristics, typically for the purposes of security. For Georgia's Clean Air Force inspectors, biometric finger vein readers are used for biometric logins.
- (c) "Calibration" means, in the case of the Georgia Analyzer System (GAS), the process of establishing or verifying that the test values of the GAS emissions bench are accurate by using the applicable calibration gases. In the case of a fuel cap tester, "calibration" means the process of verifying that the measured pressure drop over time is between the upper and lower control limits.
- (d) "Certificate" means the license issued by the Director to a person authorizing him or her to perform emission inspections in accordance with the requirements of the Act and this Chapter.
- (e) "Certificate of Authorization" means a certificate issued by the Director to each establishment or location designated as an official emission inspection station.
- (f) "Certificate of Emissions Inspection" means an official certificate that exhaust emissions, evaporative emissions, emission control equipment, and on-board diagnostic equipment have been inspected and approved in accordance with the Act and this Chapter. Such certificates will be furnished to official emission inspection stations by EPD to be completed and issued by such stations to the owner or operator of a responsible motor vehicle upon inspection and approval certifying that such responsible motor vehicle has been inspected and complies with the inspection and maintenance required by the Act and this Chapter.
- (g) "DLC" means the data or diagnostic link connector for a vehicle's on-board diagnostic system.
- (h) "Dedicated data transmission line" means a unique communication line identifiable by a transmitted digital identification number which allows the Vehicle Information Database or (VID) to identify the Georgia Analyzer System (GAS) unit communicating with the VID.
- (i) "Department" means the Department of Natural Resources.
- (j) "Diagnostic Trouble Codes (DTC)" means that for vehicles equipped with on-board diagnostic (OBD) computer systems, a five digit code that is associated with a specific test of the OBD system.

- (k) "Director" means the Director of the Environmental Protection Division of the Department of Natural Resources.
- (l) "E-Certs" means blank Electronic Certificates of Emission Inspection that are pre-purchased by official emissions inspection stations for the purpose of performing emission inspections.
- (m) "Emission Inspection" means all tests and inspections required by the Act and this Chapter, including an on-board diagnostic system check, a fuel cap test, a tampering inspection, and an exhaust emissions test where applicable.
- (n) "Emissions Inspector Certification Training Program Manual", means the manual supplied to inspectors during their initial and re-certification classes; the most current version of this manual is available on the Georgia Clean Air Force website at www.cleanairforce.com.
- (o) "Emission Recall Compliance Check" means determining whether a recall campaign has been issued by the original equipment manufacturer of a vehicle.
- (p) "E-VIN" means the Electronic Vehicle Identification Number embedded in the OBD computer system on 1996 and later model year vehicles.
- (q) "EPD" means the Environmental Protection Division of the Georgia Department of Natural Resources.
- (r) "Exhaust Emission Test" means the determination of the amount of specified gases in a vehicle's exhaust by use of the 2-speed idle (TSI) test.
- (s) "Fleet Vehicle" means a motor vehicle owned or leased by a person engaged in a commercial activity, utility service, or government service; or a motor vehicle offered for sale, rent, or lease at a business which is licensed to sell, rent, or lease motor vehicles.
- (t) "Fuel Cap Test" means the determination of the ability of the fuel cap(s) to retain pressure.
- (u) "Gas Calibration" means the calibration of the Georgia Analyzer System (GAS) by the use of a manufactured calibration gas.
- (v) "Georgia Analyzer System" (GAS) means the test systems approved by EPD for use in performing emission inspections in Georgia in accordance with the Act and this Chapter.
- (w) "Georgia Analyzer System Hardware and Software Specifications" (GAS Specs) means the Georgia Analyzer System Hardware and Software Specifications, Phase V, August 31, 2016, which contains the hardware and software requirements for a GAS.

- (x) "Georgia's Clean Air Force" (GCAF) means the partnership between EPD and the Management Contractor to implement Georgia's Enhanced Motor Vehicle Emission Inspection and Maintenance Program (I/M Program).
- (y) "GVWR" means the gross vehicle weight rating, i.e., the weight of the vehicle and contents when loaded to its maximum capacity, as established by the vehicle manufacturer.
- (z) "Hot Rod" means a vehicle in which the original engine has been replaced with an engine from another manufacturer, or with a different type of engine from the same manufacturer which was never installed in that model vehicle. For the purposes of this definition, a different type of engine will include engines with a different number of cylinders from any engine which was originally installed in that make of vehicle. It will not include engines of the same family, e.g., Chevrolet V8s of 283, 305, 327, 350 and 400 cubic inch displacement, nor will it include engines different from the original, but which were also installed in that make of vehicle, e.g., gasoline for diesel engine swaps in General Motors or Volkswagen vehicles, or V8 for V6 swaps where both engines were installed in that model vehicle by the manufacturer for retail sale.
- (aa) "Idle RPM" means for vehicles equipped with a manual transmission, the manufacturer's recommended engine speed with the transmission in neutral or with the clutch disengaged. For vehicles equipped with an automatic transmission, idle revolutions per minute (RPM) means the manufacturer's recommended engine speed with the transmission in neutral or park.
- (bb) "Inspection Term" means the period of time a certificate of emission inspection shall be considered valid. The specific period of an inspection term is established in this Chapter.
- (cc) "Inspector" means a person certified by the Director to perform emission inspections in accordance with the requirements of the Act and this Chapter.
- (dd) "Kit Car" means a motor vehicle which does not utilize a chassis from a vehicle certified by the manufacturer to meet emission control standards or for which the original manufacturer's identification has been eliminated due to the replacement of the vehicle's body with one of a different make and/or style.
- (ee) "Light Duty Truck" means any motor vehicle with a GVWR of 8,500 pounds or less which has a vehicle curb weight of 6,000 pounds or less and which has a basic vehicle frontal area of 45 square feet or less, which is:
 1. Designed primarily for purposes of transportation of property or is a derivation of such a vehicle, or
 2. Designed primarily for transportation of persons and has a capacity of more than 12 persons, or

3. Available with special features enabling off-street or off-highway operation and use.
- (ff) "Light Duty Vehicle" means a passenger car or passenger car derivative, capable of seating 12 passengers or less with a GVWR of 8,500 pounds or less.
- (gg) "Management Contractor" means the person, corporation or entity under contract to design and operate the data management system and to perform other functions for the I/M Program.
- (hh) "Malfunction Indicator Light (MIL)" means a light on the dashboard of OBD equipped vehicles that notifies the driver that an emission related fault has been detected and the vehicle should be repaired as soon as possible.
- (ii) "Non-conforming Vehicle" means a covered vehicle that has not obtained an EPA certification or has an emissions control component that is obsolete according to the manufacturer; such a vehicle would be subject to an alternative tail pipe emissions standard based upon its model year to obtain a vehicle registration in the Georgia covered counties.
- (jj) "On-Board Diagnostic (OBD) System" means a computer system installed on 1996 or later model year vehicles as required by Section 202(m) of the Clean Air Act ([42 U.S.C. 7521](#)) which is designed to identify engine or primary emission control component problems which cause excess emissions.
- (kk) "On-Board Diagnostic (OBD) System Check" means the determination of readiness codes and diagnostic trouble codes stored within the memory of the on-board diagnostic system.
- (ll) "Primary Emission Control Component" means the catalytic converter, air injection system, exhaust gas recirculation system or other major component, as determined by the Director, which is installed on a vehicle primarily for the purpose of emission control.
- (mm) "Public Vehicle" means a motor vehicle that is not a fleet vehicle.
- (nn) "Recognized Repair Technician" means any person professionally engaged in vehicle repair, employed by an ongoing business whose purpose is vehicle repair or possessing a nationally recognized certification for vehicle emission related diagnosis and repair.
- (oo) "Responsible Motor Vehicle" means any motor vehicle defined as a light duty vehicle or a light duty truck, excluding any motor vehicle exempted from the Act and this Chapter such as vehicles not in a Covered County as defined in [391-3-20-.02](#).
- (pp) "Revolutions per Minute" (RPM) means the number of times the crankshaft of an engine makes a complete 360 degree turn in one minute (60 seconds).

- (qq) "State-Certified Emissions Inspection Station" means a facility that has met all the qualifications of this Act and this Chapter and is certified by the Director.
- (rr) "Station Owner" means the individual, partnership, firm, corporation, association, municipality, governmental agency, lessee, or other entity having ownership of or control of the daily operation of an inspection station.
- (ss) "Tampering Inspection" means the determination of whether the catalytic converter(s) as installed by the original manufacturer has been removed from the vehicle or modified.
- (tt) "Time Extension" means any time extension as defined in section "Extensions and Reciprocal Inspections" of these rules and issued by EPD, the Management Contractor or an authorized agent of EPD to the owner of a responsible motor vehicle certifying that such owner and vehicle have met the requirements in the Act and this Chapter for extending the time to comply with the emission inspection requirement.
- (uu) "Vehicle" means a motor vehicle.
- (vv) "Vehicle Information Database" (VID) means the data collection and management system for Georgia's Enhanced Motor Vehicle Emission Inspection and Maintenance Program (I/M Program) that contains current and historical program data. The VID is comprised of data collection tables, including the table of inspection records. The term "VID" is used to refer to the VID as a whole or to any part, e.g., Enforcement database, Audit database, Emission Inspections database, and Waiver database.
- (ww) "Waiver" means the official form issued by EPD, the Management Contractor or an authorized agent of EPD to the owner of a responsible motor vehicle certifying that such owner and vehicle have met the requirements in the Act and this Chapter for obtaining a waiver of the emission inspection requirement.
- (xx) "2-speed idle (TSI) test" means an exhaust emission test where the vehicle under test is run at an idle revolutions per minute (RPM) speed and a higher RPM speed as defined in the GAS Specs.

Rule 391-3-20-.03. Covered Vehicles; Exemptions.

- (1) The requirements of this Chapter apply to the following classes of gasoline-powered responsible motor vehicles, as defined by the Act, registered or required to be registered in Covered Counties:
 - (a) All light duty vehicles 24 model years old and newer.
 - (b) All light duty trucks 24 model years old and newer with a gross vehicle weight rating of 8,500 pounds or less.
- (2) The requirements of this Chapter also apply to the following vehicles in the classes listed above which are operated in Covered County:
 - (a) Vehicles which are owned and operated by a federal or state agency, municipality or other political subdivision in a Covered County.
 - (b) Vehicles which are operated for 60 days or more per year on federal installations located in whole or in part in a Covered County.
- (3) Vehicles which are capable of being operated on both gasoline and any alternate fuel are covered by the inspection requirements and shall be tested on gasoline.
- (4) New vehicles are exempt from the emission inspection requirement until the inspection term three years following the model year of the vehicle.
- (5) EPD may require that any vehicle registered or operated in the Covered Counties but which is claimed to be not subject to the requirements of the State Inspection Program, be presented for verification that the vehicle is not subject.
- (6) For vehicles which do not have the original engine, the model year of the chassis will be considered the model year of the vehicle.
- (7) For kit cars, the model of the vehicle shall be deemed to be the model year of the vehicle as established in the vehicle registration database maintained by the Georgia Department of Revenue, Motor Vehicle Division or its successor agency.

- (8) Owners of vehicles which qualify as non-conforming vehicles may request special inspection standards as described in Rule [391-3-20.05\(2\)](#). Such vehicles will be subject to the special inspection standards at subsequent inspections.
- (9) A vehicle which is otherwise subject to the provisions of this Chapter is exempt from inspection if it is driven less than 5,000 miles per year, is 10 model years old or older and the current primary registered owner is a person 65 years old or older.
- (10) No responsible motor vehicle shall be registered in a Covered County unless it has received a valid passing Certificate of Emission Inspection, a time extension or a waiver meeting all requirements of the Act and this Chapter.

Rule 391-3-20-.04. Emission Inspection Procedures.

- (1) Prior to performing an emission inspection, the inspector shall determine whether the vehicle has leaking fluids, is overheating, or is otherwise unsafe to inspect. The inspector shall not perform an emission inspection on any vehicle which is unsafe to inspect.
- (2) Inspectors shall perform a complete emission inspection on any responsible motor vehicle presented for an initial inspection, in accordance with the requirements of the Act and this Chapter and the procedures as prompted by the GAS, including the following:
 - (a) For OBD equipped vehicles.
 1. A tampering inspection.
 2. An OBD system check. On occasion, when activated by EPD, the GAS will prompt the inspector at the conclusion of the OBD system check to perform

the 2-speed idle test to collect exhaust emission data. The exhaust emission data will not be used to determine Pass/Fail results of the vehicle.

3. A fuel cap test.

(b) For non-OBD equipped vehicles.

1. A tampering inspection.

2. An exhaust emission test. The inspector may perform a 2-speed idle test on vehicles as prompted by the GAS.

3. A fuel cap test.

(c) For non-conforming vehicles.

1. A tampering inspection. The inspector shall perform a tampering inspection only for those vehicles given non-conforming status by EPD that were originally equipped with a catalytic converter by the vehicle manufacturer or that have been subsequently equipped with a catalytic converter.

2. An exhaust emission test. The inspector shall perform a 2-speed idle test on all vehicles that have been given non-conforming status by EPD.

3. A fuel cap test.

(3) The station owner and inspector shall take all reasonable precautions to avoid damage to vehicles during the emission inspection.

(4) EPD may require alternate procedures for certain types or classes of vehicles when it determines that such alternate procedures are necessary to safely and effectively inspect such vehicles.

(5) Emission inspections may be performed on any vehicle when done "at motorist's request," for reasons such as performing a reciprocal inspection for a motorist to meet the emission inspection requirements in his or her state of residence, as allowed by the Georgia Analyzer System software. The inspection procedure to be performed by certified inspectors shall be as prompted by the GAS.

(6) Inspectors shall perform a reinspection of the portions previously failed during an emission inspection on any vehicle presented for an after repairs inspection, in accordance with the requirements of the Act and this Chapter and the procedures as prompted by the GAS.

Rule 391-3-20-.05. Emission Standards.

- (1) An inspector shall not perform a tampering inspection, an exhaust emission test, a fuel cap test, or an OBD system check on a vehicle which:
 - (a) has a missing exhaust system, or
 - (b) is unsafe to inspect.

- (2) The inspector shall not issue a Certificate of Emission Inspection indicating an overall passing result for the emission inspection unless the inspector has inspected the vehicle in accordance with the requirements of the Act and this Chapter and the vehicle has passed the tampering inspection, the OBD system check, the fuel cap test, and the exhaust emissions test where applicable.
 - (a) The vehicle shall pass the tampering inspection if:
 1. the catalytic converter(s) has not been removed or disconnected;
 2. no catalytic converter was installed by the original equipment manufacturer as determined from the vehicle emission control label;
 3. in the case of a vehicle which has been converted from a single exhaust system to a dual exhaust system and a catalytic converter(s) was part of the

original single exhaust system configuration, a catalytic converter has been installed in each pipe of the dual exhaust system;

4. in the case of a non-conforming vehicle for which either the original vehicle or the replacement engine was equipped with a catalytic converter(s), a catalytic converter(s) has been installed; or
5. a catalytic converter(s) installed by the original equipment manufacturer has been removed and replaced with another catalytic converter(s).

(b) The vehicles shall pass the OBD system check if:

1. the Georgia Analyzer System (GAS) is able to communicate with the vehicle's OBD system;
2. the MIL illuminates with the ignition key in the "on" position and the engine not running, which is known as Key On Engine Off (KOEO);
3. the OBD system does not command the MIL to illuminate with the ignition key in the on position with the engine running;
4. all nonexempt OBD system monitors, as specified in the GAS, are set to "ready";
5. the OBD system does not contain any fault codes which command the MIL to illuminate, as specified by the vehicle manufacturer, indicating problems with the emissions control parameters monitored by the OBD system; and
6. the MIL does not illuminate with the ignition key in the "on" position and the engine running, which is known as Key On Engine Running (KOER).

(c) The vehicle shall pass the fuel cap test if:

1. the vehicle's primary fuel cap and, when equipped, one secondary fuel cap, holds pressure in accordance with the standard established by the GAS; and
2. where a vehicle has two or more fuel caps, each fuel cap is present.

(d) The vehicle shall pass the exhaust emission test if:

1. in the case of a vehicle subject to a 2-speed idle test any simultaneous pair of values for hydrocarbons and carbon monoxide, in each mode, do not exceed the exhaust levels established in the GAS, and the combined value for carbon monoxide and carbon dioxide is equal to or more than the minimum combined value established in the GAS; or

2. in the case of a kit car, hot rod, or non-conforming vehicle that has been given non-conforming status by EPD under this Chapter, any simultaneous pair of values for hydrocarbon and carbon monoxide, in each mode of the 2-speed idle test, do not exceed the exhaust levels established in the GAS for 1975 model year vehicles, or for the model year of the vehicle, and the combined value for carbon monoxide and carbon dioxide is equal to or more than the minimum combined value established in the GAS.

Rule 391-3-20-.06. On-Road Testing of Exhaust Emissions by Remote Sensing Technology or Other Means.

- (1) Covered vehicles are expected to meet emission standards at all times. EPD may use on-road testing measures such as remote sensing technology or other methods established by the Director to evaluate at least 0.5% of the vehicle population or 20,000 vehicles, whichever is less, for the on-road testing and high emitter requirement. Covered vehicles that appear to be producing exhaust emissions in excess of the applicable emission standards may be presumed to be high emitting vehicles. If EPD identifies a vehicle as a high emitter, EPD shall notify the owner of an identified vehicle to present his or her vehicle for an emission inspection under Rules [391-3-20-.04](#) and [391-3-20-.05](#). An owner so notified by EPD must present his or her vehicle for an emission inspection within thirty (30) days. Vehicles which fail such inspection shall be required to be reinspected and pass such reinspection as required by Rule [391-3-20-.15](#).

Rule 391-3-20-.07. Inspection Equipment System Specifications.

- (1) Georgia Analyzer Systems (GAS) Approval.
 - (a) EPD shall approve a test system which meets all specifications established in the Georgia Analyzer System Hardware and Software Specifications, Phase V, August 31, 2016 (GAS Specs) as a Georgia Analyzer System (GAS). Station owners may select from any GAS approved by EPD for their class of station.
 - (b) Regular inspection station owners shall acquire an EPD-approved GAS which meets the OBD and TSI requirements of this Chapter.
 - (c) Fleet inspection station owners that inspect vehicles shall acquire an EPD-approved GAS which meets the OBD and TSI requirements of this Chapter.
- (2) EPD-approved GAS shall contain features to prevent tampering by unauthorized personnel. No unauthorized person shall override or circumvent or attempt to override or circumvent said anti-tampering features.
- (3) No person shall modify or install parts in a GAS unless such modification or installation of parts has been approved in writing by EPD.
- (4) Station owners shall acquire all available fuel cap adapters and the most recent Fuel Cap Testing Application Chart, as published by the fuel cap manufacturers: Stant and/or Hickok Waekon, for the adapters being used for those model year vehicles that are subject to this Chapter and are authorized to be inspected at that station.

Rule 391-3-20-.08. Quality Control and Equipment Calibration Procedures.

- (1) All Georgia Analyzer Systems (GAS) shall, at a minimum, be calibrated according to the procedures and schedules as prompted by the GAS.
- (2) No person shall operate a GAS for the purpose of performing an emissions inspection unless the Georgia Analyzer System:
 - (a) has passed all calibrations, audits, and leak checks as prompted by the GAS;
 - (b) in the case of a GAS that is not a mobile GAS, is connected to the dedicated data transmission line as described in [391-3-20-.09\(2\)\(i\)](#); and
 - (c) in the case of a GAS that is a mobile GAS, is connected to the dedicated data transmission line within 72 hours of any inspection performed at a fleet or car dealer location and at all times when the mobile GAS is located at the inspection station location identified on the Certificate of Authorization.
- (3) Any station or GAS that has not performed an inspection in more than 90 days, shall not resume performing inspections until the Management Contractor has been contacted and a passing audit has been performed by the Management Contractor on the station's GAS(s).

Rule 391-3-20-.09. Inspection Station Requirements.

- (1) Classes of stations - There shall be two classes of inspection stations: regular inspection stations and fleet inspection stations. Regular inspection stations shall be public inspection stations and may inspect no more than ten (10) vehicles per year which are owned incidental to the operation of the business.
 - (a) Regular Inspection Stations
 1. A regular inspection station is authorized to inspect any vehicle subject to the I/M Program.
 - (b) Fleet Inspection Stations
 1. Vehicle owners who operate a fleet vehicle may apply for a Certificate of Authorization under this Chapter to inspect their own fleet vehicles, but must meet certain additional requirements beyond those established for public regular inspection stations. Fleet inspection stations are only allowed to inspect fleet vehicles that they own or operate. No inspection of public vehicles is allowed by a fleet inspection station.
- (2) General Requirements for Inspection Stations
 - (a) Persons wishing to obtain or renew a Certificate of Authorization to operate one or more inspection stations shall apply to EPD in a format established by EPD. One application must be submitted for each inspection station. Each application shall include all information required by the Director to determine that the proposed inspection station will meet the requirements of the Act and this Chapter and shall identify all persons having any ownership, financial and/or operational interest in the station. Additional information that may be requested includes, but is not limited to:
 1. Explicit permission of all persons having any financial or operational interest in the station, as named in the application, authorizing the director to conduct a background check, including criminal history, on the named individuals;
 2. Facility purchase or lease agreement(s);
 3. Georgia Analyzer System (GAS) purchase or lease agreement(s);
 4. Proof of a filed bond or a copy of accepted certificate of liability insurance;

5. Copy of approved business license or application for same showing signature(s) of the business owner(s); and
 6. Other documents as deemed necessary by EPD to determine all persons having any ownership, financial and/or operational interest in the inspection station.
- (b) A station owner shall obtain all permits and licenses necessary for the establishment of each inspection station. The station shall conform to all applicable federal, state and local code requirements including, but not limited to, planning and building codes, carbon monoxide levels, ventilation, safety, and fire regulations. All permits, licenses, leases, and/or other requirements for the station shall be maintained for the duration of the Certificate of Authorization. An update shall be filed with the Management Contractor, in a format approved by EPD, no later than the next business day for any change in the information in or submitted with the application and/or any change in the permits, licenses and/or other requirements for the station.
- (c) Mobile Georgia Analyzer Systems (GAS)
1. EPD may approve a station owner to operate a mobile GAS only at a fleet or car dealer location for the purpose of performing emission inspections only on fleet vehicles subject to the I/M Program that are owned or operated by that fleet or car dealer. A public inspection station owner with an approved mobile test system shall make all invoices submitted to fleet owners and/or car dealers for emission inspections using a mobile test system available to EPD or the Management Contractor.
 2. A station owner that has been approved to operate a mobile GAS at a fleet or car dealer location shall comply with all requirements for mobile inspecting as established in these rules. A station owner that has been approved to operate a mobile GAS shall provide the Management Contractor and EPD, if directed to do so by EPD, with advance notice of scheduled emission inspections of fleet or car dealer locations by 2 PM of the previous business day and shall update such notice as the schedule is changed. The station owner may delete locations from the schedule of fleet or car dealer locations after 2 PM of the previous business day, but may not add fleet or car dealer locations to the schedule. EPD may approve an alternate procedure that provides equivalent quality assurance in lieu of a submitted schedule.
 3. A public inspection station owner that has received an approval to operate a mobile GAS shall not perform emission inspections on public vehicles at a location other than at the public inspection station location identified on the Certificate of Authorization.

- (d) Public inspection station owners shall provide an area adequate to allow four (4) vehicles per inspection lane to wait for an emissions inspection.
- (e) A public inspection station owner shall display a sign approved by EPD that indicates that the facility is a State-Certified Emissions Inspection Station and that shows the fee charged for performing the emission inspection. The station owner shall erect the sign in a location visible to the motoring public. All sign locations must meet State and local code requirements. Signs that are illegible, damaged or contain unapproved modifications shall be replaced with an approved sign.
- (f) Lanes at each inspection station must be of adequate length, width, and height to accommodate all normal-sized vehicles which are presented for inspection.
- (g) A station owner shall provide adequate protection for the GAS to allow it to operate within specifications in all weather conditions. Any component of the GAS, which could affect the emission inspection results, shall not be subjected to temperatures outside the manufacturer's specifications. The station owner shall maintain all GAS in fully operational condition.
- (h) A public inspection station owner shall provide to its customers:
 - 1. a public waiting area, which will allow the motorist to observe the emissions inspection of his or her vehicle;
 - 2. a response to inquiries and complaints in person and over the telephone during business hours;
 - 3. EPD public information materials:
 - (i) The current, quarterly RepairWatch Public Report provided by EPD or the Management Contractor on repair facilities that have a documented history of emission related repairs on vehicles which have failed the emission inspection;
 - (ii) The program Motorist Rights Poster provided at the time of station certification; and
 - (iii) The program Q&A brochure.
 - (iv) The station owner shall maintain such item(s) in legible condition and either posted or made available for motorists' uninhibited viewing.
- (i) A station owner shall:

1. be responsible for all emission inspections conducted at the inspection station(s);
 2. be responsible for providing adequate oversight to ensure the station and station personnel comply with the requirements of the Act and this Chapter;
 3. obtain and maintain in working order a secure static internet connection for each GAS at the station to connect to the VID;
 4. transmit all vehicle inspection data and quality assurance data that is collected to the VID;
 5. ensure that the GAS is connected to the secure static internet connection at all times, except in the case of a mobile or mobile capable GAS operating offsite at a fleet or car dealer location which shall be connected to the data transmission line within 72 hours of any emission inspection;
 - (i) Mobile capable GAS shall have the GAS connected at all times to a secure static internet connection while being used as a non-mobile GAS.
 6. collect, store and submit to the Management Contractor all Emission Repair Forms for each reinspection performed at the inspection station;
 7. obtain and maintain in legible condition any published OBD DLC Location Chart available or copy which is available on the GCAF website-www.cleanairforce.com, at each station;
 8. obtain and maintain at all times in legible condition a current copy of the Emissions Inspector Certification Training Program Manual, Version 1.4 or later provided during inspector certification or copy which is available on the GCAF website-www.cleanairforce.com, at each station; and
- (j) The station owner shall pay a per-paid-inspection program administration fee. This fee will be collected through the sale of E-Certs or other method determined by the Director. This fee will cover the cost to administer the program, including:
1. the services of the Management Contractor,
 2. the cost of EPD administration,
 3. the cost to affected county tax offices of monitoring vehicle registrations, and
 4. any other costs allowed by the Act.

(k) Liability Insurance

1. Inspection station owners, except fleet inspection station owners, conducting inspections on vehicles as defined in this Chapter shall provide proof of \$100,000 bond or liability insurance for the period of the Certificate of Authorization.
2. Inspection station owners shall notify the Management Contractor no later than the next business day upon termination of or any change in insurance coverage.

(l) Hours of Operation

1. Public inspection station owners shall post the inspection station hours of operation, including hours regularly closed for meals if applicable, on the inspection station's State-Certified Emissions Inspection Station sign. Inspection station owners shall provide emissions inspections at all times during the posted hours. Public inspection station owners may provide inspections by appointment only but shall notify the Management Contractor and indicate such on the station's State-Certified Emissions Inspection Station sign.
2. The station owner shall post a "Closed" sign over the station's State-Certified Emissions Inspection Station sign when the inspection station is closed and unstaffed during posted hours.

(m) A public inspection station owner shall display the Certificate of Authorization issued to the inspection station pursuant to this Chapter at said inspection station in a convenient location visible to the public.

(n) Whenever an inspector ceases employment with an inspection station, either through resignation, termination, or by other means, the station owner shall notify the Management Contractor, in a format approved by EPD, within three (3) business days of the inspector ceasing employment.

(o) No station owner, facility owner, station personnel, or facility personnel shall interfere with EPD or the Management Contractor when they are conducting an audit of the inspection station or GAS(s), or when they are conducting an investigation of the emission inspection activities at a station or at any facility claiming or appearing to be an emission inspection station.

(p) During an audit of the inspection station or GAS(s) by EPD or the Management Contractor, or during an investigation of the emission inspection activities at a station, the station owner shall:

1. provide prompt access to the premises, at reasonable times, where inspections are performed and to the GAS(s);
 2. provide prompt access to all station related documents and materials necessary to complete the audit or investigation; and
 3. provide prompt assistance in operating and calibrating the GAS(s) as necessary to facilitate the audit or investigation, or sign a release of liability that allows EPD or the Management Contractor to operate and calibrate the GAS(s) during the audit or investigation.
- (q) The station owner shall maintain a current mailing address, telephone number, email address and other contact information on file with EPD so that EPD may communicate with the owner on all matters regarding the station, including compliance and enforcement issues. The station owner may designate, in the station application or a written update thereto, another person to receive such communication from EPD. In that case, the station owner shall also provide that person's contact information, including email address, will be presumed to have received all communications from EPD through the person he or she has designated, and remains responsible for compliance with the requirements of the Act and this Chapter.
- (3) Additional Requirements for Fleet Inspection Stations.
- (a) The administrative fee charged to fleet inspection stations shall be at least as much as the fee charged to public inspection stations. This fee may be increased to cover any additional cost of increased monitoring requirements for fleet inspection stations.
- (4) Quality Assurance for Fleet Vehicles.
- (a) EPD or the Management Contractor may require fleet inspection stations and mobile inspection stations while on-site to re-inspect randomly selected fleet or car dealer vehicles to verify that emissions inspections are being performed properly.
 - (b) EPD may require fleet inspection stations and mobile inspection stations to install a video camera surveillance system on the GAS to record all emissions inspections.

Rule 391-3-20-.10. Certificates of Authorization.

- (1) The Director shall issue a Certificate of Authorization to the station owner if the station owner has demonstrated to EPD that the inspection station for which the application has been submitted meets all requirements of the Act and this Chapter.
- (2) The Certificate of Authorization shall allow the station owner to operate an inspection station as described in its application.
- (3) The Director may suspend or revoke a Certificate of Authorization as authorized by the Act.
- (4) Unless suspended, revoked, or the station is closed-out, the Certificate of Authorization shall be valid for two years. For station owners intending to renew their certificate, a station owner must apply for renewal of the Certificate by submitting a complete application at least 30 days prior to the expiration of the existing Certificate.
- (5) Upon the sale of an inspection station, or the discontinuation of emission inspections, the station owner named on the Certificate of Authorization shall:
 - (a) provide not less than five (5) days notice to the Management Contractor prior to the change in ownership or the discontinuation of emissions inspections;
 - (b) maintain the dedicated data transmission line(s) to the VID and electrical power to the GAS until such time as the Management Contractor performs a close-out audit; and

- (c) make arrangements to provide a free reinspection to motorists which are eligible for a free reinspection under this Chapter.

- (6) A Certificate of Authorization is only valid for the owner and location for which it is issued. A Certificate of Authorization shall not be assigned, transferred, or used by any other person, business or entity, other than as shown on the Certificate of Authorization. A Certificate of Authorization shall not be assigned, transferred, or used at any location other than the location shown on the Certificate of Authorization. Upon a change in ownership of an inspection station, the new owner(s) must apply for and receive a new Certificate of Authorization prior to operating the station.

- (7) The Director may deny issuance or renewal of a Certificate of Authorization for cause including, but not limited to the compliance history of the inspection station, its inspectors, its employees and all persons having any ownership, financial and/or operational interest in the station.

Amended: F. Mar. 30, 2022; eff. Apr. 19, 2022.

Rule 391-3-20-.11. Inspector Qualifications and Certification.

- (1) No person shall perform an emission inspection, or any part of an emission inspection, or issue a Certificate of Emission Inspection, unless he or she:
 - (a) has submitted an Inspector Certification Application to EPD in a format established by EPD. The application shall include all information required by the Director to determine that the applicant meets the requirements of the Act and this Chapter. An update shall be filed with the Management Contractor, in a format approved by EPD, no later than the next business day for any change in the information in or submitted with the application.

 - (b) has obtained the age of 18 prior to attending the inspector training class;

- (c) has completed the appropriate EPD-approved training program for the type of inspection he or she will be performing;
 - (d) has obtained training on the proper operation of inspection equipment from the manufacturer of the GAS that will be used to perform the emission inspections;
 - (e) has passed a written and practical test of proficiency, and,
 - (f) holds a valid Certificate as a certified emission inspector issued by the Director.
- (2) The EPD-approved training program will include information on:
- (a) air pollution, its causes and effects;
 - (b) the purpose and functions of the I/M Program;
 - (c) inspection regulations and procedures, including technical details and the rationale for their design;
 - (d) emission control devices, their functions, configuration, identification and inspection;
 - (e) Georgia Analyzer System (GAS) operation, calibration and maintenance;
 - (f) quality control procedures and their purpose;
 - (g) public relations; and
 - (h) safety and health issues related to inspections.
- (3) Inspectors must demonstrate knowledge and proficiency in proper inspection procedures. Inspectors must pass (with 80% correct answers) a written test on all aspects of the training.
- Inspectors must also pass a practical test by demonstrating that they have knowledge about conducting all parts of the inspection correctly.
- (4) The Director shall issue a Certificate and one Inspector picture ID badge to inspectors who satisfactorily complete the EPD-approved training program and pass the written and hands-on tests. Certificates may be suspended or revoked at any time, after notice and offer of a hearing, for failure to conduct inspections properly or to otherwise comply with the Act or this Chapter.
- (5) Unless suspended, revoked or voluntarily surrendered, a Certificate issued by the Director is valid for two years from the date of issuance.

- (a) For inspectors intending to renew their Certificate, a complete application for renewal of an inspector's Certificate must be submitted at least 30 calendar days prior to the expiration of the existing Certificate.
 - (b) The Director shall renew the Certificate upon timely receipt of a renewal application, determination that there is no cause to deny the renewal in accordance with the Act or Chapter 391-3-20 of the Rules, the inspector successfully completing an EPD approved retraining program, and the inspector passing the written test.
- (6) No inspector shall perform an emissions inspection unless he or she is wearing his or her EPD-issued Inspector picture ID badge so the picture is clearly visible on his or her front upper body area. Replacement of a lost, missing, damaged or illegible ID badge is the responsibility of the inspector at a cost of twenty-five dollars (\$25.00) paid to the Management Contractor.
 - (7) No inspector shall hold or attempt to fraudulently obtain two (2) or more valid Certificates.
 - (8) Whenever an inspector, after applying for and receiving a Certificate, moves from the address listed in his or her application or changes the telephone or e-mail address contact information, the inspector shall notify the Management Contractor of his or her change of address or contact information no later than the next business day. The address in the application or as updated by the inspector shall serve as the address for any and all notice required by law.
 - (9) No unauthorized person shall use a certified emission inspector's personal access code or biometric login to perform any part of an emission inspection. No certified emission inspector shall use the personal access code or biometric login of another certified emission inspector to perform any part of an emission inspection.
 - (10) An inspector shall not divulge or authorize the use of his or her personal access code or biometric login by any other person(s). An inspector shall be held responsible for all inspections performed by any person using his or her personal access code or biometric login.
 - (11) Before an inspector may perform emissions inspections at a station, the Management Contractor must allow the inspector access to the test system(s) at the station. Inspectors must notify the Management Contractor at least three (3) business days before they begin employment at a given station, and no later than the next business day when they cease employment at a station.
 - (12) The Director may deny issuance or renewal of a Certificate for cause, including, but not limited to, the inspector's compliance history.

Rule 391-3-20-.12. Schedules for Emission Tests.

- (1) The inspection term shall be annual.
- (2) All covered vehicles must have a current passing Certificate of Emission Inspection, time extension, or waiver to obtain a vehicle registration each year. A passing Certificate of Emission Inspection, time extension, or waiver shall be valid for no more than twelve (12) months and shall be used for no more than one registration renewal by the same owner, except as provided herein.
- (3) Vehicles not subject to [391-3-20-.18](#), which are purchased or obtained by a resident of a covered county, must receive a passing Certificate of Emission Inspection, time extension, or waiver prior to being registered in a covered county. This inspection shall be performed within thirty (30) days of purchasing or obtaining the vehicle. Persons newly establishing residence in a covered county must receive a passing Certificate of Emission Inspection, time extension, or waiver for their covered vehicle(s) within thirty (30) days of establishing residence in the covered county.
- (4) For vehicles which are inspected under paragraph (3), if the vehicle's next registration renewal date is less than 12 months after the date of the passing Certificate of Emission Inspection, time extension, or waiver, that Certificate, time extension, or waiver shall be valid for the current registration and for the next registration renewal by the same owner.

Rule 391-3-20-13. Certificate of Emission Inspection.

- (1) Inspectors shall provide the motorist or owner of a vehicle which has received an emission inspection a Certificate of Emission Inspection. The Certificate shall be in a form approved by EPD and printed by the GAS such that the information on the Certificate is sharp, clear, legible, and suitable for copying. The Certificate shall include:
 - (a) the Vehicle Identification Number;
 - (b) the license plate number and state;
 - (c) the vehicle make and model year;
 - (d) the inspection date and time;
 - (e) the inspection type (initial, after-repairs reinspection);
 - (f) the inspection fee;
 - (g) vehicle odometer reading;
 - (h) fuel type;
 - (i) the inspection results for the on-board diagnostic check or the exhaust emission test with engine RPM, fuel cap test, and tampering inspection;
 - (j) the applicable standards;
 - (k) the pass or fail status for each test, and for the complete emission inspection;
 - (l) the vehicle engine size and number of cylinders;
 - (m) the inspection station's name, physical address, public access telephone number, and Certificate of Authorization number;
 - (n) Certificate of Emission Inspection number:

- (o) the inspector's Certificate number, name, and signature; and
 - (p) any other information required by EPD.
- (2) In the case of a vehicle that fails the emission inspection, in addition to the failing Certificate of Emission Inspection, the inspector shall provide to the vehicle owner:
- (a) information on the possible availability of warranty emission system repairs and information provided by EPD or the Management Contractor on repairs which may be useful in repairing failed vehicles. Subject to the availability of this information supplied by the EPA, and revised test system software, EPD may modify or waive this requirement;
 - (b) an Emissions Repair Form. This form, provided by EPD or the Management Contractor (via the GCAF website at www.cleanairforce.com) or the GAS shall include a checklist of common repairs and spaces for the repair technician to insert: his or her name; the business name, address, and telephone number; and the cost of repairs; and
 - (c) access to the current, quarterly Repair Watch Public Report provided by EPD or the Management Contractor on repair facilities that have a documented history of emission related repairs on vehicles which have failed the emission inspection.
- (3) Station owners shall purchase E-Certs from EPD or the Management Contractor at a price established by this Chapter. The method for fee collection and E-Cert distribution shall be as established by EPD.

Repealed: Rule Reserved. F. Dec. 2, 1999; eff. Dec. 22, 1999.

Rule 391-3-20-.15. Repairs and Retests.

- (1) Owners of vehicles which fail any portion of the emission inspection shall have necessary maintenance and repairs performed. Vehicles which are brought to an inspection station operated by the same owner as the station which performed the original inspection within 30 days of an inspection failure, will be given one reinspection at no additional charge. If any additional reinspections are required to pass the inspection requirement, another inspection fee shall be charged. This fee will cover one reinspection and, if required, one additional reinspection.
- (2) Owners of vehicles presented for reinspection shall present a completed Emissions Repair Form. No reinspection, whether paid or unpaid, shall be performed unless the repair information form has been completed and submitted to the inspection station. The repair information form should be completed by the repair facility which repaired the vehicle or by the vehicle owner. The information from the form shall be entered into the VID by the inspector performing the reinspection.
- (3) Repairs by the owner or other persons who are not recognized repair technicians are permitted; however, the cost of such repairs, except repairs to primary emission control components, shall not be counted toward a waiver for any 1980 or newer model year vehicle.
- (4) Except as noted, reinspections shall consist only of the failed portions of the previous inspection, i.e., exhaust, fuel cap, tampering, OBD, provided the previous inspection results are retrieved electronically by the GAS. For an exhaust emission reinspection, the vehicle must pass the inspection for all required pollutants (HC, CO). For an OBD system reinspection, the vehicle must pass the complete OBD system check.
- (5) Vehicles which pass the reinspection will receive a passing Certificate of Emission Inspection.
- (6) A station owner that is not the owner of the inspection station which performed the previous initial inspection or paid after-repairs reinspection may perform a free after-repairs reinspection provided the free after-repairs reinspection is performed within 30 days of the previous inspection, and the previous inspection was a paid inspection.

- (7) When the inspector is presented with a vehicle for a reinspection, the inspector shall verify that the vehicle being submitted for the reinspection matches the vehicle specified on the previous failing Certificate of Emission Inspection and on the Emissions Repair Form.
- (8) No station owner or inspector shall charge the motorist or vehicle owner for an after-repairs reinspection, unless a new E-Cert is used and a new Certificate of Emission Inspection is issued containing a new number. The number of any previously issued Certificate of Emission Inspection shall be used only for a reinspection that is free of charge to the motorist or vehicle owner and only in accordance with the requirements of this Chapter.

Rule 391-3-20-.16. Extensions and Reciprocal Inspections. Amended.

- (1) Owners of vehicles which are temporarily stationed in a location which is outside the covered counties, and which cannot obtain a reciprocal inspection by another State's emission inspection program, or be easily brought to the covered counties for inspection may request an extension of time to comply. Each request for an extension shall include current proof that the vehicle and owner are stationed outside the covered counties, e.g., military orders, school registration or other documentation acceptable to EPD. Extensions may be granted for up to one year.
- (2) Vehicles stationed outside the covered counties may comply with the inspection requirement by passing a reciprocal emission inspection from an inspection program approved by the U.S. Environmental Protection Agency.
- (3) Extensions may be granted by EPD, the Management Contractor or an authorized agent of EPD.

- (4) Extensions are valid for no more than one inspection term and shall be used for no more than one registration renewal.

Rule 391-3-20-.17. Waivers.

- (1) Vehicles which fail a reinspection despite expenditures over a set dollar amount on appropriate repairs and which have met certain other criteria may be granted a waiver from complying with the inspection requirements for that registration period. Expenditures must be reasonable costs as determined by the Director.
- (2) In order to obtain a waiver the following criteria must have been met:
 - (a) Repair Costs:
 1. A yearly expenditure, as required by OCGA [12-9-48\(d\)\(2\)](#), must have been made on qualifying repairs after the vehicle fails the initial inspection. The amount will be adjusted each year to reflect the change in the Consumer Price Index after 1989, which was \$450. At the start of each inspection term, EPD will determine the new effective amount in accordance with these requirements and will make that information available at the GCAF website, www.cleanairforce.com. For vehicles which otherwise qualify for waivers based on a prior calendar inspection term, the waiver limit shall be that prior year's level of qualifying repairs.
 2. No cost for labor performed by a vehicle owner in the repair of his or her own vehicle shall be applied toward the repair waiver amount, except that a fleet owner may apply the actual cost of labor and parts, excluding any and all overhead costs, toward the waiver amount.

- (b) Receipts for these expenditures shall be submitted by the vehicle owner. Vehicle owners shall present the vehicle for which the waiver is requested to an authorized waiver inspection facility for verification of waiver eligibility. This verification shall include an inspection of the vehicle to confirm that reported repairs have been performed and to assess possible reasons for the vehicle's failure to meet the emission inspection requirements.
 - (c) Receipts for parts and labor expenditures being considered for a repair waiver shall be submitted from a licensed business that performs emissions repairs to qualify. Repair forms shall adequately describe the vehicle by indicating, at a minimum, the VIN of the vehicle and shall also indicate date of service.
 - 1. Vehicles must have qualifying repair receipts that are dated not more than 30 days prior to the initial failing inspection for the current registration cycle;
 - 2. Repair receipts shall only be used to obtain a single waiver.
 - (d) Qualifying repairs do not include:
 - 1. repair or replacement of tampered emissions control equipment;
 - 2. repairs performed by persons other than a recognized repair technician, except for repairs to primary emissions control components;
 - 3. repairs that are unrelated to emissions performance or are inappropriate for the type of test failure.
 - (e) Motorists must utilize emission performance warranty coverage. If the vehicle is within the age and mileage limitations of the federal Clean Air Act warranty provisions contained in Section 207(b), the owner must present a written denial of warranty coverage from the manufacturer or authorized dealer.
 - (f) Repairs shall address the OBD system failure or have produced a reduction in tailpipe emission of pollutants which failed during the previous initial inspection. Reinspection exhaust emission levels for pollutants which originally passed shall not exceed the relevant standards.
 - (g) Waivers shall be issued by EPD, the Management Contractor or an authorized agent of EPD. Before issuing a waiver, the issuer shall verify that receipts for qualifying repairs equaling or exceeding the established waiver amount have been submitted, verify the repairs have been made by presenting the vehicle for a visual inspection and that the vehicle is otherwise qualified to receive a waiver.
- (3) Waivers are valid for no more than twelve (12) months and shall be used for no more than one registration.

Rule 391-3-20-.18. Sale of Vehicles.

- (1) No person may sell a responsible motor vehicle intended for highway use unless that vehicle has a current valid passing certificate of emissions inspection if, after purchase, the vehicle will be registered in one of the Covered Counties listed in rule [391-3-20-.02](#).
- (2) A current valid passing Certificate of Emission Inspection is not required for any motor vehicle that might otherwise be subject to a pre-sale emission inspection, but is sold for salvage or for parts rather than for use as a motor vehicle on the streets and highways, provided that said vehicle is not in fact operated on the streets and highways, but is towed or hauled by some other vehicle. The purpose for which the vehicle is sold shall be indicated by the seller on the bill of sale.

Rule 391-3-20-.19. Management Contractor.

- (1) The Director, on behalf of the Board of Natural Resources, may contract with any person, corporation or entity as necessary to implement and adequately enforce and ensure compliance with the State Inspection Program. The Department may contract for the design and operation of a centralized data system and other functions as determined by the Director.
- (2) The Management Contractor will be responsible for designing and maintaining an inspection database that will include all vehicles subject to inspection in the covered counties. This database will include all inspection-related information required by the Act and this Chapter or by the management contract. Access to the information in this database shall be made available to EPD for oversight, data analysis and other purposes, and to the Georgia Department of Revenue, Motor Vehicle Division or its successor agency for the purpose of determining compliance with the inspection requirement for vehicles which are to be registered. Data in this database may not be used for any other purpose unless specifically authorized by the Director.
- (3) The Management Contractor, and its employees, shall not be engaged in, or have any financial interest in, the repair of motor vehicles, or in the operation of any emission inspection station. Financial interest in the repair of vehicles shall include the ownership or operation of repair facilities or the sale of motor vehicles or motor vehicle parts.

Rule 391-3-20-.20. Referee Program.

- (1) Should a vehicle owner question the emission inspection procedures, GAS accuracy or validity of the inspection results, the owner may request that a referee inspection be

performed on the vehicle, provided no repairs have been made on the vehicle since the inspection in question. The owner must request the referee inspection within fifteen (15) business days of the inspection in question.

- (2) Referee inspections shall be observed by EPD or the Management Contractor at a mutually agreed upon time at the inspection station where the inspection in question was performed.
- (3) Prior to any referee inspection, EPD or the Management Contractor will review all calibration records to ensure that the GAS at the applicable station are meeting the appropriate specifications. EPD or the Management Contractor will then observe the referee inspection performed by station personnel to ensure that it is properly performed.
- (4) If the vehicle passes the referee test, the vehicle will be given a passing Certificate of Emission Inspection.
- (5) EPD may request that a referee inspection be performed on a vehicle at any reasonable time.

Rule 391-3-20-.21. Inspection Fees.

- (1) The emission inspection fee shall be due from the motorist or vehicle owner when the vehicle starts the inspection process. Vehicles which are rejected prior to the start of the inspection process for being unsafe to inspect shall not be charged a fee.
- (2) The emission inspection fee paid by the motorist or vehicle owner to the inspection station owner shall consist of the program administration fee plus a fee for performing the inspection. The emission inspection fee shall be established by the inspection station owner but shall be no less than \$10.00 and no more than \$25.00. The fee will cover an initial inspection, plus one free reinspection. Another reinspection fee will be charged for subsequent re-inspections; this fee will cover one reinspection and, if required, one additional reinspection.

(3) Program Administration Fees.

- (a) Each inspection station owner shall remit to the Director a program administration fee of four dollars and two cents (\$4.02) for each E-Cert purchased.
- (b) Each owner of a fleet inspection station where EPD has required the installation and operation of a video camera surveillance system, shall remit to the Director a program administration fee of five dollars and two cents (\$5.02) for each E-Cert purchased.

- (1) The administration and enforcement of this Chapter shall be as prescribed in the Act and in compliance with the minimum applicable requirements as prescribed by the Georgia Administrative Procedures Act (O.C.G.A. Section [50-13-1](#), *et seq.*, as amended).
- (2) Suspensions and Revocations.
 - (a) Whenever a Certificate of Authorization has been suspended and that Certificate expires during the suspension period, the inspection station owner may not obtain a Certificate of Authorization until the term of the suspension has expired. Whenever a Certificate of Authorization has been revoked or surrendered as a result of enforcement action, the inspection station owner may not apply for a new Certificate of Authorization for a minimum of two years from the date of the revocation or surrender.

- (b) Whenever an inspector's Certificate has been suspended and that Certificate expires during the suspension period, the inspector may not obtain a Certificate until the term of the suspension has expired. Whenever an inspector's Certificate has been revoked or surrendered as a result of enforcement action, the inspector shall surrender his or her Inspector picture ID badge and may not apply for a new Certificate for a minimum of two years from the date of the revocation or surrender.
- (3) Any inspection station whose Certificate of Authorization has been revoked or surrendered as a result of enforcement action will not be eligible for listing in the Repair Watch Public Report.

Rule 391-3-21-.04. Section 319(h) Nonpoint Source Implementation Grant FY 2005 - FY 2011.

- (1) Statutory Basis: O.C.G.A. [28-5-120](#).
- (2) General Scope and Purpose of the Grant Program: Under Section 319(h) of the Clean Water Act, the U.S. Environmental Protection Agency awards a Nonpoint Source Implementation Grant to the State to fund eligible projects which support the implementation of the Georgia Nonpoint Source Management Program (Revision - August 2000). Section 319(h) Nonpoint Source Implementation Grant funds for the prevention, control and/or abatement of nonpoint sources of pollution are made available to eligible recipients in Georgia.
- (3) General Terms and Conditions of the Grant: The general terms and conditions of the grant are:
 - (a) Section 319(h) Nonpoint Source Implementation Grant projects must specifically identify the nonpoint sources of pollution to be addressed and the activities proposed to prevent, control and/or abate these nonpoint sources of pollution.
 - (b) Maximum Federal reimbursement for a Section 319(h) Nonpoint Source Implementation Grant project is 60 percent of the total project cost.

Therefore, each recipient must provide non-Federal matching funds or in-kind services for a minimum of 40 percent of the total project cost.

- (c) Types of activities which are eligible include: regulatory or non-regulatory programs for enforcement, technical assistance, financial assistance, education, training, technology transfer, TMDL implementation projects, watershed restoration projects, demonstration projects, update and refinement of nonpoint source programs and assessments, monitoring to assess the success of specific nonpoint source implementation projects, urban stormwater control activities that are not specifically required by draft or final NPDES permit, and certain ground water activities. Lake protection and restoration activities are eligible provided that they are not used for "in-lake" work such as aquatic macrophyte harvesting or dredging unless the nonpoint sources of pollution will be remediated.
 - (d) Section 319(h) Nonpoint Source Implementation Grant projects must conform to all applicable legal requirements of Section 319, 40 CFR Part 31 and 40 CFR Part 35, Subpart A, and the requirements of OMB Circular A-87, A-102 and A-110, and must be consistent with the goals, objectives and priorities in the Georgia Nonpoint Source Management Program (Revision - August 2000).
- (4) Eligible Recipients of the Grant: Eligible recipients of the Section 319(h) Nonpoint Source Implementation Grant funds include local, regional and State units of government, local authorities which operate local government service delivery programs, regional development centers, local school systems, State college and universities, and State agencies. Local governments must have Qualified Local Government status, in compliance with the requirements of the Georgia Planning Act of 1989 and Service Delivery Strategy Law of 1997.
- (5) Criteria for the Award: The Section 319(h) Nonpoint Source Implementation Grant funds are limited. Therefore, a competitive process is used to ensure that the most appropriate projects are selected for funding. Each project proposal will be evaluated to determine if the proposed project is an eligible activity and all eligible project proposals will be ranked based on the selection criteria below. Section 319(h) Nonpoint Source Implementation Grant awards are contingent upon review and approval of the U.S. Environmental Protection Agency and funding by Congress.
- (6) Key Ranking Factors for Competitive Project Selection: Project proposals must specifically identify the nonpoint sources of pollution to be addressed and the activities proposed to prevent, control and/or abate these nonpoint sources of pollution. Project proposals must also support the milestones and/or implementation activities described in the Georgia Nonpoint Source Management Program (Revision - August 2000). Finally, project proposals must include an appropriate component to evaluate the effectiveness (i.e., measure of success) of the project (e.g., water quality monitoring, beneficial use assessment, environmental indicators).

If the project is implementing structural best management practices, the project must ensure that the practices will be operated and maintained for a period of at least five to ten years. In addition, the project must annually provide (for nitrogen, phosphorus and/or

sediment) an estimate of load reductions achieved by the project and (for streambank and wetlands protection or restoration projects) the linear feet of streambank, or acres of wetlands, protected or restored.

If a project proposal includes water quality monitoring, a detailed Quality Assurance Project Plan (QAPP) is required. The requirements for QAPP are contained in EPA QA/G-5, EPA Requirements for Quality Assurance Project Plans for Environmental Data Operations.

The following selection criteria apply to all Section 319(h) Nonpoint Source Implementation Grant FY2005 - FY2011 project proposals:

- (a) Priority will be given to project proposals resulting in measurable (i.e., quantitative) improvements in water quality.
- (b) Priority will be given to project proposals implementing structural best management practices to prevent, control and/or abate nonpoint sources of pollution.
- (c) Priority will be given to project proposals implementing actions to alleviate the "criterion violated" identified in the Section 303(d) and Section 305(b) lists of waters which are partially or not supporting designated or beneficial uses due to nonpoint sources of pollution. Emphasis will be placed on projects addressing waters listed for biota, habitat, and/or sediment.
- (d) Priority will be given to project proposals implementing the nonpoint source components of TMDLs that have been finalized as of November 30, 2010 under Section 303(d) of the Clean Water Act.
- (e) Priority will be given to project proposals developing, revising and/or implementing TMDL Implementation Plans and/or Watershed Improvement Plans to prevent, control and/or abate nonpoint sources of pollution. Emphasis will be placed on projects implementing Extended Revisions of TMDL Implementation Plans, or plans developed with Section 319(h) funds.
- (f) Priority will be given to project proposals that support a watershed management approach utilizing cooperating partnerships and/or involving multi-governmental agencies. Emphasis will be placed on projects conducted in conjunction with other nonpoint source management activities within the watershed.
- (g) Priority will be given to projects that include structural and/or managerial improvements that prevent and/or correct the adverse hydrologic impacts of increased impervious surface in a watershed. In order to receive this priority ranking, grantees must develop and implement or have in place development ordinances, stream buffer protections wider than state minimums, or other local

mechanisms to ensure long-term success in minimizing the potential future impacts of hydrologic modifications.

- (h) Priority will be given to project proposals that address and/or implement management measures, enforceable policies and mechanisms that will result in *Georgia's Coastal Nonpoint Source Management Program* being fully approvable under Section 6217 of the Coastal Zone Act Reauthorization Amendments of 1990 (CZARA).
 - (i) Priority will be given to projects located in priority watersheds, as determined by GAEPD and USEPA, that are implementing watershed-based implementation, restoration and/or planning.
- (7) Directions and Deadlines for Applying: Requests for copies of the general guidelines for preparing a Section 319(h) Nonpoint Source Implementation Grant proposal should be made to:

Rule 391-3-21-.05. Grants to State and Local Governments from the Hazardous Waste Trust Fund.

- (1) **Statutory Authority:** O.C.G.A. [12-8-90](#)*et seq.*
- (2) **General Scope and Purpose.** The purpose of this grant is to provide financing to state and local governments for their share of costs associated with the investigation, remediation, post-closure care and maintenance of sites placed on the National Priority List pursuant to the federal Comprehensive Response, Compensation, and Liability Act of 1980, as amended, or sites placed on the Hazardous Site Inventory pursuant to O.C.G.A. Section [12-8-97](#).
- (3) **Terms and Conditions.** The terms and conditions of the grant are:
 - (a) For state or local governments that have been designated as a responsible party for a site, and that are not the owner of the site, the Director may pay up to 50% of the first \$500,000 of eligible costs, as described in Rule [391-3-19-.09\(4\)\(a\)](#), and up to 25% of all eligible costs exceeding \$500,000.
 - (b) For state or local governments, excluding counties or municipal corporations, that have been designated as a responsible party for a site, and that are the owner of the site, the Director may pay up to 50% of the first \$500,000 of eligible costs, as described in Rule [391-3-19-.09\(4\)\(a\)](#), and up to 25% of all eligible costs exceeding \$500,000.

- (c) For counties or municipal corporations that have been designated as a responsible party for a site and that own or operate such site, the Director shall pay 100% of the first \$500,000 of eligible costs, as described in Rule [391-3-19-.09\(4\)\(a\)](#), and may pay up to 50% of all eligible costs exceeding \$500,000.
 - (d) In the event that the unencumbered balance of the Hazardous Waste Trust Fund falls below \$4.0 million, the Director may suspend the provision of financial assistance to state and local governments as described herein.
 - (e) Total payment of eligible costs, as described in Rule [391-3-19-.09\(4\)\(a\)](#), from the Hazardous Waste Trust Fund shall in no event exceed \$2,000,000 per site.
 - (f) Those costs set forth and described in Rule [391-3-19-.09\(4\)\(b\)](#) are not eligible for payment pursuant hereto.
- (4) **Eligible Recipients.** A state or local government that meets all the eligibility requirements described in Rule [391-3-19-.09\(2\)](#) may receive financial assistance from the Hazardous Waste Trust Fund as described in Paragraph (3) above, "**Terms and Conditions.**" For purposes of this Rule, "state" means any agency, board, bureau, commission or authority of the State of Georgia. For purposes of this Rule, "local government" means any county or municipality or consolidated city-county government, any local solid waste management authority, or any regional solid waste management authority created pursuant to O.C.G.A. Section [12-8-53](#) of the Comprehensive Georgia Solid Waste Management Act.
- (5) **Criteria for the award.** There is no competitive ranking of applications for financial assistance; a state or local government that meets all the eligibility requirements described in Rule [391-3-19-.09\(2\)](#) may receive financial assistance from the Hazardous Waste Trust Fund as described in Paragraph (3) above, "**Terms and Conditions.**"
- (6) **Directions and Deadlines for applying.** There are no deadlines for applying. Requests for information and applications should be directed to the:

Environmental Protection Division
Hazardous Sites Response Program

Rule 391-3-21-.06. Chattahoochee Basin Downstream Assistance (CBDA) Grant Program.

- (1) **Statutory Basis:** S.F.Y. 1996 - 1997 (Act No. 1037).
- (2) **General Scope and Purpose of the Grant.** The general purpose and scope of this grant program is to provide assistance to local governments in the Chattahoochee Basin downstream of the City of Atlanta to deal with water quality problems.
- (3) **General Terms and Conditions of the Grant.** The general terms and conditions of the grant are:
 - (a) The grant to the local government will be used for water quality monitoring, to implement projects that mitigate documented water quality problems in the Chattahoochee River, to provide public education on Chattahoochee water quality issues, to develop and/or implement non-point source management strategies or to mitigate documented water treatment problems.
 - (b) Grant awards will range from a minimum of \$10,000 to a maximum of \$1,000,000 per project.
 - (c) The grant shall pay up to 100% of project costs, subject to maximum limitation.
- (4) **Eligible Recipients for the Grant.** Eligible recipient of competitive grants include local and regional units of government including cities, counties and local authorities which operate local government service delivery programs. To be eligible, applicants must be located in and provide services within the Chattahoochee River Basin downstream of the river's confluence with Peachtree Creek. Local governments must have **QUALIFIED LOCAL GOVERNMENT STATUS**, in compliance with the requirements of the Georgia Planning Act of 1989.
- (5) **Criteria for the Award.** The following minimum requirements apply to all applicants for assistance:

- (a) Applicant must describe the need, purpose and objective of the activity. Details should be provided on the specific type of activities to be carried out with grant assistance.
 - (b) Applicant must provide a detailed line budget highlighting all anticipated sources of project/grant funding as well a detailed line item estimate of all expenses.
 - (c) Applicant must provide a detailed project schedule including start date, completion date and intermediate milestones.
 - (d) Projects must be related to water quality issues involving the Chattahoochee River or direct public use of the river's resources.
- (6) **Directories and Deadlines for Applying.** For a copy of the application form contact:

Department of Natural Resources

Environmental Protection Division

205 Butler Street, S.E., Suite 1058

Atlanta, Georgia 30334

Contact: Mr. Alan Hallum, Branch Chief, Water Protection Branch 404-656-4708

Application Deadline: September 1, 1996.

(7) Selection Criteria.

Each application will be scored on the following eight Project Selection Criteria. Answers to each of the criteria will be scored from 0 to 3, 3 being the highest and most desirable, and an average of the scores determined. Bonus points will be added to the average as indicated. The maximum score possible is 30.

1. **Purpose:** Is the purpose of the project clearly stated, and will the project work achieve the stated purpose?
2. **Schedule:** Is the project appropriately phased, and can all project work reasonably be completed within the proposed schedule?
3. **Budget:** Is the budget adequate and reasonable?
4. **Management:** Has a capable project manager and fiscal manager within the applicant organization been clearly identified?

5. **Methodology:** Is there a demonstrated need for this project at this time? Would the project help meet an identified goal within a local, regional or state plan?
6. **Funding Need:** Would the project fail to be completed without CBDA grant assistance?
7. **Public Participation:** Does the project involve meaningful public participation on a large scale or will results of the project be made available widely to the public?
8. **Local Support:** Is there evidence of local support of this project?

Bonus: Six (6) points will be added to the average score if the project involves the mitigation of a water quality problem documented in the most recent report on Wafer Quality in Georgia [1305(b) report].

Cite as Ga. Comp. R. & Regs. R. 391-3-21-.06

Authority: O.C.G.A. Sec. [28-5-120](#) *et seq.*

History. Original grant description entitled "Chattahoochee Basin Downstream Assistance (CBDA) Grant Program" received July 11, 1996.

Rule 391-3-21-.07. Section 319(h) Nonpoint Source Implementation Grant.

- (1) Statutory Basis: O.C.G.A. Secs. [28-5-120](#) *et seq.* and Secs. [12-5-20](#) *et seq.*
- (2) General Scope and Purpose of the Grant Program: Under Section 319(h) of the Clean Water Act, the U. S. Environmental Protection Agency awards a Nonpoint Source Implementation Grant to the State to fund eligible projects that support the implementation of the most recent revision of the Georgia Nonpoint Source Management Plan. Section 319(h) Nonpoint Source Implementation Grant funds for the prevention, control and/or abatement of nonpoint sources of pollution are made available to eligible recipients in Georgia.
- (3) General Terms and Conditions of the Grant: The general terms and conditions of the grant are:
 - (a) Section 319(h) Nonpoint Source Implementation Grant projects must specifically identify the nonpoint sources of pollution to be addressed and the activities proposed to prevent, control and/or abate these nonpoint sources of pollution.
 - (b) Maximum Federal reimbursement for a Section 319(h) Nonpoint Source Implementation Grant project is 60 percent of the total project cost.

Therefore, each recipient must provide non-Federal matching funds or in-kind services for a minimum of 40 percent of the total project cost.

- (c) Types of activities which are eligible under Federal rules include: regulatory or non-regulatory programs for enforcement, technical assistance, financial assistance, education, training, technology transfer, TMDL implementation projects, watershed restoration projects, demonstration projects, update and refinement of nonpoint source programs and assessments, monitoring to assess the success of specific nonpoint source implementation projects, urban stormwater control activities that are not specifically required by draft or final NPDES permit, and certain ground water activities. Lake protection and restoration activities are eligible provided that they are not used for "in-lake" work such as aquatic macrophyte harvesting or dredging unless the nonpoint sources of pollution will be remediated.
 - (d) Section 319(h) Nonpoint Source Implementation Grant projects must conform to all applicable legal requirements including, but not limited to, Section 319, 40 CFR Part 31, 40 CFR Part 35, Subpart A, and 2 CFR Part 200, 2 CFR Part 1500, and the requirements of OMB Circular A-87, A-102 and A-110, and must be consistent with the goals, objectives and priorities in the most recent revision of the Georgia Nonpoint Source Management Plan.
- (4) Eligible Recipients of the Grant: Eligible recipients of the Section 319(h) Nonpoint Source Implementation Grant funds include; local, regional and State units of government, local authorities which operate local government service delivery programs, regional commissions, resource conservation and development councils, local school systems, State college and universities, and State agencies. Local government applicants must have Qualified Local Government status, in compliance with the requirements of the Georgia Planning Act of 1989 and Service Delivery Strategy Law of 1997.
- (5) Criteria for the Award: The Section 319(h) Nonpoint Source Implementation Grant funds are limited. Therefore, a competitive process is used to ensure that the most appropriate projects are selected for funding. Each project proposal will be evaluated to determine if the proposed project is an eligible activity, and all eligible project proposals will be ranked based on the selection criteria below. Section 319(h) Nonpoint Source Implementation Grant awards are contingent upon review and approval of the U. S. Environmental Protection Agency and funding by Congress.
- (6) Key Ranking Factors for Competitive Project Selection: Project proposals must specifically identify the nonpoint sources of pollution to be addressed and the activities proposed to prevent, control and/or abate these nonpoint sources of pollution. Project proposals must also demonstrate cost effectiveness. Project proposals must also support the milestones and/or implementation activities described in the most recent revision of the Georgia Nonpoint Source Management Plan. Finally, project proposals must include an appropriate component to evaluate the effectiveness (i.e., measure of success) of the project (e.g., water quality monitoring, beneficial use assessment, environmental indicators).

If the project is implementing structural best management practices, the project must ensure that the practices will be properly operated and maintained for the reasonable lifespan of the project. In addition, the project must provide (for nitrogen, phosphorus and/or sediment) estimates of load reductions achieved by the project and (for streambank and wetlands protection or restoration projects) the linear feet of streambank, or acres of wetlands, protected or restored for the life of the project.

If a project proposal includes water quality monitoring, a detailed Sampling and Quality Assurance Plan (SQAP) or Quality Assurance Project Plan (QAPP) is required. The requirements for SQAP are contained in EPD's Guidance On Submitting Water Quality Data For Use By The Georgia Environmental Protection Division In 305(b)/303(d) Listing Assessments (SQAP). The requirements for QAPP are contained in EPA QA/G-5, Guidance for Quality Assurance Project Plans.

Project applications will be considered and based on the following criteria. At a minimum, all applications must propose to implement an existing watershed based plan that addresses USEPA's 9-Elements for Watershed Planning and whose area is equal to a single Hydrologic Unit Code (HUC) 10 or smaller. Those applications that do not meet this minimum requirement will *not* be considered for funding.

(7) Additional criteria to be used to select projects for funding:

The following selection criteria apply to all Section 319(h) Nonpoint Source Implementation Grant project proposals:

- (a) Project proposals implementing a watershed-based plan that adequately address USEPA's 9-Elements for Watershed Planning for waters listed as impaired under Section 303(d) of the Clean Water Act, or,
- (b) Project proposals implementing a watershed-based plan that adequately address USEPA's 9-Elements for Watershed Planning for waters listed as Category 1 under Section 305(b) of the Clean Water Act that supports USEPA's Healthy Watersheds Initiative.
- (c) Project proposals that implement watershed-based plans that will result in measurable (i.e., quantitative) improvements in water quality by implementing structural and/or nonstructural best management practices to prevent, control and/or abate nonpoint sources of pollution.
- (d) Project proposals implementing actions contained within watershed-based plans that adequately address USEPA's 9-Elements for Watershed Planning to alleviate the "criterion violated" identified in the Section 303(d) and Section 305(b) lists of waters, which are not supporting designated or beneficial uses due to nonpoint sources of pollution.

- (e) Project proposals that support a watershed management approach utilizing cooperating partnerships and/or involving multi-governmental agencies. Emphasis will be placed on projects conducted in conjunction with other nonpoint source management activities within the watershed as well as projects conducted across jurisdictional boundaries.
- (8) Additional priority will be given to projects that:
- (a) Specifically target waterbodies impaired for violating and/or addressing pathogens, dissolved oxygen, sediment, and/or nutrients;
 - (b) Projects that propose implementing management practices identified within the appropriate Regional Water Plan;
 - (c) Demonstrate environmental benefits beyond addressing NPS impairments. These benefits may include but are not limited to: environmental justice, protection of healthy streams, air quality, water conservation, energy conservation, stream flow profile, habitat connectivity, and others;
 - (d) Demonstrate a match commitment of 50% or higher;
 - (e) Are located in priority watersheds, as determined by GAEPD and USEPA, and are focused on watershed-based implementation and restoration;
 - (f) Include administrative and/or managerial improvements that prevent and/or correct the adverse hydrologic impacts of increased impervious surface in a watershed. In order to receive this priority ranking, during the project period grantees must develop and implement items such as, development ordinances, stream buffer protections wider than state minimums, or other local mechanisms to ensure long-term success in minimizing the potential future impacts of hydrologic modifications; or
 - (g) Partner with local Non-Profit watershed groups established prior to the submittal of application.
- (9) Additional priority may be given to project proposals that carry out specific activities that address and/or implement management measures, enforceable policies and mechanisms included in *Georgia's Coastal Nonpoint Source Management Program*.
- (10) Projects that have *not* demonstrated successful administration of previous Section 319(h), Section 106, and/or Section 604(b) grant funded projects where applicable may receive a reduction in points during project review. Successful administration includes but is not limited to: completing all project activities during the contract period, meeting all required deadlines, completed the project on time and on budget, expending most or all grant funds requested on project activities, and providing adequate documentation as requested by GAEPD.

- (11) Applications that *do not* follow all instructions and guidelines as described in GAEPD's *General Guidelines: Section 319(h) Grant Nonpoint Source Implementation Grant*, may not be reviewed or considered for recommendation for funding.
- (12) Directions and Deadlines for Applying: Requests for copies of the general guidelines for preparing a Section 319(h) Nonpoint Source Implementation Grant proposal should be made to:

Georgia Department of Natural Resources

Environmental Protection Division

ATTN: NonPoint Source Program

2 Martin Luther King Jr. Drive

Suite 1462 East

Atlanta, Georgia 30334

Additional grant information, application materials and staff contact information may be found at the Division's website, <http://epd.georgia.gov/>.

Deadline for submitting proposals: Applications for grant award will be solicited via advertisement on the Division's website no later than January of each year and applications will be due no later than April. Specific application timeframes will be available via the Division's website.

Submitted: Oct. 20, 1998.

Terminated: July 13, 2004.

Submitted: Grant description entitled "Section 319(h) Nonpoint Source Implementation Grant" received July 15, 2015.

Submitted: Apr. 18, 2019.

Rule 391-3-21-.08. Owens-Brockway Supplemental Environmental Project Georgia School Bus Retrofit Grant Program.

- (1) Owens-Brockway Glass Container, Inc. Supplemental Environmental Project (SEP) Georgia School Bus Retrofit Program Scope and Purpose: Grant funds are available to the 20-county Atlanta ozone maintenance area (Barrow, Bartow, Carroll, Cherokee, Clayton, Cobb, Coweta, DeKalb, Douglas, Fayette, Forsyth, Fulton, Gwinnett, Hall, Henry,

Newton, Paulding, Spalding, Rockdale, Walton) under the Federal Consent Decree (DOJ Case # 90-5-1-09678) for purchasing and installing diesel emission control devices and/or the incremental cost of purchasing vehicles that will operate on natural gas, propane, or are hybrid electric.

(a) General Terms and Conditions.

1. Projects submitted for funding under this Program must:
 - (i) Identify the vehicles for installing emission control devices and type of emission control equipment to be used; and/or
 - (ii) Identify the vehicles for purchase that are hybrid electric or that will operate on propane or natural gas.
2. Submitted projects must conform to all applicable programmatic and administrative conditions including, without limitation:
 - (i) Coordination with EPD personnel;
 - (ii) Use of verified emission control technologies under the U.S. Environmental Protection Agency's (EPA's) Retrofit Program or the California Air Resources Board (CARB) for projects including emission control equipment;
 - (iii) Use of natural gas, propane, or hybrid electric engine configurations that have been certified by EPA and/or CARB to meet at a minimum the 2010 emission standards for projects including the purchase of natural gas, propane, or hybrid electric vehicles;
 - (iv) Submission of quarterly and final reports when requested;
 - (v) Compliance with applicable procurement and subgrant procedures;
 - (vi) Certification that the emission control equipment was properly installed and is in working condition when applicable;
 - (vii) Use of data-logging in accordance with manufacturer specifications of diesel vehicles that will be equipped with emission control equipment on existing routes to ensure proper exhaust temperature profiles;
 - (viii) Properly maintain vehicles and retrofit equipment and enforce warranty claims against vendors, as applicable, if a maintenance problem arises for all buses and equipment purchased as a part of this grant; and

- (ix) Use of the emission control equipment and/or natural gas, propane, and/or hybrid electric vehicles for a minimum of four years unless the equipment is damaged beyond repair and/or the vehicle becomes inoperable and is unable to be repaired.

- (b) Eligible Recipients. Eligible applicants for this grant are school systems and municipal governments within the 20 county metro Atlanta ozone maintenance area.

- (c) Match Requirements. There are no match requirements for this supplemental environmental project.

- (d) Criteria for the Award. Grant awards will be limited to projects that include the purchase and installation of diesel emission control devices on public school or municipal government-owned and -operated diesel-powered vehicles and/or equipment; and/or the purchase of natural gas, propane, or hybrid electric vehicles. In the event that the total requested funding in the eligible projects exceed the available funding, EPD will give preference to applications from eligible school systems. Within the preferences, EPD will rank the applications according to the cost effectiveness of each project (cost per ton of emission reduced over the lifetime of the project).

- (e) Deadline for Submittal. EPD will send out the first solicitation for applications within one month of notice of criteria approval. Applications will be due no later than eight weeks after release of the solicitation. Funding will be distributed based on the criteria for award between applicants that reply within the first solicitation period. If funds remain or additional funds are received after funds are awarded to all qualified projects from the first solicitation, additional solicitation(s) will be issued until all of the funds have been obligated. In the first solicitation, projects will be awarded based on the order in which projects rank within the criteria selection process. The applications will be evaluated based on the criteria stated in Subsection (d). If additional solicitations are needed, applications will be awarded based on the order in which projects rank within the criteria selection process.

- (f) Directions For Submitting Applications for the Owens-Brockway SEP Georgia School Bus Retrofit Program. Requests for copies of the general guidelines, proposal forms and submittal of applications for the Owens-Brockway SEP Georgia School Bus Retrofit Program should be made to:

Georgia Environmental Protection Division

Mobile and Area Sources Program

4244 International Parkway, Suite 134

Atlanta, Georgia 30354

- (g) Award of the Owens-Brockway SEP Georgia School Bus Retrofit Program is subject to funding provided to EPD. EPD may fund individual projects less than the requested amounts if necessary to distribute funds among equally-ranked projects or to reduce the project cost to the maximum allowable distribution.

Cite as Ga. Comp. R. & Regs. R. 391-3-21-.08

Authority: O.C.G.A. § [12-9-1](#) *et seq.*, as amended.

History. Original grant description entitled "Scrap Tire Recycle/Roadside Clean Up Event Program" received Oct. 20, 1998.

Terminated: July 13, 2004.

Submitted: Grant description entitled "Owens-Brockway Supplemental Environmental Project Georgia School Bus Retrofit Grant Program" received July 25, 2016.

Rule 391-3-21-.09. Regional Water Plan Seed Grant Program.

- (1) Statutory Basis: O.C.G.A. Secs. [28-5-120](#) *et seq.* and Secs. [12-5-520](#) *et seq.*
- (2) General Scope and Purpose of the Grant Program: The purpose of the grant program is to provide funds to eligible recipients in Georgia to support and incentivize local governments and other appropriate water users as they undertake implementation activities identified in the applicable Regional Water Plans.
- (3) Eligible Recipients of the Grant: Eligible recipients of the Regional Water Plan Seed Grant funds include local, regional and State units of government, local authorities which operate local government service delivery programs, regional commissions, resource conservation and development councils, local school systems, State college and universities, and State agencies. Local governments must have Qualified Local Government status as of the date of application, in compliance with the requirements of the Georgia Planning Act of 1989 and Service Delivery Strategy Law of 1997.
 - (a) Applications will include a letter of endorsement signed by the Council Chair or their authorized signatory from the relevant Regional Water Planning Council or Councils that at a minimum describes how the project is consistent with the Council's implementation priorities and the vision and goals articulated in their Regional Water Plan(s).
- (4) General Terms and Conditions of the Grant: The general terms and conditions of the grant are:

- (a) Regional Water Plan Seed Grant projects must specifically identify the Regional Water Plan(s) and management practice(s) or other recommendation(s) from each plan (including data and information needs) that the project is designed to address.
 - (b) Prospective applicants must schedule and participate in a project development pre-application meeting with Division staff to ensure the application satisfies the general requirements as well as more specific criteria.
 - (c) Maximum reimbursement for a Regional Water Plan Seed Grant project is 60 percent of the total project cost. Therefore, each recipient must provide matching funds for a minimum of 40 percent of the total project cost. Of the required 40 percent match, a minimum of 10 percent of the total project cost must be in the form of a cash match. The cash match must be expended to pay for specific elements of the project budget and may not include indirect costs, equipment operation costs, or in-kind services.
 - (d) Types of activities that are eligible include:
 - i. undertaking programs to address critical information and/or data needs identified in the Regional Water Plan(s);
 - ii. tracking and analyzing available monitoring data and reporting on water resource conditions identified in the Regional Water Plan(s);
 - iii. preparing and distributing technical guidance that address management practices in two or more water planning regions;
 - iv. providing technical assistance to support implementation of Regional Water Plan(s) management practices; or
 - v. undertaking other specific implementation activities identified in the Regional Water Plan(s).
 - (e) Regional Water Plan Seed Grant projects must conform to all applicable requirements of O.C.G.A. § [12-5-33\(b\)](#) and O.C.G.A. § [12-5-520](#) et seq. and must be consistent with the policies and implementation actions in the Georgia Comprehensive State-wide Water Management Plan.
- (5) Criteria for the Award: The Regional Water Plan Seed Grant funds are limited and are contingent upon available funding. Each project proposal will be evaluated by the Division to determine if the proposed project is an eligible activity, and all eligible project proposals will be ranked based on the selection criteria below. The Division funds projects starting with the highest ranking score first and will continue awarding funds to those qualifying applications until the total amount funded reaches the total available amount. The Division reserves the right to coordinate with applicants as needed to modify project scopes and budgets to allow for modified project funding.

- (a) Project proposals must specifically identify the Regional Water Plan or Plans and management practice(s) or other recommendation(s) from each plan that the project is designed to implement;
 - i. Projects that are located within the Metro Water District, or applicants who are located within the Metro Water District, are eligible to apply for a seed grant if all of the following apply:
 - 1. The project will provide benefits in one or more of the neighboring Water Planning Council regions,
 - 2. The project addresses implementation of one or more management practices or other recommendations from the Regional Water Plans for those regions, and
 - 3. The application is endorsed by the neighboring Water Planning Council(s) in those regions.
 - ii. If the project addresses data or information needs, the applicant must 1) specify the connections between the data to be collected and specific management practice(s) or other recommendation(s) in the Regional Water Plan(s) and 2) demonstrate how the data to be collected will be applied or integrated in the Regional Water Plan(s) or plan implementation.
- (b) Project proposals must be consistent with the implementation priorities and the vision and goals articulated in the applicable Regional Water Plan(s). To ensure this consistency, proposals must demonstrate significant coordination between the applicant, Council(s), and the Division during preparation of the application and throughout the awarded project;
- (c) Project proposals must demonstrate the state, regional and/or local benefits of the project including but not limited to enhancing water supply or water quality improvements that also provide water supply benefits;
- (d) Project proposals must demonstrate how the project will enable continued and new implementation of Regional Water Plan management practices or other Regional Water Plan recommendations;
 - i. Applications that do not clearly demonstrate this will not be considered for funding.
- (e) Project proposals must demonstrate how the effectiveness of the project will be evaluated (i.e., measure of success), and numerical measures should be used where appropriate;

- (f) Project proposals should demonstrate collaboration with multiple Regional Water Planning Councils, cooperating partnerships, and/or multi-governmental agencies and local implementing actors;
 - (g) Project proposals should demonstrate coordination with other water management projects and activities within the watershed as well as projects conducted across jurisdictional boundaries;
 - (h) Project proposals should demonstrate additional environmental benefits including but not limited to protection of in-stream flows, water conservation, air quality and energy conservation;
 - (i) Project proposals should demonstrate cost effectiveness of both grant and match funds. Cost effectiveness is defined as having the largest possible impact with the funds available;
 - i. Project proposals utilizing indirect costs as a sole source of match will not score as well due to a reduction of cost effectiveness.
 - (j) If a project proposal includes water quality monitoring, a Quality Assurance Project Plan (QAPP) will be required. If the data will be submitted to the Division for listing or delisting purposes, a Sampling and Quality Assurance Plan (SQAP) will instead be required. The requirements for a SQAP are contained in EPD's Guidance On Submitting Water Quality Data For Use By The Georgia Environmental Protection Division In 305(b)/303(d) Listing Assessments (SQAP), which can be found on the Division's website.
 - (k) Project applicants who have received grant funds in past years but have *NOT* demonstrated successful administration of previous Section 319(h), Section 106, Section 604(b) or other grant funded projects may receive a reduction in points during project review. Successful administration includes but is not limited to: completing all project activities during the contract period, meeting all required deadlines, completing the project on time and on budget, expending all grant funds requested on project activities, and providing adequate documentation as requested by the Division.
- (6) Additional points may also be awarded to projects that demonstrate:
- (a) A match commitment of 50 percent of total project cost or higher; or
 - (b) A cash match commitment of 20 percent of total project cost or higher.
- (7) Directions and Deadlines for Applying: Applicants interested in applying for a Regional Water Plan Seed Grant should contact the Division's Grants Unit or visit the Division's website for specific application assistance. Any project proposal that does not satisfy all

grant criteria or does not follow the Division's application requirements may not be reviewed or considered for funding.

Applications should be submitted to:

Georgia Department of Natural Resources

Environmental Protection Division

Watershed Protection Branch

ATTN: Grants Unit

2 Martin Luther King Jr. Dr.

Suite 1462 East

Atlanta, GA 30334

Additional grant information, application materials, assistance preparing an application and staff contact information may be found at the Division's website, www.epd.georgia.gov.

Deadline for submitting proposals: Applications for grant award will be solicited via advertisement on the web address above no later than July of each year; applications will be due no later than October; and selections will be made no later than February. Specific application timeframes will be available via the website above.

Cite as Ga. Comp. R. & Regs. R. 391-3-21-.09

Authority: O.C.G.A. §§ [28-5-120](#) *et seq.*, [2-5-520](#) *et seq.*

History: Original grant description entitled "Innovative Technology Grant Program" submitted Oct. 30, 2000.

Terminated: July 13, 2004.

Submitted: New grant description entitled "Regional Water Plan Seed Grant Program" received September 13, 2016.

Submitted: Apr. 18, 2019.

Rule 391-3-21-.10. Georgia Diesel Engine Retrofit Grants.

- (1) Congestion Mitigation and Air Quality Program (CMAQ) School Bus Retrofit Grant Program Scope and Purpose. Grants are available under the Federal Congestion Mitigation and Air Quality (CMAQ) grant program for retrofitting school buses that are located or operated in the 20-county metro-Atlanta ozone nonattainment area.
 - (a) General Terms and Conditions of the Grant.

1. Projects submitted for funding under this Grant must identify the vehicles for retrofit and the type of emission control equipment to be used.
 2. Submitted projects must conform to all applicable programmatic conditions including, without limitation, coordination with EPD personnel; use of retrofit technologies that has been verified under EPA's Retrofit Program or certified by the California Air Resources Board (CARB); submission of quarterly reports; submission of a final report; compliance with applicable Federal procurement and subgrant procedures; certification that the emission control equipment was properly installed and is in working condition; proper maintenance of vehicles and retrofit equipment and enforcement of warranty claims against vendors if a maintenance problem arises; and use of the emission control equipment on the vehicles for a minimum of four years unless the equipment is damaged beyond repair or the vehicle becomes inoperable and is unable to be repaired.
 3. Projects that are awarded these funds require a 20% local or state match. There are limited State matching funds available for projects that qualify which will be awarded for acceptable applicants based on date of application receipt. Once these State funds have been expended, project applicants will be required to provide a 20% match. If a match is required from project applicants, it can be made with in-kind support as well as funds from project applicants.
- (b) Eligible Recipients of the Grant. An eligible applicant is any public school system fleet located or operated in the designated 20-county metro-Atlanta ozone nonattainment area. To receive funding, participating public school systems must own and operate their fleet.
- (c) Criteria for the Award. This project is limited to applications that retrofit school buses located or operated in the 20-county metro-Atlanta ozone nonattainment area. School systems must use currently-verified or certified EPA or CARB equipment.
- (d) Deadline For Submittal. EPD will send out the first solicitation for applications on March 2, 2009. Applications will be due by close of business on April 16, 2009. Funding will be distributed between applicants that reply within the first solicitation period and are able to provide any required matching funds. If funds remain after grants are awarded to all qualified projects from the first solicitation, a second solicitation will be issued and will remain open until all of the funds have been obligated. Retrofit projects will be awarded based on the order in which memoranda of agreements are signed and matching funds are available. The applications will be evaluated based on the criteria stated above.

(2) Diesel Engine Retrofit Act (DERA) State Diesel Grant Program General Scope and Purpose. Grants are available under the DERA State Diesel Grant Program for retrofitting school buses located or operated in counties that have not been officially designated as nonattainment for the PM2.5 standard.

(a) General Terms and Conditions of the Grant.

1. Projects submitted for funding under this grant must identify the vehicles for retrofit and the type of emission control equipment to be used.
2. Submitted projects must conform to all applicable programmatic conditions including, without limitation, the coordination with EPD personnel; use of retrofit technologies that have been verified under EPA's Retrofit Program or certified by the California Air Resources Board (CARB); submission of quarterly reports; submission of a final report; compliance with applicable Federal procurement and sub-grant procedures; certification that the emission control equipment was properly installed and is in working condition; proper maintenance of vehicles and retrofit equipment and enforcement of warranty claims against vendors if a maintenance problem arises; and use of the emission control equipment on the vehicles for a minimum of four years unless the equipment is damaged beyond repair or the vehicle becomes inoperable and is unable to be repaired.

(b) Eligible Recipients of the Grant. An eligible applicant is any public school system fleet that is located or operating within a county that is not designated as nonattainment for the PM2.5 standard.

(c) Criteria for the Award. This project is limited to applications that retrofit school buses located or operated in counties that are not designated as nonattainment for the PM2.5 standard. Priority will be given to applicants that are located in counties that have not been designated as nonattainment for the PM2.5 standard but whose air quality monitors are showing exceedances of the national ambient air quality standards for particulate matter (PM2.5) or school systems located in counties that have not been designated as nonattainment for the PM2.5 standard but are located adjacent to counties exceeding the PM2.5 standard or adjacent to counties designated as nonattainment for PM2.5 will receive priority for this grant. School systems must use verified or certified EPA or CARB equipment. Applicants will also be given priority if they are able to provide matching funds.

(d) Deadline for Submittal. EPD will send out the first solicitation for request for applications on March 2, 2009. Applications will be due by close of business on April 16, 2009. The projects will be evaluated based on the criteria stated above. A second solicitation will be opened if all of the funds are not obligated in the first solicitation. The second solicitation will remain open until all funding has been obligated and spent.

- (3) Directions For Submitting Applications for the Georgia Diesel Engine Retrofit (DER) Grants (CMAQ and DERA). Requests for copies of the general guidelines and proposal forms and submittal of applications for any of the Georgia DER Grants should be made to:

Georgia Environmental Protection Division

Mobile and Area Sources Program

Attn: Stacy Allman

4244 International Parkway, Suite 136

Atlanta, Georgia 30354

e-mail: stacy.allman@dnr.state.ga.us

Note: E-mail copies of project proposals will not be accepted as official submittals.

- (4) Award of Georgia Diesel Engine Retrofit grants are subject to Federal funding provided to EPD.

Cite as Ga. Comp. R. & Regs. R. 391-3-21-.10

Authority: O.C.G.A. Secs. [12-9-6](#), [28-5-122](#).

History. Original grant description entitled "Georgia Adopt-A-School Bus Pilot Project FFY2004 Clean School Bus USA Grant" submitted November 5, 2004.

Submitted: Grant description entitled "Georgia Diesel Engine Retrofit Grants" received Mar. 23, 2009.

Rule 391-3-21-.11. American Recovery and Reinvestment Act (ARRA) Georgia Truck Stop Electrification and Green Corridors.

- (1) The American Recovery and Reinvestment Act (ARRA) Georgia Truck Stop Electrification (TSE) and Green Corridors Grant Program Scope and Purpose. Grants are available through ARRA to create green corridors in Georgia by installing TSE along the major interstates.
- (a) General Terms and Conditions of the Grant.
1. The grant funding must be exclusively used to install TSE as an alternative to operating an internal combustion engine for cab comfort for trucks or other vehicles and/or reefer units on trailers. Projects submitted for funding under this grant must identify the locations and parking spaces that will be electrified and the type of technology and equipment to be used. Eligible TSE costs include the purchase and installation of necessary equipment to

electrify truck parking spaces, associated hardware and software, and necessary infrastructure. Existing or acquired land for the parking spaces, TSE equipment and hardware, or infrastructure are not eligible expenses and cannot be used as an in-kind match.

2. The TSE equipment must be located in Georgia with preference given to locations outside of areas designated as nonattainment for fine particulate matter (PM_{2.5}).
 3. Projects that are awarded these funds will require a minimum 20% match. The project applicant will be responsible for the match. Grant funds will be distributed to grantee incrementally following completion of construction task(s) provided the match has been satisfied for the incremental distribution.
 4. Grant recipients must conform to all applicable administrative and programmatic conditions.
 5. Selected projects must be completed by September 30, 2010.
- (b) Eligible Recipients of the Grant. An eligible grant recipient is any TSE vendor seeking grant funding to provide electrification technology for heavy-duty trucks that idle for extended periods of time at truck stops in Georgia.
- (c) Criteria for the Award. This project is limited to applications that will be used to assist in the development of "green corridors" in the southeast. EPD intends to fund the purchase and installation of TSE equipment at a minimum of three truck stop locations along Georgia interstate(s). The amount of funding per application will depend on the amount of funds requested by applicants and availability of grant funds. The highest scoring project will be fully funded, subject to a maximum of 40% of the total available funding. The second and third highest scoring projects will be funded at equal percentage based on funding requested, and subject to a maximum of 40% each of the total available funding. If the first three projects are fully funded, then the remaining funds will be awarded sequentially to the next highest score. A scoring system will be used to rank and select the submitted applications. The application(s) receiving the highest total score(s) will be selected. The maximum score for a project will be 100. The following criteria will be used to score the submitted applications:
1. Maximized distance between existing TSE locations from the proposed location in application - 35 Maximum Criteria Points;
 2. Proposed locations are along interstate corridors with a minimized distance between the proposed TSE location and the interstate entrance/exit ramp - 20 Maximum Criteria Points;

3. Experience of vendor installing TSE - 10 Maximum Criteria Points;
4. Exceeds minimum matching fund requirement of 20% - 10 Maximum Criteria Points; and
5. Minimize grant costs per parking space for selected TSE design - 25 Maximum Criteria Points.

(d) **Deadline For Submittal.** EPD will send out the first solicitation for applications on or before October 1, 2009. Applications will be due by close of business on November 2, 2009. If any funds are remaining after projects are selected from the solicitation issued on or before October 1, 2009, additional solicitations will be issued with specific deadlines until all funds have been exhausted. All applications submitted in response to any additional solicitations will be evaluated based on the criteria in part (c). Selected applicants must sign the memorandum of agreement with EPD within 30 days of receipt of the MOA from EPD.

- (2) **Directions For Submitting Applications for the ARRA Georgia TSE and Green Corridors Grant.** Requests for copies of the general guidelines and proposal forms and submittal of applications for the ARRA Georgia TSE and Green Corridors Grant should be made to:

Georgia Environmental Protection Division

Mobile and Area Sources Program

Attn: Richard McDonald

4244 International Parkway, Suite 136

Atlanta, Georgia 30354

e-mail: Richard_McDonald@dnr.state.ga.us

- (3) Award of ARRA Georgia TSE and Green Corridors grants are subject to Federal funding provided to EPD.

Cite as Ga. Comp. R. & Regs. R. 391-3-21-.11

Authority: O.C.G.A. Sec. [12-9-6](#).

History. Original grant description entitled "American Recovery and Reinvestment Act (ARRA) Georgia Truck Stop Electrification and Green Corridors Grant Program" submitted October 20, 2009.

Rule 391-3-21-.12. American Recovery and Reinvestment Act (ARRA) State Clean Diesel Grant Program.

(1) American Recovery and Reinvestment Act (ARRA) State Clean Diesel Grant Program General Scope and Purpose. Grants are available under the ARRA State Clean Diesel Grant Program for installing emission control devices on, repowering, and replacing school buses and transit buses located in Georgia and for rebuilding school and transit bus engines for school and transit buses operated in Georgia.

(a) General Terms and Conditions of the Grant.

1. Projects submitted for funding under this grant must identify the vehicles or engines that are planned for retrofit, which includes the installation of emission control devices, repowering, rebuilding, and/or early replacement. Projects proposing to retrofit buses must identify the type of emission control equipment to be used; the make, model, model year, fuel type, and emission certification for the engine to be used; the make, model, model year, fuel type, and emission certification for the replacement bus; and/or the components to be used and the cleaner standard that will be met for rebuilt engines.
2. Submitted projects must conform to all applicable administrative and programmatic conditions including, without limitation, the coordination with EPD personnel; use of emission control technologies, rebuilds, or engines that have been or will be verified or certified under EPA's Retrofit or Certification Program or by the California Air Resources Board (CARB); new buses purchased for replacement of older buses are certified by CARB; submission of quarterly reports; submission of a final report; compliance with applicable Federal procurement and sub-grant procedures; certification that the emission control equipment, engine rebuild, and/or engine repower was properly installed and is in working condition; certification that the bus replacement meets applicable new engine standards and meets all other applicable specifications; proper maintenance of vehicles and, where applicable, retrofit equipment and enforcement of warranty claims against vendors if a maintenance problem arises; and use of the emission control equipment, repowered bus, rebuilt engine, or replacement bus for a minimum of four years unless the equipment or engine is damaged beyond repair or the bus becomes inoperable and is unable to be repaired.
3. Selected projects must be completed by September 30, 2010.

(b) Eligible Recipients of the Grant. An eligible applicant is any public school system or public transit fleet that is located and operating in Georgia and own or have control over the buses included in a submitted project.

(c) Criteria for the Award. This project is limited to applications that install emission control devices on, repower, or replace school or transit buses located or operated in Georgia or rebuild engines for school or transit buses that will be located or operated in Georgia. School and transit systems must use equipment and/or

engines that have been or will be verified or certified by EPA or CARB. New diesel buses or new diesel engines procured under this grant must meet the applicable CARB heavy-duty engine standards. Projects for repowering buses require a minimum 25% local or state match. Projects for replacing buses require a minimum 75% local or state match. In the event that the costs of the projects submitted exceed the available funding, EPD will determine the projects to be selected as follows:

1. First priority will be given for public school systems whose fleets are based in counties that have not been officially designated as nonattainment for the PM2.5 standard and that install emission control devices on school buses.
 2. Second priority will be given for public school systems whose fleets are based in counties that have been officially designated as nonattainment for the PM2.5 standard and that install emission control devices on school buses.
 3. Repowering and/or replacement of school buses and/or rebuilding school bus engines are third priority and will be ranked on the cost effectiveness of the project (\$/ton of emission reduction over lifetime of the project).
 4. Transit buses are fourth priority and will be ranked on the cost effectiveness of the project (\$/ton of emission reduction over lifetime of the project).
 5. Buses installed with emission control devices will be prioritized according to the following:
 - (i) engine model year 2000 through 2006 buses are equipped with devices that reduce PM by a minimum of 50%; and
 - (ii) the cost effectiveness of the project (\$/ton of emission reduction over lifetime of the project).
- (d) Deadline for Submittal. EPD will send out the first solicitation for request for applications on or before September 1, 2009. Applications will be due by close of business on September 25, 2009. The projects will be evaluated based on the criteria stated above. A second solicitation will be opened if all of the funds are not obligated in the first solicitation. The second solicitation will remain open until all funding has been obligated and spent.
- (2) Directions For Submitting Applications for the American Recovery and Reinvestment Act State Clean Diesel Grant. Requests for copies of the general guidelines and proposal forms and submittal of applications for the ARRA State Clean Diesel Grant should be made to:

Georgia Environmental Protection Division

Mobile and Area Sources Program

Attn: Stacy Allman

Atlanta, Georgia 30354

e-mail: stacy.allman@dnr.state.ga.us

- (3) Award of the American Recovery and Reinvestment Act State Clean Diesel Grant is subject to Federal funding provided to EPD. EPD may fund individual projects less than the requested amounts if necessary to distribute funds among equally ranked projects.

Cite as Ga. Comp. R. & Regs. R. 391-3-21-.12

Authority: O.C.G.A. Sec. [12-9-6](#).

History. Original grant description entitled "American Recovery and Reinvestment Act (ARRA) State Clean Diesel Grant Program" submitted October 20, 2009.

Rule 391-3-21-.13. Georgia Diesel Engine Retrofit Project Grant.

- (1) Congestion Mitigation and Air Quality Program (CMAQ) Fiscal Year (FY) 2009 Georgia Diesel Retrofit Project Scope and Purpose. Grants are available under the Federal Congestion Mitigation and Air Quality (CMAQ) grant program for retrofitting diesel vehicles that are located or operated in a PM_{2.5} nonattainment area.
 - (a) General Terms and Conditions of the Grant.
 1. Projects submitted for funding under this Grant must identify the vehicles for retrofit and the type of emission control equipment to be used.
 2. Submitted projects must conform to all applicable programmatic and administrative conditions including, without limitation, coordination with EPD personnel; use of retrofit technologies that have been or will be verified or certified under the U.S. Environmental Protection Agency's (EPA's) Retrofit Program or the California Air Resources Board (CARB); submission of quarterly reports when applicable; submission of a final report when applicable; compliance with applicable Federal procurement and subgrant procedures; certification that the emission control equipment was properly installed and is in working condition; use of data-logging in accordance with manufacturer specifications of diesel vehicles that will be equipped with emission control equipment on existing routes to ensure

proper exhaust temperature profiles; proper maintenance of vehicles and retrofit equipment and enforcement of warranty claims against vendors if a maintenance problem arises; and use of the emission control equipment on the vehicles for a minimum of four years unless the equipment is damaged beyond repair or the vehicle becomes inoperable and is unable to be repaired.

- (b) **Eligible Recipients of the Grant.** An eligible applicant is any public school system fleet located or operated in a designated PM_{2.5} nonattainment area. To receive funding, participating public school systems must own and operate their fleet.
- (c) **Criteria for the Award.** The request for applications will be limited to applications that retrofit school buses located or operated in a PM_{2.5} nonattainment area. Applications from school systems for this grant must include emission control equipment that is or will be verified or certified by EPA or CARB. Funding for the selected school systems will be limited to \$1.2 million. Projects will be ranked by cost effectiveness on a cost-per-ton-of-emissions-reduced basis.
- (d) **Deadline For Submittal.** EPD will send out the first solicitation for applications on or before November 30, 2010. Applications will be due within six weeks after release of the solicitation. Funding will be distributed based on the criteria for award between applicants that reply within the first solicitation period. If funds remain after grants are awarded to all qualified projects from the first solicitation, additional solicitation(s) will be issued until all of the funds have been obligated. For each solicitation, retrofit projects will be awarded based on the order in which projects rank within the criteria selection process. The applications will be evaluated based on the criteria stated in Subsection (c).
- (e) **Directions For Submitting Applications for the Georgia Diesel Retrofit Project Grant.** Requests for copies of the general guidelines, proposal forms and submittal of applications for the Fiscal Year 2009 CMAQ Georgia Diesel Retrofit Project Grant should be made to:

Georgia Environmental Protection Division

Mobile and Area Sources Program

Attn: Stacy Allman

4244 International Parkway, Suite 136

Atlanta, Georgia 30354

e-mail: stacy.allman@dnr.state.ga.us

- (f) Award of the FY 2009 CMAQ Georgia Diesel Retrofit Project Grant is subject to Federal funding provided to EPD. EPD may fund individual projects less than the requested amounts if necessary to distribute funds among equally-ranked projects or to reduce the project cost to the maximum allowable distribution.
- (2) Congestion Mitigation and Air Quality Program (CMAQ) Georgia Diesel Engine Retrofit Project Scope and Purpose. Grants are available under the Federal Congestion Mitigation and Air Quality (CMAQ) grant program for purchasing and installing diesel emission control devices, purchasing of school buses that will replace an existing diesel school bus early, repowering of diesel school buses, and/or rebuilding of school bus diesel engines that are located or operated in a PM_{2.5} nonattainment and/or maintenance area.
- (a) General Terms and Conditions of the Grant.
 - 1. Projects submitted for funding under this Grant must:
 - (i) Identify the school buses for early replacement to be replaced with buses that have 2010 or newer model year engines certified by the U.S. Environmental Protection Agency (EPA) or the California Air Resources Board (CARB);
 - (ii) Identify the school buses for repowering and the replacement engine manufacturer, model, model year, and fuel type, and use a replacement engine which is certified by EPA or CARB to a cleaner emission standard than the original engine;
 - (iii) Rebuild the existing engine to an EPA or CARB certified cleaner emission standard and identify the school buses for which the engines will be rebuilt; and/or
 - (iv) Identify the school buses for installing emission control devices and type of emission control equipment to be used.
 - 2. Submitted projects must conform to all applicable programmatic and administrative conditions including, without limitation:
 - (i) Coordination with EPD personnel;
 - (ii) Use of verified emission control technologies under the U.S. Environmental Protection Agency's (EPA's) Retrofit Program or the California Air Resources Board (CARB) for projects including emission control equipment;
 - (iii) Follow guidelines established by EPA regarding qualifications for vehicle early replacement, vehicle repower, and engine rebuilds and disposal of replaced vehicle or engine;

- (iv) Submission of quarterly and final reports when requested;
 - (v) Compliance with applicable Federal procurement and subgrant procedures;
 - (vi) Certification that the emission control equipment was properly installed and is in working condition when applicable;
 - (vii) Use of data-logging in accordance with manufacturer specifications of diesel school buses that will be equipped with emission control equipment on existing routes to ensure proper exhaust temperature profiles;
 - (viii) Proper maintenance of school buses and retrofit equipment and enforcement of warranty claims against vendors if a maintenance problem arises, as applicable;
 - (ix) Use of the emission control equipment and/or rebuilt engine on the school buses and/or use of repowered and replacement school buses for a minimum of four years unless the equipment is damaged beyond repair and/or the vehicle becomes inoperable and is unable to be repaired; and
 - (x) Submit documentation on the decommissioning of the replaced school bus engine in projects that include early bus replacement or bus repowering.
- (b) Eligible Recipients of the Grant. An eligible applicant is any public school system located or operated in a designated PM_{2.5} nonattainment or maintenance area. To receive funding, participating public school systems must own and operate their fleet.
- (c) Match Requirements. Project applicants shall be required to match a minimum of 20% of the project cost for purchasing and installing emissions control devices on their diesel school buses, to match a minimum of 50% of the project cost to purchase early replacement school buses, and/or match a minimum of 25% of the project cost to repower and/or rebuild school bus engines.
- (d) Criteria for the Award. Grant awards will be limited to projects that include the purchase and installation of diesel emission control devices, the purchase of school buses that will replace an existing diesel school bus early, repowering of diesel school buses, and/or rebuilding of school bus diesel engines that are located or operated in a PM_{2.5} nonattainment and/or maintenance area. For projects including the early replacement of existing school buses, buses that are scheduled

in the project applicant's budget to be replaced in the current or following budget year, in relation to the solicitation period, do not qualify for early replacement. In the event that the total requested funding in the eligible projects exceed the available funding, EPD will determine the projects to be selected for awards in accordance with the following priorities:

1. First priority will be given for projects purchasing and installing emission control devices on diesel school buses.
 2. Second priority will be given for projects replacing existing diesel school buses early, repowering diesel school buses with a lower polluting engine, and/or rebuilding school bus diesel engines to a cleaner emission standard.
 3. Within each priority, applications will be ranked according to the cost effectiveness of the project (cost per ton of emission reduced over the lifetime of the project).
- (e) **Deadline For Submittal.** EPD will send out the first solicitation for applications on or before April 1, 2012. Applications will be due within six weeks after release of the solicitation. Funding will be distributed based on the criteria for award between applicants that reply within the first solicitation period. If funds remain or additional funds are received after grants are awarded to all qualified projects from the first solicitation, additional solicitation(s) will be issued until all of the funds have been obligated. In the first solicitation, projects will be awarded based on the order in which projects rank within the criteria selection process. The applications will be evaluated based on the criteria stated in Subsection (d). If additional solicitations are needed, applications will be awarded based on the order in which projects rank within the criteria selection process. The applications will be evaluated based on the criteria stated in Subsection (d).
- (f) **Directions For Submitting Applications for the Georgia Diesel Engine Retrofit Project Grant.** Requests for copies of the general guidelines, proposal forms and submittal of applications for the CMAQ Georgia Diesel Engine Retrofit Project Grant should be made to:

Georgia Environmental Protection Division

Mobile and Area Sources Program

4244 International Parkway, Suite 134

Atlanta, Georgia 30354

e-mail: stacy.allman@dnr.state.ga.us

- (g) Award of the CMAQ Georgia Diesel Engine Retrofit Project Grant is subject to Federal funding provided to EPD. EPD may fund individual projects less than the requested amounts if necessary to distribute funds among equally-ranked projects or to reduce the project cost to the maximum allowable distribution.

Cite as Ga. Comp. R. & Regs. R. 391-3-21-.13

Authority: O.C.G.A. Sec. [12-9-6](#).

History. Original grant description entitled "Georgia Diesel Engine Retrofit Project Grant" submitted November 19, 2010.

Submitted: Jul. 18, 2012.

Rule 391-3-21-.14. Railroad-Related Emission Reductions Program.

- (1) Congestion Mitigation and Air Quality Program (CMAQ) Railroad-Related Emissions Reductions in Atlanta Program Scope and Purpose. Funds are available under the Federal Congestion Mitigation and Air Quality (CMAQ) Program for converting diesel locomotives that are located or operated in the urban core of the Atlanta PM_{2.5} nonattainment area.
 - (a) General Terms and Conditions.
 1. The grant funding must be used exclusively to convert switcher locomotives operated in the Atlanta "urban core" counties, as defined in subparagraph (c) of this paragraph, that result in reductions of diesel PM_{2.5} and related pollutants. Projects submitted for funding must identify the locomotives for conversion and the type of conversion equipment to be used.
 2. Submitted projects must conform to all applicable programmatic and administrative conditions including, without limitation, coordination with EPD personnel; submission of an initial report before the switcher is converted, a report immediately after the conversion, and then a report each six months for the first two years of operation and then once per year for the remaining period of commitment, including detailed activity and emissions data; compliance with applicable Federal procurement and subgrant procedures; certification that the equipment was properly installed and is in working condition; use of data-logging in accordance with manufacturer specifications; proper maintenance of locomotives and conversion equipment and enforcement of warranty claims against vendors if a maintenance problem arises; and use of the converted locomotives in the designated areas for a minimum of 10 years unless the locomotive becomes inoperable and is unable to be repaired or replaced with comparable equipment.

3. Projects that are awarded these funds will require a minimum 30% match. The project applicant will be responsible for the match. Grant funds will be distributed to the grantee incrementally following completion of conversion task(s) provided the match has been satisfied for the incremental distribution.

(b) Eligible Recipients of the Grant.

Owners of traditional diesel switcher locomotives operating in Clayton, Cobb, DeKalb, Fulton, or Gwinnett County are eligible for this funding assistance. Locomotives eligible for conversion include unregulated (pre-1973) or Tier 0 (1973-2001) diesel switchers that are currently in service and would have remained in service in the proposed/designated railyard for at least five years from the application date. This project must result in emission reductions that would otherwise not occur in the nonattainment area for the remaining useful life of the converted equipment (e.g., the project cannot be applied to increase a fleet size.)

(c) Criteria for the Award.

The request for proposals will be limited to convert switchers operating in Atlanta "urban core" counties, which are defined as Clayton, Cobb, DeKalb, Fulton, and Gwinnett. Highest priority will be given for those operating near the Fire Station No. 8 air quality monitor in Fulton County. Proposals must commit the converted switchers to 80% of their operating time for at least 10 years from the installation of the equipment (or to a similar schedule approved by EPD) within a designated distance of the proposed railyard (also to be approved by EPD). Funding for the selected railroads is not to exceed 70% of the conversion cost.

EPD may fund individual projects less than the requested amounts if the total amount of the proposals exceeds available funds as follows: if one proposal is received, that proposal will be funded at 100% of the available funds. If two proposals are received, the 2nd highest scoring proposal will be funded at the lower of a) the amount of the proposal or b) a percentage of the available funds determined as follows: percent of available funds awarded = $20\% + (\text{total score}/4)\%$ with the remainder awarded to the highest scoring proposal. If three or more proposals are received, the 3rd highest scoring proposal will be funded at the lower of a) the amount of the proposal or b) 10% of available funds, the 2nd highest scoring proposal will be funded at a lower of a) the amount of the proposal or b) a percentage of the available funds determined as follows: percent of available funds awarded = $15\% + (\text{total score}/4)\%$, and the remainder awarded to the highest scoring proposal.

During any solicitation, if the amount of funding provided to individual projects is less than that project's respective proposal, EPD may specify which switcher

engines are to be converted based on criteria 2 listed below, for each switcher converted. If two or more proposals are received during any solicitation, EPD may adjust the amount of funding awarded to the 2nd and, if applicable, 3rd highest scoring proposal so that the amount of funding awarded plus the amount of match money provided by the grant recipient is sufficient for the complete conversion of the number of locomotives included in the award.

Projects will be ranked on a 100-point system with the following criteria:

1. The proposed railyard location. Highest points will be given to switchers operating near the Fire Station 8 Monitor, with points decreasing with distance. - *50 points*;
2. Cost effectiveness of the project based on the emission levels of the equipment to be used in the conversion, the operating cycle of the switcher to be converted, the emission levels of the engines to be replaced (Tier level or direct measurements), the estimated length of remaining service of the switcher to be replaced, the number of years (minimum 10) that the converted switcher will remain in the Atlanta urban core area, and the amount of time and average duty cycle of operation of the converted switcher. When calculating cost effectiveness, only funds to be awarded under this grant will be included. - *50 points*

A commitment to a schedule and maximum time period needed for converting the switchers must be specified, not to exceed 24 months from execution of a contract for the award. Penalties and/or contingencies for not meeting the terms of the contract will be specified in the award contract in accordance with applicable requirements.

- (d) **Deadline For Submittal.** EPD will send out the first solicitation for proposals on or before January 1, 2011. Applications will be due within eight weeks after release of the solicitation. Funding will be distributed based on the criteria for award described above. If funds remain after grants are awarded to all qualified projects from the first solicitation, additional solicitations will be issued with specific deadlines until all funds have been obligated. All applications submitted in response to any additional solicitations would be evaluated based on the criteria in subparagraphs (c)1 and 2.
- (e) **Directions For Submitting Proposals.** Requests for copies of the general guidelines and proposal forms and submittal of applications for the CMAQ Railroad-Related Emission Reductions in Atlanta should be made to:

Georgia Environmental Protection Division

Planning and Support Program, PRDU

Attn: Dr. Michelle Bergin

4244 International Parkway, Suite 120

Atlanta, Georgia 30354

e-mail: michelle.bergin@dnr.state.ga.us

- (f) Award of the CMAQ Railroad-Related Emission Reductions in Atlanta grants are subject to Federal funding provided to EPD.
- (2) Congestion Mitigation and Air Quality Program (CMAQ) Railroad-Related Emissions Reductions in Macon Program Scope and Purpose. Funds are available under the Federal Congestion Mitigation and Air Quality (CMAQ) Program for converting diesel locomotives that are located or operated in the Macon Nonattainment area.
- (a) General Terms and Conditions.
 - 1. The grant funding must be used exclusively to convert switcher locomotives operated in Bibb County that result in reductions of diesel PM_{2.5} and related pollutants. Projects submitted for funding must identify the locomotives for conversion and the type of conversion equipment to be used.
 - 2. Submitted projects must conform to all applicable programmatic and administrative conditions including, without limitation, coordination with EPD personnel; submission of an initial report before the switcher is converted, a report immediately after the conversion, and then a report each six months for the first two years of operation and then once per year for the remaining period of commitment, including detailed activity and emissions data; compliance with applicable Federal procurement and subgrant procedures; certification that the equipment was properly installed and is in working condition; use of data-logging in accordance with manufacturer specifications; proper maintenance of locomotives and conversion equipment and enforcement of warranty claims against vendors if a maintenance problem arises; and use of the converted locomotives in the designated areas for a minimum of 10 years unless the locomotive becomes inoperable and is unable to be repaired or replaced with comparable equipment.
 - 3. Projects that are awarded these funds will require a minimum 30% match. The project applicant will be responsible for the match. Grant funds will be distributed to grantee incrementally following completion of conversion

task(s) provided the match has been satisfied for the incremental distribution.

(b) Eligible Recipients of the Grant.

Owners of traditional diesel switcher locomotives operating in Bibb County are eligible for this funding assistance. Locomotives eligible for conversion include unregulated (pre-1973) or Tier 0 (1973-2001) diesel switchers that are currently in service and would have remained in service in the proposed/designated railyard for at least five years from the application date. This project must result in emission reductions that would otherwise not occur in the nonattainment area for the remaining useful life of the converted equipment (e.g., the project cannot be applied to increase a fleet size.)

(c) Criteria for the Award.

The request for proposals will be limited to convert switchers operating in Bibb County. Proposals must commit the converted switchers to 80% of their operating time for at least 10 years from the installation of the equipment (or to a similar schedule approved by EPD) within a designated distance of the proposed railyard (also to be approved by EPD). Funding for the selected railroads is not to exceed 70% of the conversion cost. Priority will be given to the projects with the highest cost effectiveness as follows:

Cost effectiveness of the project is to be based on the emission levels of the equipment to be used in the conversion, the operating cycle of the switcher to be converted, the emission levels of the engines to be replaced (tier level or direct measurements), the estimated length of remaining service of the switcher to be replaced, the number of years (minimum 10) that the converted switcher will remain in Bibb County, and the amount of time and average duty cycle of operation of the converted switcher. When calculating cost effectiveness, only funds to be awarded under this grant will be included.

Each project will be fully funded based on the cost effectiveness of the proposal and available funds. EPD may fund individual projects less than the requested amounts if the total amount of the proposals exceeds available funds. If the amount of funding provided to individual projects during additional solicitations is less than that project's respective proposal, EPD may specify which switcher engines are to be converted based on criteria listed in subparagraph (c), for each switcher converted.

A commitment to a schedule and maximum time period needed for converting the switchers must be specified, not to exceed 24 months from execution of a contract for the award. Penalties and/or contingencies for not meeting the terms of the

contract will be specified in the award contract in accordance with applicable requirements.

- (d) **Deadline For Submittal.** EPD will send out the first solicitation for proposals on or before January 1, 2011. Applications will be due within eight weeks after release of the solicitation. Funding will be distributed based on the criteria for award described above. If funds remain after grants are awarded to all qualified projects from the first solicitation, additional solicitations will be issued with specific deadlines until all funds have been obligated. All applications submitted in response to any additional solicitations would be evaluated based on the criteria in subparagraph (c).
- (e) **Directions For Submitting Proposals.** Requests for copies of the general guidelines and proposal forms and submittal of applications for the CMAQ Railroad-Related Emission Reductions in Macon should be made to:

Georgia Environmental Protection Division

Planning and Support Program, PRDU

Attn: Dr. Michelle Bergin

4244 International Parkway, Suite 120

Atlanta, Georgia 30354

e-mail: michelle.bergin@dnr.state.ga.us

- (f) Award of the CMAQ Railroad-Related Emission Reductions in Macon grants are subject to Federal funding provided to EPD.
- (3) **High Priority Projects (HPP) Railroad-Related Emissions Reductions in the Middle Georgia Region Program Scope and Purpose.** Funds are available under the High Priority Projects (HPP) Program for converting diesel locomotives that are located or operated in the Middle Georgia Region.
- (a) **General Terms and Conditions.**
 1. The grant funding must be used exclusively to convert switcher locomotives operated in the Middle Georgia Region, as defined in subparagraph (c) of this paragraph, that result in reduction of diesel PM_{2.5} and related pollutants. Projects submitted for funding must identify the locomotives for conversion and the type of conversion equipment to be used.
 2. Submitted projects must conform to all applicable programmatic and administrative conditions including, without limitation, coordination with

EPD personnel; submission of an initial report before the switcher is converted, a report immediately after the conversion, and then a report each six months for the first two years of operation and then once per year for the remaining period of commitment, including detailed activity and emissions data; compliance with applicable Federal procurement and subgrant procedures; certification that the equipment was properly installed and is in working condition; use of data-logging in accordance with manufacturer specifications; proper maintenance of locomotives and conversion equipment and enforcement of warranty claims against vendors if a maintenance problem arises; and use of the converted locomotives in the designated areas for a minimum of 10 years unless the locomotive becomes inoperable and is unable to be repaired or replaced with comparable equipment.

3. Projects that are awarded these funds will require a minimum 20% match. The project applicant will be responsible for the match. Grant funds will be distributed to grantee incrementally following completion of conversion task(s) provided the match has been satisfied for the incremental distribution.

(b) Eligible Recipients of the Grant.

Owners of traditional diesel switcher locomotives operating in Bibb, Crawford, Houston, Monroe, Jones, Peach, or Twiggs County are eligible for this funding assistance. Locomotives eligible for conversion include unregulated (pre-1973) or Tier 0 (1973-2001) diesel switchers that are currently in service and would have remained in service in the proposed/designated railyard for at least five years from the application date. This project must result in emission reductions that would otherwise not occur in the nonattainment area for the remaining useful life of the converted equipment (e.g., the project cannot be applied to increase a fleet size.)

(c) Criteria for the Award.

The request for proposals will be limited to convert switchers operating in the Middle Georgia Region, which is defined as Bibb, Crawford, Houston, Monroe, Jones, Peach, and Twiggs County. Proposals must commit the converted switchers to 80% of their operating time for at least 10 years from the installation of the equipment (or to a similar schedule approved by EPD) within a designated distance of the proposed railyard (also to be approved by EPD). Funding for the selected railroads is not to exceed 80% of the conversion cost. Priority will be given to the projects with the highest cost effectiveness as follows:

Cost effectiveness of the project is to be based on the emission levels of the equipment to be used in the conversion, the operating cycle of the switcher to be

converted, the emission levels of the engines to be replaced (Tier level or direct measurements), the estimated length of remaining service of the switcher to be replaced, the number of years (minimum 10) that the converted switcher will remain in the Middle Georgia Region, and the amount of time and average duty cycle of operation of the converted switcher. When calculating cost effectiveness, only funds to be awarded under this grant will be included.

Each project will be fully funded based on the cost effectiveness of the proposal and available funds. EPD may fund individual projects less than the requested amounts if the total amount of the proposals exceeds available funds. If the amount of funding provided to individual projects during additional solicitations is less than that project's respective proposal, EPD may specify which switcher engines are to be converted based on criteria listed in subparagraph (c), for each switcher converted.

A commitment to a schedule and maximum time period needed for converting the switchers must be specified, not to exceed 24 months from execution of a contract for the award. Penalties and/or contingencies for not meeting the terms of the contract will be specified in the award contract in accordance with applicable requirements.

- (d) **Deadline For Submittal.** EPD will send out the first solicitation for proposals on or before January 1, 2011. Applications will be due within eight weeks after release of the solicitation. Funding will be distributed based on the criteria for award described above. If funds remain after grants are awarded to all qualified projects from the first solicitation, additional solicitations will be issued with specific deadlines until all funds have been obligated. All applications submitted in response to any additional solicitations would be evaluated based on the criteria in subparagraph (c).
- (e) **Directions For Submitting Proposals.** Requests for copies of the general guidelines and proposal forms and submittal of applications for the HPP Railroad-Related Emission Reductions in the Middle Georgia Region should be made to:

Georgia Environmental Protection Division

Planning and Support Program, PRDU

Attn: Dr. Michelle Bergin

4244 International Parkway, Suite 120

Atlanta, Georgia 30354

e-mail: michelle.bergin@dnr.state.ga.us

- (f) Award of the HPP Railroad-Related Emission Reductions in the Middle Georgia Region grants are subject to Federal funding provided to EPD.
- (4) Congestion Mitigation and Air Quality Program (CMAQ) Railroad-Related Emissions Reductions in Floyd County Program Scope and Purpose. Funds are available under the Federal Congestion Mitigation and Air Quality (CMAQ) Program for converting or replacing diesel locomotives that are located or operated in the Floyd County nonattainment area.
- (a) General Terms and Conditions.
1. The grant funding must be used exclusively to convert switcher locomotives operated in Floyd County that result in reductions of diesel PM_{2.5} and related pollutants. Projects submitted for funding must identify the locomotives for conversion and the type of conversion equipment to be used.
 2. Submitted projects must conform to all applicable programmatic and administrative conditions including, without limitation, coordination with EPD personnel; submission of an initial report before the switcher is converted, a report immediately after the conversion, and then a report each six months for the first two years of operation and then once per year for the remaining period of commitment.
 - a. The two (2) reports describing activities immediately before and immediately after the conversion must include: a demonstration of compliance with applicable Federal procurement and subgrant procedures, certification that the equipment was properly installed and is in working condition, confirmation of proper maintenance of locomotives and conversion equipment, and provisions to ensure enforcement of warranty claims against vendors if a maintenance problem arises.
 - b. The two (2) reports covering activities immediately before and immediately after the conversion and two (2) reports covering each six months of the first year of genset operation must include detailed activity and emissions data collected through the use of data-logging or similar equipment in accordance with manufacturer specifications. EPA emission factors may be used in conjunction with measured duty cycle activity.
 - c. The two (2) reports covering each six month period of the second year of genset operation must indicate if there have been any changes in operating patterns or activity levels since the previous year, deviance from the agreements, or need for unexpected maintenance or repair. If any of these changes occurred the report must detail those changes.

d. All reports, beginning with the first six month report of the first year of genset operation, must confirm the use of the converted locomotives in the designated areas during the reporting period unless the locomotive became inoperable and was unable to be repaired or replaced with comparable equipment. The report must explain if there have been significant performance or unanticipated maintenance difficulties.

3. Projects that are awarded these funds will require a minimum 30% match. The project applicant will be responsible for the match. Grant funds will be distributed to the grantee incrementally following completion of conversion task(s) provided the match has been satisfied for the incremental distribution.

(b) Eligible Recipients of the Grant.

Owners of traditional diesel switcher locomotives operating in Floyd County are eligible for this funding assistance. Locomotives eligible for conversion include unregulated (pre-1973) or Tier 0 (1973-2001) diesel switchers that are currently in service and would have remained in service for at least five years from the application date. If EPD and the grantee mutually agree that switcher locomotives operating outside of Floyd County are a more environmentally beneficial candidate for conversion than the switchers operating in Floyd County, the alternative locomotives may be converted to the genset and used to replace the switchers normally operating in Floyd County. Emissions benefits will be calculated as the emission difference between the converted genset switchers and the switchers previously operating in Floyd County, rather than from the locomotives converted. This project must result in emission reductions that would otherwise not occur in the nonattainment area for the remaining useful life of the replaced equipment (e.g., the project cannot be applied to increase a fleet size).

(c) Criteria for the Award.

The request for proposals will be limited to conversion of switchers operating in Floyd County or the replacement of switchers operating in Floyd County with converted locomotives operating outside of Floyd County. Proposals must commit the converted switchers to 80% of their operating time for at least ten years from the installation of the equipment (or to a similar schedule approved by EPD) within a designated distance of the proposed railyard (also to be approved by EPD). Funding for the selected railroads is not to exceed 70% of the conversion cost. Priority will be given to the projects with the highest cost effectiveness as follows:

Cost effectiveness of the project is to be based on the emission levels of the equipment to be used in the conversion, the operating cycle and emission levels (tier level or direct measurements) of the switchers that are operating in Floyd County and are to be converted or replaced, the estimated length of remaining service of the switchers to be replaced, the number of years (minimum ten) that the converted switchers will remain in Floyd County, and the amount of time and average duty cycle of operation anticipated for the converted switchers. When calculating cost effectiveness, only funds to be awarded under this grant will be included.

Each project will be fully funded based on the cost effectiveness of the proposal and available funds. EPD may fund individual projects less than the requested amounts if the total amount of the proposals exceed available funds. If the amount of funding provided to individual projects during additional solicitations is less than that project's respective proposal, EPD may specify which switcher engines are to be converted based on criteria listed in Subparagraph (c) for each switcher converted.

A commitment to a schedule and maximum time period needed for converting the switchers must be specified, not to exceed 24 months from execution of a contract for the award. Penalties and/or contingencies for not meeting the terms of the contract will be specified in the award contract in accordance with applicable requirements.

- (d) **Deadline For Submittal.** EPD will send out the first solicitation for proposals on or before May 1, 2011. Applications will be due within eight weeks after release of the solicitation. Funding will be distributed based on the criteria for award described above. If funds remain after grants are awarded to all qualified projects from the first solicitation, additional solicitations will be issued with specific deadlines until all funds have been obligated. All applications submitted in response to any additional solicitations would be evaluated based on the criteria in Subparagraph (c).
- (e) **Directions For Submitting Proposals.** Requests for copies of the general guidelines and proposal forms and submittal of applications for the CMAQ Railroad-Related Emission Reductions in Floyd County should be made to:

e-mail: michelle.bergin@dnr.state.ga.us

- (f) Award of the CMAQ Railroad-Related Emission Reductions in Floyd County grants are subject to Federal funding provided to EPD.

Cite as Ga. Comp. R. & Regs. R. 391-3-21-.14

Authority: O.C.G.A. Sec. [12-9-6](#).

History. Original grant description entitled "Railroad-Related Emission Reductions Program" submitted November 19, 2010.

Submitted: May 16, 2011.

Rule 391-3-21-.15. Georgia Diesel Emissions Reduction Program.

- (1) Diesel Emissions Reduction Act (DERA) Georgia Diesel Emissions Reduction Program Scope and Purpose. Grants are available under the Diesel Emissions Reduction Act (DERA) State Clean Diesel Grant Program for retrofitting diesel vehicles that are located or operated in the State of Georgia.
- (a) General Terms and Conditions of the Grant.
1. Projects submitted for funding under this Grant must identify the vehicles for retrofit and the type of emission control equipment to be used.
 2. Submitted projects must conform to all applicable programmatic and administrative conditions including, without limitation, coordination with EPD personnel; use of retrofit technologies that have been or will be verified or certified under the U.S. Environmental Protection Agency's (EPA's) Retrofit Program or by the California Air Resources Board (CARB); submission of quarterly reports when applicable; submission of a final report when applicable; compliance with applicable Federal procurement and subgrant procedures; certification that the emission control equipment was properly installed and is in working condition; use of data-logging in accordance with manufacturer specifications of diesel vehicles that will be equipped with emission control equipment on existing routes to ensure proper exhaust temperature profiles; proper maintenance of vehicles and retrofit equipment and enforcement of warranty claims against vendors if a maintenance problem arises; and use of the emission control equipment on the vehicles for a minimum of four years unless the equipment is damaged beyond repair or the vehicle becomes inoperable and is unable to be repaired.

- (b) Eligible Recipients of the Grant. An eligible applicant is any Georgia public school system that proposes to install emission control devices on school buses the system owns and operates.
- (c) Criteria for the Award. In the event that the costs of the applications submitted for eligible projects exceed the available funding, EPD will determine the projects to be selected as follows:
 - 1. First priority will be given for public school systems whose fleets are based in counties that are adjacent to designated PM2.5 nonattainment or maintenance counties.
 - 2. Second priority will be given for public school systems whose fleets are based in counties that have not been designated as nonattainment for PM2.5 and are not adjacent to designated PM2.5 nonattainment or maintenance counties.
 - 3. Third priority will be given for public school systems whose fleets are based in counties that have been officially designated as nonattainment or maintenance for the PM2.5 standard.

Within each priority, applications will be ranked according to the following criteria:

- 1. Retrofit of school buses with devices that reduce PM2.5 by a minimum of 50% on school bus engines with model years ranging from 2001 through 2006; and
 - 2. Cost effectiveness of the project (cost per ton of emission reduced over the lifetime of the project).
- (d) Deadline For Submittal. EPD will issue the first solicitation for applications on or before April 18, 2011. Applications will be due within six weeks after release of the solicitation. Funding will be distributed based on the criteria for award between eligible applicants that reply within the first solicitation period. If funds remain after grants are awarded to all qualified projects from the first solicitation or additional funds are received for this program after the initial solicitation, additional solicitation(s) will be issued until all of the funds have been obligated. For each solicitation, retrofit projects will be awarded based on the priority and order in which projects rank within the criteria selection process. The applications will be evaluated based on the criteria stated in Subsection (c).
- (e) Directions For Submitting Applications for the Georgia Diesel Emission Reduction Program. Requests for copies of the general guidelines and proposal

forms and submittal of applications for the DERA Georgia Diesel Emission Reduction Program should be made to:

Georgia Environmental Protection Division

Mobile and Area Sources Program

Attn: Stacy Allman

4244 International Parkway, Suite 134

Atlanta, Georgia 30354

e-mail: stacy.allman@dnr.state.ga.us

- (f) Award of the Georgia Diesel Emission Reduction Program grants is subject to Federal funding provided to EPD. EPD may fund individual projects less than the requested amounts if necessary to distribute funds among equally ranked projects or to reduce the project cost to the maximum allowable distribution.
- (2) Diesel Emissions Reduction Act (DERA) Georgia Diesel Emissions Reduction Program Scope and Purpose. Grants are available under the Diesel Emissions Reduction Act (DERA) State Clean Diesel Grant Program for retrofitting, replacing, repowering, and/or rebuilding diesel vehicles/engines that are located or operated in the State of Georgia.
- (a) General Terms and Conditions of the Grant.
 - 1. Projects submitted for funding under this Grant must identify the school bus(es) proposed for:
 - (i) Early replacement and the model year of the new replacement bus(es);
 - (ii) Repowering and the replacement engine manufacturer, model, model year, and fuel type for each proposed repowered bus;
 - (iii) Existing engine(s) to be rebuilt and the standard the rebuilt engine is expected to meet; and/or
 - (iv) Identify the school buses for installing emission control devices and type of emission control equipment to be used.
 - 2. Submitted projects must conform to all applicable programmatic and administrative conditions including, without limitation.
 - (i) Coordination with EPD personnel.

- (ii) Use of verified emission control technologies under the U.S. Environmental Protection Agency's (EPA's) Retrofit Program or the California Air Resources Board (CARB) for projects including emission control equipment.
- (iii) Use of engines certified by EPA or CARB to 2010 or newer heavy duty engine standards for projects including the early replacement of school buses.
- (iv) Use of replacement engines certified by EPA or CARB to a cleaner emission standard than the original engine for projects including the repowering of school bus engines.
- (v) Use of rebuilt engines certified to a cleaner EPA or CARB emission standard than the original engines for projects including the rebuilding of existing school bus engines.
- (vi) Funds under this award cannot be used for emission reductions that result from school bus replacements or repowers that would have occurred through normal attrition/fleet turnover within three years of October 1, 2012.
- (vii) Funds under this award cannot be used for the purchase of school buses or engines to expand a fleet.
- (viii) Any proposed replacement bus or engine must perform the same function and operation as the bus or engine that is being replaced.
- (ix) Any proposed replacement bus or engine must be of the same type and similar gross vehicle weight rating or horsepower as the bus or engine being replaced.
- (x) Any proposed engine to be replaced must be scrapped or rendered permanently disabled within ninety (90) days of the replacement, or returned to the original engine manufacturer for remanufacturing to a certified cleaner emission standard. Remanufacturing must be completed during the project period. Permanently disabling the engine while retaining possession of the engine is an acceptable scrapping method. Disabling the engine may be completed by drilling a hole in the engine block (the part of the engine containing the cylinders). Alternatively, disabling the engine may be completed by removing the engine oil from the crankcase, replacing it with a 40 percent solution of sodium silicate and running the engine for a short period of time at low speeds, thus rendering the engine inoperable.

Remanufacturing of school bus engines requires that the engine be returned to the original engine manufacturer for remanufacturing to MY 2007 or newer certified emission standards. Other acceptable scrapping methods may be considered and will require prior Division approval. If scrapped or remanufactured engines are to be sold, program income requirements apply.

- (xi) Any school bus to be replaced must be scrapped or rendered permanently disabled within ninety (90) days of the replacement, or its engine returned to the original engine manufacturer for remanufacturing to a certified cleaner emission standard. Remanufacturing must be completed during the project period. Permanently disabling the chassis and the engine (see (x) above) while retaining possession of the bus is an acceptable scrapping method. Disabling the chassis may be completed by cutting the chassis in half. Remanufacturing of a highway school bus requires that it be returned to the original engine manufacturer for remanufacturing to MY 2007 or newer certified emission standards. Other acceptable scrapping methods may be considered and will require prior Division approval. Components that are not part of the bus engine or chassis may be salvaged from the unit being replaced. If scrapped or remanufactured buses or salvaged bus chassis or components are to be sold, program income requirements apply.
- (xii) Submit documentation on the decommissioning of the replaced school bus engine (as outlined in the above sections (x) and (xi)) in projects that include early bus replacement or bus repowering.
- (xiii) Submission of quarterly and final reports when requested.
- (xiv) Compliance with applicable Federal procurement and subgrant procedures.
- (xv) Certification that the emission control equipment was properly installed and is in working condition when applicable.
- (xvi) Use of data-logging in accordance with manufacturer specifications of diesel school buses that will be equipped with emission control equipment on existing routes to ensure proper exhaust temperature profiles.
- (xvii) Proper maintenance of school buses and retrofit equipment and enforcement of warranty claims against vendors if a maintenance problem arises, as applicable.

- (xviii) Use of the emission control equipment and/or rebuilt engine on the school buses and/or use of repowered and replacement school buses for a minimum of four years unless the equipment is damaged beyond repair and/or the vehicles become inoperable and are unable to be repaired.
- (b) Eligible Recipients of the Grant. An eligible applicant is any Georgia public school system that owns and operates school buses. Eligible applicants can only receive funding for projects proposing to:
1. Retrofit school buses with pre-2007 model year engines with emission control devices;
 2. Rebuild school bus pre-2007 engines to a cleaner engine standard;
 3. Replace school buses with pre-2007 model year engines with school buses equipped with 2010 or newer model year engines; and/or
 4. Repower school buses with pre-2007 model year engines with engines certified by EPA or CARB to a cleaner emission standard.
- (c) Match Requirements. Project applicants shall be required to match a minimum of 50% of the project cost for purchasing and installing emissions control devices on diesel school buses and/or to rebuild school bus engines, to match a minimum of 65% of the project cost to purchase early replacement school buses, and/or match a minimum of 65% of the project cost to repower school bus engines.
- (d) Criteria for the Award. In the event that the costs of the applications submitted for eligible projects exceed the available funding, EPD will determine the projects to be selected as follows:
1. First priority will be given for public school systems whose fleets are based in counties that are not designated as nonattainment or maintenance for PM2.5 and who submit projects to retrofit school buses with emission control devices.
 2. Second priority will be given for public school systems whose fleets are based in counties that are not designated as nonattainment or maintenance for PM2.5 and who submit projects to replace school buses early, repower school buses, and/or rebuild school bus engines.
 3. Third priority will be given for public school systems whose fleets are based in counties that are officially designated as nonattainment or maintenance

for the PM2.5 standard and who submit projects to retrofit school buses with emission control devices.

4. Fourth priority will be given for public school systems whose fleets are based in counties that are officially designated as nonattainment or maintenance for the PM2.5 standard and who submit projects to replace school buses early, repower school buses, and/or rebuild school bus engines.
 5. Within each priority, applications will be ranked according to cost effectiveness of the project (cost per ton of emission reduced over the lifetime of the project).
- (e) **Deadline For Submittal.** EPD will issue the first solicitation for applications on or before June 1, 2013. Applications will be due within four weeks after release of the solicitation. Funding will be distributed based on the criteria for award between eligible applicants that reply within the first solicitation period. If funds remain after grants are awarded to all qualified projects from the first solicitation or additional funds are received for this program after the initial solicitation, additional solicitation(s) will be issued until all of the funds have been obligated. For each solicitation, retrofit projects will be awarded based on the priority and order in which projects rank within the criteria selection process. The applications will be evaluated based on the criteria stated in Subsection (c).
- (f) **Directions For Submitting Applications for the Georgia Diesel Emission Reduction Program.** Requests for copies of the general guidelines and proposal forms and submittal of applications for the DERA Georgia Diesel Emission Reduction Program should be made to:
- Georgia Environmental Protection Division
- Mobile and Area Sources Program
- Attn: Stacy Allman
- 4244 International Parkway, Suite 134
- Atlanta, Georgia 30354
- e-mail: stacy.allman@dnr.state.ga.us
- (g) Award of the Georgia Diesel Emission Reduction Program grants is subject to Federal funding provided to EPD. EPD may fund individual projects less than the requested amounts if necessary to distribute funds among equally ranked projects or to reduce the project cost to the maximum allowable distribution.

(3) Diesel Emissions Reduction Act (DERA) Georgia Diesel Emissions Reduction Program Scope and Purpose. Grants are available under the Diesel Emissions Reduction Act (DERA) State Clean Diesel Grant Program for replacing diesel vehicles that are located or operated in the State of Georgia.

(a) General Terms and Conditions of the Grant.

1. Projects submitted for funding under this Grant must identify the school bus(es) proposed for early replacement and the model year of the new replacement bus(es).
2. Submitted projects must conform to all applicable programmatic and administrative conditions including but not limited to those in this subsection.
 - (i) Coordination with EPD personnel.
 - (ii) Use of engines certified by EPA or CARB to 2010 or newer heavy duty engine standards for projects including the early replacement of school buses.
 - (iii) Any proposed school bus(es) to be replaced must be between model year 1991-2003.
 - (iv) Funds under this award cannot be used for emission reductions that result from school bus replacements that would have occurred through normal attrition/fleet turnover within three years of October 1, 2014.
 - (v) Funds under this award cannot be used for the purchase of school buses to expand a fleet.
 - (vi) Any proposed replacement bus must perform the same function and operation as the bus or engine that is being replaced.
 - (vii) Any proposed replacement bus must be of the same type and similar gross vehicle weight rating or horsepower as the bus being replaced.
 - (viii) For any proposed school bus to be replaced, the bus engine must be scrapped or rendered permanently disabled within ninety (90) days of the replacement, or returned to the original engine manufacturer for remanufacturing to a certified cleaner emission standard. Permanently disabling the engine, while retaining possession of the engine, is an acceptable scrapping method. Disabling the engine may be completed by drilling a hole in the engine block (the part of the engine containing the cylinders) and

manifold. Alternatively, disabling the engine may be completed by removing the engine oil from the crankcase, replacing it with a 40 percent solution of sodium silicate and running the engine for a short period of time at low speeds, thus rendering the engine inoperable. Remanufacturing shall be performed by the original engine manufacturer, or by a dealership/distributor that has a service program that is sponsored/backed by original engine manufacturer warranties (i.e. the new, remanufactured and upgraded engine is warranted by the OEM). Bus engines shall be remanufactured to Model Year (MY) 2007 or newer certified emission standards. Remanufacturing must be completed during the project period. Other acceptable scrapping methods may be considered and will require prior Division approval. This grant does not cover the cost of scrapping or remanufacturing the bus engine. If scrapped or remanufactured engines are to be sold, program income requirements apply.

- (ix) For any school bus to be replaced, the chassis must be scrapped or rendered permanently disabled within ninety (90) days of the replacement, or its engine returned to the original engine manufacturer for remanufacturing to a certified cleaner emission standard. Remanufacturing must be completed during the project period. Permanently disabling the chassis and the engine (see (viii) above), while retaining possession of the bus, is an acceptable scrapping method. Disabling the chassis may be completed by cutting through the frame/frame rails on each side at a point located between the front and rear axles. Other acceptable scrapping methods may be considered and will require prior Division approval. This grant does not cover the cost of scrapping or refurbishing the bus chassis. Components that are not part of the bus engine or chassis may be salvaged from the unit being replaced. If scrapped or remanufactured buses or salvaged bus chassis or components are to be sold, program income requirements apply.
- (x) Submit documentation on the decommissioning of the replaced school bus engine (as outlined in the above sections (viii) and (ix)) in projects that include early bus replacement.
- (xi) Submission of quarterly and final reports when requested.
- (xii) Compliance with applicable Federal procurement and subgrant procedures.

(xiii) Use of the replacement school buses for a minimum of four years unless the vehicles become inoperable and are unable to be repaired.

(b) Eligible Recipients and Projects for the Grant.

1. An eligible applicant is any Georgia public school system that owns and operates school buses.
2. Eligible applicants can only receive funding for projects proposing to replace model year 1991-2003 school buses equipped with pre-2007 model year engines with school buses equipped with 2013 or newer model year engines.

(c) Match Requirements. Project applicants shall be required to match a minimum of 75% of the project cost to purchase early replacement school buses. Solicitations may include an additional voluntary cost share so that additional federal funds may be received.

(d) Criteria for the Award. In the event that the costs of the applications submitted for eligible projects exceed the available funding, EPD will determine the projects to be selected as follows:

1. First priority will be given for public school systems whose fleets are based in counties that have been designated as nonattainment or maintenance for PM2.5
2. Second priority will be given for public school systems whose fleets are based in counties that have not been designated as nonattainment or maintenance for PM2.5
3. Within each priority, applications will be ranked according to cost effectiveness of the project (cost per ton of emission reduced over the lifetime of the project).

(e) Deadline for Submittal. EPD will issue the first solicitation for applications on or before December 31, 2014. Applications will be due within four weeks after release of the solicitation. Funding will be distributed based on the criteria for award between eligible applicants that reply within the first solicitation period. If funds remain after grants are awarded to all qualified projects from the first solicitation or additional funds are received for this program after the initial solicitation, additional solicitation(s) will be issued until all of the funds have been obligated. For each solicitation, retrofit projects will be awarded based on the priority and order in which projects rank within the criteria selection process. The

applications will be evaluated based on the criteria and requirements included in this Subsection 391-3-21-.15(3).

- (f) Directions for Submitting Applications for the Georgia Diesel Emission Reduction Program. Requests for copies of the general guidelines and proposal forms and submittal of applications for the DERA Georgia Diesel Emission Reduction Program should be made to:

Georgia Environmental Protection Division

Mobile and Area Sources Program

Attn: Stacy Allman

4244 International Parkway, Suite 134

Atlanta, Georgia 30354

e-mail: stacy.allman@dnr.state.ga.us

- (g) Award of the Georgia Diesel Emission Reduction Program grants is subject to Federal funding provided to EPD. EPD may fund individual projects less than the requested amounts if necessary to distribute funds among equally ranked projects or to reduce the project cost to the maximum allowable distribution.
- (4) Diesel Emissions Reduction Act (DERA) Georgia Diesel Emissions Reduction Program Scope and Purpose. Grants are available under the Diesel Emissions Reduction Act (DERA) State Clean Diesel Grant Program for replacing diesel vehicles that are located or operated in the State of Georgia.
- (a) General Terms and Conditions of the Grant.
 - 1. Projects submitted for funding under this Grant must identify the school bus(es) proposed for early replacement and the model year of the new replacement bus(es).
 - 2. Submitted projects must conform to all applicable programmatic and administrative conditions including but not limited to those in this paragraph.
 - (i) Coordination with EPD personnel.
 - (ii) Use of engines certified by EPA or CARB to 2010 or newer heavy duty engine standards for projects including the early replacement of school buses.

- (iii) Any proposed school bus(es) to be replaced must be between model year 1996-2006.
- (iv) Funds under this award cannot be used for emission reductions that result from school bus replacements that would have occurred through normal attrition/fleet turnover within three years of notice of criteria approval.
- (v) Funds under this award cannot be used for the purchase of school buses to expand a fleet.
- (vi) Any proposed replacement bus must perform the same function and operation as the bus or engine that is being replaced.
- (vii) Any proposed replacement bus must be of the same type and similar gross vehicle weight rating or horsepower as the bus being replaced.
- (viii) For any proposed school bus to be replaced, the bus engine must be scrapped or rendered permanently disabled within ninety (90) days of the replacement, or returned to the original engine manufacturer for remanufacturing to a certified cleaner emission standard. Permanently disabling the engine, while retaining possession of the engine, is an acceptable scrapping method. Disabling the engine may be completed by drilling a hole in the engine block (the part of the engine containing the cylinders) and manifold. Other acceptable scrapping methods may be considered and will require prior Division approval. This grant does not cover the cost of scrapping or remanufacturing the bus engine. If scrapped or remanufactured engines are to be sold, program income requirements apply.
- (ix) For any school bus to be replaced, the chassis must be scrapped or rendered permanently disabled within ninety (90) days of the replacement, or its engine returned to the original engine manufacturer for remanufacturing to a certified cleaner emission standard. Remanufacturing must be completed during the project period. Permanently disabling the chassis and the engine (see (viii) above), while retaining possession of the bus, is an acceptable scrapping method. Disabling the chassis may be completed by cutting through the frame/frame rails on each side at a point located between the front and rear axles. Other acceptable scrapping methods may be considered and will require prior Division approval. This grant does not cover the cost of scrapping or

refurbishing the bus chassis. Components that are not part of the bus engine or chassis may be salvaged from the unit being replaced. If scrapped or remanufactured buses or salvaged bus chassis or components are to be sold, program income requirements apply.

- (x) Submit documentation on the decommissioning of the replaced school bus engine (as outlined in the above subparagraphs (viii) and (ix)) in projects that include early bus replacement.
- (xi) Submission of quarterly and final reports when requested.
- (xii) Compliance with applicable Federal procurement and subgrant procedures.
- (xiii) Use of the replacement school buses for a minimum of four years unless the vehicles become inoperable and are unable to be repaired.

(b) Eligible Recipients and Projects for the Grant.

1. An eligible applicant is any Georgia public school system that owns and operates school buses.
2. Eligible applicants can only receive funding for projects proposing to replace model year 1996-2006 school buses equipped with pre-2007 model year engines with school buses equipped with 2017 or newer model year engines.

(c) Match Requirements. Project applicants shall be required to match a minimum of 75% of the project cost to purchase early replacement school buses. Solicitations may include an additional voluntary cost share so that additional federal funds may be received.

(d) Criteria for the Award. In the event that the costs of the applications submitted for eligible projects exceed the available funding, EPD will determine the projects to be selected as follows:

1. First priority will be given for public school systems whose fleets are based in counties that have been designated as nonattainment or maintenance for the 2008 or 2015 Ozone National Ambient Air Quality Standards (NAAQS)
2. Second priority will be given for public school systems whose fleets are based in counties that have not been designated as nonattainment or maintenance for the 2008 or 2015 Ozone NAAQS

3. Within each priority, applications will be ranked according to cost effectiveness of the project (cost per ton of emission reduced over the lifetime of the project).
- (e) **Deadline for Submittal.** EPD will issue the first solicitation for applications within 4 months of notice of criteria approval. Applications will be due within four weeks after release of the solicitation. Funding will be distributed based on the criteria for award between eligible applicants that reply within the first solicitation period. If funds remain after grants are awarded to all qualified projects from the first solicitation or additional funds are received for this program after the initial solicitation, additional solicitation(s) will be issued until all of the funds have been obligated. For each solicitation, retrofit projects will be awarded based on the priority and order in which projects rank within the criteria selection process. The applications will be evaluated based on the criteria and requirements included in this paragraph 391-3-21-.15(4).
 - (f) **Directions for Submitting Applications for the Georgia Diesel Emission Reduction Program.** Requests for copies of the general guidelines and proposal forms and submittal of applications for the DERA Georgia Diesel Emission Reduction Program should be made to:

Georgia Environmental Protection Division

Planning and Support Program

4244 International Parkway, Suite 134

Atlanta, Georgia 30354
 - (g) Award of the Georgia Diesel Emission Reduction Program grants is subject to Federal funding provided to EPD. EPD may fund individual projects less than the requested amounts if necessary to distribute funds among equally ranked projects or to reduce the project cost to the maximum allowable distribution.
- (5) **Scope and Purpose.** Grants are available under the Diesel Emissions Reduction Act (DERA) State Clean Diesel Grant Program for replacing diesel school buses that are located or operated in the State of Georgia.
 - (a) **General Terms and Conditions of the Grant.**
 1. Projects submitted for funding under this Grant must identify the school bus(es) proposed for early replacement and the model year of the new replacement bus(es).

2. Submitted projects must conform to all applicable programmatic and administrative conditions including but not limited to those in this paragraph.
 - (i) Coordination with EPD personnel.
 - (ii) Use of engines certified by EPA or CARB to 2010 or newer heavy duty engine standards for projects including the early replacement of school buses.
 - (iii) Any proposed school bus(es) to be replaced must be between model year 1995-2006.
 - (iv) Funds under this award cannot be used for emission reductions that result from school bus replacements that would have occurred through normal attrition/fleet turnover within three years of notice of criteria approval.
 - (v) Funds under this award cannot be used for the purchase of school buses to expand a fleet.
 - (vi) Any proposed replacement bus must perform the same function and operation as the bus or engine that is being replaced.
 - (vii) Any proposed replacement bus must be of the same type and similar gross vehicle weight rating or horsepower as the bus being replaced.
 - (viii) For any proposed school bus to be replaced, the bus engine must be scrapped or rendered permanently disabled within ninety (90) days of the replacement, or returned to the original engine manufacturer for remanufacturing to a certified cleaner emission standard. Permanently disabling the engine, while retaining possession of the engine, is an acceptable scrapping method. Disabling the engine may be completed by drilling a hole in the engine block (the part of the engine containing the cylinders) and manifold. Other acceptable scrapping methods may be considered and will require prior Division approval. This grant does not cover the cost of scrapping or remanufacturing the bus engine. If scrapped or remanufactured engines are to be sold, program income requirements apply.
 - (ix) For any school bus to be replaced, the chassis must be scrapped or rendered permanently disabled within ninety (90) days of the replacement, or its engine returned to the original engine

manufacturer for remanufacturing to a certified cleaner emission standard. Remanufacturing must be completed during the project period. Permanently disabling the chassis and the engine (see (viii) above), while retaining possession of the bus, is an acceptable scrapping method. Disabling the chassis may be completed by cutting through the frame/frame rails on each side at a point located between the front and rear axles. Other acceptable scrapping methods may be considered and will require prior Division approval. This grant does not cover the cost of scrapping or refurbishing the bus chassis. Components that are not part of the bus engine or chassis may be salvaged from the unit being replaced. If scrapped or remanufactured buses or salvaged bus chassis or components are to be sold, program income requirements apply.

- (x) Submit documentation on the decommissioning of the replaced school bus engine (as outlined in the above subparagraphs (viii) and (ix)) in projects that include early bus replacement.
- (xi) Submission of quarterly and final reports when requested.
- (xii) Compliance with applicable Federal procurement and subgrant procedures.
- (xiii) Use of the replacement school buses for a minimum of four years unless the vehicles become inoperable and are unable to be repaired.

(b) Eligible Recipients and Projects for the Grant.

1. An eligible applicant is any Georgia public school system that owns and operates school buses.
2. Eligible applicants can only receive funding for projects proposing to replace model year 1995-2006 school buses equipped with pre-2007 model year engines with school buses equipped with 2017 or newer model year engines.

(c) Match Requirements. Project applicants shall be required to match a minimum of 75% of the project cost to purchase early replacement school buses. Solicitations may include an additional voluntary cost share so that additional federal funds may be received.

- (d) Criteria for the Award. In the event that the costs of the applications submitted for eligible projects exceed the available funding, EPD will determine the projects to be selected as follows:
1. First priority will be given for public school systems whose fleets are based in counties that have been designated as nonattainment for the 2015 Ozone National Ambient Air Quality Standards (NAAQS). The counties included are Bartow, Clayton, Cobb, DeKalb, Fulton, Gwinnett, and Henry.
 2. Second priority will be given for public school systems whose fleets are based in counties that have been designated as maintenance for the 2008 Ozone NAAQS and attainment for the 2015 Ozone NAAQS. These counties are Cherokee, Coweta, Douglas, Fayette, Forsyth, Newton, Paulding, and Rockdale.
 3. Third priority will be given for public school systems whose fleets are based in counties that have not been designated as nonattainment or maintenance for the 2008 or 2015 Ozone NAAQS.
 4. Within each priority, applications will be ranked according to cost effectiveness of the project (cost per ton of emission reduced over the lifetime of the project).
- (e) Deadline for Submittal. EPD will issue the first solicitation for applications within 4 months of notice of criteria approval. Applications will be due within four weeks after release of the solicitation. Funding will be distributed based on the criteria for award between eligible applicants that reply within the first solicitation period. If funds remain after grants are awarded to all qualified projects from the first solicitation or additional funds are received for this program after the initial solicitation, additional solicitation(s) will be issued until all of the funds have been obligated. For each solicitation, retrofit projects will be awarded based on the priority and order in which projects rank within the criteria selection process. The applications will be evaluated based on the criteria and requirements included in this paragraph 391-3-21-.15(5).
- (f) Directions for Submitting Applications for the Georgia Diesel Emission Reduction Program. Requests for copies of the general guidelines and proposal forms and submittal of applications for the DERA Georgia Diesel Emission Reduction Program should be made to:

Georgia Environmental Protection Division

Planning and Support Program

4244 International Parkway, Suite 120

Atlanta, Georgia 30354

- (g) Award of the Georgia Diesel Emission Reduction Program grants is subject to Federal funding provided to EPD. EPD may fund individual projects less than the requested amounts if necessary to distribute funds among equally ranked projects or to reduce the project cost to the maximum allowable distribution.
- (6) Scope and Purpose. Grants are available under the Diesel Emissions Reduction Act (DERA) State Clean Diesel Grant Program for replacing diesel school buses that are located or operated in the State of Georgia.
- (a) General Terms and Conditions of the Grant.
 - 1. Projects submitted for funding under this Grant must identify the school bus(es) proposed for early replacement and the model year of the new replacement bus(es).
 - 2. Submitted projects must conform to all applicable programmatic and administrative conditions including but not limited to those in this paragraph.
 - (i) Coordination with EPD personnel.
 - (ii) Use of engines certified by EPA or CARB to 2010 or newer heavy-duty engine standards for projects including the early replacement of school buses.
 - (iii) Any proposed school bus(es) to be replaced must be between model year 1996-2018.
 - (iv) Funds under this award cannot be used for emission reductions that result from school bus replacements that would have occurred through normal attrition/fleet turnover within three years of notice of criteria approval.
 - (v) Funds under this award cannot be used for the purchase of school buses to expand a fleet.
 - (vi) Any proposed replacement bus must perform the same function and operation as the bus or engine that is being replaced.
 - (vii) Any proposed replacement bus must be of the same type and similar gross vehicle weight rating or horsepower as the bus being replaced.

- (viii) For any proposed school bus to be replaced, the bus engine must be scrapped or rendered permanently disabled within ninety (90) days of the replacement or returned to the original engine manufacturer for remanufacturing to a certified cleaner emission standard. Permanently disabling the engine, while retaining possession of the engine, is an acceptable scrapping method. Disabling the engine may be completed by drilling a hole in the engine block (the part of the engine containing the cylinders) and manifold. Other acceptable scrapping methods may be considered and will require prior Division approval. This grant does not cover the cost of scrapping or remanufacturing the bus engine. If scrapped or remanufactured engines are to be sold, program income requirements apply.
- (ix) For any school bus to be replaced, the chassis must be scrapped or rendered permanently disabled within ninety (90) days of the replacement, or its engine returned to the original engine manufacturer for remanufacturing to a certified cleaner emission standard. Remanufacturing must be completed during the project period. Permanently disabling the chassis and the engine (see (viii) above), while retaining possession of the bus, is an acceptable scrapping method. Disabling the chassis may be completed by cutting through the frame/frame rails on each side at a point located between the front and rear axles. Other acceptable scrapping methods may be considered and will require prior Division approval. This grant does not cover the cost of scrapping or refurbishing the bus chassis. Components that are not part of the bus engine or chassis may be salvaged from the unit being replaced. If scrapped or remanufactured buses or salvaged bus chassis or components are to be sold, program income requirements apply.
- (x) Submit documentation on the decommissioning of the replaced school bus engine (as outlined in the above subparagraphs (viii) and (ix)) in projects that include early bus replacement.
- (xi) Submission of quarterly and final reports when requested.
- (xii) Compliance with applicable Federal procurement and subgrant procedures.
- (xiii) Use of the replacement school buses for a minimum of four years unless the vehicles become inoperable and are unable to be repaired.

- (b) Eligible Recipients and Projects for the Grant.
1. An eligible applicant is any Georgia public school system that owns and operates school buses.
 2. Eligible applicants can only receive funding for projects proposing to replace model year 1996-2009 school buses with school buses equipped with 2016 or newer model year engines; or replace 1996-2018 diesel school buses with 2016 or newer near zero NOx or zero emissions school buses.
- (c) Match Requirements. Project applicants shall be required to match a minimum of 75% of the project cost to purchase early replacement school buses. Solicitations may include an additional voluntary cost share so that additional federal funds may be received.
- (d) Criteria for the Award. In the event that the costs of the applications submitted for eligible projects exceed the available funding, EPD will determine the projects to be selected as follows:
1. First priority will be given for public school systems whose fleets are based in counties that have been designated as nonattainment for the 2015 Ozone National Ambient Air Quality Standards (NAAQS). The counties included are Bartow, Clayton, Cobb, DeKalb, Fulton, Gwinnett, and Henry.
 2. Second priority will be given for public school systems whose fleets are based in counties that have been designated as maintenance for the 2008 Ozone NAAQS and attainment for the 2015 Ozone NAAQS. These counties are Cherokee, Coweta, Douglas, Fayette, Forsyth, Newton, Paulding, and Rockdale.
 3. Third priority will be given for public school systems whose fleets are based in counties that have not been designated as nonattainment or maintenance for the 2008 or 2015 Ozone NAAQS.
 4. Within each priority, applications will be ranked according to cost effectiveness of the project (cost per ton of emission reduced over the lifetime of the project).
- (e) Deadline for Submittal. EPD will issue the first solicitation for applications within 4 months of notice of criteria approval. Applications will be due within four weeks after release of the solicitation. Funding will be distributed based on the criteria for award between eligible applicants that reply within the first solicitation period. If funds remain after grants are awarded to all qualified projects from the first solicitation or additional funds are received for this program after the initial solicitation, additional solicitation(s) will be issued until all the funds have been obligated. For each solicitation, retrofit projects will be awarded based on the

priority and order in which projects rank within the criteria selection process. The applications will be evaluated based on the criteria and requirements included in this paragraph 391-3-21-.15(6).

- (f) Directions for Submitting Applications for the Georgia Diesel Emission Reduction Program. Requests for copies of the general guidelines and proposal forms and submittal of applications for the DERA Georgia Diesel Emission Reduction Program should be made to:

Georgia Environmental Protection Division

Planning and Support Program

4244 International Parkway, Suite 120

Atlanta, Georgia 30354

- (g) Award of the Georgia Diesel Emission Reduction Program grants is subject to Federal funding provided to EPD. EPD may fund individual projects less than the requested amounts, if necessary, to distribute funds among equally ranked projects or to reduce the project cost to the maximum allowable distribution.
- (7) Scope and Purpose. Grants are available under the Diesel Emissions Reduction Act (DERA) State Clean Diesel Grant Program for replacing diesel school buses that are located or operated in the State of Georgia.
- (a) General Terms and Conditions of the Grant.
 1. Projects submitted for funding under this Grant must identify the school bus(es) proposed for early replacement and the model year of the new replacement bus(es).
 2. Submitted projects must conform to all applicable programmatic and administrative conditions including but not limited to those in this paragraph.
 - (i) Coordination with EPD personnel.
 - (ii) Any proposed school bus(es) must be certified by EPA or CARB to meet the eligibility requirements in (b)2.
 - (iii) Any proposed school bus(es) to be replaced must be diesel-powered and the model year must be between 1996-2020.
 - (iv) Funds under this award cannot be used for emission reductions that result from school bus replacements that would have occurred

through normal attrition/fleet turnover within three years of notice of criteria approval.

- (v) Funds under this award cannot be used for the purchase of school buses to expand a fleet.
- (vi) Any proposed replacement bus must perform the same function and operation as the bus or engine that is being replaced.
- (vii) Any proposed replacement bus must be of the same type and similar gross vehicle weight rating or horsepower as the bus being replaced.
- (viii) For any proposed school bus to be replaced, the bus engine must be scrapped or rendered permanently disabled within ninety (90) days of the replacement or returned to the original engine manufacturer for remanufacturing to a certified cleaner emission standard. Permanently disabling the engine, while retaining possession of the engine, is an acceptable scrapping method. Disabling the engine may be completed by cutting a three-inch hole in the engine block (the part of the engine containing the cylinders). Other acceptable scrapping methods may be considered and will require prior Division approval. This grant does not cover the cost of scrapping or remanufacturing the bus engine. If scrapping is to be sold, program income requirements apply.
- (ix) For any school bus to be replaced, the chassis must be scrapped or rendered permanently disabled within ninety (90) days of the replacement. Permanently disabling the chassis and the engine (see (viii) above), while retaining possession of the bus, is an acceptable scrapping method. Disabling the chassis may be completed by cutting through the frame/frame rails on each side at a point located between the front and rear axles. Other acceptable scrapping methods may be considered and will require prior Division approval. This grant does not cover the cost of scrapping or refurbishing the bus chassis. Components that are not part of the bus engine or chassis may be salvaged from the unit being replaced. If scrapping is to be sold, program income requirements apply.
- (x) Submit documentation on the decommissioning of the replaced school bus engine (as outlined in the above subparagraphs (viii) and (ix)) in projects that include early bus replacement.
- (xi) Submission of quarterly and final reports when requested.

- (xii) Compliance with applicable Federal procurement and subgrant procedures.
- (xiii) Use of the replacement school buses for a minimum of four years unless the vehicles become inoperable and are unable to be repaired.
- (xiv) If a 2010 engine model year (EMY) or newer bus is replaced, the 2010 EMY or newer bus may be retained by selling the bus within Georgia provided the 2010 EMY or newer bus replaces a 1996-2009 EMY bus, and the 1996-2009 EMY bus is scrapped. The retained bus must be sold, and the 1996-2009 replacement bus must be located within Georgia. It is preferred that the scrapped unit currently operates within the same project location(s) as the 2010 EMY or newer vehicle currently operates, however alternative scenarios will be considered. The option to sell a bus is only allowed if the NOx emission reduction benefits are retained or improved compared to the original application. A detailed scrappage plan must be submitted and approved by the Division prior to the sale. If the bus is sold, program income requirements apply.

(b) Eligible Recipients and Projects for the Grant.

1. An eligible applicant is any Georgia public school system that owns and operates school buses.
2. Eligible applicants can only receive funding for projects proposing to replace model year 1996-2009 diesel school buses with school buses equipped with 2016 or newer model year engines; or replace 1996-2020 diesel school buses with 2016 or newer low-NOx or zero emissions school buses.

(c) Match Requirements. Project applicants shall be required to match a minimum of 75% of the project cost to purchase early replacement school buses. Solicitations may include an additional voluntary cost share so that additional federal funds may be received.

(d) Criteria for the Award. In the event that the costs of the applications submitted for eligible projects exceed the available funding, EPD will determine the projects to be selected as follows:

1. First priority will be given for public school systems whose fleets are based in counties that have been designated as nonattainment for the 2015 Ozone

National Ambient Air Quality Standards (NAAQS). The counties included are Bartow, Clayton, Cobb, DeKalb, Fulton, Gwinnett, and Henry.

2. Second priority will be given for public school systems whose fleets are based in counties that have been designated as maintenance for the 2008 Ozone NAAQS and attainment for the 2015 Ozone NAAQS. These counties are Cherokee, Coweta, Douglas, Fayette, Forsyth, Newton, Paulding, and Rockdale.
 3. Third priority will be given for public school systems whose fleets are based in counties that have not been designated as nonattainment or maintenance for the 2008 or 2015 Ozone NAAQS.
 4. Within each priority, applications will be ranked according to cost effectiveness of the project (cost per ton of emission reduced over the lifetime of the project).
- (e) Deadline for Submittal. EPD will issue the first solicitation for applications within 4 months of notice of criteria approval. Applications will be due within four weeks after release of the solicitation. Funding will be distributed based on the criteria for award between eligible applicants that reply within the first solicitation period. If funds remain after grants are awarded to all qualified projects from the first solicitation or additional funds are received for this program after the initial solicitation, additional solicitation(s) will be issued until all the funds have been obligated. For each solicitation, retrofit projects will be awarded based on the priority and order in which projects rank within the criteria selection process. The applications will be evaluated based on the criteria and requirements included in this paragraph 391-3-21-.15(7).
- (f) Directions for Submitting Applications for the Georgia Diesel Emission Reduction Program. Requests for copies of the general guidelines and proposal forms and submittal of applications for the DERA Georgia Diesel Emission Reduction Program should be made to:

Georgia Environmental Protection Division

Planning and Support Program

4244 International Parkway, Suite 120

Atlanta, Georgia 30354

- (g) Award of the Georgia Diesel Emission Reduction Program grants is subject to Federal funding provided to EPD. EPD may fund individual projects less than the

requested amounts, if necessary, to distribute funds among equally ranked projects or to reduce the project cost to the maximum allowable distribution.

(8) **Scope and Purpose.** Grants are available under the Diesel Emissions Reduction Act (DERA) State Clean Diesel Grant Program for replacing diesel school buses that are located or operated in the State of Georgia.

(a) **General Terms and Conditions of the Grant.**

1. Projects submitted for funding under this Grant must identify the school bus(es) proposed for early replacement and the model year of the new replacement bus(es).
2. Submitted projects must conform to all applicable programmatic and administrative conditions including but not limited to those in this paragraph.
 - (i) Coordination with EPD personnel.
 - (ii) Any proposed school bus(es) must be certified by EPA or CARB to meet the eligibility requirements in (b)2.
 - (iii) Any proposed school bus(es) to be replaced must be diesel-powered and the model year must be 2021 or older.
 - (iv) Funds under this award cannot be used for emission reductions that result from school bus replacements that would have occurred through normal attrition/fleet turnover within three years of notice of criteria approval.
 - (v) Funds under this award cannot be used for the purchase of school buses to expand a fleet.
 - (vi) Any proposed replacement bus must perform the same function and operation as the bus or engine that is being replaced.
 - (vii) Any proposed replacement bus must be of the same type and similar gross vehicle weight rating or horsepower as the bus being replaced (e.g., replace Type D bus with another Type D bus). Alternately, the proposed replacement bus may be one type smaller and of less gross vehicle weight rating or horsepower as the bus being replaced (e.g., replace Type D bus with a Type C bus).
 - (viii) For any proposed school bus to be replaced, the bus engine must be scrapped or rendered permanently disabled within ninety (90) days of the replacement or returned to the original engine

manufacturer for remanufacturing to a certified cleaner emission standard. Permanently disabling the engine, while retaining possession of the engine, is an acceptable scrapping method. Disabling the engine may be completed by cutting a three-inch hole in the engine block (the part of the engine containing the cylinders). Other acceptable scrapping methods may be considered and will require prior Division approval. This grant does not cover the cost of scrapping or remanufacturing the bus engine. If scrapping is to be sold, program income requirements apply.

- (ix) For any school bus to be replaced, the chassis must be scrapped or rendered permanently disabled within ninety (90) days of the replacement. Permanently disabling the chassis and the engine (see (viii) above), while retaining possession of the bus, is an acceptable scrapping method. Disabling the chassis may be completed by cutting through the frame/frame rails on each side at a point located between the front and rear axles. Other acceptable scrapping methods may be considered and will require prior Division approval. This grant does not cover the cost of scrapping or refurbishing the bus chassis. Components that are not part of the bus engine or chassis may be salvaged from the unit being replaced. If scrapping is to be sold, program income requirements apply.
- (x) Submit documentation on the decommissioning of the replaced school bus engine (as outlined in the above subparagraphs (viii) and (ix)) in projects that include early bus replacement.
- (xi) Submission of quarterly and final reports when requested.
- (xii) Compliance with applicable Federal procurement and subgrant procedures.
- (xiii) Use of the replacement school buses for a minimum of four years unless the vehicles become inoperable and are unable to be repaired.
- (xiv) If a 2010 engine model year (EMY) or newer bus is replaced, the 2010 EMY or newer bus may be retained by selling the bus within Georgia provided the 2010 EMY or newer bus replaces a pre-2009 EMY bus, and the pre-2009 EMY bus is scrapped. The retained bus must be sold, and the pre-2009 replacement bus must be located within Georgia. It is preferred that the scrapped unit currently operates within the same project location(s) as the 2010 EMY or newer vehicle currently operates, however alternative

scenarios will be considered. The option to sell a bus is only allowed if the NOx emission reduction benefits are retained or improved compared to the original application. A detailed scrappage plan must be submitted and approved by the Division prior to the sale. If the bus is sold, program income requirements apply.

(b) Eligible Recipients and Projects for the Grant.

1. An eligible applicant is any Georgia public school system that owns and operates school buses.
2. Eligible applicants can only receive funding for projects proposing to replace model year 2009 or older diesel school buses with school buses equipped with 2019 or newer model year engines; or replace 2021 or older diesel school buses with 2019 or newer low-NOx or zero emissions school buses.

(c) Match Requirements. Project applicants shall be required to match a minimum of 75% of the project cost to purchase early replacement school buses. Solicitations may include an additional voluntary cost share so that additional federal funds may be received.

(d) Criteria for the Award. In the event that the costs of the applications submitted for eligible projects exceed the available funding, EPD will determine the projects to be selected as follows:

1. First priority will be given for public school systems whose fleets are based in counties that have been designated as nonattainment for the 2015 Ozone National Ambient Air Quality Standards (NAAQS). The counties included are Bartow, Clayton, Cobb, DeKalb, Fulton, Gwinnett, and Henry.
2. Second priority will be given for public school systems whose fleets are based in counties that have been designated as maintenance for the 2008 Ozone NAAQS and attainment for the 2015 Ozone NAAQS. These counties are Cherokee, Coweta, Douglas, Fayette, Forsyth, Newton, Paulding, and Rockdale.
3. Third priority will be given for public school systems whose fleets are based in counties that have not been designated as nonattainment or maintenance for the 2008 or 2015 Ozone NAAQS.

4. Within each priority, applications will be ranked according to cost effectiveness of the project (cost per ton of emission reduced over the lifetime of the project).
- (e) **Deadline for Submittal.** EPD will issue the first solicitation for applications within 4 months of notice of criteria approval. Applications will be due within four weeks after release of the solicitation. Funding will be distributed based on the criteria for award between eligible applicants that reply within the first solicitation period. If funds remain after grants are awarded to all qualified projects from the first solicitation or additional funds are received for this program after the initial solicitation, additional solicitation(s) will be issued until all the funds have been obligated. For each solicitation, retrofit projects will be awarded based on the priority and order in which projects rank within the criteria selection process. The applications will be evaluated based on the criteria and requirements included in this paragraph 391-3-21-.15(8).
 - (f) **Directions for Submitting Applications for the Georgia Diesel Emission Reduction Program.** Requests for copies of the general guidelines and proposal forms and submittal of applications for the DERA Georgia Diesel Emission Reduction Program should be made to:

Georgia Environmental Protection Division

Planning and Support Program

4244 International Parkway, Suite 120

Atlanta, Georgia 30354
 - (g) Award of the Georgia Diesel Emission Reduction Program grants is subject to Federal funding provided to EPD. EPD may fund individual projects less than the requested amounts, if necessary, to distribute funds among equally ranked projects or to reduce the project cost to the maximum allowable distribution.
- (9) **Scope and Purpose.** Grants are available under the Diesel Emissions Reduction Act (DERA) State Clean Diesel Grant Program for replacing diesel school buses that are located or operated in the State of Georgia.
 - (a) **General Terms and Conditions of the Grant.**
 1. Projects submitted for funding under this Grant must identify the school bus(es) proposed for early replacement and the model year of the new replacement bus(es).

2. Submitted projects must conform to all applicable programmatic and administrative conditions including but not limited to those in this paragraph.
 - (i) Coordination with EPD personnel.
 - (ii) Any proposed school bus(es) must be certified by EPA or CARB to meet the eligibility requirements in (b)2.
 - (iii) Any proposed school bus(es) to be replaced must be diesel-powered and the model year must be 2022 or older.
 - (iv) Funds under this award cannot be used for emission reductions that result from school bus replacements that would have occurred through normal attrition/fleet turnover within three years of notice of criteria approval.
 - (v) Funds under this award cannot be used for the purchase of school buses to expand a fleet.
 - (vi) Any proposed replacement bus must perform the same function and operation as the bus or engine that is being replaced.
 - (vii) Any proposed replacement bus must be of the same type and similar gross vehicle weight rating or horsepower as the bus being replaced (e.g., replace Type D bus with another Type D bus). Alternately, the proposed replacement bus may be one type smaller and of less gross vehicle weight rating or horsepower as the bus being replaced (e.g., replace Type D bus with a Type C bus).
 - (viii) For any proposed school bus to be replaced, the bus engine must be scrapped or rendered permanently disabled within ninety (90) days of the replacement or returned to the original engine manufacturer for remanufacturing to a certified cleaner emission standard. Permanently disabling the engine, while retaining possession of the engine, is an acceptable scrapping method. Disabling the engine may be completed by cutting a three-inch hole in the engine block (the part of the engine containing the cylinders). Other acceptable scrapping methods may be considered and will require prior Division approval. This grant does not cover the cost of scrapping or remanufacturing the bus engine. If scrapping is to be sold, program income requirements apply.
 - (ix) For any school bus to be replaced, the chassis must be scrapped or rendered permanently disabled within ninety (90) days of the

replacement. Permanently disabling the chassis and the engine (see (viii) above), while retaining possession of the bus, is an acceptable scrapping method. Disabling the chassis may be completed by cutting through the frame/frame rails on each side at a point located between the front and rear axles. Other acceptable scrapping methods may be considered and will require prior Division approval. This grant does not cover the cost of scrapping or refurbishing the bus chassis. Components that are not part of the bus engine or chassis may be salvaged from the unit being replaced. If scrapping is to be sold, program income requirements apply.

- (x) Submit documentation on the decommissioning of the replaced school bus engine (as outlined in the above subparagraphs (viii) and (ix)) in projects that include early bus replacement.
- (xi) Submission of quarterly and final reports when requested.
- (xii) Compliance with applicable Federal procurement and subgrant procedures.
- (xiii) Use of the replacement school buses for a minimum of four years unless the vehicles become inoperable and are unable to be repaired.
- (xiv) If a 2010 engine model year (EMY) or newer bus is replaced, the 2010 EMY or newer bus may be retained by selling the bus within Georgia provided the 2010 EMY or newer bus replaces a pre-2009 EMY bus, and the pre-2009 EMY bus is scrapped. The retained bus must be sold, and the pre-2009 replacement bus must be located within Georgia. It is preferred that the scrapped unit currently operates within the same project location(s) as the 2010 EMY or newer vehicle currently operates, however alternative scenarios will be considered. The option to sell a bus is only allowed if the NOx emission reduction benefits are retained or improved compared to the original application. A detailed scrapping plan must be submitted and approved by the Division prior to the sale. If the bus is sold, program income requirements apply.

(b) Eligible Recipients and Projects for the Grant.

1. An eligible applicant is any Georgia public school system that owns and operates school buses.

2. Eligible applicants can only receive funding for projects proposing to replace engine model year 2009 or older diesel school buses with school buses equipped with 2019 or newer model year engines; or replace 2022 or older diesel school buses with 2019 or newer low-NOx or zero emissions school buses.
- (c) Match Requirements. Project applicants shall be required to match a minimum of 75% of the project cost to purchase early replacement school buses. Solicitations may include an additional voluntary cost share so that additional federal funds may be received.
- (d) Criteria for the Award. In the event that the costs of the applications submitted for eligible projects exceed the available funding, EPD will determine the projects to be selected as follows:
1. First priority will be given for public school systems whose fleets are based in counties that have been designated as nonattainment for the 2015 Ozone National Ambient Air Quality Standards (NAAQS). The counties included are Bartow, Clayton, Cobb, DeKalb, Fulton, Gwinnett, and Henry.
 2. Second priority will be given for public school systems whose fleets are based in counties that have been designated as maintenance for the 2008 Ozone NAAQS and attainment for the 2015 Ozone NAAQS. These counties are Cherokee, Coweta, Douglas, Fayette, Forsyth, Newton, Paulding, and Rockdale.
 3. Third priority will be given for public school systems whose fleets are based in counties that have not been designated as nonattainment or maintenance for the 2008 or 2015 Ozone NAAQS.
 4. Within each priority, applications will be ranked according to cost effectiveness of the project (cost per ton of emission reduced over the lifetime of the project).
- (e) Deadline for Submittal. EPD will issue the first solicitation for applications within 4 months of notice of criteria approval. Applications will be due within four weeks after release of the solicitation. Funding will be distributed based on the criteria for award between eligible applicants that reply within the first solicitation period. If funds remain after grants are awarded to all qualified projects from the first solicitation or additional funds are received for this program after the initial solicitation, additional solicitation(s) will be issued until all the funds have been obligated. For each solicitation, retrofit projects will be awarded based on the priority and order in which projects rank within the criteria selection process. The applications will be evaluated based on the criteria and requirements included in this paragraph 391-3-21-.15(9).

- (f) Directions for Submitting Applications for the Georgia Diesel Emission Reduction Program. Requests for copies of the general guidelines and proposal forms and submittal of applications for the DERA Georgia Diesel Emission Reduction Program should be made to:

Georgia Environmental Protection Division

Planning and Support Program

4244 International Parkway, Suite 120

Atlanta, Georgia 30354

- (g) Award of the Georgia Diesel Emission Reduction Program grants is subject to Federal funding provided to EPD. EPD may fund individual projects less than the requested amounts, if necessary, to distribute funds among equally ranked projects or to reduce the project cost to the maximum allowable distribution.

Rule 391-3-21-.16. Georgia High Hazard Potential Dams Grant.

- (1) Statutory Basis: National Dam Safety Program Act (Pub. L. 92-367), as amended, [33 U.S.C. 467f-2](#), and the Georgia Safe Dams Act of 1978, O.C.G.A. Sec. [12-5-370](#) et seq.
- (2) General Scope and Purpose. Grants are available under the Georgia High Hazard Potential Dams (HHPD) Grant for the rehabilitation of eligible high hazard potential dams located in the State of Georgia. The funding source for these grants is provided to the Environmental Protection Division (the "Division") by the U.S. Department of Homeland Security, Federal Emergency Management Agency ("FEMA"). The types of activities that may be funded by this grant include technical, planning, design, pre-construction and construction activities related to the rehabilitation of eligible high hazard dams.

- (a) The term "eligible high hazard potential dam" is defined under [33 U.S.C. § 467\(4\)\(A\)](#). The Division has published a list of such dams on its webpage and will update this list periodically. This list will include high hazard potential dams that the Division has determined fail to meet minimum dam safety standards and pose an unacceptable risk to the public, as defined by FEMA.
 - (b) Rehabilitation may include the repair, replacement, reconstruction, or removal of a dam; rehabilitation does not include routine operation and maintenance activities.
- (3) General Terms and Conditions of the Grant.
- (a) Projects submitted for funding under this Grant must clearly identify the eligible high hazard dam proposed for rehabilitation.
 - (b) Submitted projects must conform to all applicable programmatic and administrative conditions of the grant program, including but not limited to the following:
 1. An applicant must coordinate early and often with EPD personnel.
 2. An applicant must act in accordance with the Georgia Safe Dams Act and Georgia's Rules for Dam Safety, Chapter 391-3-8.
 3. An applicant must participate in, and comply with, all applicable federal flood insurance programs.
 4. An applicant must commit to provide operation and maintenance of the project for the 50-year period following completion of rehabilitation (or the expected life of the dam) and provide assurance that the owner of the dam has developed and will carry out a plan for maintenance of the dam during the expected life of the dam. For projects that do not involve construction, and are limited to planning and/or design, the applicant may meet this requirement through a commitment letter to provide operation and maintenance once the dam rehabilitation moves into construction. If the rehabilitation involves removal of the dam, then this requirement does not apply.
 5. An applicant must have a floodplain management plan in place to reduce the impacts of future flood events in the area protected by the project, or the applicant must commit to developing a floodplain management plan not later than one year after the date of execution of the project agreement and implementing the plan not later than one year after the date of completion of the project.
 6. An applicant must have in place (by the application deadline and at the time of obligation of grant funds) a FEMA-approved hazard mitigation plan that

includes all dam risks and complies with the Disaster Mitigation Act of 2000. Nonprofit organizations that are applicants must be located in a local jurisdiction with a FEMA-approved hazard mitigation plan that includes all dam risks and complies with the Disaster Mitigation Act of 2000. If an applicant does not have a local mitigation plan that includes all dam risks, the applicant may request an extension to meet this requirement where certain extraordinary circumstances defined by FEMA may apply.

7. An applicant must submit quarterly progress reports throughout the duration of the project pursuant to a schedule provided by the Division.
8. An applicant must comply with applicable Federal procurement and subgrant procedures. This may include compliance with federal requirements regarding contractor and subcontractor wages ([42 U.S.C. § 5196\(j\)\(9\)](#)) and selection of architects and engineers (40 U.S.C. §§ 1101-1104).

(4) Eligible Recipients and Dams for the Grant.

- (a) An eligible applicant shall be a state or local governmental organization or nonprofit organization. Private dam owners that do not qualify as nonprofit organizations will need to enlist the support of a local government or nonprofit sponsor who can serve as the applicant for the project and can meet the grant conditions of paragraph (3)(b).
- (b) The dam proposed for rehabilitation must have an emergency action plan approved by the Division.
- (c) The dam proposed for rehabilitation shall not be a licensed hydroelectric dam, or a dam built under the authority of the Secretary of Agriculture.
- (d) Match Requirements. Funding is available for up to 65 percent of the eligible activity costs. Project applicants shall be required to match a minimum of 35% of the project cost through non-federal sources, which may be in-kind. Requirements for cash and third-party in-kind contributions can be found in [2 C.F.R. § 200.306](#).

(5) Criteria for the Award.

- (a) Award of the Georgia High Hazard Potential Dams (HHPD) Grant is subject to federal funding provided to the Division and funding is limited. Therefore, a prioritization process will be used to ensure that the most appropriate projects are selected for funding from among the applications received. The Division may fund individual projects at less than the requested amounts, if necessary, to distribute funds among selected projects.

- (b) In the event that the costs of the applications submitted for eligible projects exceed the available funding, EPD will prioritize projects for selection using the following criteria:
1. Category I dams that are unpermitted, provided that the application commits to bringing the dam into full compliance with the Georgia Safe Dams Act.
 2. The Population at Risk (PAR) associated with each dam.
 3. The anticipated losses avoided due to rehabilitation of the dam.
- (6) Directions and deadlines for applications.
- (a) Applicants interested in applying for the Georgia High Hazard Potential Dams Grant should contact the Division's Safe Dams Unit or visit the Division's website for specific application assistance. Any project proposal that does not satisfy all grant criteria or does not follow the Division's application requirements may not be reviewed or considered for funding. Applications should be submitted to:
- Georgia Environmental Protection Division
- Regulatory Support Program
- ATTN: Safe Dams Unit
- 2 Martin Luther King Jr. Drive, SE
- Suite 1152 East
- Atlanta, Georgia 30354
- (b) Deadline for submitted applications: The Division will announce the availability of this grant and provide instructions and the deadline for submittal of applications within 4 months of publication of this program description. Funding will be distributed based on the criteria for award between eligible applicants that reply within the first solicitation period. If funds remain after grants are awarded to all qualified projects from the first solicitation or additional funds are received for this program after the initial solicitation, additional solicitation(s) will be issued until all the funds have been obligated.

Rule 391-3-21-.17. Solid Waste Trust Fund Grant Program.

- (1) Statutory Authority: O.C.G.A. [12-8-27.1](#) and O.C.G.A. [12-8-37.1](#)
- (2) General Scope and Purpose. The purpose of this grant is to provide financing to the entities described in O.C.G.A. [12-8-37.1](#) for the purposes identified in that Code section.
- (3) General Terms and Conditions of the Grant. The terms and conditions of the grant are:
 - (a) Grants will be made to entities identified as eligible in O.C.G.A. [12-8-37.1](#) to support projects that further the purposes of the Solid Waste Trust Fund as described in that Code section including: the cleanup of solid waste disposal facilities, including those used for the disposal of scrap tires; the development and implementation of solid waste enforcement programs for the prevention and abatement of illegal dumping of solid waste, including without limitation the prevention and abatement of litter; the funding of grants or loans, in accordance with procedures developed by the division; the implementation of innovative technologies for the recycling and reuse of solid waste, including without limitation scrap tires; and/or for educational and other efforts to promote waste reduction, recycling, and recycling market development.
 - (b) Grants will be awarded each year subject to the amount of funds available that year to support the Solid Waste Trust Fund Grant Program. Eligible applicants may apply for any amount up to the maximum available in that year.
 - (c) The grant may pay up to 100% of project costs, subject to available funding, maximum limitations, and match requirements.
 - (d) Further terms and conditions for the Solid Waste Trust Fund Grant Program may be described in publications on the Environmental Protection Division's website at: <https://epd.georgia.gov/about-us/land-protection-branch>
- (4) Eligible Recipients. Eligible recipients of competitive grants are those described as eligible in 12-8-37.1. Local governments also must be designated by the Georgia Department of Community Affairs as having Qualified Local Government Status, in compliance with the requirements of the Georgia Planning Act of 1989, to be eligible.
- (5) Criteria for the Award.
 - (a) The following minimum eligibility criteria apply to all grant applications:
 1. The application must describe the need, purpose, and objective of the proposed activity.
 2. The application must include details regarding the specific activities or categories of activities to be carried out with grant assistance.

3. The application must include a detailed budget outlining all anticipated sources of project funding as well a detailed line-item estimate of all expenses.
 4. The application must include a detailed project schedule including start date, completion date and intermediate milestones.
 5. The application must describe how the projects for which grant funds are requested support the Solid Waste Trust Fund purposes identified in O.C.G.A. [12-8-37.1](#).
- (b) Applications may be prioritized for funding based on the following additional criteria:
1. A clear demonstration of the need for the project in the proposed affected community(ies).
 2. Community investment has been established through a documented financial or in-kind match.
 3. The steps for project implementation are adequately identified and, if followed, are likely to result in the achievement of the outlined goals and objectives.
 4. The project description includes clear metrics for success that are appropriate and, if achieved, will have a significant impact on achieving the Solid Waste Trust Fund purposes as described in 12-8-37.1.
 5. The project is cost effective, and the benefits are likely to be sustainable.
- (c) Applications may be assigned bonus points in the prioritization assessment for:
1. Projects that use Georgia-based suppliers for products and services.
 2. Regional or multi-jurisdictional project proposals jointly submitted by two or more local governments.
 3. Demonstrating coordination with the local solid waste management plan or other recycling, waste reduction and/or diversion projects and activities.
 4. Bringing together new resources or innovative approaches to recycling, waste reduction, and diversion.
 5. Applicants that have or who have partners for the proposed project who have "buy recycled" ordinances, policies, practices, and procedures.

6. Project proposals that demonstrate additional environmental benefits including, but not limited to, water conservation, emissions reduction, and energy conservation.

- (6) Directions and Deadlines for Applying. Awards will be made annually as funds allow and deadlines will vary. Requests for information and applications should be directed to the:

Subject 391-3-23. PETROLEUM PIPELINE EMINENT DOMAIN PERMIT PROCEDURES.

Rule 391-3-23-.01. Purpose.

The following rule serves to protect Georgia's natural and environmental resources by requiring permits be issued by the Director with monitoring conditions prior to any construction of a new petroleum pipeline or an extension to an existing petroleum pipeline.

Cite as Ga. Comp. R. & Regs. R. 391-3-23-.01

Authority: O.C.G.A. § [12-17-1](#), *et seq.*, as amended.

History. Original Rule entitled "Purpose" adopted. F. Jun. 18, 1996; eff. July 8, 1996.

Amended: F. May 29, 2018; eff. June 18, 2018.

Rule 391-3-23-.02. Definitions.

- (1) `Corridor of Public Utilities' means right of way for electric, telephone, and cable facilities and pipelines such as natural gas, liquid product, sewer and water.
- (2) `Director' means the Director of the Environmental Protection Division of the Georgia Department of Natural Resources.
- (3) `Division' means the Environmental Protection Division of the Georgia Department of Natural Resources.
- (4) `Existing petroleum pipeline' means a petroleum pipeline constructed and in use prior to January 1, 2016.
- (5) `Expansion' means a modification to an existing petroleum pipeline within the existing easement or right of way that increases the supply of petroleum by:
 - (a) Increasing the diameter of an existing petroleum pipeline; or
 - (b) Constructing a parallel petroleum pipeline.
- (6) `Extension' means a modification to an existing petroleum pipeline that increases the length or footprint of the existing petroleum pipeline by a distance greater than one linear mile.
- (7) `Maintenance' means:
 - (a) The care or upkeep of an existing petroleum pipeline and its appurtenances;
 - (b) The replacement of an existing petroleum pipeline within the same easement or right of way; or
 - (c) The relocation of an existing petroleum pipeline for repair within one linear mile of the existing petroleum pipeline's alignment.
- (8) `New petroleum pipeline' means a petroleum pipeline that was not constructed and in use prior to January 1, 2016. The term 'new petroleum pipeline' shall not include an expansion, an extension, or any maintenance.
- (9) `Parallel petroleum pipeline' means a petroleum pipeline that runs side by side to an existing petroleum pipeline.
- (10) `Petroleum Product' means any mixture of naturally occurring or artificially produced refined hydrocarbons that are liquid at atmospheric temperatures and pressures.
- (11) `Petroleum pipeline' means a fixed conduit constructed to transport petroleum or petroleum products in or through this state.
- (12) `Petroleum Pipeline Company' means a corporation, partnership, or other business entity organized under the laws of this state or which is organized under the laws of another

state and is authorized to do business in this state and which is specifically authorized by its charter or articles of incorporation to construct and operate pipelines for the transportation of petroleum or petroleum products.

- (13) `Pipeline Facility' or `Pipeline Facilities' means and includes the pipeline and all equipment or facilities, including lateral lines, essential to the operation of the pipeline but shall not include any storage tank or storage facility which is not being constructed as a part of the operation of the pipeline.
- (14) `Professional Engineer' means a person registered to practice engineering in the State of Georgia in accordance with Chapter 15 of Title 43 of the Official Code of Georgia Annotated.
- (15) `Professional Geologist' means a person registered to practice geology in the State of Georgia in accordance with Chapter 19 of Title 43 of the Official Code of Georgia Annotated.

Amended: New title "Definitions." F. May 29, 2018; eff. June 18, 2018.

Rule 391-3-23-.03. Permit Application.

- (1) On or after July 1, 2017, any construction of a new petroleum pipeline or an extension in this state shall require a permit from the Director as provided in this chapter. No construction activity on any portion of a new petroleum pipeline or any extension shall occur unless and until such permit is obtained. Such permit shall be required without regard to whether the petroleum pipeline company intends to exercise any power of eminent domain pursuant to Article 4 of Chapter 3 of Title 22 and shall be in addition to any other permits or authorization required under this title or any other provision of state or federal law.
- (2) Any application to the division for a permit under this chapter shall contain, at a minimum, the following:
 - (a) A non-refundable permit application fee of \$5000.00.
 - (b) A description of the proposed project, including its route sufficiently adequate to permit the location of the subject parcel on a United States Geological Survey 1:24,000 topographic quadrangle map;
 - (c) Copies of any relevant background data on engineering or environmental studies in the possession of or used by the pipeline company to select or develop the proposed pipeline route and/or prepare the permit application.

- (d) Information on other corridors of public utilities.
 - (e) Information on the existence of any local zoning ordinances or land use restrictions and whether or not the pipeline company is in compliance with local zoning ordinances or land use restrictions.
 - (f) Evidence of financial responsibility by the petroleum pipeline company as described in the most current version of the Division's Petroleum Pipeline Permit Guidelines;
 - (g) Description of proposed construction activities
 - (h) A proposal, where appropriate, for monitoring the effects of the petroleum pipeline during construction on the surrounding environment and natural resources, including but not limited to wetland dewatering, sinkhole inducement, impact on protected plants and animals, pollutant pathways, and stream siltation. No proposal is necessary for leak detection or any other monitoring required by federal regulations.
 - (i) Include an objective evaluation of the environmental effects of all reasonable alternatives, and for alternatives which were eliminated from detailed study, briefly discuss the reasons for their having been eliminated. Include the alternative of no action.
 - (j) A geologic and hydrologic analysis of the proposed pipeline route.
 - (k) An environmental analysis, include a discussion of all of the areas identified and described in the most current version of the Division's Petroleum Pipeline Permit Guidelines.
 - (l) Means to mitigate adverse environmental impacts
- (3) The permit application shall be prepared under the direction of and shall be signed and sealed by a professional engineer or a professional geologist.
- (4) Permit applications shall be made available for a 30 day public comment period prior to submitting to EPD. The submitted application shall include a summary of all public comments received and a discussion of how those comments have been addressed.
- (5) Within ten days of applying for a permit, the applicant shall provide:
- (a) Public notice in the legal organ of each county through which the proposed route of the new petroleum pipeline or of the extension is to be located; and
 - (b) Written notice of the filing of an application under this Code section to all landowners whose property is located within 1,000 feet of the proposed route of

the new petroleum pipeline or of the extension. Such notice shall be delivered to each landowner and contain the following language in boldface type:

'YOUR PROPERTY IS LOCATED WITHIN 1,000 FEET OF A PROPOSED PETROLEUM PIPELINE FOR WHICH AN APPLICATION FOR A PERMIT HAS BEEN FILED PURSUANT TO CHAPTER 17 OF TITLE 12 OF THE OFFICIAL CODE OF GEORGIA ANNOTATED. SAID CHAPTER ALONG WITH ARTICLE 4 OF CHAPTER 3 OF TITLE 22 OF THE OFFICIAL CODE OF GEORGIA ANNOTATED PROVIDE SPECIFIC REQUIREMENTS WHICH MUST BE FOLLOWED BY PETROLEUM PIPELINE COMPANIES BEFORE THEY MAY BUILD A NEW PETROLEUM PIPELINE OR MODIFY AN EXISTING PETROLEUM PIPELINE. THESE PROVISIONS OF THE OFFICIAL CODE OF GEORGIA ANNOTATED ALSO PROVIDE SPECIFIC RIGHTS FOR YOUR PROTECTION. YOU SHOULD FAMILIARIZE YOURSELF WITH THOSE REQUIREMENTS AND YOUR RIGHTS.'

- (c) In the event that any landowner who, after reasonable efforts, cannot personally be given the notice required in [391-3-23-.04\(5\)\(b\)](#), the applicant shall cause to be posted in a conspicuous location in the city hall and/or court house for municipal or county government(s) in which such parcels are located a copy of the proposed route of the new petroleum pipeline or of the extension with all parcels within 1,000 feet of such route clearly marked, along with the following language in boldface type:

'THE PARCELS INDICATED ON THE ATTACHED MAP ARE LOCATED WITHIN 1,000 FEET OF A PROPOSED PETROLEUM PIPELINE FOR WHICH AN APPLICATION FOR A PERMIT HAS BEEN FILED PURSUANT TO CHAPTER 17 OF TITLE 12 OF THE OFFICIAL CODE OF GEORGIA ANNOTATED. SAID CHAPTER ALONG WITH ARTICLE 4 OF CHAPTER 3 OF TITLE 22 OF THE OFFICIAL CODE OF GEORGIA ANNOTATED PROVIDE SPECIFIC REQUIREMENTS WHICH MUST BE FOLLOWED BY PETROLEUM PIPELINE COMPANIES BEFORE THEY MAY BUILD A NEW PETROLEUM PIPELINE OR MODIFY AN EXISTING PETROLEUM PIPELINE. THESE PROVISIONS OF THE OFFICIAL CODE OF GEORGIA ANNOTATED ALSO PROVIDE SPECIFIC RIGHTS FOR PROTECTION FOR AFFECTED LANDOWNERS. YOU SHOULD FAMILIARIZE YOURSELF WITH THOSE REQUIREMENTS AND YOUR RIGHTS.'

History. Original Rule entitled "Definitions" adopted. F. Jun. 18, 1996; eff. July 8, 1996.

Amended: New title "Permit Application." F. May 29, 2018; eff. June 18, 2018.

[Rule 391-3-23-.04. Permit Issuance.](#)

- (1) This permit shall be issued on the basis of a determination by the Director that the location and construction of the proposed pipeline, which is the subject of the application, is consistent with and not an undue hazard to the environment and natural resources of Georgia. This determination shall be made after consideration of:
 - (a) The information required to be contained in the petroleum pipeline company's application;
 - (b) The direct environmental impacts of the proposed new petroleum pipeline or the proposed extension;
 - (c) Alternative alignments to the proposed new petroleum pipeline or the proposed extension;
 - (d) Evidence that ample opportunity has been afforded for public comment;
 - (e) Such other factors that the director deems reasonable and applicable.
- (2) The applicant shall bear the burden of proof to demonstrate that the director should issue the permit.
- (3) The director's decision shall be based on the record before the director, which shall include, but not be limited to, the applicant's submissions, written comments submitted to the director, and research the director may conduct in analyzing the application.
- (4) Within seven days of the receipt of an application the Director has determined to be complete and filed, the Director shall provide for reasonable public notice of the application and the proposed route. The public notice of the application also shall make provisions for a public hearing on the application for the permit. The hearing shall be within sixty days of the date of the public notice of the application. Any interested person may submit written comments on the proposed pipeline prior to the date of the public hearing.
- (5) The Director may request reasonable additional application information from the pipeline company in order to make the determination to issue a permit. If possible, any such request shall be within 45 days of the receipt of the application.
- (6) In the event a permit application, which the Director has determined to be complete and filed, is not approved or denied within 150 days of the date of the publication of the public notice of the application as provided in O.C.G.A. [12-17-6\(b\)](#), the application shall be deemed approved by operation of law and the permit deemed issued. The permit application information shall be provided to the Division in a timely manner so that the Director may have up to 150 days to assess the environmental effects report; to assess other information deemed relevant by the Director; to hold hearings; and to issue or deny the permit.

Amended: New title "Permit Issuance." F. May 29, 2018; eff. June 18, 2018.

Rule 391-3-23-.05. Permit Amendment.

- (1) If, during the course of construction, conditions arise which result in a material or substantial change of any of the bases of the approved permit (including, but not limited to, deviation from the original route that goes out of the original easement or right of way, change of ownership, or new information that impacts the environmental analysis) the applicant will submit a request for a permit amendment describing the change and the reasons for the change.
- (2) After review and determination that sufficient information exists to justify that the amendment is necessary and does not require a new permit application, the Director will post for 30 days a notice of the draft amendment for public comment on the web site. After close of the public comment period, the Director will grant or deny the amendment.
- (3) If the proposed amendment results in additional landowners whose property will be located within 1,000 feet of the proposed route the applicant shall comply with provisions of [391-3-23-.03\(5\)](#).

Rule 391-3-23-.06. Hearings and Appeals.

- (1) As used in this Code section, the term 'aggrieved or adversely affected' means a challenged action has caused or will cause persons injury in fact and where the injury is to an interest within the zone of interests to be protected or regulated by the provisions of this chapter that the director is empowered to administer and enforce.
- (2) Any person who is aggrieved or adversely affected by a decision or action of the director under this chapter shall, upon filing a petition within 30 days after the issuance of such order or taking of such action, have a right to a hearing before an administrative law judge appointed by the board. The hearing before the administrative law judge shall be conducted in accordance with Chapter 13 of Title 50, the 'Georgia Administrative Procedure Act.' The decision of the administrative law judge shall constitute the final decision of the director, and any party to the hearing, including the department, shall have the right of judicial review thereof in accordance with Chapter 13 of Title 50, the 'Georgia Administrative Procedure Act.'

- (3) In the event the director asserts in response to the petition before the administrative law judge that the petitioner is not aggrieved or adversely affected, the administrative law judge shall take evidence and hear arguments on this issue and thereafter make a ruling on same before continuing with the hearing. The burden of going forward with evidence on this issue shall rest with the petitioner.

Subject 391-3-24. LEAD-BASED PAINT HAZARD MANAGEMENT.

[Rule 391-3-24-.01. Scope and Applicability.](#)

- (1) These Rules contain procedures and requirements for the accreditation of renovation and lead-based paint activities training programs, procedures and requirements for the certification of persons and firms engaged in renovation and lead-based paint activities, and standards for performing such activities. These Rules also contain requirements that all renovation and lead-based paint activities performed for compensation in target housing and child-occupied facilities shall be performed by certified persons and lead or renovation firms. No person or firm shall offer to perform renovation or lead-based paint activities without obtaining the certification and training required in these Rules. These Rules do not require the mandatory abatement of lead-based paint.
- (2) These Rules are applicable to all persons and firms who are engaged in renovation and lead-based paint activities as defined in Rule [391-3-24-.03](#), except persons who perform these activities within residential dwellings that they own, unless the residential dwelling

is occupied by a person or persons other than the owner or owner's immediate family while these activities are being performed, or a child residing in the residential dwelling has been identified as having an elevated blood lead level. Each department, agency, and instrumentality of the executive, legislative, and judicial branches of the State of Georgia having jurisdiction over any property or facility, or engaged in any activity resulting, or which may result, in a lead-based paint hazard, and each officer, agent, or employee thereof, shall be subject to, and comply with all requirements, both substantive and procedural, regarding lead-based paint, lead-based paint activities, and lead-based paint hazards.

- (3) The information distribution requirements in Rule [391-3-24-.08](#) are to ensure that owners and occupants of target housing and child-occupied facilities receive information on lead-based paint hazards before renovations begin.
- (4) The training and certification requirements, the standards for performing renovation activities and associated pre-notification education and record keeping requirements under Rule [391-3-24-.04](#) and Rules [391-3-24-.08](#) through [391-3-24-.11](#) apply to all renovations performed for compensation in target housing and child-occupied facilities, except for the following:
 - (a) Renovations in target housing or child-occupied facilities in which a written determination has been made by a certified inspector or certified risk assessor that the components affected by the renovation are free of paint or other surface coatings that contain lead equal to or in excess of 1.0 milligrams per square centimeter (mg/cm^2) or 0.5 percent (0.5%) by weight, where the certified renovation firm performing the renovation has obtained a copy of the determination.
 - (b) Renovations in target housing or child-occupied facilities in which a certified renovator, using an EPA recognized test kit and following the kit manufacturer's instructions, has tested each component affected by the renovation and determined that the components are free of paint or other surface coatings that contain lead equal to or in excess of 1.0 milligrams per square centimeter (mg/cm^2) or 0.5 percent (0.5%) by weight. If the components make up an integrated whole, such as the individual stair treads and risers of a single staircase, the renovator is required to test only one of the individual components, unless the individual components appear to have been repainted or refinished separately.
- (5) The information distribution requirements in Rule [391-3-24-.08](#) do not apply to emergency renovation activities. Emergency renovations other than interim controls are exempt from the warning sign, containment, waste handling, training, and certification requirements in Rule [391-3-24-.10](#) to the extent necessary to respond to the emergency. Interim controls performed in response to an elevated blood lead level in a resident child are also emergency renovations. Emergency renovations are not exempt from the cleaning requirements of Rule [391-3-24-.10](#), which must be performed by certified renovators or trained individuals, the cleaning verification requirements of Rule [391-3-](#)

[24-.10](#), which must be performed by certified renovators, and the recordkeeping requirements of Rule [391-3-24-.11](#).

Repealed: New Rule of the same title adopted. F. Nov. 19, 2010; eff. Dec. 9, 2010.

Rule 391-3-24-.02. Enforcement.

- (1) The administration and enforcement of these Rules shall be in accordance with the Georgia Lead Poisoning Prevention Act of 1994, O.C.G.A. [31-41-1](#) *et seq.*, as amended, the Executive Reorganization Act of 1972, O.C.G.A. [12-2-1](#), *et seq.*, and the Georgia Administrative Procedures Act, O.C.G.A. [50-13-1](#), *et seq.*
- (2) Persons and firms conducting renovation or lead-based paint activities shall permit the Division to enter, evaluate, sample and monitor any renovation and lead-based paint activity and have access to records specified in this section without charge or hindrance to the Division for the purposes of evaluating compliance with these Rules. The Division shall perform periodic and unannounced inspections of renovation and lead-based paint activities, lead firms, renovation firms, training providers and lead training courses.

Rule 391-3-24-.03. Definitions.

- (1) "Abatement" means any measures or set of measures designed to permanently eliminate lead-based paint or lead-based paint hazards. Abatement includes, but is not limited to:
 - (a) The removal of lead-based paint and lead contaminated dust, the permanent enclosure or encapsulation of lead-based paint, the replacement of lead-painted surfaces or fixtures, and the removal or permanent covering of soil, when lead-based paint hazards are present in such paint, dust or soil; and
 - (b) All preparation, clean-up, disposal, and post-abatement clearance testing activities associated with such measures; and

- (c) Specifically, abatement in target housing and child-occupied facilities includes, but is not limited to:
1. Projects for which there are written contracts or other documentation, which provides that an individual or firm certified in accordance with Rule [391-3-24.05](#) will be conducting activities in or to a residential dwelling or child-occupied facility that:
 - (i) Shall result in the permanent elimination of lead-based paint, or lead-based paint hazards; or
 - (ii) Are designed to permanently eliminate lead-based paint or lead-based paint hazards and are described in paragraphs (a) and (b) of this definition.
 2. Projects involving and/or resulting in the permanent elimination of a lead-based paint hazard, or intact lead-based paint equal to or greater than 1.0 milligram(s) per square centimeter (mg/cm²) or equal to or greater than 0.5 percent (0.5%) by weight, conducted by firms or persons certified in accordance with [391-3-24.05](#), unless such projects are covered by subsection (d) of this definition;
 3. Projects involving and/or resulting in the permanent elimination of a lead-based paint hazard, or intact lead-based paint equal to or greater than 1.0 milligram(s) per square centimeter (mg/cm²) or equal to or greater than 0.5 percent (0.5%) by weight, conducted by firms or persons who, through their company name or promotional literature, or otherwise represent, advertise, or hold themselves to be in the business of performing lead-based paint activities as defined by these Rules, unless such projects are covered by subsection (d) of this definition; or
 4. Projects involving and/or resulting in the permanent elimination of lead-based paint hazards or lead-based paint, that are conducted in response to State or local abatement orders.
- (d) Abatement does not include renovation, remodeling, landscaping or other activities, when such activities are not designed to permanently eliminate lead-based paint hazards, but instead are designed to repair, restore, or remodel a given structure or dwelling, even though these activities may incidentally result in a reduction or elimination of lead-based paint hazards. Furthermore, abatement does not include interim controls, operations and maintenance activities, or other measures and activities designed to temporarily, but not permanently, reduce lead-based paint hazards.
- (2) "Accessible surface" means an interior or exterior surface painted with lead-based paint that is accessible for a child, six (6) years of age or younger, to mouth or chew.

- (3) "Accredited training program" means a training program that has been accredited by the Division pursuant to section 391-3-24-.04 to provide training for persons engaged in renovation or lead-based paint activities.
- (4) "Adequate quality control" means a plan or design to ensure the authenticity, integrity, and accuracy of samples, including dust, soil, and paint chip or paint film samples. Adequate quality control also includes provisions for representative sampling.
- (5) "Agent-in-Charge" means the most responsible person at the location or activity being inspected with the direct responsibility for the property or the activity taking place, e.g., lead supervisor.
- (6) "Arithmetic Mean" means the number obtained by dividing the sum of a set of quantities or concentrations (such as wipe sample concentrations) by the number of quantities or concentrations in the set.
- (7) "Certificate of mailing" means proof of mailing and proof of delivery.
- (8) "Certified Dust Sampling Technician" means an individual who has been trained by an accredited training program, passed the course test, and certified by the Division to conduct dust sampling following renovation activities to meet clearance standards in Rule [391-3-24-.07](#).
- (9) "Certified Lead Firm" means a company, partnership, corporation, sole proprietorship, association, or other business entity that performs lead-based paint activities, to which the Division has issued a certificate of approval pursuant to section 391-3-24-.05.
- (10) "Certified Lead Inspector" means an individual who has been trained by an accredited training program and certified by the Division to conduct inspections. A lead inspector also samples for the presence of lead in paint, dust, and soil for the purposes of abatement clearance testing.
- (11) "Certified Lead Project Designer" means an individual who has been trained by an accredited training program, passed the course test, and certified by the Division to prepare abatement project designs, occupancy protection plans, and abatement reports.
- (12) "Certified Lead Risk Assessor" means an individual who has been trained by an accredited training program and certified by the Division to conduct risk assessments. A lead risk assessor also samples for the presence of lead in paint, dust, and soil for the purposes of abatement clearance testing.
- (13) "Certified Lead Supervisor" means an individual who has been trained by an accredited training program and certified by the Division to supervise and conduct abatements in target housing and child-occupied facilities and to prepare occupant protection plans and abatement reports.

- (14) "Certified Lead Worker" means an individual who has been trained by an accredited training program, passed the course test, and certified by the Division to perform abatement activities.
- (15) "Certified Renovation Firm" means a company, partnership, corporation, sole proprietorship, individual doing business, association, or other business entity; a Federal, State, Tribal, or local government agency; or a nonprofit organization that performs renovation activities to which the Division has issued a certificate of approval pursuant to Section 391-3-24-.09.
- (16) "Certified Renovator" means an individual who either performs or directs workers who perform renovations. A certified renovator is a renovator who has successfully completed a renovator course by an accredited training program, passed the course test, and been certified by the Division to perform renovation activities.
- (17) "Chewable surface" means an interior or exterior surface painted with lead-based paint that a child six (6) years of age or younger can mouth or chew. A chewable surface is the same as an "accessible surface" as defined in [42 U.S.C. 4851](#) b(2). Hard metal substrates and other materials that cannot be dented by the bite of a young child are not considered chewable.
- (18) "Child-occupied facility" means a building, or portion of a building constructed prior to 1978, visited by the same child, six years of age or under, on at least two different days within the same week (Sunday through Saturday period), provided each day's visit lasts at least three hours and the combined weekly visit lasts at least six hours. Child-occupied facilities include, but are not limited to, day-care centers, pre-schools and kindergarten classrooms.
- (19) "Cleaning verification card" means a card developed and distributed, or otherwise approved, by EPA for the purpose of determining, through comparison of wet and dry disposable cleaning cloths with the card, whether post-renovation cleaning has been properly completed.
- (20) "Clearance levels" means a value that indicates the amount of lead on a surface following completion of an abatement activity. To achieve clearance when dust sampling is required, values below these levels must be achieved.
- (21) "Commissioner" means the Commissioner of the Board of Natural Resources, Department of Natural Resources.
- (22) "Common area" means a portion of a building that is generally accessible to all occupants. Such an area may include, but is not limited to, hallways, stairways, laundry and recreational rooms, playgrounds, community centers, garages and boundary fences.
- (23) "Completion date" means the date on which all activities on a permitted lead-based paint abatement project requiring the use of certified persons are complete, including, but not

limited to, the complete disassembly of all removal area barriers, final clearance testing and disposal of all lead-based paint waste.

- (24) "Component or building component" means specific design or structural elements or fixtures of a building, residential dwelling, or child-occupied facility that are distinguished from each other by form, function, and location. These include, but are not limited to, interior components such as: ceilings, crown molding, walls, chair rails, doors, door trim, floors, fireplaces, radiators and other heating units, shelves, shelf supports, stair treads, stair risers, stair stringers, newel posts, railing caps, balustrades, windows and trim, including sashes, window heads, jambs, sills, stools and troughs, built-in cabinets, columns, beams, bathroom vanities, counter tops, and air conditioners; and exterior components such as: painted roofing, chimneys, flashing, gutters and downspouts, ceilings, soffits, fascias, rake boards, corner boards, bulkheads, doors and door trim, fences, floors, joists, lattice work, railings and railing caps, siding, handrails, stair risers and treads, stair stringers, columns, balustrades, window sills, casings, sashes, wells and troughs, and air conditioners.
- (25) "Concentration" means the relative content of a specific substance contained within a larger mass, such as the amount of lead (micrograms per gram or parts per million by weight) in a sample of dust or soil.
- (26) "Containment" means a process to protect the public, occupants, workers and the environment by controlling exposures to the lead-contaminated dust and debris created during an abatement.
- (27) "Course agenda" means an outline of the key topics to be covered during a training course, including the time allotted to teach each topic.
- (28) "Course test" means an evaluation of the overall effectiveness of the training, which shall test the trainees' knowledge and retention of the topic covered during the course.
- (29) "Course test blueprint" means written documentation identifying the proportion of course test questions devoted to each major topic in the course curriculum.
- (30) "Deteriorated paint" means any interior or exterior paint or other coating that is peeling, chipping, chalking or cracking or any paint or coating located on an interior or exterior surface or fixture that is otherwise damaged or separating from the substrate.
- (31) "Director" means the Director of the Environmental Protection Division of the Department of Natural Resources or his designees.
- (32) "Discipline" means one of the specific types or categories of lead-based paint activities identified in these Rules for which persons may receive training from accredited training programs and become certified by the Division. For example, "Lead worker" is a discipline.

- (33) "Distinct painting history" means the application history, as indicated by its visual appearance or a record of application, over time, of paint or other surface coatings to a component or room.
- (34) "Disturb" means to break up, burn, crush, cut into, dissolve, sand, scrape, abrade, remove, demolish, or otherwise manipulate a painted surface in a manner that generates dust, paint chips, or debris.
- (35) "Division" means the Environmental Protection Division of the Department of Natural Resources and shall where applicable include any contractors selected by the Division to carry out any provisions of these Rules.
- (36) "Documented methodologies" are current methods or protocols, e.g., ASTM E1728-03, used to sample for the presence of lead in paint, dust, and soil found in the following:
- (a) The U.S. Department of Housing and Urban Development (HUD);
 - (b) The Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing;
 - (c) The Environmental Protection Agency (EPA) Guidance on Residential Lead-Based Paint, Lead-Contaminated Dust, and Lead-Contaminated Soil and Residential Sampling for Lead: Protocols for Dust and Soil Sampling (EPA Report Number 7474-R-95- 001); and
 - (d) Regulations, guidance methods or protocols issued by States and Indian Tribes that have been authorized by the EPA; and other equivalent methods and guidelines.
- (37) "Dripline" means the area within 3 feet surrounding the perimeter of a building.
- (38) "Dry disposable cleaning cloth" means a commercially available dry, electrostatically charged, white disposable cloth designed to be used for cleaning hard surfaces such as uncarpeted floors or counter tops.
- (39) "Dust-lead hazard" means surface dust in a residential dwelling or child-occupied facility that contains a mass-per-area concentration of lead equal to or exceeding 10 micrograms per square foot ($\mu\text{g}/\text{ft}^2$), on floors or equal to or exceeding 100 micrograms per square foot ($\mu\text{g}/\text{ft}^2$), on interior window sills based on wipe samples.
- (40) "Elevated blood lead level (EBL)" means an excessive absorption of lead that is a confirmed concentration of lead in whole blood of 20 $\mu\text{g}/\text{dl}$ (micrograms of lead per deciliter of whole blood) for a single venous test or of 15-19 $\mu\text{g}/\text{dl}$ in two consecutive venous tests taken 3 to 4 months apart.

- (41) "Emergency lead-based paint abatement project" means a lead-based paint abatement project that has been determined by a lead risk assessor and the Division to be an imminent lead-based paint hazard to building occupants in a child-occupied facility.
- (42) "Emergency renovation project" means a renovation activity that was not planned but resulted from a sudden, unexpected event (such as non-routine failures of equipment) that, if not immediately attended to presents a safety or public health hazard, or threatens equipment and/or property with significant damage.
- (43) "Encapsulant" means a substance that forms a barrier between lead-based paint and the environment using a liquid-applied coating (with or without reinforcement materials) or an adhesively bonded covering material.
- (44) "Encapsulation" means the application of an encapsulant.
- (45) "Enclosure" means the use of rigid, durable construction materials that are mechanically fastened to the substrate in order to act as a barrier between lead-based paint and the environment.
- (46) "Floor" means the interior or exterior installed surface on which one stands, walks, crawls or plays. For exterior entrances, the term does not include sidewalks or uncovered porches (e.g. a porch with no roof).
- (47) "Friction Surface" means an interior or exterior surface that is subject to abrasion or friction, including, but not limited to, certain windows, floors and stair surfaces.
- (48) "Guest Instructor" means a person designated by the training manager or principal instructor to provide instruction specific to the lecture, hands-on activities or work practice components of a course.
- (49) "Hands-on skills assessment" means an evaluation, which tests the trainees' ability to satisfactorily perform the work practices and procedures identified in [391-3-24-.04](#) of these Rules.
- (50) "Hazardous waste" means any solid waste which has been defined as hazardous waste in regulations promulgated by Board of Natural Resources, Chapter 391-3-11.
- (51) "Health investigation" means the investigation of target housing or a child-occupied facility housing a child, six years of age or under, with an elevated blood lead level. The purpose of a health investigation is to identify a cause or causes for the lead poisoning of a child.
- (52) "HEPA vacuum" means a vacuum cleaner, which has been designed with a high-efficiency particulate air (HEPA) filter as the last filtration stage. A HEPA filter is a filter that is capable of capturing particles of 0.3 microns with 99.97 percent (99.97%) efficiency. The vacuum cleaner must be designed, so that all the air drawn into the machine is expelled through the HEPA filter with none of the air leaking past it.

- (53) "Impact surface" means an interior or exterior surface that is subject to damage by repeated sudden force, such as certain parts of door frames.
- (54) "Inspection" means a surface-by-surface investigation conducted by a lead inspector to determine the presence of lead-based paint and the provision of a report explaining the results of the investigation.
- (55) "Interim controls" means a set of measures designed to temporarily reduce human exposure or likely exposure to lead-based paint hazards including, but not limited to specialized cleaning, repairs, maintenance, painting, temporary containment, ongoing monitoring of lead-based paint hazards or potential hazards, standard treatments, and the establishment and operation of management and resident education programs.
- (56) "Interior window sill" means the portion of the horizontal window ledge that protrudes into the interior of the room.
- (57) "Lead-based paint (LBP)" means paint or other surface coatings that contain lead equal to or in excess of 1.0 milligram(s) per square centimeter (mg/cm²), or 0.5 percent (0.5%) by weight or 5000 parts per million (ppm).
- (58) "Lead-based paint abatement project" means the abatement of lead-based paint or lead-based paint hazards from one or more residential dwelling units and/or child-occupied facilities located within the same local government jurisdiction and submitted under a common project notification.
- (59) "Lead-based paint activities" means, in the case of target housing and child-occupied facilities, inspection, risk assessment, and abatement, as defined in this Rule. Lead-based paint activities do not include renovation, as defined in this Rule.
- (60) "Lead-based paint hazard" means any condition that causes exposure to lead from lead-contaminated dust, lead-contaminated soil, or lead-contaminated paint that is deteriorated or present in accessible surfaces, friction surfaces, or impact surfaces that would result in adverse human health effects as identified pursuant to Toxic Substance Control Act (TSCA) section 403.
- (61) "Lead-contaminated dust" means surface dust in residential dwellings or in child-occupied facilities that contain an area or mass concentration of lead at or in excess of levels identified pursuant to Rule [391-3-24-.07](#).
- (62) "Lead-contaminated soil" means bare soil on residential real property or on the property of a child-occupied facility that contains lead at or in excess of levels identified pursuant to Rule [391-3-24-.03\(85\)](#).
- (63) "Lead-hazard screen" is a limited risk assessment activity that involves limited paint and dust sampling as described in [391-3-24-.06\(3\)](#) of these Rules.

- (64) "Living Area" means any area of a residential dwelling used by one or more children age six (6) and under, including, but not limited to, living rooms, kitchen areas, dens, play rooms, and children's bedrooms.
- (65) "Loading" means the quantity of a specific substance present per unit of surface area, such as the amount of lead in micrograms contained in the dust collected from a certain surface area divided by the surface area in square feet or square meters.
- (66) "Mid-yard" means an area of a residential yard approximately midway between the dripline of a residential building and the nearest property boundary or between the driplines of a residential building and another building on the same property.
- (67) "Minor repair and maintenance activities" are activities, including minor heating, ventilation or air conditioning work, electrical work, and plumbing, that disrupt 6 square feet or less of painted surface per room for interior activities or 20 square feet or less of painted surface for exterior activities where none of the work practices prohibited or restricted in Rule [391-3-24-.10\(3\)\(c\)](#) are used and where the work does not involve window replacement or demolition of painted surface areas. When removing painted components, or portions of painted components, the entire surface area removed is the amount of painted surface disturbed. Jobs, other than emergency renovations, performed in the same room within the same 30 days must be considered the same job for the purpose of determining whether the job is a minor repair and maintenance activity.
- (68) "Multi-family dwelling" means a structure that has more than one separate dwelling unit, which is used or occupied, or intended to be used or occupied in whole or in part, as the home or residence of one or more persons.
- (69) "Occupant Protection Plan" means a written plan which describes the measure and management procedures that will be taken during abatement to protect building occupants from exposure to lead-based paint hazards. The plan shall be unique to each residential dwelling unit or child-occupied facility. For projects less than five units, the plan shall be prepared by a certified lead supervisor or certified lead project designer. For projects with five or more units, the plan shall be prepared by a lead project designer. The plan shall include the preparer's signature and certification number.
- (70) "Paint in poor condition" means more than ten (10) square feet of deteriorated paint on exterior components with large surface areas; or more than two (2) square feet of deteriorated paint on interior components with large surface areas (e.g., walls, ceilings, floors, doors); or more than 10 percent (10%) of the total surface area of the component is deteriorated on interior or exterior components with small surface areas (window sills, baseboards, soffits, trim).
- (71) "Paint-lead hazard" means any of the following:
- (a) Any lead-based paint on a friction surface that is subject to abrasion and where the lead dust levels on the nearest horizontal surface underneath the friction

surface (e.g., the window sill, or floor) are equal to or greater than the dust-lead hazard levels identified in the definition of dust-lead hazard.

- (b) Any damaged or otherwise deteriorated lead-based paint on an impact surface that is caused by impact from a related building component (such as a door knob that knocks into a wall or a door that knocks against its door frame).
 - (c) Any chewable lead-based painted surface on which there is evidence of teeth marks.
 - (d) Any other deteriorated lead-based paint in any residential building or child-occupied facility or on the exterior of any residential building or child-occupied facility.
- (72) "Pamphlet" means the EPA pamphlet titled Renovate Right: Important Lead Hazard Information for Families, Child Care Providers and Schools developed under section 406(a) of TSCA for use in complying with section 406(b) of TSCA or any Division pamphlet approved by EPA pursuant to [40 CFR 745.326](#) that is developed for the same purpose. This includes reproductions of the pamphlet when copied in full and without revision or deletion of material from the pamphlet except for the addition or revision of the Division's sources of information.
- (73) "Permanently covered soil" means soil which has been separated from human contact by the placement of a barrier consisting of solid, relatively impermeable materials, such as pavement or concrete. Grass, mulch and other landscaping materials are not considered permanent covering.
- (74) "Person" means the State of Georgia or any agency or instrumentality thereof, or any political subdivision, municipality, county, public or private corporation, authority, partnership, individual or association; any interstate body; or department, agency, or instrumentality of the Federal Government.
- (75) "Play Area" means an area of frequent soil contact by children six (6) years of age or less as indicated by, but not limited to, such factors including the following: the presence of play equipment (e.g., sandboxes, swing sets, and sliding boards), toys, or other children's possessions, observations of play patterns, or information provided by parents, residents, care givers, or property owners.
- (76) "Principal instructor" means the person who has the primary responsibility for organizing and teaching a particular course.
- (77) "Recognized laboratory" means an environmental laboratory recognized by EPA pursuant to TSCA 405(b) as being capable of performing an analysis for lead compounds in paint, soil and dust.

- (78) "Recognized test kit" means a commercially available kit recognized by EPA under 40 Code of Federal Regulations 745.88 as being capable of allowing a user to determine the presence of lead at levels equal to or in excess of 1.0 milligrams per square centimeter (mg/cm²), or more than 0.5 percent (0.5%) lead by weight, in a paint chip, paint powder, or painted surface.
- (79) "Reduction" means measures designed to reduce or eliminate human exposure to lead-based paint hazards through methods including interim controls and abatement.
- (80) "Renovation" means the modification of any existing structure, or portion thereof, that results in the disturbance of painted surfaces, unless that activity is performed as part of an abatement as defined by this Rule. The term renovation includes (but is not limited to): the removal, modification or repair of painted surfaces or painted components (e.g., modification of painted doors, surface restoration, window repair, surface preparation activity (such as sanding, scraping, or other such activities that may generate paint dust)); the removal of building components (e.g., walls, ceilings, plumbing, windows); weatherization projects (e.g., cutting holes in painted surfaces to install blown-in insulation or to gain access to attics, planing thresholds to install weather-stripping), and interim controls that disturb painted surfaces. A renovation performed for the purpose of converting a building, or part of a building, into target housing or a child-occupied facility is a renovation. The term renovation does not include minor repair and maintenance activities.
- (81) "Renovation activities" mean any activities performed during a renovation including dust sampling following renovation.
- (82) "Residential building" means a building containing one or more residential dwellings.
- (83) "Residential dwelling" means
- (1) a detached single family dwelling unit, including attached structures such as porches and stoops; or
 - (2) a single family dwelling unit in a structure that contains more than one separate residential dwelling unit, which is used or occupied, or intended to be used or occupied, in whole or in part, as the home or residence of one or more persons.
- (84) "Risk assessment" means
- (1) an on-site investigation to determine the existence, nature, severity, and location of lead-based paint hazards, and
 - (2) the provision of a report by the person or the lead firm conducting the risk assessment, explaining the results of the investigation and options for reducing lead-based hazards.

- (85) "Room" means a separate part of the inside of a building, such as a bedroom, living room, dining room, kitchen, bathroom, laundry room, or utility room. To be considered a separate room, the room must be separated from adjoining rooms by built-in walls or archways that extend at least six (6) inches from an intersecting wall. Half walls or bookcases count as room separators if built-in. Moveable or collapsible partitions or partitions consisting solely of shelves or cabinets are not considered built-in walls. A screened in porch that is used as a living area is a room.
- (86) "Soil-lead hazard" means bare soil on residential real property or on the property of a child-occupied facility that contains total lead equal to or exceeding 400 parts per million in a play area or average of 1,200 parts per million of bare soil in the rest of the yard based on soil samples.
- (87) "Soil sample" means a sample collected in a representative location using ASTM E1727, "Standard Practice for Field Collection of Soil Samples for Lead Determination by Atomic Spectrometry Techniques," or equivalent method.
- (88) "Start date" means the date on which activities begin on a notified lead-based paint abatement project requiring the use of certified persons, including the abatement area isolation and preparation or any other activity which may disturb lead-based paint. Start date also means the date on which activities begin on a permitted renovation project.
- (89) "Target housing" means any housing constructed prior to 1978, except housing for the elderly or persons with disabilities (unless any child/children age six (6) years or under reside or is expected to reside in such housing for the elderly or persons with disabilities) or any zero (0)-bedroom dwelling.
- (90) "Third party certification exam" means a third party examination in a particular discipline which is recognized by the Division and administered by a third party certification exam administrator.
- (91) "Third party certification exam administrator" means an administrator which is accepted by the Division to conduct third party certification exams.
- (92) "Training course curriculum" means an established set of course topics for instruction in an accredited training program for a particular discipline designed to provide specialized knowledge and skills.
- (93) "Training hour" means at least 50 minutes of actual teaching, including, but not limited to, time devoted to lecture, learning activities, small group activities, demonstrations, evaluations, and/or hands-on experience.
- (94) "Training manager" means the person responsible for administering an accredited training program and monitoring the performance of principal instructors and guest instructors.
- (95) "TSCA" means the Toxic Substances Control Act, [15 U.S.C. 2601](#).

- (96) "Visual inspection for clearance testing" means the visual examination of a residential dwelling or a child-occupied facility following an abatement to determine whether or not the abatement has been successfully completed.
- (97) "Visual inspection for risk assessment" means the visual examination of a residential dwelling or a child-occupied facility to determine the existence of deteriorated lead-based paint or other potential sources of lead-based paint hazards.
- (98) "Weighted Arithmetic Mean" means an arithmetic mean determined by assigning a multiplier to each quantity or concentration (such as a wipe sample concentration) to be averaged to indicate the relative importance of each quantity's contribution to the average. For example, multiplying each wipe sample concentration by the size of the area wiped, adding the resulting mathematical products, adding the size of the areas wiped, and dividing the sum of the mathematical products by the sum of the areas wiped.
- (99) "Wet disposable cleaning cloth" means a commercially available, pre-moistened white disposable cloth designed to be used for cleaning hard surfaces such as uncarpeted floors or counter tops.
- (100) "Wet mopping system" means a device with the following characteristics: A long handle, a mop head designed to be used with disposable absorbent cleaning pads, a reservoir for cleaning solution, and a built-in mechanism for distributing or spraying the cleaning solution onto a floor, or a method of equivalent efficacy.
- (101) "Window trough" means, for the typical double-hung window, the portion of the exterior windowsill between the interior windowsill (or stool) and the frame of the storm window. If there is no storm window, the window trough is the area that receives both the upper and lower window sashes when they are both lowered. The window trough is sometimes referred to as the window "well".
- (102) "Wipe sample" means the sample collected by wiping a representative surface of known area, as determined by ASTM E1728, "Standard Practice for Field Collection of Settled Dust Samples Using Wipe Sampling Methods for Lead Determination by Atomic Spectrometry Techniques," or equivalent method, with an acceptable wipe material as defined in ASTM E1792, "Standard Specification for Wipe Sampling Materials for Lead in Surface Dust."
- (103) "Work area" means the area that the certified renovator establishes to contain the dust and debris generated by a renovation.
- (104) "Working day" means any day Monday through Friday. Holidays falling on any of these days are included in this definition.
- (105) "Zero (0)-bedroom dwelling" means any residential dwelling in which the living area is not separated from the sleeping area. The term includes efficiencies, studio apartments,

dormitory housing, military barracks, and rentals of individual rooms in residential dwellings.

Rule 391-3-24-.04. Accreditation of Training Programs.

(1) Scope.

- (a) A training program may seek accreditation to offer lead-based paint and renovation activities training courses in any of the following disciplines: lead inspector, lead risk assessor, lead supervisor, lead project designer, lead worker, renovator, and dust sampling technician. A training program may also seek accreditation to offer refresher courses for each of the above-listed disciplines. A training program seeking accreditation to offer initial and refresher courses taught in non-English languages must follow the requirements specified in this Rule and submit the required material in the language for which accreditation is sought.
- (b) A training program may apply for accreditation to offer initial courses or refresher courses in as many disciplines as it chooses. A training program may seek accreditation for additional courses at any time as long as the program can demonstrate that it meets the requirements of this Rule.
- (c) A training program shall not provide, offer, or claim to provide Division-accredited training courses without applying for and receiving accreditation from the Division as required in this Rule.
- (d) Training courses shall be evaluated by the Division to maintain accreditation by the Division for course administration, course length, curriculum, training methods, instructor's qualifications, instructor's teaching effectiveness, technical accuracy of written materials and instruction, examination, and training certificate. The evaluation shall be conducted in accordance with the requirements set forth in this Rule and any documented methodologies referenced herein.
- (e) Training programs shall permit the Division to attend, evaluate and monitor any training course, take the course test and have access to records of training courses without charge or hindrance to the Division for the purpose of evaluating compliance with these Rules. The Division shall perform periodic and unannounced on-site audits of training courses.

- (f) All accredited training programs shall be assigned an accreditation number and issued a certificate which lists each accredited training course approved by the Division.
 - (g) All accreditations shall expire on the following October 1, Where an October 1 expiration date results in less than 12 months of accreditation status, the accreditation fee shall be pro-rated accordingly. Training courses taught after the expiration date but prior to renewal shall constitute a violation of this Rule.
 - (h) In order to maintain accreditation as a training program, training programs must follow the requirements specified in paragraph (7) of this section.
- (2) Application Process. The following are procedures and requirements an applicant must meet when applying to the Division for accreditation:
- (a) A training program seeking accreditation shall submit the following documentation in accordance with the requirements specified in paragraphs (3) through (6) of this Rule, which shall include, but not be limited to:
 1. A completed application on forms provided by the Division with all the appropriate information included and signed by the training manager. This information shall include, but not be limited to, training program's name, address, telephone number, and a list of courses for which the training program is applying for accreditation.
 2. A statement signed by the training manager certifying that the training program meets the minimum requirements established in this Rule. If a training program uses EPA-developed model training materials, the training manager shall submit a statement certifying that the training program meets the minimum requirements established in EPA-developed model training materials.
 3. A statement signed by the training manager certifying that the training program shall comply at all times with all of the requirements specified in 391-3-24.-04.
 4. A statement signed by the training manager stating that the training manager is responsible for maintaining the validity and integrity of the hands-on-skills assessment to ensure that it accurately evaluates the trainees' performance of the work practices and procedures associated with each course topic.
 5. A statement signed by the training manager stating that the training manager is responsible for maintaining the validity and integrity of the course test to ensure that it accurately evaluates the trainees' knowledge and retention of the course topics.

6. A fee in the amount of \$400 per eight-hour day of training for each lead supervisor, inspector, risk assessor, project designer, or lead worker training course shall be submitted electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Abatement Fees. A fee in the amount of \$400 per eight-hour day of training for each renovator or dust sampling technician training course shall be submitted electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Renovation Fees. Fees are based on eight hours a day of training for each training course. A minimum of \$400 shall be submitted for a training course less than eight hours.
7. A copy of the student manuals and instructor manuals to be used for each training course in the appropriate language for which the course is taught. This would also include a content checklist that identifies and locates sections of the manual where required course topics are covered.
8. A copy of each course agenda which shall include, but not be limited to, daily start and stop times and time allotted to teaching each course topic.
9. A copy of the course test for each training course with the correct answers marked for each test question.
10. A description of the facilities and equipment to be used for the lecture, the course test and the hands-on skills training.
11. A copy and description of all audio/visual materials which shall be used for each course.
12. A copy of the course test blueprint for each course.
13. A detailed description of each hands-on skills training activity and skills assessment, including criteria for student proficiency.
14. A detailed description of the learning or performance objectives that will be taught for each course topic.
15. A copy of the quality control plan.
16. An original course completion certificate, which shall include:
 - (i) Name and address of the student;
 - (ii) Training course title specifying if it is an initial or refresher training course;

- (iii) Inclusive dates of training course and applicable course test passage;
- (iv) Statement that the student completed the course and passed the course test requirements and hands-on skills assessment;
- (v) Unique certificate identification number;
- (vi) Printed name and signature of the training manager and printed name of principal instructor(s);
- (vii) Name, address, and phone number of training program;
- (viii) Training course location, if different from training program's address;
- (ix) Certificate expiration date that is three (3) years after the date the course was completed;
- (x) Language in which training course was taught, if other than English; and
- (xi) The date the training course was accredited and the name of the agency issuing the accreditation.
- (xii) A photograph of the individual for renovator and dust sampling technician course completion certificates.

(b) Training course accreditation shall be processed as follows:

1. The Division shall review the application for accreditation and supporting documentation submitted pursuant to paragraph (a) of this section and advise the applicant of any deficiencies. If the deficiencies are not corrected within one (1) year from the date of application, the application and any supporting documentation may be returned to the applicant and the applicant shall be required to resubmit a complete application pursuant to paragraph (a) of this section. Approval of submitted documentation does not constitute course accreditation.
2. If the submitted documentation meets all applicable requirements of this section, the Division shall notify the applicant of this and also advise the applicant to contact the Division to schedule an on-site audit. The on-site audit shall be conducted in Georgia and on the training course for which accreditation is sought with at least two (2) student attendees present. No

class shall be conducted for accreditation purposes prior to the on-site audit except for the class scheduled for on-site audit purposes.

3. If the Division determines, as a result of the on-site audit, that the training course meets all applicable requirements of this section, the Division shall issue a training course accreditation certificate for the accredited training course. If the training course does not meet these requirements, the Division shall notify the applicant of the deficiencies and advise the applicant that it may request one (1) additional on-site audit, which shall be held no more than six (6) months from the date of the first audit.
4. If the Division determines, as a result of the second audit, that the training course meets all applicable requirements of this section, the Division shall issue a training course accreditation certificate for the accredited training course. If the training course does not meet all requirements, the Division shall notify the applicant of the deficiencies and advise the applicant that it may not reapply for training course accreditation for the audited training course for a period of six (6) months from the date of the last audit.
5. The Division shall not accept training course certificates pursuant to this section for a training course that is not accredited pursuant to this Rule.

(3) Minimum Requirements for the Accreditation of Training Programs.

- (a) For a training program to obtain accreditation from the Division to offer training courses in renovation and lead-based paint activities, the training program shall meet and maintain the following minimum requirements for each discipline for which the training program is seeking accreditation:
 1. The training program shall employ a training manager who has:
 - (i) At least two (2) years of experience, education or training in teaching adults; or
 - (ii) A bachelor's or graduate level degree in building construction technology, engineering, industrial hygiene, biology, physical science, safety, public health, education, business administration, program management or a related field; or
 - (iii) Two (2) years of experience in managing a training program specializing in environmental hazards; and
 - (iv) Demonstrated experience, education, or training in the construction industry including: lead or asbestos abatement, painting, carpentry,

renovation, remodeling, occupational safety and health, or industrial hygiene.

2. The training manager shall designate a qualified principal instructor for each course who has:
 - (i) Demonstrated experience, education, or training in teaching workers or adults; and
 - (ii) Successfully completed a lead training course from an accredited training program specific to the discipline(s) in which the instructor intends to teach, with a minimum of sixteen (16) training hours.
 - (iii) Demonstrated two (2) years of experience, education, or training in lead or asbestos abatement, painting, carpentry, renovation, remodeling, occupational safety and health, or industrial hygiene.
3. The principal instructor shall be responsible for the organization of the course and oversight of the teaching of all training course curriculum. The training manager may designate guest instructors as needed to provide instruction specific to the lecture, hands-on activities, or work practice components of a training course.
4. The training manager may appoint one (1) or more guest instructors for each training course to teach hands-on activities and/or work practices who has:
 - (i) Demonstrated experience, education, or training in teaching workers or adults; and
 - (ii) Successfully completed a lead training course from an accredited training program specific to the discipline(s) in which the instructor intends to teach, with a minimum of sixteen (16) training hours; and
 - (iii) At least two (2) years of experience, education, or training in the field in which they provide the instruction.
5. The following documents shall be recognized by the Division as evidence that training managers, principal instructors, and guest instructors meet the relevant educational, work experience, and/or training requirements specifically listed in paragraphs (3)(a)1., (3)(a)2., and (3)(a)4. of this section. This documentation shall be submitted with the application for training program accreditation.

- (i) A copy of an official academic transcript or diploma as evidence of meeting the educational requirements.
 - (ii) Resumes, letters of reference or documentation of work experience, as evidence of meeting the work experience requirements. This documentation should include, but not be limited to, work history documenting related experience including inclusive dates of experience, employer's name, address and phone number; positions held; projects completed and job responsibilities held during the projects.
 - (iii) A copy of certificates from train-the-trainer courses and lead-specific training courses, as evidence of meeting the training requirements.
6. The training program shall ensure the availability of, and provide adequate facilities for, the delivery of the lecture, course test, hands-on training, and assessment activities. This includes providing training equipment that reflects current work practices and maintaining or updating the equipment and facilities as needed.
7. The training manager shall be responsible for ensuring that the instructors accurately teach the training course curriculum that was accredited by the Division.
8. For each training course offered, the training program shall conduct a hands-on skills assessment, if applicable, and a closed book course test at the completion of the training course. For successful completion of the training course, each student shall attend at least ninety-five percent (95%) of the training course, successfully complete the hands-on skills assessment, and receive a passing score of seventy percent (70%) or greater on the course test. Passing students shall be provided with a course completion certificate from the training program.
- (i) The training manager is responsible for maintaining the validity and integrity of the hands-on skills assessment to ensure that it accurately evaluates the trainee's performance of the work practices and procedures associated with the course topics contained in paragraph (4) of this section.
 - (ii) The training manager is responsible for maintaining the validity and integrity of the course test to ensure that it accurately evaluates the trainees' knowledge and retention of the course topics.

- (iii) The course test shall be developed in accordance with the test blueprint. All initial course tests, except lead worker and renovator, shall consist of a minimum of 50 multiple choice questions. All other training course exams shall consist of a minimum of 25 multiple choice questions.
9. The training programs shall issue a unique course completion certificate as specified in paragraph (2)(a)16. of this section to each person who successfully completes a training course.
10. The training manager shall develop and implement the quality control plan. The plan shall be used to maintain and improve the quality of the training program over time. This plan shall contain at least the following elements:
- (i) Procedures for periodic revision of training materials and the course test to reflect innovations in the field; and
 - (ii) Procedures for the training manager's annual review of the principal instructor's competency.
11. The training program shall ensure that the following quality control measures are met:
- (i) The instructor(s) shall follow the training curriculum which was accredited by the Division;
 - (ii) Each initial training course shall have a maximum of forty (40) students;
 - (iii) A day of training shall be a minimum of eight (8) hours a day and at least six and one-half (6 1/2) hours of direct instruction, including classroom, hands-on training or field trips, except for the renovator, dust sampling technician and lead project designer refresher training courses;
 - (iv) Work time and instruction time shall not exceed twelve (12) hours in a twenty-four (24) -hour period;
 - (v) All course requirements must be completed within a two-week period of the course start date;
 - (vi) All instructors and students shall be fluent in the language in which the course is being taught;

- (vii) An interpreter shall not be used to teach or instruct training courses;
- (viii) Lead worker, renovator, and dust sampling technician initial training courses shall have at least one (1) principal instructor. Other initial courses shall have a minimum of two (2) instructors;
- (ix) Instructor ratio for hands-on training skills assessment shall be no more than ten (10) students per instructor;
- (x) All course materials shall be developed in the language for which the course is being taught;
- (xi) Each training course shall be discipline specific;
- (xii) Students shall take a course test no more than two (2) times for each training course. After two (2) failures, the student shall retake the full course before being allowed to retest;
- (xiii) Instructors shall not review for the course test by reading questions from the test;
- (xiv) A training program shall provide course test security measures to prevent student access to the course test before and after the test. Training programs shall take measures to preclude cheating during the course test; and
- (xv) For each training course, the training program shall verify, by photo identification, the identity of each person taking the training course.

12. The training program shall offer training courses which teach the work practice standards for conducting renovation and lead-based paint activities contained in Rule [391-3-24-.10](#) and Rule [391-3-24-.06](#).

These standards shall be taught in the appropriate courses so as to provide trainees with the knowledge needed to perform the renovation and lead-based paint activities they are responsible for conducting.

13. The training manager shall be responsible for ensuring that the training program complies at all times with all of the requirements specified in Rule [391-3-24-.04](#).

14. At the conclusion of all training courses, the training program shall make available copies of the Georgia Rules and certification applications to all course attendees.

(4) Minimum Training Curricula Requirements for Training Courses.

- (a) To become accredited to offer renovation and lead-based paint training courses in the specific disciplines listed below, training programs must ensure that their training course curriculum includes, at a minimum, the following course topics. Listed requirements ending in an asterisk (*) indicate areas that require hands-on activities as an integral component of the course.

(b) Lead Inspector.

1. Role and responsibilities of the inspector.
2. Background information on lead and its adverse health effects.
3. Background information on Federal, State, and local regulations and guidance that pertain to lead-based paint and lead-based paint activities.
4. Lead-based paint inspection methods, including selection of rooms and components for sampling and testing.*
5. Paint, dust, and soil sampling methodologies.*
6. Clearance standards and testing, including random sampling.*
7. Preparation of the final inspection report.*
8. Recordkeeping.
9. Minimum course length is twenty-four (24) training hours, with a minimum of eight (8) hours devoted to hands-on training.

(c) Lead Risk Assessor.

1. The role and responsibilities of the risk assessor.
2. Collection of background information to perform a risk assessment.
3. Sources of environmental lead contamination such as paint, surface dust and soil, water, air, packaging, and food.
4. Visual inspection for the purpose of identifying lead-based paint, and lead-based paint hazards.*

5. Lead hazard screen protocol.
6. Sampling for other sources of lead exposure.*
7. Interpretation of lead-based paint and other lead sampling results including all applicable State or Federal guidance or regulations pertaining to lead-based paint hazards.*
8. Development of hazard control options, the role of interim controls, and operations and maintenance in reducing lead hazards.
9. Preparation of a final risk assessment report.
10. The minimum course length is sixteen (16) training hours, with a minimum of four (4) hours devoted to hands-on training activities.

(d) Lead Supervisor.

1. Role and responsibilities of a supervisor.
2. Background information on lead and its adverse health effects.
3. Background information on Federal, State, and local regulations and guidance that pertains to lead-based paint abatement.
4. Liability and insurance issues relating to lead-based paint abatement.
5. Risk assessment and inspection report interpretation.*
6. Development and implementation of an occupant protection plan and abatement report.
7. Lead-based paint hazard recognition and control.*
8. Lead-based paint abatement and lead hazard reduction methods, including restricted practices. *
9. Interior dust abatement/clean-up or lead hazard control and reduction methods.*
10. Soil and exterior dust abatement or lead hazard control and reduction methods.*
11. Clearance standards and testing.*
12. Clean-up and waste disposal practices and regulations.

13. Recordkeeping.

14. The minimum course length is thirty-two (32) training hours, with a minimum of eight (8) hours devoted to hands-on training activities.

(e) Lead Project Designer.

1. Role and responsibility of a project designer.
2. Development and implementation of an occupant protection plan for large-scale abatement projects.
3. Lead-based paint abatement and lead-based paint hazard reduction methods for abatement projects with five (5) or more residential dwelling units.
4. Interior dust abatement/cleanup or lead hazard control and reduction methods for large-scale abatement projects.
5. Clearance standards and testing for large-scale abatement projects.
6. Integration of lead-based paint abatement methods with modernization and rehabilitation projects for large-scale abatement projects.
7. The minimum course length is eight (8) training hours.

(f) Lead Worker.

1. Role and responsibility of a lead worker.
2. Background information on lead and its adverse health effects.
3. Background information on Federal, State and local regulations and guidance that pertain to lead-based paint abatement.
4. Lead-based paint hazard recognition and control.*
5. Lead-based paint abatement and lead hazard reduction methods, including restricted practices.*
6. Interior dust abatement methods/clean-up or lead hazard reduction.*
7. Soil and exterior dust abatement methods or lead hazard reduction.*
8. The minimum course length is sixteen (16) training hours with a minimum of eight (8) hours devoted to hands-on training activities.

(g) Renovator.

1. Role and responsibility of a renovator.
2. Background information on lead and its adverse health effects.
3. Background information on EPA, HUD, OSHA, and other Federal, State, and local regulations and guidance that pertains to lead-based paint and renovation activities.
4. Procedures for using acceptable test kits to determine whether paint is lead-based paint.
5. Renovation methods to minimize the creation of dust and lead-based paint hazards.*
6. Interior and exterior containment and cleanup methods.*
7. Methods to ensure that the renovation has been properly completed, including cleaning verification, and clearance testing.*
8. Waste handling and disposal.
9. Providing on-the-job training to other workers.
10. Record preparations.
11. The minimum course length is eight (8) training hours with a minimum of two (2) hours devoted to hands-on training activities.

(h) Dust sampling technician.

1. Role and responsibility of a dust sampling technician.
2. Background information on lead and its adverse health effects.
3. Background information on Federal, State, and local regulations and guidance that pertains to lead-based paint and renovation activities.
4. Dust sampling methodologies.*
5. Clearance standards and testing.
6. Report preparations.
7. The minimum course length is eight (8) training hours with a minimum of two (2) hours devoted to hands-on training activities.

(5) Minimum Requirements for the Accreditation of Refresher Training Programs.

- (a) A training program may seek accreditation to offer refresher training courses in any of the following disciplines: lead inspector, lead risk assessor, lead supervisor, lead project designer, lead worker, renovator and dust sampling technician. To obtain Division accreditation to offer refresher training, a training program must meet and maintain the following minimum requirements:
- (b) Each refresher training course shall review the curriculum topics of the full-length courses listed under paragraph (4) of this section, as appropriate. In addition, to become accredited to offer refresher training courses, the training program shall ensure that their training course curriculum includes, at a minimum, the following:
 - 1. An overview of current safety practices relating to renovation and lead-based paint activities in general, as well as specific information pertaining to the appropriate discipline.
 - 2. Current laws and regulations relating to renovation and lead-based paint activities in general, as well as specific information pertaining to the appropriate discipline.
 - 3. Current technologies relating to renovation and lead-based paint activities in general, as well as specific information pertaining to the appropriate discipline.
- (c) Each refresher training course, except for lead project designer, dust sampling technician, and renovator, shall last a minimum of eight (8) training hours. The lead project designer, dust sampling technician, and renovator refresher courses shall last a minimum of four (4) training hours.
- (d) For each course offered, the training program shall administer a course test at the completion of the course. All refresher course tests shall consist of a minimum of 25 multiple choice questions. For successful completion of the training course, each student shall attend at least ninety-five percent (95%) of the training course, and receive a passing score of seventy percent (70%) or greater on the course test. Passing students shall be provided with a refresher course completion certificate from the training program.
- (e) A training program seeking to offer refresher training courses shall also meet and maintain the requirements specified in paragraphs (2) through (7), except for training hour requirements.

(6) Minimum Requirements for Training Program Notification and Recordkeeping.

- (a) Accredited training programs shall submit to the Division the following:

1. Notice of intention to conduct an accredited training course for lead and renovation certification purposes shall be submitted to the Division. Notices for training courses, except lead worker and renovator, shall be postmarked or received by the Division ten (10) working days before the training course start date. Notice for lead worker and renovator training courses shall be postmarked or received by the Division five (5) working days before the training course start date. If the training course is canceled, the training program shall notify the Division at least one (1) working day prior to the scheduled start date. Notification of intent to conduct a training course shall be made on forms provided by the Division and shall include, but not be limited to, the following:
 - (i) Training program name, address, phone number and contact person;
 - (ii) Training course title;
 - (iii) Inclusive dates of training course and applicable exam;
 - (iv) Start and completion times of training course;
 - (v) Location of course facility and directions to the course facility if the site is not routine for the training program;
 - (vi) Language in which training course is taught;
 - (vii) Principal instructor for the training course; and
 - (viii) Signature of the training manager.
2. A course roster must be submitted to the Division no later than five (5) working days after the last day of training. The course roster must be provided on forms provided by or acceptable to the Division and must contain the name of every person who attended the training course, including whether the person was issued a training certificate or not.
3. Any changes to course length, curriculum, training methods, training manual or materials, instructors, course test, training certificate, training manager or contact person shall be made in writing and submitted to the Division at least ten (10) working days prior to the scheduled training course start date. Changes must be approved by the Division prior to any training utilizing the changes in order for the course to be accepted for accreditation purposes.
4. Current curriculum/course materials and documents reflecting any changes made to these materials.

- (b) The accredited training program shall maintain and make available to the Division for inspection the following information:
 - 1. Information and documentation for any course accredited under 391-3-24-.04 of this Rule.
 - 2. Assessment information on how the hands-on training, work tasks and procedures are evaluated for each student which shall include, but not be limited to, instructor conducting the assessment, grading criteria, facilities used, and the pass/fail rate.
 - 3. Results of the students' hands-on skills assessments and course tests, and a record of each student's course completion certificate.
 - 4. The quality control plan as described in paragraph (3)(a)(10) of this section.
 - 5. Any other material not listed above that was submitted to the Division as part of the program's application for accreditation.

 - (c) The training program shall retain records specified in paragraph (b) of this section at the address specified on the training program application for a minimum of three (3) years and six (6) months. The training program shall notify the Division within twenty (20) working days of changes to the address specified on its training program application or transferring of the records from that address.
- (7) Minimum Requirements for Renewals of Accredited Training Programs.
- (a) If a training program submits a renewal application and meets the requirements of this section, the training program's course accreditation shall be renewed for a period of twelve (12) months.
 - (b) An accredited training program seeking training course renewal shall submit a completed renewal application on forms provided by the Division with all appropriate information included and signed by the training manager. The renewal application shall include, but not be limited to:
 - 1. The training program's name, address and telephone number.
 - 2. A list of training courses for which renewal of accreditation is being sought.
 - 3. A description of any changes to the training facility, equipment, curriculum, hands-on activities, instructors, or quality control plan since its last application was approved that adversely affects the students' ability to learn.

4. A certified statement signed by the training manager stating that the training program complies at all times with all requirements of 391-3-24-.04 of this Rule.
- (c) Applications for course renewal must be postmarked or hand delivered to the Division no later than thirty (30) days before the expiration date for each course accredited by the Division. Renewal applications postmarked or hand delivered on or before the thirtieth (30th) day before the expiration date shall include a renewal fee of \$300 per training course. Renewal applications postmarked or hand delivered less than thirty (30) days before the expiration date shall include a renewal fee of \$450 per training course. Fees shall be submitted electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Abatement Fees for lead supervisor, inspector, risk assessor, project designer, or lead worker courses. Fees shall be submitted electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Renovation Fees for renovator and dust sampling technician courses.
 - (d) Training programs, which submit an application for course renewal after the expiration date of accreditation by the Division shall follow the requirements specified in paragraph 391-3-24-.04(2) of this Rule for accreditation purposes.
 - (e) Training programs holding an accreditation from the Division shall submit a renewal application on forms provided by the Division on or before October 1 yearly and shall be renewed for a period of up to twelve (12) months. In those cases where an October 1 expiration date results in less than twelve (12) months of accreditation, the renewal fee shall be pro-rated accordingly.
 - (f) The Division may audit the training program at any time to verify the contents of the application for renewal.
- (8) Reciprocity.
- (a) The Division may seek reciprocity agreements with other States, Tribes or Territories where equivalency of lead certification and training requirements can be demonstrated.

The Division may recognize the accreditation of a training course or refresher training course granted by any other State, Tribe or Territory with which the Division has a written reciprocal agreement. Any training program may apply to have its accredited courses approved by the Division if its training course or refresher training course has been accredited by a State, Tribe or Territory with which the Division has a written reciprocal agreement.

- (b) Training programs applying for Division accreditation by reciprocity shall follow the requirements specified in paragraph (2)(a), except (2)(a)6., and submit a fee in the amount of \$400 per training course for which accreditation is sought. Fees shall be submitted electronically or in the form of a check or money order made payable to the Environmental Protection Division - Lead Abatement Fees for lead supervisor, inspector, risk assessor, project designer, or lead worker courses. Fees shall be submitted electronically or in the form of a check or money order made payable to the Environmental Protection Division - Lead Renovation Fees for renovator and dust sampling technician courses.

(9) Recognition of EPA Training Program Accreditation

- (a) The Division shall recognize training programs holding an accreditation from the U.S. EPA issued before the effective date of this Rule for renovator and/or dust sampling technician courses if the following requirements are met:
 - 1. Upon notification by the Division, an application for recognition of U.S. EPA training program accreditation is submitted on forms provided by the Division within sixty (60) days of the Division's notification.
 - 2. A fee of \$200.00 per training course shall be submitted to the Division electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Renovation Fees for each training course to be recognized by the Division.
- (b) The Division shall issue a certification of the Division's acceptance of the U.S. EPA training program accreditation within thirty (30) days of the applicant meeting the requirements of paragraph 1. and 2. of this Rule. The accreditation issued by the Division shall have an expiration date of October 1, 2011. Renewals of accreditation shall meet the requirements in Rule 391-3-24-.04(7).
- (c) The Division shall not recognize U.S. EPA training program accreditation or accept courses offered as acceptable training for Division certification of renovator or dust sampling technician certifications if the training provider fails to submit an application and the appropriate fees within sixty (60) days of being notified by the Division.

(10) Suspension, Revocation, and Modification of Accredited Training Programs.

- (a) The Director may investigate the actions of any training program and may suspend, revoke or modify the accreditation of a training program in accordance with Chapter 13 of Title 50, the "Georgia Administrative Procedures Act", when it is found that the training program, training manager, or other responsible persons with the training program has:

1. Misrepresented the contents of a training course to the Division and/or the student population.
 2. Failed to submit required information or notifications in a timely manner.
 3. Failed to maintain required records.
 4. Falsified accreditation records, instructor qualifications, or other accreditation-related information or documentation.
 5. Failed to comply with the training standards and requirements in this section.
 6. Failed to comply with Federal, State or local lead-based paint statutes or regulations.
 7. Made false or misleading statements to the Division in its application for accreditation or renewal that the Division relied upon in approving the application.
- (b) When accreditation of a training program is revoked, the training program shall not be eligible for re-accreditation for a period of five (5) years from the date of revocation.

Rule 391-3-24-.05. Certification of Persons and Firms Conducting Lead-Based Paint Activities.

(1) Scope.

- (a) Following the submission of an application demonstrating that all the requirements of this Rule are met and a determination by the Division that a person has met all applicable requirements to perform the appropriate lead-based paint activities, the Division shall certify the applicant as a lead inspector, lead risk assessor, lead supervisor, lead project designer or lead worker.

- (b) All certified persons shall be assigned a certification number and issued a photo-identification certificate by the Division.
 - (c) All certified lead firms shall be assigned a certification number and issued a certificate by the Division.
 - (d) When educational experience is required, the Division shall recognize a copy of an official academic transcript, diploma, or professional certification as evidence of meeting the educational requirements.
 - (e) When work experience is required, the Division shall recognize a resume or letter of reference from a current or previous employer as evidence of meeting the work experience requirements. This documentation shall include, but not be limited to, work history documenting related experience including inclusive dates of experience, employer's name, address and phone number, positions held, projects completed and job responsibilities held during the projects.
 - (f) Upon receiving certification by the Division, persons conducting lead-based paint activities shall work for a certified lead firm and shall comply with the standards for performing such lead-based paint activities as established in Rule [391-3-24-.06](#).
 - (g) All certifications shall expire twelve (12) months from the issue date of the certificate or on the expiration date of required training, whichever is earlier as specified in (2)(a) through (2)(e) of this Rule. Work performed after the certification expiration date and prior to renewal shall constitute a violation of this Rule.
 - (h) No person or lead firm shall conduct lead-based paint activities described in this section if that person or lead firm has not received the appropriate certification by the Division pursuant to the requirements specified herein of this section and the person or lead firm does not have in their possession a Division issued certification card or certificate.
 - (i) In order to maintain certification as a person or lead firm, applicants must follow the requirements specified in paragraph (4) of this section.
 - (j) A person who is employed by and in the process of conducting lead-based paint activities for a federal, state or local government agency shall not be required to pay certification fees as specified in this section.
 - (k) Persons requesting a duplication of their certification shall submit a fee in the amount of \$25.00 electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Abatement Fees.
- (2) Application Process. The following are procedures and requirements an applicant must meet when applying to the Division for certification:

(a) Certification of Lead Workers.

1. To become certified as a lead worker, a person must:

- (i) Successfully complete a course and receive an initial course completion certificate from an accredited training program in the appropriate discipline for which certification is sought;
- (ii) Submit a completed certification application on forms provided by the Division with all appropriate information included. This would also include original signature and date;
- (iii) Submit an original initial course completion training certificate in the discipline for which certification is sought or an original letter from the accredited training program confirming completion of said training course on the accredited training program letterhead. Original documents shall be returned upon issuance or denial of certification by the Division;
- (iv) Submit one (1) current 1 1/4 inch × 1 1/4 inch color passport photograph of the applicant with the applicant's name and original signature on the back of the picture; and
- (v) Submit a fee in the amount of \$25.00 electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Abatement Fees.

(b) Certification of Lead Inspectors.

1. To become certified as a lead inspector, a person must:

- (i) Successfully complete a course and receive an initial course completion certificate from an accredited training program in the appropriate discipline for which certification is sought;
- (ii) Successfully pass an exam and receive a third party certification exam letter from a third party certification exam administrator in the appropriate discipline for which certification is sought;
- (iii) Submit a completed certification application on forms provided by the Division with all appropriate information included. This would also include original signature and date;
- (iv) Submit an original initial course completion training certificate in the discipline for, which certification is sought or an original letter from the accredited training program confirming completion of said

training course on the accredited training program letterhead. Original documents shall be returned upon issuance or denial of certification by the Division;

- (v) Submit an original third party certification exam letter in the appropriate discipline for which certification is sought confirming successful completion of said exam. Original documents shall be returned upon issuance or denial of certification by the Division;
- (vi) Submit one (1) current 1 1/4 inch × 1 1/4 inch color passport photograph of the applicant with the applicant's name and original signature on the back of the picture; and
- (vii) Submit a fee in the amount of \$150.00 electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Abatement Fees.

(c) Certification of Lead Supervisors.

1. To become certified as a lead supervisor, a person must:
 - (i) Successfully complete a course and receive an initial course completion certificate from an accredited training program in the appropriate discipline for which certification is sought;
 - (ii) Successfully pass an exam and receive a third party certification exam letter from a third party certification exam administrator in the appropriate discipline for which certification is sought;
 - (iii) Meet or exceed the following experience and/or education requirements:
 - (I) One-year of experience as a lead worker; or,
 - (II) At least two (2) years of experience in a related field or in the building trades.
 - (iv) Submit a completed certification application on forms provided by the Division with all appropriate information included. This would also include original signature and date;
 - (v) Submit an original initial course completion training certificate in the discipline for which certification is sought or an original letter from the accredited training program confirming completion of said training course on the accredited training program letterhead.

Original documents shall be returned upon issuance or denial of certification by the Division;

- (vi) Submit an original third party certification exam letter in the appropriate discipline for which certification is sought confirming successful completion of said exam. Original documents shall be returned upon issuance or denial of certification by the Division;
- (vii) Submit one (1) current 1 1/4 inch × 1 1/4 inch color passport photograph of the applicant with the applicant's name and original signature on the back of the picture; and
- (viii) Submit a fee in the amount of \$150.00 electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Abatement Fees.

(d) Certification of Lead Risk Assessors.

1. To become certified as a lead risk assessor, a person must:

- (i) Successfully complete a course and receive initial course completion certificates from an accredited training program in the lead inspector course and in the appropriate discipline for which certification is sought;
- (ii) Successfully pass an exam and receive a third party certification exam letter from a third party certification exam administrator in the lead inspector discipline and in the appropriate discipline for which certification is sought;
- (iii) Meet or exceed the following experience and/or education requirements:
 - (I) Bachelor's degree and one (1) year of experience in a related field; or,
 - (II) An Associate's degree and two (2) years of experience in a related field; or,
 - (III) Certification as an industrial hygienist, professional engineer, registered architect and/or certification in a related engineering/ health/environmental field; or,
 - (IV) A high school diploma (or equivalent), and at least three (3) years of experience in a related field.

- (iv) Submit a completed certification application on forms provided by the Division with all appropriate information included. This would also include original signature and date;
- (v) Submit original course completion training certificates in the lead inspector discipline and in the discipline for which certification is sought or an original letter from the accredited training program confirming completion of said training courses on the accredited training program letterhead. Original documents shall be returned upon issuance or denial of certification by the Division;
- (vi) Submit an original third party certification exam letter in the lead inspector discipline and in the appropriate discipline for which certification is sought confirming successful completion of said exams. Original documents shall be returned upon issuance or denial of certification by the Division;
- (vii) Submit one (1) current 1 1/4 inch × 1 1/4 inch color passport photograph of the applicant with the applicant's name and original signature on the back of the picture; and
- (viii) To obtain a joint Inspector/Risk Assessor certification simultaneously, submit a fee in the amount of \$250.00 along with the documents required by (2)(c)1.(i)-(vii) and (2)(d)1.(i)-(vii); or
- (ix) To obtain a Risk Assessor certification without an Inspector Certification, submit a fee in the amount of \$150.00 electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Abatement Fees along with the documents required by (2)(d)1.(i)-(vii).

(e) Certification of Lead Project Designers.

1. To become certified as a lead project designer, a person must:
 - (i) Successfully complete a course and receive course completion certificates from an accredited training program in the lead supervisor course and in the appropriate discipline for which certification is sought;
 - (ii) Successfully pass an exam and receive a third party certification exam letter from a third party certification exam administrator in the lead supervisor discipline;

- (iii) Meet or exceed the following experience and/or education requirements:
 - (I) Bachelor's degree in engineering, architecture, or a related profession, and one (1) year of experience in building construction and design or a related field; or,
 - (II) Four (4) years of experience in building construction and design or a related field.
- (iv) Submit a completed certification application on forms provided by the Division with all appropriate information included. This would also include original signature and date;
- (v) Submit original course completion training certificates in the lead supervisor discipline and in the discipline for which certification is sought or an original letter from the accredited training program confirming completion of said training courses on the accredited training program letterhead. Original documents shall be returned upon issuance or denial of certification by the Division;
- (vi) Submit an original third party certification exam letter in the lead supervisor discipline confirming successful completion of said exam. Original documents shall be returned upon issuance or denial of certification by the Division;
- (vii) Submit one (1) current 1 1/4 inch × 1 1/4 inch color passport photograph of the applicant with the applicant's name and original signature on the back of the picture; and
- (viii) Submit a fee in the amount of \$150.00 electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Abatement Fees.

(f) Certification of Lead Firms.

1. All firms, which offer to perform, or that perform, any of the lead-based paint activities described in Rule [391-3-24-.06](#) must have certification from the Division.
2. A firm seeking certification, as a Lead Firm must:
 - (i) Submit a completed certification application on forms supplied by the Division certifying that the firm shall:

- (I) Only employ Division certified employees to conduct lead-based paint activities;
- (II) Follow standards in Rule [391-3-24-.06](#) for conducting lead-based paint activities; and
- (III) Maintain all records pursuant to the requirements in Rule [391-3-24-.06](#).

- (ii) Submit a disclosure statement of any action taken by EPA or an EPA authorized program involving violations, suspensions, revocations or modifications of a firm's activities; and
- (iii) Submit a fee in the amount of \$350.00 electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Abatement Fees.
- (iv) Federal, State, county or city government agencies, who conduct lead-based paint investigations are exempt from the \$350.00 firm certification fee.

(3) Third Party Certification Exam.

- (a) The third party certification exam shall be taken only from a third party certification exam administrator who is accepted by the Division to perform such duties.
- (b) In order to take the third party certification exam for a particular discipline, a person must:
 - 1. Successfully complete an accredited course in the appropriate discipline and receive a course completion certificate from an accredited training program.
 - 2. Meet or exceed the educational and/or work experience requirements in section 391-3-24-.05 of this Rule for each appropriate discipline for which certification is sought.
 - 3. Take the third party certification exam no more than three (3) times. If a person does not pass the third party certification exam with a passing score of 70 percent (70%) or greater and receive a certificate and/or certification letter, the person must retake the appropriate training course from an accredited training program before retaking the third party certification exam.

(4) Renewal of Certification.

- (a) After certified persons demonstrate that all of the requirements of this section are met and the Division determines that an applicant has met all the requirements set forth in this section, the Division shall renew certification of a person as a lead inspector, lead risk assessor, lead supervisor, lead project designer, or lead worker.
- (b) Certified persons meeting the requirements of this section shall be renewed for a period of twelve (12) months from the expiration date of certification or until the expiration date of required training, whichever is earlier.
- (c) Persons seeking renewal of certification shall:
 - 1. Submit a completed renewal application to the Division on forms provided by the Division with all the appropriate information included and signed by the applicant.
 - 2. Successfully complete a course(s) and receive a refresher course completion certificate(s) from an accredited training program in the appropriate discipline(s) for which renewal is sought within twenty-four (24) months from the last date of training.

Persons that do not successfully complete the said refresher course(s) within twenty-four (24) months from the last date of training may obtain provisional certification for twelve (12) months by payment of a fee two (2) times the certification fee.

Persons that do not successfully complete the refresher course(s) and receive a certificate of completion by the thirty-sixth (36th) month from the last date of training, shall successfully complete the initial said training course for renewal of certification.

- 3. Submit an original refresher course completion certificate(s) in the appropriate discipline(s) for which renewal is sought or an original letter from the accredited training program confirming completion of said training course(s) on the accredited training program letterhead.
- 4. Submit one (1) current 1 1/4 × 1 1/4 inch color passport photograph of the applicant with the applicant's name and original signature on the back of the photograph.
- 5. Submit a fee in the amount of \$150.00 per renewal discipline, or \$250.00 per 391-3-24-.05(2)(d)1(viii), except the lead worker discipline. An applicant seeking renewal in the lead worker discipline shall submit a fee in the amount of \$25.00. Fees shall be submitted electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Abatement Fees.

- (d) In order for lead firm certification to be renewed for a period of twelve (12) months, the firm shall:
1. Submit a completed renewal application to the Division on forms provided by the Division certifying that the lead firm shall:
 - (i) Only employ Division certified persons to conduct lead-based paint activities;
 - (ii) Follow the standards in Rule [391-3-24-.06](#) for conducting lead-based paint activities; and
 - (iii) Maintain all records pursuant to the requirements in Rule [391-3-24-.06](#).
 2. Submit a disclosure statement of any action taken by EPA or an EPA approved program involving violations, suspensions, revocations, or modifications of a lead firm's activity.
 3. Submit a fee in the amount of \$350.00 electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Abatement Fees.
- (e) Renewal applications shall be postmarked or hand delivered to the Division thirty (30) days prior to the expiration date of certification for each discipline in which certification is sought. Certified persons submitting renewal applications postmarked or hand delivered after the expiration date of certification shall follow the requirements specified in paragraph (2) of this section for certification purposes.

(5) Reciprocity.

- (a) Each person seeking certification who is licensed, certified or permitted in another state, Tribe or Territory of the United States to perform lead hazard reduction activities may petition the Division on a form provided by the Division to grant certification without repetition of training requirements. The Division may recognize the certification of a discipline granted by another State, Tribe or Territory with which the Division has a written reciprocal agreement. Any person may apply to have their certification approved by the Division if their certification has been licensed, certified or permitted by another State, Tribe or Territory with which the Division has a written reciprocal agreement.
- (b) Persons seeking certification by reciprocity shall also submit to the Division the following:

1. A completed application to the Division on forms provided by the Division with all the appropriate information included and signed by the applicant.
2. A copy of the certification issued by the reciprocating state, tribe or territory.
3. One (1) current 1 1/4 inch × 1 1/4 inch color passport photograph of the applicant with the applicant's name and original signature on the back of the picture.
4. A fee in the amount of \$150.00 for each discipline, except lead worker discipline and/or the combined lead inspector/risk assessor obtained simultaneously; an applicant seeking certification in the lead worker discipline shall submit a fee in the amount of \$25.00; an applicant seeking the combined inspector/risk assessor obtained simultaneously shall submit a fee in the amount of \$250.00. Fees shall be submitted electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Abatement Fees.

(6) Suspension, Revocation, and Modification.

- (a) The Director may investigate the actions of any certified person or lead firm and may suspend, revoke or modify the certification of a person or lead firm in accordance with Chapter 13 of Title 50, the "Georgia Administrative Procedures Act," when it is found that the person or lead firm has:
 1. Obtained training documentation through fraudulent means.
 2. Gained admission to and completed an accredited training program through misrepresentation of admission requirements.
 3. Obtained certification through misrepresentation of certification requirements or related documents dealing with education, training, professional registration, or experience.
 4. Performed work requiring certification at a job site without having proof of certification.
 5. Permitted the duplication or use of the person's own certificate by another.
 6. Performed work for which certification is required, but for which appropriate certification has not been received.
 7. Failed to comply with the appropriate work practice standards for lead-based paint activities as specified in [391-3-24-.06](#).

8. Failed to comply with Federal, State, or local lead-based paint statutes or regulations.
 9. Performed work requiring certification at a job site with persons who are not certified.
 10. Misrepresented facts in a lead firm's letter of application.
 11. Failed to maintain required records.
- (b) When certification of a person or lead firm is revoked, the person or lead firm shall not be eligible for recertification for a period of five (5) years from the date of revocation.

Authority: O.C.G.A. Sec. [31-41-1](#) *et seq.*

History. Original Rule entitled "Certification Requirements and Application Procedures for Individuals and Firms" adopted. F. June 28, 1996; eff. July 18, 1996.

Repealed: New Rule entitled "Certification Requirements and Application Procedures for Persons and Firms" adopted. F. June 26, 1998; eff. July 16, 1998.

Amended: F. June 27, 2002; eff. July 17, 2002.

Repealed: New Rule entitled "Certification of Persons and Firms Conducting Lead-Based Paint Activities" adopted. F. Nov. 19, 2010; eff. Dec. 9, 2010.

Rule 391-3-24-.06. Standards for Conducting Lead-Based Paint Activities.

(1) Scope.

- (a) When performing any lead-based paint activities, a certified person must perform that activity in compliance with the requirements specified in this section.
- (b) Persons performing lead-based paint activities shall work for a certified lead firm.
- (c) No person or firm shall engage in a lead-based paint abatement project prior to notifying the Division and receiving a notice to proceed from the Division.
- (d) For each inspection, risk assessment, or lead hazard screen conducted, the lead inspector or lead risk assessor shall submit an inspection report or risk assessment report to the party for which services are rendered, and the Division, if requested. The report shall be submitted within thirty (30) days of the activity.

(2) Inspection.

- (a) An inspection shall be conducted only by a person certified by the Division as a lead inspector and/or a combined inspector/risk assessor. The inspection must be conducted according to the procedures in this section.
- (b) When conducting an inspection, the following locations shall be selected according to documented methodologies and tested for the presence of lead-based paint:
 - 1. In a residential dwelling and child-occupied facility, each interior component with a distinct painting history and each exterior component with a distinct painting history shall be tested for lead-based paint, except those components that the lead inspector or lead risk assessor determines to have been replaced after 1978, or to not contain lead-based paint; and
 - 2. In a multi-family dwelling or child-occupied facility, each component with a distinct painting history in every common area, except those components that the lead inspector or lead risk assessor determines to have been replaced after 1978, or to not contain lead-based paint.
- (c) Paint shall be sampled in the following manner:
 - 1. The analysis of paint to determine the presence of lead shall be conducted using documented methodologies, which incorporate adequate quality control procedures; and/or
 - 2. All collected paint chip samples shall be analyzed according to paragraph (6) of this section to determine if they contain detectable levels of lead that can be quantified numerically.
- (d) The certified lead inspector or lead risk assessor shall prepare an inspection report, which shall include the following information:
 - 1. Date of each inspection.
 - 2. Address of building.
 - 3. Date of construction.
 - 4. Apartment numbers (if applicable).
 - 5. Name, address, and telephone number of the owner or owners of each residential dwelling or child-occupied facility.
 - 6. Name, signature, and certification number of each certified inspector and/or risk assessor conducting testing.

7. Name, address, and telephone number of the certified lead firm employing each inspector and/or risk assessor, if applicable.
8. Each testing method and device and/or sampling procedure employed for paint analysis, including quality control data and, if used, the serial number of any x-ray fluorescence (XRF) device.
9. Specific locations of each painted component tested for the presence of lead-based paint.
10. The results of the inspection expressed in terms appropriate to the sampling method used.

(3) Lead Hazard Screen.

- (a) A lead hazard screen shall be conducted only by a person certified by the Division as lead risk assessor.
- (b) If conducted, a lead hazard screen shall be conducted as follows:
 1. Background information regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause lead-based paint exposure to one or more children age six (6) years and under shall be collected.
 2. A visual inspection of the residential dwelling or child-occupied facility shall be conducted to:
 - (i) Determine if any deteriorated paint is present, and
 - (ii) Locate at least two dust sampling locations.
 3. If deteriorated paint is present, each surface with deteriorated paint, which is determined, using documented methodologies, to be in poor condition and to have a distinct painting history, shall be tested for the presence of lead.
 4. In residential dwellings, at least two dust samples shall be collected, one from a floor and the other from a window, in rooms, hallways or stairwells where one or more children, age six (6) and under, are most likely to come in contact with dust.
 5. In multi-family dwellings and child-occupied facilities, in addition to the floor and window samples required in paragraph (3)(b)4. of this section, the lead risk assessor shall collect dust samples from common areas where one or more children, age six (6) and under, are most likely to come into contact with dust.

- (c) Dust samples shall be collected and analyzed in the following manner:
 - 1. All dust samples shall be taken using documented methodologies that incorporate adequate quality control procedures.
 - 2. All collected dust samples shall be analyzed according to paragraph (6) of this section to determine if they contain detectable levels of lead that can be quantified numerically.

- (d) Paint shall be sampled in the following manner:
 - 1. The analysis of paint to determine the presence of lead shall be conducted using documented methodologies which incorporate adequate quality control procedures; and/or
 - 2. All collected paint chip samples shall be analyzed according to paragraph (6) of this section to determine if they contain detectable levels of lead that can be quantified numerically.

- (e) The lead risk assessor shall prepare a lead hazard screen report, which shall include, but not be limited to, the following information.
 - 1. The information required in a risk assessment report as specified in paragraph (4) of this section, including any background information collected pursuant to paragraph (b)1 of this section shall be included in the risk assessment report; and
 - 2. Recommendations, if warranted, for a follow-up risk assessment and, as appropriate, any further actions.

(4) Risk Assessment.

- (a) A risk assessment shall be conducted only by a person certified by the Division as a lead risk assessor and, if conducted, must be conducted according to the procedures in this section:

- (b) A visual inspection for risk assessment of the residential dwelling or child-occupied facility shall be undertaken to locate the existence of deteriorated paint, assess the extent and causes of the deterioration, and other potential sources of lead-based paint hazards.

- (c) Background information regarding the physical characteristics of the residential dwelling or child-occupied facility and occupant use patterns that may cause a lead-based paint exposure to one or more children age six (6) years and under shall be collected.

- (d) The following surfaces, which are determined, using documented methodologies, to have a distinct painting history, shall be tested for the presence of lead.
 - 1. Each friction surface or impact surface with visibly deteriorated paint; and
 - 2. All other surfaces with visibly deteriorated paint.
- (e) In residential dwellings, dust samples (single-surface samples) from the interior window sill(s) and floor shall be collected in all living areas where one or more children age six (6) and under are most likely to come into contact with dust.
- (f) For multi-family dwellings and child-occupied facilities, the samples required in paragraph (4)(d) of this section shall be taken. In addition, interior window sill and floor dust samples (single-surface samples) shall be collected in the following locations:
 - 1. Common areas adjacent to the sampled residential dwelling or child-occupied facility, and
 - 2. Other common areas in the building where the lead risk assessor determines that one or more children age six (6) years and under, are likely to come into contact with dust.
- (g) For child-occupied facilities, window and floor dust samples (single-surface samples) shall be collected in each room, hallway or stairwell utilized by one or more children, age six (6) and under, and in other common areas in the child-occupied facility where the lead risk assessor determines one or more children, age six (6) and under, are likely to come into contact with dust.
- (h) Soil samples shall be collected and analyzed for lead concentrations in the following locations:
 - 1. Exterior play areas where bare soil is present.
 - 2. Dripline/ foundation areas where bare soil is present.
 - 3. The rest of the yard (i.e., non-play areas) where bare soil is present.
- (i) Any paint, dust or soil samples shall be taken using documented methodologies that incorporate adequate quality control procedures.
- (j) Any collected paint chip, dust, or soil samples shall be analyzed according to paragraph (6) of this section to determine if they contain detectable levels of lead that can be quantified numerically.
- (k) The lead risk assessor shall prepare a risk assessment report which shall include the following information:

1. Date of assessment.
2. Address of each building.
3. Date of construction of buildings.
4. Apartment number (if applicable).
5. Name, address, and telephone number of each owner of each building.
6. Name, signature, and certification of the lead risk assessor conducting the assessment.
7. Name, address, and telephone number of the lead firm employing each lead risk assessor.
8. Name, address, and telephone number of each recognized laboratory conducting analysis of collected samples.
9. Results of the visual inspection.
10. Testing method and sampling procedure for paint analysis employed.
11. Specific locations of each painted component tested for the presence of lead.
12. All data collected from on-site testing, including quality control data and, if used, the serial number of any XRF device.
13. All results of laboratory analysis on collected paint, soil, and dust samples.
14. Any other sampling results.
15. Any background information collected pursuant to paragraph (4)(c) of this section.
16. To the extent that they are used as part of the lead-based paint hazard determination, the results of any previous inspections or analyses for the presence of lead-based paint, or other assessments of lead-based paint-related hazards.
17. A description of the location, type, and severity of identified lead-based paint hazards and any other potential lead hazards.
18. A description of interim controls and/or abatement options for each identified lead-based paint hazard and a suggested prioritization for

addressing each hazard. If the use of an encapsulant or enclosure is recommended, the report shall recommend a maintenance and monitoring schedule for the encapsulant or enclosure.

(5) Abatement.

- (a) An abatement shall be conducted only by a person certified by the Division and shall be conducted in accordance with the procedures and requirements specified in this section.
- (b) A lead supervisor is required for each abatement project and shall be on-site at all times when abatement is being conducted. This would include preparation, cleanup, disposal and testing activities associated with such measures.
- (c) All abatement shall be conducted in accordance with the requirements of this section.
- (d) Notification for a lead-based paint abatement project in a residential dwelling, child-occupied facility, or multi-family dwelling shall be made on forms supplied by the Division and submitted to the Division fifteen (15) calendar days prior to the start date of the lead-based paint abatement project.
- (e) Abatement shall not commence until the Division has provided a notice to proceed in accordance with paragraph (11) of this section.
- (f) A written occupant protection plan shall be developed for all abatement projects and shall be prepared according to the following procedures:
 - 1. The occupant protection plan shall be unique to each residential dwelling, multi-family dwelling or child-occupied facility and developed prior to the abatement. The occupant protection plan shall describe the measures and management procedures that will be taken during the abatement to protect the building occupants from exposure to any lead-based paint hazards.
 - 2. A certified lead supervisor or certified lead project designer shall prepare the occupant protection plan.
- (g) The work practices listed below shall be restricted during an abatement as follows:
 - 1. Open-flame burning or torching of lead-based paint is prohibited;
 - 2. Machine sanding or grinding or abrasive blasting or sandblasting of lead-based paint is prohibited unless used with High Efficiency Particulate Air (HEPA) exhaust control capable of removing particles of 0.3 microns or larger from air at 99.97 percent or greater efficiency;

3. Operating a heat gun on lead-based paint is permitted only at a temperature below 1100 degrees Fahrenheit; and
 4. Dry scraping of lead-based paint is permitted only in conjunction with heat guns or around electrical outlets or when treating defective painting spots no more than two (2) square feet in any one room, hallway or stairwell or totaling no more than twenty (20) square feet on exterior surfaces.
- (h) If conducted, soil abatement shall be conducted in one of the following ways:
1. If soil is removed, the lead-contaminated soil shall be replaced with soil with a lead concentration less than 400 parts per million or background concentration of lead, whichever is lower; or
 2. If soil is not removed, the lead-contaminated soil shall be permanently covered as defined in TSCA § 745.223.
 3. If soil is removed, it shall not be used as top soil at another site.
- (i) The following post-abatement clearance procedures shall be performed only by a lead inspector or lead risk assessor:
1. Following an abatement, a visual inspection shall be performed to determine if deteriorated painted surfaces and/or visible amounts of dust, debris or residue are still present. If deteriorated painted surfaces or visible amounts of dust, debris or residue are present, these conditions must be eliminated prior to the continuation of the clearance procedures.
 2. Following the visual inspection and any post-abatement cleanup required by paragraph (5)(i)1. of this section, clearance sampling for lead-contaminated dust shall be conducted. Clearance sampling may be conducted by employing single-surface sampling techniques.
 3. Dust samples for clearance purposes shall be taken using documented methodologies that incorporate adequate quality control procedures. Dust samples for clearance purposes shall be taken a minimum of one (1) hour after completion of final post-abatement cleanup activities.
 4. The following post-abatement clearance activities shall be conducted based upon the extent or manner of abatement activities conducted in or to the residential dwelling or child-occupied facility:
 - (i) After conducting an interior abatement with containment between abated and unabated areas, one (1) dust sample shall be taken from one (1) interior window sill and from one (1) window trough (if

available) and one dust sample shall be taken from the floors of each of no less than four (4) rooms, hallways or stairwells within the containment area. In addition, one (1) dust sample shall be taken from the floor outside the containment area. If there are less than four (4) rooms, hallways or stairwells within the containment area, then all rooms, hallways or stairwells shall be sampled.

(ii) After conducting an interior abatement with no containment, two (2) dust samples shall be taken from no less than four (4) rooms, hallways or stairwells in the residential dwelling or child-occupied facility. One (1) dust sample shall be taken from one (1) window (if available) and one (1) dust sample shall be taken from one (1) interior window sill and window trough (if present) and one (1) dust sample shall be taken from the floor of each room, hallway or stairwell selected. If there are less than four (4) rooms, hallways or stairwells within the residential dwelling or child-occupied facility, then all rooms, hallways or stairwells shall be sampled.

(iii) Following an exterior paint abatement, a visible inspection shall be conducted. All horizontal surfaces in the outdoor living area closest to the abated surface shall be found to be cleaned of visible dust and debris. In addition, a visual inspection shall be conducted to determine the presence of paint chips on the dripline or next to the foundation below any exterior surface abated. If paint chips are present, they must be removed from the site and properly disposed of in accordance with applicable standards set forth by the Division, and in compliance with all federal, state and local requirements. Clearance wipe samples must be collected from the exterior floors and concrete involved with the abatement project.

5. The rooms, hallways or stairwells selected for sampling shall be selected according to documented methodologies.

6. The lead inspector or risk assessor shall compare the residual lead dust level (as determined by the laboratory analysis) from each dust sample with applicable clearance levels for lead in dust on floors, concrete, windowsills, and window troughs as found in [391-3-24.07](#). If the residual dust levels in a dust sample exceed the clearance levels, all the components represented by the failed sample shall be re-cleaned and retested until clearance levels are met.

(j) In a multi-family dwelling with similarly constructed and maintained residential dwellings, random sampling for the purposes of clearance may be conducted provided:

1. The certified persons who abate or clean the residential dwelling do not know which residential dwellings will be selected for the random sample.
 2. A sufficient number of residential dwellings are selected for dust sampling to provide a ninety-five percent (95%) level of confidence that no more than 5 percent (5%) or 50 of the residential dwellings (whichever is smaller) in the randomly sampled population exceed the appropriate clearance levels.
 3. The randomly selected residential dwellings shall be sampled and evaluated for clearance according to the procedures found in paragraph (5)(i) of this section.
- (k) An abatement project completion notification shall be prepared by a lead supervisor or lead project designer. The notification shall be prepared on forms supplied by the Division and shall include, but not be limited to, the following information:
1. Start and completion dates of abatement.
 2. The name and address of each lead firm conducting the abatement and the name of each lead supervisor assigned to the abatement project.
 3. The name and title of the lead supervisor or lead project designer who prepared the occupant protection plan pursuant to paragraph (5)(f) of this section.
 4. The name, address, signature, and lead firm of each lead risk assessor or lead inspector conducting clearance sampling and the date of clearance testing.
 5. The results of clearance testing and all soil analyses (if applicable) and the name of each recognized laboratory that conducted the analyses.
 6. A detailed written description of the abatement, including abatement methods used, locations of rooms and/or components where abatement occurred, reason for selecting particular abatement methods for each component, and any monitoring of encapsulants or enclosures.
- (l) Abatement project completion notifications shall be submitted to the Division no later than thirty (30) working days after the completion date of lead-based paint abatement project.
- (6) Collection and Laboratory Analysis of Samples.

- (a) Any paint chip, dust, or soil samples collected pursuant to the work practice standards contained in this section shall be:
 - 1. Collected by persons certified by the Division as a lead inspector or lead risk assessor; and
 - 2. Analyzed by a laboratory recognized by the EPA pursuant to section 405(b) of TSCA as being capable of performing analyses for lead compounds in paint chip, dust, and soil samples.

- (7) A paint-lead hazard is present:
 - (a) On any friction surface that is subject to abrasion and where the lead dust levels on the nearest horizontal surface underneath the friction surface (e.g., the window sill or floor) are equal to or greater than the dust hazard levels identified in [391-3-24-.07](#);
 - (b) On any chewable lead-based paint surface on which there is evidence of teeth marks;
 - (c) Where there is any damaged or otherwise deteriorated lead-based paint on an impact surface that is caused by impact from a related building component (such as a door knob that knocks into a wall or a door that knocks against its door frame); and
 - (d) If there is any other deteriorated lead-based paint in any residential building or child-occupied facility or on the exterior of any residential building or child-occupied facility.

- (8) A dust-lead hazard is present in a residential dwelling or child-occupied facility:
 - (a) On floors and interior window sills when the weighted arithmetic mean lead loading for all single surface of floors and interior window sills are equal to or greater than 10 micrograms per square foot ($\mu\text{g}/\text{ft}^2$) for floors and equal to or greater than 100 micrograms per square foot ($\mu\text{g}/\text{ft}^2$) for interior window sills respectively;
 - (b) On floors or interior window sills in an un-sampled residential dwelling in a multi-family dwelling, if a dust-lead hazard is present on floors or interior window sills, respectively, in at least one sampled residential unit on the property; and
 - (c) On floors or interior window sills in an unsampled common area in a multi-family dwelling or child-occupied facility, if a dust-lead hazard is present on floors or interior window sills, respectively, in at least one sampled common area in the same common area group on the property.

(9) A soil-lead hazard is present:

- (a) In a play area when the soil-lead concentration from a composite play area sample of bare soil is equal to or greater than 400 parts per million; or
- (b) In the rest of the yard when the arithmetic mean lead concentration from a composite sample (or arithmetic mean of composite samples) of bare soil from the rest of the yard (i.e., non-play areas) for each residential building on a property is equal to or greater than 1,200 parts per million.

(10) Project Fees.

- (a) A lead firm or lead supervisor shall submit to the Division a project fee for each lead-based paint abatement project at least fifteen (15) calendar days prior to the start date of each abatement project. Project fees shall be submitted electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Abatement Fees. Project fees shall be based upon the following formula:
 - 1. \$50 per residential dwelling unit or child-occupied facility plus 2% (.02) of the total value of lead-based paint abatement work covered by the notification. Notifications submitted less than fifteen (15) calendar days prior to the state date, and with Division approval to commencement of lead-based paint abatement activities, are Emergency Notifications and must include an additional \$50 fee.

(11) Lead-Based Paint Abatement Project Notification.

- (a) No person shall conduct abatement without a notice to proceed from the Division, except as provided for in paragraph (c)(2) of this section. All abatement activities shall be conducted by certified persons and certified lead firms.
- (b) All notifications shall be made on forms provided by the Division. The notification shall include, but not be limited to, the following applicable information:
 - 1. Name, address, contact name, and phone number of the owner and operator of the target housing or child-occupied facility;
 - 2. Name, certification number, address, contact name and phone number of the lead firm;
 - 3. Name, certification number, address, firm, and phone number of the lead inspector and lead risk assessor;
 - 4. Name, certification number, address, firm, and phone number of the lead project designer;

5. Location and street address, including building number or name and floor or room number, city, county, and state of the building where the abatement is taking place;
6. Scheduled start and completion dates of active lead-based paint abatement work including preparation work and cleanup work;
7. Work schedule, including days of the week and hours to be worked;
8. Amount and locations of material to be abated;
9. Method(s) of abatement;
10. Waste transporter, address, contact name, and phone number;
11. Waste disposal site, address, contact name, and phone number;
12. For ordered abatements, the name, title, and authority of the State or local government representative who has ordered the abatement, the date that the order was issued, and the date the abatement was ordered to begin;
13. For emergency abatements, a description of the nature of the emergency and an explanation of how failure to correct the situation would cause a lead-based paint hazard;
14. Total value of the lead-based paint abatement work covered by the notification;
15. Total number of residential dwelling units and/or child occupied facilities abated; and
16. The original signature and date of the lead firm representative.
17. The person who developed the Occupant Protection Plan for the project.

(c) Notifications for lead-based paint abatement projects shall adhere to the following schedule:

1. Notifications for a lead-based paint abatement project shall be postmarked or delivered to the Division at least fifteen (15) calendar days prior to the scheduled start date;
2. The fifteen (15) calendar day notice may be waived if the abatement project is deemed an emergency lead-based paint abatement project by a lead risk assessor and approved by the Division prior to commencement of lead-based paint abatement activities. A notification involving an

emergency lead-based paint abatement project shall be postmarked or hand delivered to the Division by the workday following the request for the emergency abatement project. Notifications for emergency abatement projects shall be submitted along with a letter from the owner or the lead risk assessor explaining the nature of the emergency.

- (d) All notifications, both regular and emergency, for lead-based paint abatement shall be accompanied by a project fee in accordance with paragraph (10) of this section. Project fees shall be submitted electronically or in the form of check or money order and made payable to the Environmental Protection Division - Lead Abatement Fees.
- (e) Revisions to lead-based paint abatement project notifications shall be made in writing on a form provided by the Division and shall be submitted to the Division for the following:
 - 1. Revision to a start date for a project that will begin after the start date stated in the previous notification shall be received on or before the previously stated start date or previously revised start date;
 - 2. Revision to a start date for a project that will begin before the start date stated in the previous notification or subsequent revisions shall be received at least fifteen (15) calendar days before the new start date;
 - 3. Revision to a completion date that will be extended beyond the completion date stated in the previous notification shall be received by the original completion date or previously revised completion date;
 - 4. Revision to a completion date that will be earlier than the completion date stated in the previous notification or subsequent revision shall be received by the new completion date; and
 - 5. Revisions to notifications other than start or completion dates shall be submitted to the Division prior to initiating the activity which the revision addresses.
- (f) The following shall be maintained on site during abatement activities and be immediately made available for review by the Division:
 - 1. A copy of the project notification, notice to proceed and all revisions;
 - 2. The occupant protection plan;
 - 3. A copy of the applicable lead-based paint abatement design, risk assessment and inspection reports; and

4. Certifications issued by the Director for all certified persons and firms performing lead-based paint activities.

(g) All abatement shall be conducted in accordance with Rule 391-3-24-.06.

(h) All abatement shall be conducted under the direct supervision of a certified lead supervisor who shall be on-site at all times when abatement activities are being conducted.

(12) Recordkeeping.

(a) All reports or plans required in this section shall be maintained by the certified lead firm or person who prepared the report for no fewer than three (3) years. The certified lead firm or person shall also provide copies of these reports to the building owner who contracted for its services.

Rule 391-3-24-.07. Lead Clearance Levels.

Clearance procedures shall be conducted on all abatement projects by a certified inspector or lead risk assessor after appropriate cleaning has been completed. The following lead clearance levels must be met.

CLEARANCE DUST STANDARDS (Wipe Sampling Only)

Surface/ Medium	Level ($\mu\text{g}/\text{ft}^2$) (Equal to or less than)
Bare and carpeted floors	10 $\mu\text{g}/\text{ft}^2$
Interior Window Sills	100 $\mu\text{g}/\text{ft}^2$
Window Troughs	400 $\mu\text{g}/\text{ft}^2$
Exterior Concrete	800 $\mu\text{g}/\text{ft}^2$

Rule 391-3-24-.08. Information Distribution Requirements Before Conducting Renovation Activities.

- (1) Renovations in dwelling units. No more than 60 days before beginning renovation activities in any residential dwelling unit of target housing, the firm performing the renovation must:
 - (a) Provide the owner of the unit with the pamphlet, and comply with one of the following:
 1. Obtain, from the owner, a written acknowledgment that the owner has received the pamphlet, or
 2. Obtain a certificate of mailing at least 7 days prior to the renovation.
 - (b) In addition to the requirements in this section, if the owner does not occupy the dwelling unit, provide an adult occupant of the unit with the pamphlet, and comply with one of the following:
 1. Obtain, from the adult occupant, a written acknowledgment that the occupant has received the pamphlet; or certify in writing that a pamphlet has been delivered to the dwelling or that the firm performing the renovation has been unsuccessful in obtaining a written acknowledgment from an adult occupant. Such certification must include the address of the unit undergoing renovation, the date and method of delivery of the pamphlet, names of the persons delivering the pamphlet, reason for lack of acknowledgment (e.g., occupant refuses to sign, no adult occupant available), the signature of a representative of the firm performing the renovation, and the date of signature, or
 2. Obtain a certificate of mailing at least 7 days prior to the renovation.
- (2) Renovations in common areas. No more than 60 days before beginning renovation activities in common areas of multi-unit target housing, the firm performing the renovation must:
 - (a) Provide the owner with the pamphlet, and comply with one of the following:

1. Obtain, from the owner, a written acknowledgment that the owner has received the pamphlet, or
 2. Obtain a certificate of mailing at least 7 days prior to the renovation.
- (b) Comply with one of the following:
1. Notify in writing, or ensure written notification of, each affected unit and make the pamphlet available upon request prior to the start of renovation. Such notification shall be accomplished by distributing written notice to each affected unit. The notice shall describe the general nature and locations of the planned renovation activities; the expected starting and ending dates; and a statement of how the occupant can obtain the pamphlet and a copy of the records required by Rule [391-3-24-.11](#) at no cost to the occupants, or
 2. While the renovation is ongoing, post informational signs describing the general nature and locations of the renovation and the anticipated completion date. These signs must be posted in areas where they are likely to be seen by the occupants of all of the affected units. The signs must be accompanied by a posted copy of the pamphlet or information on how interested occupants can review a copy of the pamphlet or obtain a copy from the renovation firm at no cost to occupants. The signs must also include information on how interested occupants can review a copy of the records required by Rule [391-3-24-.11](#) or obtain a copy from the renovation firm at no cost to the occupants.
- (c) Prepare, sign, and date a statement describing the steps performed to notify all occupants of the intended renovation activities and to provide the pamphlet.
- (d) If the scope, locations, or expected starting and ending dates of the planned renovation activities change after the initial notification, and the firm provided written initial notification to each affected unit, the firm performing the renovation must provide further written notification to the owners and occupants providing revised information on the ongoing or planned activities. This subsequent notification must be provided before the firm performing the renovation initiates work beyond that which was described in the original notice.
- (3) Renovations in child-occupied facilities. No more than 60 days before beginning renovation activities in any child-occupied facility, the firm performing the renovation must:
- (a) Provide the owner of the building with the pamphlet, and comply with one of the following:

1. Obtain, from the owner, a written acknowledgment that the owner has received the pamphlet; or
 2. Obtain a certificate of mailing at least 7 days prior to the renovation.
- (b) If the owner of the child-occupied facility is not the operator or manager of the building, provide the operator, manager or management representative of the child-occupied facility with the pamphlet, and comply with one of the following:
1. Obtain, from the manager or management representative, a written acknowledgment that the manager or management representative has received the pamphlet; or certify in writing that a pamphlet has been delivered to the facility and that the firm performing the renovation has been unsuccessful in obtaining a written acknowledgment from an adult representative. Such certification must include the address of the child-occupied facility undergoing renovation, the date and method of delivery of the pamphlet, names of the persons delivering the pamphlet, reason for lack of acknowledgment (e.g., representative refuses to sign), the signature of a representative of the firm performing the renovation, and the date of signature; or
 2. Obtain a certificate of mailing at least 7 days prior to the renovation.
- (c) Provide the parents and guardians of children using the child-occupied facility with the pamphlet, information describing the general nature and locations of the renovation and the anticipated completion date, and information on how interested parents or guardians of children frequenting the child-occupied facility can review a copy of the records required by Rule [391-3-24-.11](#) or obtain a copy from the renovation firm at no cost to the occupants by complying with one of the following:
1. Mail or hand-deliver the pamphlet and the renovation information to each parent or guardian of a child using the child-occupied facility; or
 2. While the renovation is ongoing, post informational signs describing the general nature and locations of the renovation and the anticipated completion date. These signs must be posted in areas where they can be seen by the parents or guardians of the children frequenting the child-occupied facility. The signs must be accompanied by a posted copy of the pamphlet or information on how interested parents or guardians of children frequenting the child-occupied facility can review a copy of the pamphlet or obtain a copy from the renovation firm at no cost to the parents or guardians. The signs must also include information on how interested parents or guardians of children frequenting the child-occupied facility can review a copy of the

records required by Rule [391-3-24-.11](#) or obtain a copy from the renovation firm at no cost to the parents or guardians.

- (d) The renovation firm must prepare, sign, and date a statement describing the steps performed to notify all parents and guardians of the intended renovation activities and to provide the pamphlet.
- (4) Written acknowledgment. The written acknowledgments required in this Section must:
- (a) Include a statement recording the owner or occupant's name and acknowledging receipt of the pamphlet prior to the start of renovation, the address of the unit undergoing renovation, the signature of the owner or occupant as applicable, and the date of signature.
 - (b) Be either a separate sheet or part of any written contract or service agreement for the renovation.
 - (c) Be written in the same language as the text of the contract or agreement for the renovation or, in the case of non-owner occupied target housing, in the same language as the lease or rental agreement or the pamphlet.

Rule 391-3-24-.09. Certification of Persons and Firms Conducting Renovation Activities.

- (1) Scope.
- (a) Following the submission of an application demonstrating that all the requirements of this Rule are met and a determination by the Division that a person has met all applicable requirements to perform the appropriate renovation activities, the Division shall certify the applicant as a renovator or dust sampling technician.
 - (b) All certified persons shall be assigned a certification number and issued a certificate by the Division.
 - (c) All certified renovation firms shall be assigned a certification number and issued a certificate by the Division.

- (d) All individuals performing renovation activities on behalf of the certified renovation firm shall be either a certified dust sampling technician, a certified renovator or have been trained by a certified renovator when performing renovation activities and shall comply with the standards for performing such renovations or dust sampling activities as established in Rule [391-3-24-.08](#) through Rule [391-3-24-.11](#).
 - (e) All certifications shall expire based on the issue date or based on the last date of attending required training as specified in (2)(a) through (2)(c) of this Rule. Work performed after expiration of the certificate and prior to renewal shall constitute a violation of this Rule.
 - (f) No person or renovation firm shall conduct or offer to conduct renovation activities described in this section if that person or renovation firm does not have the appropriate certification by the Division pursuant to the requirements specified in this Rule and the person or renovation firm does not have in their possession a Division issued certificate.
 - (g) In order to maintain certification as a person or renovation firm, applicants must follow the requirements specified in paragraph (3) of this Rule.
 - (h) A person who is employed by and in the process of conducting renovation activities for a federal, state or local government agency shall not be required to pay certification fees as specified in this section.
 - (i) Persons requesting a duplication of their certificate shall submit a fee in the amount of \$25.00 electronically or in the form of a check, money order and made payable to the Environmental Protection Division - Lead Renovation Fees.
- (2) Application Process. The following are procedures and requirements an applicant must meet when applying to the Division for certification:
- (a) Certification of Renovation Firms.
 - 1. All firms, which perform or offer to perform, any of the renovation activities described in Rule [391-3-24-.10](#) must have certification from the Division.
 - 2. A firm seeking certification, as a Renovation Firm must:
 - (i) Submit a completed certification application on forms supplied by the Division certifying that the firm shall:
 - (I) Ensure that all individuals performing renovation activities on behalf of the certified renovation firm are either a certified dust sampling technician, a certified renovator or have been trained by a certified renovator when performing renovation

activities and shall comply with the standards for performing such renovations and/or dust sampling activities;

- (II) Follow the pre-notification education activity standards in Rule [391-3-24-.08](#).
- (III) Follow the standards for conducting renovation activities in Rule [391-3-24-.10](#), and
- (IV) Maintain all records required in Rule [391-3-24-.11](#).

- (ii) Submit a disclosure statement of any action taken by EPA or an EPA authorized program involving violations, suspensions, revocations or modifications of a firm's activities; and
- (iii) Submit a fee either in the amount of \$300.00 for a three (3) year certification or \$125.00 for a one (1) year certification. Fees shall be submitted electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Renovation Fees.
- (iv) Federal, State, county or city government agencies which conduct renovation activities are exempt from the renovation firm certification.

- 3. The renovation firm certification issued by the Division is valid either for a period of three (3) years or one (1) year from the date of issuance based on the amount of fees submitted as specified in this Rule.

(b) Certification of Renovators.

- 1. To become certified as a renovator, a person must:
 - (i) Successfully complete an initial renovator training course and receive an initial course completion certificate from a Division accredited training program;
 - (ii) Successfully pass the initial renovator training course exam.
 - (iii) Submit a completed certification application on forms provided by the Division with all appropriate information included. This would also include original signature and date.

- (iv) Submit an original initial renovator course completion training certificate or an original letter from the accredited training program confirming completion of the initial renovator training course on the accredited training program letterhead. Original documents shall be returned upon issuance or denial of certification by the Division;
- (v) Submit one (1) current 1 1/4 inch × 1 1/4 inch color passport photograph of the applicant with the applicant's name and original signature on the back of the picture; and
- (vi) Submit a fee in the amount of \$150.00 electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Renovation Fees.
- (vii) Persons, employed by a federal, state, county or city government agency, who conduct renovations for the government agency are exempt from the renovator certification fee.

2. The renovator certification issued by the Division allows the certified individual to perform renovations covered by this Rule 391-3-24-.09 through [391-3-24-.11](#) and is valid for a period of three (3) years from the date of issuance.

(c) Certification of Dust Sampling Technicians.

1. To become certified as a dust sampling technician, a person must:
 - (i) Successfully complete an initial dust sampling technician course and receive an initial course completion certificate from a Division accredited training program;
 - (ii) Successfully pass an initial dust sampling technician course exam;
 - (iii) Submit a completed certification application on forms provided by the Division with all appropriate information included. This would also include original signature and date;
 - (iv) Submit an original initial dust sampling technician course completion training certificate or an original letter from the accredited training program confirming completion of the initial dust sampling technician training course on the accredited training program letterhead. Original documents shall be returned upon issuance or denial of certification by the Division;

- (v) Submit one (1) current 1 1/4 inch × 1 1/4 inch color passport photograph of the applicant with the applicant's name and original signature on the back of the picture; and
 - (vi) Submit a fee in the amount of \$150.00 electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Renovation Fees for a one-year certification or submit a fee in the amount of \$276.00 for a two-year certification.
 - (vii) Persons, employed by a federal, state, county or city government agency, who conducts dust sampling for the government agency are exempt from the dust sampling certification fee.
2. The dust sampling technician certification issued by the Division allows the certified individual to perform dust sampling activities covered by Rule [391-3-24-.10](#) and is valid for a period of one (1) year from the date of issuance.

(3) Renewal of Certification.

- (a) After certified persons demonstrate that all of the requirements of this section are met and the Division determines that an applicant has met all the requirements set forth in this section, the Division shall renew certification of a person as a renovator or dust sampling technician.
- (b) Renewal of certified renovators
 - 1. Certified renovators meeting the requirements of this section shall be renewed for a period of thirty-six (36) months from the expiration date of certification or thirty-six (36) months from the last date of completing a Division accepted renovation course, whichever is earlier.
 - 2. Certified Renovators holding a certificate from an U.S. EPA accredited training provider issued before the effective date of this Rule shall be recognized by the Division and the renovator certification shall be valid for a period of five (5) years from the date of issuance. At least thirty (30) days before the expiration of the U.S. EPA renovator certification, the renovator shall submit a renewal application on forms provided by the Division and pay the fees as required in paragraph (3) of this Rule.
 - 3. Persons seeking renewal of certification, as a renovator shall:

- (i) Submit a completed renewal application to the Division on forms provided or approved by the Division with all the appropriate information included and signed by the applicant.
- (ii) Successfully complete a refresher renovator training course and receive a refresher course completion certificate from a Division accredited training program within thirty-six (36) months from the last date of training.

Persons that do not successfully complete the renovator refresher course within thirty-six (36) months from the last date of training may obtain provisional certification for twelve (12) months by payment of a fee two (2) times the certification fee.

Persons that do not successfully complete the refresher renovator course and receive a certificate of completion by the forty-eighth (48) month from the last date of training, shall successfully complete the initial renovator training course for renewal of certification.

- (iii) Submit an original refresher renovator course completion certificate for renewal or an original letter from the accredited training program confirming completion of the renovator training course on the accredited training program letterhead.
- (iv) Submit one (1) current 1 1/4 inch × 1 1/4 inch color passport photograph of the applicant with the applicant's name and original signature on the back of the photograph.
- (v) Submit a fee in the amount of \$150.00. Fees shall be submitted electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Renovation Fees.

(c) Renewal of certified dust sampling technicians

1. Certified dust sampling technicians meeting the requirements of this section shall be renewed for a period of twelve (12) months from the expiration date of certification or twenty-four (24) months from the last date of completing a Division accepted dust sampling technician course, whichever is earlier.
2. Certified dust sampling technicians holding a certificate from an U.S. EPA accredited training provider issued before the effective date of this Rule shall be recognized by the Division and the renovator certification shall be valid for a period of five (5) years from the date of the issuance of the

certification. At least thirty (30) days before the expiration of the dust sampling technician certification, the dust sampling technician shall submit a renewal application on forms provided by the Division as required in paragraph (3) of this Rule.

3. Persons seeking renewal of certification, as a dust sampling technician shall:

- (i) Submit a completed renewal application to the Division on forms provided or approved by the Division with all the appropriate information included and signed by the applicant.
- (ii) Successfully complete a refresher dust sampling technician course(s) and receive a refresher course completion certificate from an accredited training program within twenty-four (24) months from the last date of training.

Persons that do not successfully complete the refresher dust sampling technician course within twenty-four (24) months from the last date of training may obtain provisional certification for twelve (12) months by payment of a fee two (2) times the certification fee.

Persons that do not successfully complete the refresher dust sampling technician course and receive a certificate of completion by the thirty-sixth (36th) month from the last date of training, shall successfully complete the initial said training course for renewal of certification.

- (iii) Submit an original refresher dust sampling technician course completion certificate or an original letter from the accredited training program confirming completion of said training course(s) on the accredited training program letterhead.
- (iv) Submit one (1) current 1 1/4 inch × 1 1/4 inch color passport photograph of the applicant with the applicant's name and original signature on the back of the photograph.
- (v) Submit a fee in the amount of \$150.00 per renewal discipline for a one-year certification or submit \$275.00 for a two-year certification. Fees shall be submitted electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Renovation Fees.

(d) Renewal of renovation firm certification

1. Certified renovation firms meeting the requirements of this section shall be renewed either for a period of twelve (12) months from the expiration date of certification or thirty-six (36) months from the expiration date of the certificate. Length of renewal is based on the amount of fees submitted.
2. Renovation firms holding a certificate from EPA issued before the effective date of this Rule shall be valid for a period of five (5) years from the date of issuance from U.S. EPA. At least thirty (30) days prior to the expiration of the U.S. EPA certification, the renovation firm shall submit a renewal application on forms provided by the Division. A renewal application must be submitted as defined in paragraph (3) of this Rule by the date of the expiration of the EPA renovation firm certificate.
3. In order for renovation firm certification to be renewed for either a period of twelve (12) months or thirty-six (36) months, the renovation firm shall:
 - (i) Submit a completed renewal application to the Division on forms provided by the Division certifying that the renovation firm shall:
 - (ii) Ensure that all individuals performing renovation activities on behalf of the certified renovation firm are either a certified dust sampling technician, a certified renovator or have been trained by a certified renovator when performing renovation activities;
 - (iii) Follow the standards in Rule [391-3-24-.10](#) for conducting renovations and dust sampling activities;
 - (iv) Follow the standards in Rule [391-3-24-.08](#) for pre-notification education requirements; and
 - (v) Maintain all records pursuant to the requirements in Rule [391-3-24-.11](#).
4. Submit a disclosure statement of any action(s) taken by the Division, EPA, or an EPA approved program involving violations, suspensions, revocations, or modifications of a renovation firm's activity.
5. Submit a fee in the amount of \$300.00 electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Renovation Fees for a thirty-six (36) month renewal. A renovation firm may submit a fee in the amount of \$125.00 electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Renovation Fees for a twelve (12) month renewal.

- (e) Renewal applications shall be postmarked or hand delivered to the Division thirty (30) days prior to the expiration date of certification for each discipline in which certification is sought. Certified persons submitting renewal applications postmarked or hand delivered after the expiration date of certification shall follow the requirements specified in paragraph (3) of this section for certification purposes.

(4) Reciprocity.

- (a) Each person seeking certification who is licensed, certified or permitted in another state, Tribe or Territory of the United States to perform renovations or dust sampling activities may petition the Division on a form provided by the Division to grant certification without repetition of training requirements. The Division may recognize the certification of a discipline granted by another State, Tribe or Territory with which the Division has a written reciprocal agreement. Any person may apply to have their certification approved by the Division if their certification has been licensed, certified or permitted by another State, Tribe or Territory with which the Division has a written reciprocal agreement.
- (b) Persons seeking certification by reciprocity shall also submit to the Division the following:
 - 1. A completed application to the Division on forms provided by the Division with all the appropriate information included and signed by the applicant.
 - 2. A copy of the certification issued by the reciprocating state, tribe or territory.
 - 3. One (1) current 1 1/4 inch × 1 1/4 inch color passport photograph of the applicant with the applicant's name and original signature on the back of the picture.
 - 4. A fee in the amount of \$150.00 for each discipline. Fees shall be submitted electronically or in the form of a check or money order and made payable to the Environmental Protection Division - Lead Renovation Fees.

(5) Suspension, Revocation, and Modification.

- (a) The Director may investigate the actions of any certified person or renovation firm and may suspend, revoke or modify the certification of a person or renovation firm in accordance with Chapter 13 of Title 50, the "Georgia Administrative Procedures Act," when it is found that the person or renovation firm has:
 - 1. Obtained training documentation through fraudulent means.

2. Gained admission to and completed an accredited training program through misrepresentation of admission requirements.
 3. Obtained certification through misrepresentation of certification requirements or related documents dealing with education, training, professional registration, or experience.
 4. Performed work requiring certification at a job site without having proof of certification.
 5. Permitted the duplication, alteration or use of the person's own certificate by another.
 6. Performed work for which certification is required, but for which appropriate certification has not been received.
 7. Failed to comply with the appropriate work practice standards for lead-based paint activities as specified in Rule [391-3-24-10](#).
 8. Failed to comply with Federal, State, or local lead-based paint statutes or regulations.
 9. Performed work at a job site with persons who are not certified or trained.
 10. Misrepresented facts in a renovation firm's letter of application.
 11. Failed to maintain required records.
- (b) When certification of a person or renovation firm is revoked, the person or renovation firm shall not be eligible for recertification for a period of five (5) years from the date of revocation.

Authority: O.C.G.A. Sec. [31-41-1](#) *et seq.*

History. Original Rule entitled "Certification of Persons and Firms Conducting Renovation Activities" adopted. F. Nov. 19, 2010; eff. Dec. 9, 2010.

Rule 391-3-24-10. Standards for Conducting Renovation Activities.

- (1) Renovator responsibilities. Certified renovators are responsible for ensuring compliance with all renovations to which they are assigned. A certified renovator:
 - (a) Must perform all of the tasks described in this Rule and must either perform or direct workers who perform all of the tasks described in this Rule.

- (b) Must provide training to workers on the work practices they will be using in performing their assigned tasks.
 - (c) Must be physically present at the work site when the signs required by this Rule are being posted, while the work area containment required by this Rule is being established, and while the work area cleaning required by this Rule is being performed.
 - (d) Must regularly direct work being performed by other individuals to ensure that the work practices are being followed, including maintaining the integrity of the containment barriers and ensuring that dust or debris does not spread beyond the work area.
 - (e) Must be available, either on-site or by telephone, at all times that renovations are being conducted.
 - (f) When requested by the party contracting for renovation services, must use an acceptable test kit to determine whether components to be affected by the renovation contain lead-based paint.
 - (g) Must have with them at the work site, copies of their Division issued renovator certificate.
 - (h) Must prepare the records required by Rule [391-3-24-.11](#).
- (2) Dust sampling technician responsibilities. When performing optional dust clearance sampling, a certified dust sampling technician:
- (a) Must collect dust samples in accordance with Rule [391-3-24-.06](#), must send the collected samples to a laboratory recognized by EPA under TSCA section 405(b), and must compare the results to the clearance levels in accordance with Rule [391-3-24-.07](#).
 - (b) Must have with them at the work site, copies of their Division issued dust sampling technician certificate.
- (3) Standards for renovation activities. Renovations must be performed by certified renovation firms using at least one (1) certified renovator while conducting renovations. The responsibilities of certified firms and certified renovators are set forth in Rule 391-3-24-.10.
- (a) Occupant protection. Firms must post signs clearly defining the work area and warning occupants and other persons not involved in renovation activities to remain outside of the work area. To the extent practicable, these signs must be in the primary language of the occupants. These signs must be posted before beginning the renovation and must remain in place and readable until the

renovation and the post-renovation cleaning verification has been completed. If warning signs have been posted in accordance with Rule [391-3-24-.08](#) additional signs are not required by this Section.

- (b) Containing the work area. Before beginning the renovation, the firm must isolate the work area so that no dust or debris leaves the work area while the renovation is being performed. In addition, the firm must maintain the integrity of the containment by ensuring that any plastic or other impermeable materials are not torn or displaced, and taking any other steps necessary to ensure that no dust or debris leaves the work area while the renovation is being performed. The firm must also ensure that containment is installed in such a manner that it does not interfere with occupant and worker egress in an emergency.

1. Interior renovations. The firm must:

- (i) Remove all objects from the work area, including furniture, rugs, and window coverings, or cover them with plastic sheeting or other impermeable material with all seams and edges taped or otherwise sealed.
- (ii) Close and cover all ducts opening in the work area with taped-down plastic sheeting or other impermeable material.
- (iii) Close windows and doors in the work area. Doors must be covered with plastic sheeting or other impermeable material. Doors used as an entrance to the work area must be covered with plastic sheeting or other impermeable material in a manner that allows workers to pass through while confining dust and debris to the work area.
- (iv) Cover the floor surface, including installed carpet, with taped-down plastic sheeting or other impermeable material in the work area 6 feet beyond the perimeter of surfaces undergoing renovation or a sufficient distance to contain the dust, whichever is greater.
- (v) Use precautions to ensure that all personnel, tools, and other items, including the exteriors of containers of waste, are free of dust and debris before leaving the work area.

2. Exterior renovations. The firm must:

- (i) Close all doors and windows within 20 feet of the renovation. On multi-story buildings, close all doors and windows within 20 feet of the renovation on the same floor as the renovation, and close all doors and windows on all floors below that are the same horizontal distance from the renovation.

- (ii) Ensure that doors within the work area that will be used while the job is being performed are covered with plastic sheeting or other impermeable material in a manner that allows workers to pass through while confining dust and debris to the work area.
 - (iii) Cover the ground with plastic sheeting or other disposable impermeable material extending 10 feet beyond the perimeter of surfaces undergoing renovation or a sufficient distance to collect falling paint debris, whichever is greater, unless the property line prevents 10 feet of such ground covering.
 - (iv) In certain situations, the renovation firm must take extra precautions in containing the work area to ensure that dust and debris from the renovation does not contaminate other buildings or other areas of the property or migrate to adjacent properties.
- (c) Prohibited and restricted practices. The work practices listed below shall be prohibited or restricted during a renovation as follows:
1. Open-flame burning or torching of lead-based paint is prohibited.
 2. The use of machines that disturb lead-based paint through high-speed operation such as sanding, grinding, power planing, needle gun, abrasive blasting, or sandblasting, is prohibited unless such machines are used with HEPA exhaust control.
 3. Operating a heat gun on lead-based paint is permitted only at temperatures below 1100 degrees Fahrenheit.
- (d) Waste from renovations.
1. Waste from renovation activities must be contained to prevent releases of dust and debris before the waste is removed from the work area for storage or disposal. If a chute is used to remove waste from the work area, it must be covered.
 2. At the conclusion of each work day and at the conclusion of the renovation, waste that has been collected from renovation activities must be stored under containment, in an enclosure, or behind a barrier that prevents release of dust and debris out of the work area and prevents access to dust and debris.
 3. When the firm transports waste from renovation activities, the firm must contain the waste to prevent release of dust and debris.

(e) Cleaning the work area. After the renovation has been completed, the firm must clean the work area until no dust, debris or residue remains.

1. Interior and exterior renovations. The firm must:

- (i) Collect all paint chips and debris and, without dispersing any of it, seal this material in a heavy-duty bag, and
- (ii) Remove the protective sheeting. Mist the sheeting before folding it, fold the dirty side inward, and either tape shut to seal or seal in heavy-duty bags. Sheeting used to isolate contaminated rooms from non-contaminated rooms must remain in place until after the cleaning and removal of other sheeting. Dispose of the sheeting as waste.

2. Additional cleaning for interior renovations. The firm must clean all objects and surfaces in the work area and within 2 feet of the work area in the following manner, cleaning from higher to lower:

- (i) Walls. Clean walls starting at the ceiling and working down to the floor by either vacuuming with a HEPA vacuum or wiping with a damp cloth, and
- (ii) Remaining surfaces. Thoroughly vacuum all remaining surfaces and objects in the work area, including furniture and fixtures, with a HEPA vacuum. The HEPA vacuum must be equipped with a beater bar when vacuuming carpets and rugs, and
- (iii) Wipe all remaining surfaces and objects in the work area, except for carpeted or upholstered surfaces, with a damp cloth. Mop uncarpeted floors thoroughly, using a mopping method that keeps the wash water separate from the rinse water, such as the 2-bucket mopping method, or using a wet mopping system.

(4) Standards for post-renovation cleaning verification

(a) Interiors.

1. A certified renovator must perform a visual inspection to determine whether dust, debris or residue is still present. If dust, debris or residue is present, these conditions must be removed by re-cleaning and another visual inspection must be performed.

2. After a successful visual inspection, a certified renovator must:

- (i) Verify that each windowsill in the work area has been adequately cleaned, using the following procedure.
 - (1) Wipe the windowsill and window trough with a wet disposable cleaning cloth that is damp to the touch. If the cloth matches or is lighter than the cleaning verification card, the windowsill and window trough have been adequately cleaned.
 - (2) If the cloth does not match and is darker than the cleaning verification card, re-clean the windowsill and window trough as directed in this Section, then either use a new cloth or fold the used cloth in such a way that an unused surface is exposed, and wipe the surface again. If the cloth matches or is lighter than the cleaning verification card, the windowsill and window trough have been adequately cleaned.
 - (3) If the cloth does not match and is darker than the cleaning verification card, wait for 1 hour or until the surface has dried completely, whichever is longer.
 - (4) After waiting for the windowsill and window trough to dry, wipe the windowsill and window trough with a dry disposable cleaning cloth. After this wipe, the windowsill and window trough have been adequately cleaned.

- (ii) Wipe uncarpeted floors and countertops within the work area with a wet disposable cleaning cloth. Floors must be wiped using an application device with a long handle and a head to which the cloth is attached. The cloth must remain damp at all times while it is being used to wipe the surface for post-renovation cleaning verification. If the surface within the work area is greater than 40 square feet, the surface within the work area must be divided into roughly equal sections that are each less than 40 square feet. Wipe each such section separately with a new wet disposable cleaning cloth. If the cloth used to wipe each section of the surface within the work area matches or is lighter than the cleaning verification card, the surface has been adequately cleaned.
 - (1) If the cloth used to wipe a particular surface section does not match and is darker than the cleaning verification card, re-clean that section of the surface as directed in this Section, then use a new wet disposable cleaning cloth to wipe that section again. If the cloth matches or is lighter than the

cleaning verification card, that section of the surface has been adequately cleaned.

- (2) If the cloth used to wipe a particular surface section does not match and is darker than the cleaning verification card after the surface has been re-cleaned, wait for 1 hour or until the entire surface within the work area has dried completely, whichever is longer.
 - (3) After waiting for the entire surface within the work area to dry, wipe each section of the surface that has not yet achieved post-renovation cleaning verification with a dry disposable cleaning cloth. After this wipe, that section of the surface has been adequately cleaned.
 3. When the work area passes the post-renovation cleaning verification, remove the warning signs.
 - (b) Exteriors. A certified renovator must perform a visual inspection to determine whether dust, debris or residue is still present on surfaces in and below the work area, including windowsills and the ground. If dust, debris or residue is present, these conditions must be eliminated and another visual inspection must be performed. When the area passes the visual inspection, remove the warning signs.
- (5) Optional dust clearance testing. Cleaning verification need not be performed if the contract between the renovation firm and the person contracting for the renovation or another Federal, State, Territorial, Tribal, or local law or regulation requires:
 - (a) The renovation firm to perform dust clearance sampling at the conclusion of a renovation covered by this subpart.
 - (b) The dust clearance samples are required to be collected by a certified inspector, risk assessor or dust sampling technician.
 - (c) The renovation firm is required to re-clean the work area until the dust clearance sample results are below the clearance standards in Rule [391-3-24.07](#).
- (6) Activities conducted after post-renovation cleaning verification. Activities that do not disturb lead-based paint, such as applying paint to walls that have already been prepared, are not regulated by this subpart if they are conducted after post-renovation cleaning verification has been performed.

History. Original Rule entitled "Standards for Conducting Renovation Activities" adopted. F. Nov. 19, 2010; eff. Dec. 9, 2010.

Rule 391-3-24-11. Recordkeeping and Reporting Requirements for Renovation Activities.

- (1) Firms performing renovations must retain and, if requested, make available to the Division all records necessary to demonstrate compliance with this section for a period of three (3) years following completion of the renovation. This three (3) year retention requirement does not supersede longer obligations required by other provisions for retaining the same documentation, including any applicable federal, State or Tribal laws or regulations.
- (2) Records that must be retained pursuant to this Section shall include (where applicable):
 - (a) Records or reports certifying that a determination had been made that lead-based paint was not present on the components affected by the renovation, as described in this rule. These records or reports include:
 1. Reports prepared by a certified inspector or certified risk assessor.
 2. Records prepared by a certified renovator after using EPA-recognized test kits, including an identification of the manufacturer and model of any test kits used, a description of the components that were tested including their locations, and the result of each test kit used.
 - (b) Signed and dated acknowledgments of receipt of pre-renovation notification records as described in Rule [391-3-24-.08](#).
 - (c) Certifications of attempted delivery as described in Rule [391-3-24-.08](#).
 - (d) Certificates of mailing as described in Rule [391-3-24-.08](#).
 - (e) Records of notification activities performed regarding common area renovations and renovations in child-occupied facilities, as described in Rule [391-3-24-.08](#).
 - (f) Documentation of compliance with the requirements of Rule [391-3-24-.10](#), including documentation that a certified renovator was assigned to the project, that the certified renovator provided on-the-job training for workers used on the project, that the certified renovator performed or directed workers who performed all of the tasks described in Rule [391-3-24-.10](#), and that the certified renovator performed the post-renovation cleaning verification described in Rule [391-3-24-.10](#). If the renovation firm was unable to comply with all of the requirements of this rule due to an emergency as defined in Rule [391-3-24-.10](#), the firm must document the nature of the emergency and the provisions of the rule that were not followed. This documentation must include a copy of the certified renovator's

training certificate, and a certification by the certified renovator assigned to the project that:

1. Training was provided to workers (topics must be identified for each worker).
2. Warning signs were posted at the entrances to the work area.
3. If test kits were used, that the specified brand of kits was used at the specified locations and that the results were as specified.
4. The work area was contained by:
 - (i) Removing or covering all objects in the work area (interiors).
 - (ii) Closing and covering all HVAC ducts in the work area (interiors).
 - (iii) Closing all windows in the work area (interiors) or closing all windows in and within 20 feet of the work area (exteriors).
 - (iv) Closing and sealing all doors in the work area (interiors) or closing and sealing all doors in and within 20 feet of the work area (exteriors).
 - (v) Covering doors in the work area that were being used to allow passage but prevent spread of dust and debris outside the work area.
 - (vi) Covering the floor surface, including installed carpet, with taped-down plastic sheeting or other impermeable material in the work area 6 feet beyond the perimeter of surfaces undergoing renovation or a sufficient distance to contain the dust, whichever is greater (interiors) or covering the ground with plastic sheeting or other disposable impermeable material anchored to the building extending 10 feet beyond the perimeter of surfaces undergoing renovation or a sufficient distance to collect falling paint debris, whichever is greater, unless the property line prevents 10 feet of such ground covering, weighted down by heavy objects (exteriors).
 - (vii) Installing (if necessary) vertical containment to prevent migration of dust and debris to adjacent property (exteriors).
5. Waste was contained on-site and remained contained while being transported off-site.
6. The work area was properly cleaned after the renovation by:

- (i) Picking up all chips and debris, misting protective sheeting, folding it dirty side inward, and taping it and placing it in a secured container for removal.
 - (ii) Cleaning the work area surfaces and objects using a HEPA vacuum and/or wet cloths or mops (interiors).
 - 7. The certified renovator performed the post-renovation cleaning verification (the results of which must be briefly described, including the number of wet and dry cloths used).
- (3) When the final invoice for the renovation is delivered or within 30 days of the completion of the renovation, whichever is earlier, the renovation firm must provide information pertaining to compliance with this subpart to the following persons:
- (a) The owner of the building; and, if different,
 - (b) An adult occupant of the residential dwelling, if the renovation took place within a residential dwelling, or an adult representative of the child-occupied facility, if the renovation took place within a child-occupied facility.
- (4) When performing renovations in common areas of multi-unit target housing, renovation firms must post the information required by this subpart or instructions on how interested occupants can obtain a copy of this information. This information must be posted in areas where it is likely to be seen by the occupants of all of the affected units.
- (5) The information, required to be provided in this section, may be provided by completing the sample form titled "Sample Renovation Recordkeeping Checklist" or a similar form containing the test kit information, and the training and work practice compliance information required by this Rule.
- (6) If dust clearance sampling is performed in lieu of cleaning verification as permitted by Rule [391-3-24-.10](#), the renovation firm must provide, when the final invoice for the renovation is delivered or within 30 days of the completion of the renovation, whichever is earlier, a copy of the dust sampling report to:
- (a) The owner of the building; and, if different,
 - (b) An adult occupant of the residential dwelling, if the renovation took place within a residential dwelling, or an adult representative of the child-occupied facility, if the renovation took place within a child-occupied facility.
 - (c) When performing renovations in common areas of multi-unit target housing, renovation firms must post these dust sampling reports or information on how

interested occupants of the housing being renovated can obtain a copy of the report. This information must be posted in areas where they are likely to be seen by the occupants of all of the affected units.

History. Original Rule entitled "Recordkeeping and Reporting Requirements for Renovation Activities" adopted. F. Nov. 19, 2010; eff. Dec. 9, 2010.

Rule 391-3-24-.12. Lead-Based Paint Hazard Management Program Fees.

- (1) Persons, individuals and firms who must pay fees. Fees in accordance with this Rule must be paid by:
 - (a) Training programs.
 - 1. All training providers applying to the Division for the accreditation and re-accreditation of training programs in one or more of the following disciplines: lead supervisor, lead inspector, lead risk assessor, lead project designer, lead work, renovator, or dust sampling technician.
 - 2. All training providers applying for reciprocity as allowed in [391-3-24-.04](#) of this Rule.
 - (b) Firms. All lead and renovation firms applying to the Division for certification and re-certification to conduct renovations and lead-based paint activities.
 - (c) Individuals. All individuals applying to the Division for certification and re-certification to conduct renovations and lead-based paint activities.
- (2) Lost or replacement certificate. A \$25 fee will be charged for the replacement of a firm or individual certificate.
- (3) The fee schedule for lead-based paint and renovation activities is found in Table 1 of this section.

TABLE 1		
Training Provider Accreditation	<i>Initial Accreditation</i>	Annual Re-accreditation
Initial Training Provider Course Accreditation of the following disciplines:	\$400/ 8 hour day of training	\$300 per course/ year

Lead Supervisor, Lead Inspector, Lead Risk Assessor, Lead Project Designer, Lead Worker, Renovator or Dust Sampling Technician Courses		
Refresher Training Provider Course Accreditation of the following disciplines: Lead Supervisor, Lead Inspector, Lead Risk Assessor, Lead Project Designer, Lead Worker, Renovator or Dust Sampling Technician Course	\$400/ 8 hour day of training	\$300 per course/ year
Reciprocity Accreditation of Training Provider courses of the following disciplines: Lead Supervisor, Lead Inspector, Lead Risk Assessor, Lead Project Designer, Lead Work, Renovator or Dust Sampling Technical Course	\$300/ 8 hour day of training	\$300/ course/ year
Lead Firm Certification	Initial Certification	Re-certification
Lead Abatement Firm	\$350/ year	\$350/ year
Renovation Firm	\$125 (1-year certification) or \$300 (3-year certification)	\$125/ year or \$300/ 3 years
Individual Lead Discipline Certifications	Certification	Recertification
Lead Supervisor, Lead Inspector, Lead Risk Assessor, Lead Project Designer, Lead Worker	\$150/ year	\$150/year
Joint Lead Inspector/Lead Risk Assessor	\$250/year	\$250/year
Renovator	\$150 (3-year certification)	\$150/ 3 years
Dust Sampling Technician	\$150/1-year certification or \$275/ 2-year certification	\$150/1-year certification or \$275/ 2-year certification
Project Notification or Permit	Project Notification Fee	Notice Requirements
Lead abatement projects	\$50 plus 2% of project cost	15 days before project start
Emergency Notification: Lead Abatement	\$50	As soon as possible.

Subject 391-3-25. LOW EMISSION VEHICLE CERTIFICATION.

Rule 391-3-25-.01. Definitions.

Unless a different meaning is required by the context, the following terms as used in these rules shall have the meaning hereinafter respectively ascribed; provided, however, to the extent the definitions set forth below conflict with the definitions set forth in O.C.G.A. § [48-7-40.16](#), § [48-7-29.18](#), or § [48-7-29.19](#), the definitions in O.C.G.A. § [48-7-40.16](#), § [48-7-29.18](#), and § [48-7-29.19](#) shall control; and provided, further, to the extent any term in this Chapter is not defined below, the definitions in O.C.G.A. § [48-7-40.16](#), § [48-7-29.18](#), and § [48-7-29.19](#) shall apply; and provided, further, that definitions within any subsequent rule, or subdivision thereof, which are expressly made applicable to the rule or subdivision within which they appear, shall apply for purposes of such specific rule or subdivision thereof.

- (a) "Alternative fuel heavy-duty vehicle" means a new commercial vehicle, with a gross vehicle weight ratio equal to or more than 26,001 pounds, that is primarily fueled by an alternative fuel. As used in this definition, "primarily fueled by an alternative fuel" as defined in O.C.G.A. § [48-7-29.18](#) means a vehicle that is produced by an original equipment manufacturer and operates on 90 percent or more alternative fuel and on 10 percent or less gasoline or diesel fuel.
- (b) "Alternative fuel medium-duty vehicle" means a new commercial vehicle, with a gross vehicle weight ratio equal to 8,500 pounds or more and less than 26,001 pounds, that is solely fueled by an alternative fuel as defined in O.C.G.A. § [48-7-29.18](#), and that is produced by an original equipment manufacturer.
- (c) "Certificate" means the form used as proof to the Department of Revenue that the low-emission vehicle, zero emission vehicle, electric vehicle charger, converted vehicle, alternative fuel medium-duty vehicle, or alternative fuel heavy-duty vehicle is eligible for state income tax credit. This certificate will be issued by EPD for new low-emission vehicles, zero emission vehicles, alternative fuel medium-duty vehicles, alternative fuel heavy-duty vehicles, converted vehicles and electric vehicle chargers.
- (d) "CO" means carbon monoxide.
- (e) "Conventionally fueled vehicle" means a motor vehicle which is fueled solely by a petroleum based fuel such as gasoline or diesel.
- (f) "Converted vehicle" means a motor vehicle that is retrofitted so that it is fueled solely by an alternative fuel as defined in O.C.G.A. § [48-7-40.16](#) and which meets the emission

standards set forth for that class of low emission vehicle (LEV), ultra low emission vehicle (ULEV) or zero emission vehicle (ZEV).

- (g) "Department" means the Department of Natural Resources.
- (h) "Director" means the Director of the Environmental Protection Division of the Department of Natural Resources.
- (i) "Electric vehicle charger" means an electrical device and installation thereof located off-board the vehicle that provides electricity for electric vehicle batteries and includes the conductors, connectors, attachment plugs, and all other fittings, devices, power outlets, or apparatuses, installed specifically for the purposes of delivering energy from the premises wiring to the electric vehicle and shall have power levels greater than 130 volts, AC 1 phase.
- (j) "EPA" means the United States Environmental Protection Agency.
- (k) "EPD" means the Environmental Protection Division of the Department of Natural Resources.
- (l) "GVWR" means the gross vehicle weight rating, i.e., the weight of the vehicle and contents when loaded to its maximum capacity, as established by the vehicle manufacturer.
- (m) "Heavy Duty Vehicle (HDV)" means a vehicle that has a gross vehicle weight rating (GVWR) greater than 8500 pounds.
- (n) "HCHO" means formaldehyde.
- (o) "Installer" means any person who installs a conversion system on a vehicle in order to convert it to an alternative fuel vehicle meeting the emission standards for that LEV, ULEV, or ZEV category. NOTE: Manufacturers of conversion kits, as well as installers, are responsible for demonstrating that vehicles converted to use alternative fuels have a configuration that complies with all federal motor vehicle regulations.
- (p) "Light Duty Truck (LDT)" means a truck that has a GVWR of 8500 pounds or less.
- (q) "Light Duty Vehicle (LDV)" means a passenger car or passenger car derivative capable of seating 12 passengers or less.
- (r) "Low-emission vehicle (LEV)" means a motor vehicle which is fueled solely by an alternative fuel as defined in O.C.G.A. § [48-7-40.16](#) and which meets emission standards for LEV or ultra-low emission vehicle (ULEV) as defined by the EPA, when operating on such alternative fuel.
- (s) "Model year" means the model year of a vehicle as designated by the vehicle manufacturer.

- (t) "Motor vehicle" means any self-propelled vehicle designed for transporting persons or property on a street or highway that is registered by the Motor Vehicle Division of the Department of Revenue.
- (u) "New commercial vehicle" means a new commercial vehicle that is manufactured by an original equipment manufacturer or is manufactured by an original equipment manufacturer and any third-party equipment manufacturers, provided that such third-party manufacturers provide such parts or services prior to the original sale of such vehicle to a purchaser, and all vehicle components, including the alternative fuel system, are covered by the original equipment manufacturer or covered under separate warranties by the original equipment manufacturer and the third-party equipment manufacturer that together provide warranty for the complete vehicle.
- (v) "NMHC" means non-methane hydrocarbon.
- (w) "NMOG" means non-methane organic gasses.
- (x) "NO_x" means oxides of nitrogen.
- (y) "Owner" means the registered owner or the person who holds title to a motor vehicle for the purpose of receiving the Low Emission Vehicle Certificate.
- (z) "PM" means particulate matter.
- (aa) "TW" means test weight.
- (bb) "Vehicle" means a motor vehicle.
- (cc) "Zero emission vehicle" means a motor vehicle which has zero tailpipe and evaporative emissions as defined by the EPA and shall include an electric vehicle whose drive train is powered solely by electricity, provided said electricity is not provided by any on-board combustion device.

Amended: F. Dec. 6, 2001; eff. Dec. 26, 2001.

Amended: F. July 15, 2015; eff. August 4, 2015.

Rule 391-3-25-.03. Low-Emission and Zero Emission Vehicle Certification Eligibility and Procedures.

- (1) EPD will approve certificates for qualified new low-emission or new zero emission vehicle purchases or leases. Application by the owner or dealer must be made with EPD to initiate this certification. The EPD certification will be contingent on documents provided by the manufacturer of the vehicle that said vehicle is certified by the EPA to meet LEV, ULEV or ZEV standards.
- (2) EPD will issue certificates for qualified converted vehicles. Application by the owner must be made with EPD to initiate this certification. The EPD certification will be contingent on documents provided by the manufacturer of the conversion kit certifying that the kit is federally certified to meet LEV, ULEV or ZEV standards; and certification by the installer that the conversion was made in accordance with the conversion kit manufacturer's specifications, and that the conventional fuel system was permanently disabled.

Amended: F. July 15, 2015; eff. August 4, 2015.

Rule 391-3-25-.04. Low-Emission Vehicle Certification Standards.

- (1) To be certified as LEVs for the purposes of meeting the requirements of this chapter, low-emission vehicles or converted vehicles must be federally certified to meet or exceed the federal emission standards for their respective vehicle class and category. Only new LEVs or converted vehicles that meet or exceed these emissions standards will qualify for the LEV certificate. Conventionally fueled vehicles will not be eligible for a LEV certificate. The low-emission standards for classes and categories of motor vehicles are found in Table A and Table B of paragraph (2) of this Rule.
- (2) The following Tables A and B list the emission standards for Light Duty Vehicles (LDVs), Light Duty Trucks (LDTs), and Heavy Duty Vehicles (HDVs). In Table A, the emission standards listed under Part I are the federal 50,000-mile emission standards, and

those listed under Part II are the federal 100,000-mile emission standards for LDVs and LDTs with GVWR less than or equal to 6,000 pounds. Emission standards listed under Part II for LDTs with GVWR greater than 6,000 pounds are the federal 120,000-mile emission standards.

Subject 391-3-26. COMMERCIAL ENVIRONMENTAL LABORATORIES.

Rule 391-3-26-.01. Purpose and Scope.

The purpose of these rules is to establish the procedures required for the administration and implementation of O.C.G.A. [12-2-9](#) which requires all commercial analytical laboratories submitting data for regulatory purposes to be accredited or approved as specified in the Division's rules and Regulations.

Cite as Ga. Comp. R. & Regs. R. 391-3-26-.01

Authority: O.C.G.A. Sec. [12-2-9](#).

History. Original Rule entitled "Purpose and Scope" adopted. F. Sept. 3, 1999; eff. Sept. 23, 1999.

Rule 391-3-26-.02. Definitions.

- (1) "Accreditation" means the procedure by which an accreditation agency, a state, or the U.S. Environmental Agency evaluates and acknowledges a program as meeting certain predetermined qualifications and standards.
- (2) "Accreditation Agency" means an agency that meets the requirements of [391-3-26-.04\(2\)](#) and which the Division has entered into a Memorandum of Understanding for the purposes of [391-3-26-.04\(1\)\(c\)](#).
- (3) "Approved" means the acceptance by the Division of a commercial analytical laboratory by accreditation or certification. The approval shall be valid only for the time period specified by the accreditation or certification agency and valid for the test included in the scope of the accreditation or certification.
- (4) "Certification" means the procedure by which an accreditation agency, a state, or the U.S. Environmental Protection Agency evaluates and acknowledges a program as meeting certain predetermined qualifications or standards.
- (5) "Commercial Analytical Laboratory" means a laboratory which performs analyses of environmental samples or media on a fee or contract basis. A laboratory operated by the state, a city, county, or local authority, or an industrial facility is typically not considered a commercial analytical laboratory for the purposes of these rules.
- (6) "Data Submitted for Regulatory Purposes" means any data which is to be submitted to the Division, or required to be retained on site for review by the Division, which is required by a permit, rule, statute, or order; except for the following:
 - (a) Initial Hazardous Sites Response Act notification data submitted under Chapter [391-3-19-.04](#). Data submitted to a follow-up to such notification would be covered under this rule.
 - (b) Data which is obtained from the analyses of environmental media if such analyses is performed in situ (examples of this include but not limited to pH, chlorine residual, opacity, turbidity, on-site instrumental sampling, continuous instrumental monitoring, stream biological sampling data, etc.).
 - (c) Tests for which accreditation is not available from a third party or from another state.
- (7) "Director" means the Director of the Environmental Protection Division of the Department of Natural Resources.
- (8) "Division" means the Environmental Protection Division of the Department of Natural Resources.

- (9) "Laboratory" means a body that calibrates and/or tests. A laboratory may be at a permanent location, a temporary location, or may be a mobile facility. In any cases where a laboratory forms part of any organization that carries out other activities besides testing, the term "laboratory" refers only to those parts of that organization that are involved in the testing process.
- (10) "Test" means the technical operation that consists of the determination of one or more characteristics or performance of a given product, material, equipment, organism, physical phenomenon, process, or service according to a specified procedure.

Authority: O.C.G.A. Sec. [12-2-9](#).

History. Original Rule entitled "Definitions" adopted. F. Sept. 3, 1999; eff. Sept. 23, 1999.

Rule 391-3-26-.03. Data Submittal.

Data submitted for regulatory purposes, as defined above, by a commercial analytical laboratory or a customer of a commercial analytical laboratory, shall be accepted by the Division only if the commercial analytical laboratory is approved in accordance with [391-3-26-.04](#) below at the time the tests are performed.

Cite as Ga. Comp. R. & Regs. R. 391-3-26-.03

Authority: O.C.G.A. Sec. [12-2-9](#).

History. Original Rule entitled "Data Submittal" adopted. F. Sept. 3, 1999; eff. Sept. 23, 1999.

Rule 391-3-26-.04. Approval.

- (1) A commercial analytical laboratory is approved for submitting data for regulatory purposes in the State of Georgia if the laboratory meets any of the following requirements specific to the analytical data submitted:
- (a) Accreditation or certification by another State acceptable to the Director.
 - (b) Accreditation or certification by the U.S. Environmental Protection Agency.
 - (c) Accreditation or certification by an accreditation agency, acceptable to the Director, and which the Division has entered into a Memorandum of Understanding of these purposes.
 - (d) Certification by the Division pursuant to O.C.G.A. [12-5-174\(a\)\(3\)](#) and DNR Rule [391-3-5-.29](#) for drinking water tests.
- (2) Accreditation agencies shall use Guide 25 (as amended) of the International Organization for Standardization (ISO) as the basis for determining the ability of a laboratory to

satisfactorily carry out analyses. Additional requirements may be determined on a case by case basis depending on the specific analyses and the scopes of accreditation. Limits on scopes of accreditation acceptable to the Division may be stipulated in the Memorandum of Understanding with the accreditation agency.

- (3) The Director, or his designee, may enter into a Memorandum of Understanding with accreditation agencies specifying criteria to be included in any such accreditation.
- (4) Approval in Georgia shall be valid only for the time period specified by the accreditation agency, State or EPA, and valid only for the tests included in the scope of the accreditation.

Authority: O.C.G.A. Sec. [12-2-9](#).

History. Original Rule entitled "Approval" adopted. F. Sept. 3, 1999; eff. Sept. 23, 1999.

Rule 391-3-26-.05. Procedures.

- (1) The Division will maintain a list of all approved accrediting agencies, including States, and such list may be made available upon request.
- (2) Any person submitting data prepared by a commercial analytical laboratory to the Division for regulatory purposes shall stipulate that the laboratory is approved. The stipulation shall include the name of the accrediting agency, the scope of the accreditation relevant to the data submitted (such as drinking water, non-potable water, air, solid/hazardous wastes, etc.), the accreditation number issued by the accrediting agency, the date of accreditation, and the expiration date of accreditation. This stipulation shall be by one of the following methods:
 - (a) The stipulation shall be submitted with each regulatory report; or
 - (b) The stipulation shall be submitted in a separate document with the first regulatory report of the calendar year. No additional submittal will be necessary for the year unless another laboratory is used or there is a change in the accreditation or certification status of the laboratory.
- (3) Data submitted without such stipulation shall not be accepted by the Division and will be returned.

Subject 391-3-28. FLINT RIVER DROUGHT PROTECTION.

[Rule 391-3-28-.01. Purpose.](#)

The purpose of this rule is to establish the procedures required for the administration and implementation of the "Flint River Drought Protection Act", O.C.G.A. [12-5-540](#) *et seq.* The use of water resources of the state for agricultural purposes is of vital importance to Georgia and southwest Georgia in particular; and the protection of flows in the Flint River and its tributaries is necessary for a healthy riverine ecosystem and a healthy population of aquatic life. The wise use of water, protection of stream flow, and the overall economic well being of the state will be furthered by proper water management in periods of severe drought. Programs to augment stream flows or provide incentives to ensure that certain irrigated agricultural lands are temporarily not irrigated during times of declared severe drought will promote this wise use of water resources, the associated protection of stream flows for habitat critical for aquatic life, and the economic well being of the state.

This rule establishes the basis for a drought protection program for the Flint River basin and the coordination which will occur with the Georgia Environmental Facilities Authority to handle those funds. It states how the Director of the Environmental Protection Division of the Department of Natural Resources may each year predict or declare whether severe drought conditions are considered likely in the Flint River basin. It establishes the procedures for holding an irrigation reduction auction to decrease irrigation acreage in any declared severe drought year and how the auction may be operated. It delineates the process by which certain persons holding agricultural water withdrawal permits may offer to cease irrigating a number of acres in exchange for a certain sum of money and defines how such offers to sell are accepted. If a sufficient amount of acreage reduction is not acquired during the auction, it defines when and

how an order may be issued requiring certain permit holders to cease or reduce irrigation and provides for their compensation to stop irrigating. It establishes the irrigation efficiency thresholds for all irrigation systems in the affected areas of the Flint River Basin operating or existing under the Division's water withdrawal permitting requirement, identifies requirements pertaining to the methods an applicant or permittee shall utilize to demonstrate the achievement of the irrigation efficiency thresholds, and establishes the schedule in which all permittees will achieve irrigation efficiency thresholds. It provides for a process in which the director will notify specified permittees downstream of any state funded augmentation project that during specified periods of the project's operation for specified purposes within the affected areas, the permittee shall let the flow provided by the augmentation project pass his or her point of withdrawal. It outlines the procedures for any investigations and enforcement of these rules.

Cite as Ga. Comp. R. & Regs. R. 391-3-28-.01

Authority: O.C.G.A. § [12-5-540](#) *et seq.*

History. Original Rule entitled "Purpose" adopted. F. Jan. 20, 2006; eff. Feb. 9, 2006.

Repealed: New Rule of same title adopted. F. June 23, 2006; eff. July 13, 2006.

Amended: F. May 18, 2015; eff. April 3, 2015, as specified by the Agency.

Rule 391-3-28-.02. Definitions.

All terms used in this Chapter shall be interpreted in accordance with the definitions set forth in the Flint River Drought Protection Act, except where otherwise specifically defined:

- (a) 'Acceptable Flint River basin stream flows' means the quantity of stream flows at one or more specific locations on the Flint River or its tributaries which provides for aquatic life protection and other needs as established by the director based on municipal, agricultural, industrial, and environmental needs. Such tributaries shall not include field drainage systems, wet weather ditches, or any other water body:
 - (1) In which the channel is located above the ground-water table year round;
 - (2) For which runoff from precipitation is the primary source of water flow; and
 - (3) For which ground water is not a source of water flow.
- (b) 'Affected areas' means those specific portions of the state lying within the Flint River basin where ground-water use from the Floridan aquifer can affect stream flow or where drainage into Spring Creek, Ichawaynochaway Creek, Kinchafoonee Creek, and Muckalee Creek occurs.
- (c) 'Auction certificate' refers to a certificate issued to the holder of an agricultural water use permit when the permit holder has been certified as eligible to participate in the irrigated acreage reduction auction. A permit holder wishing to offer irrigation lands under multiple agricultural withdrawal permits must have a separate auction certificate for each permit. The auction certificate will include, but not be limited to, the identity of the land

owner, the agricultural withdrawal permit covered, and the amount of acres actually irrigated.

- (d) 'Auction offer' for a specific permit, refers to the price-per-acre offered by the farmer as the amount of money required for the farmer to not irrigate land covered by that specific permit during the remainder of the calendar year.
- (e) 'Augmentation' means the addition of ground water from one or more aquifers underlying the affected areas into a surface water channel within the affected areas for the purpose of maintaining instream flows.
- (f) 'Authority' means the Georgia Environmental Finance Authority created by Chapter 23 of Title 50.
- (g) 'Board' means the Board of Natural Resources.
- (h) 'Candidate seller' refers to holders of an auction certificate or their representatives whose single auction offer has or multiple auction offers have been tentatively accepted during preliminary rounds of the irrigated acreage reduction auction.
- (i) 'Director' means the Director of the Environmental Protection Division of the Department of Natural Resources.
- (j) 'Division' means the Environmental Protection Division of the Department of Natural Resources.
- (k) 'Drought protection funds' means the funds held by the Authority as provided in Code Section [12-5-545](#) for the accomplishment of the purposes of this article.
- (l) 'Final seller' refers to candidate sellers at the end of the final round of the irrigated acreage reduction auction.
- (m) 'Fixed irrigation system' means those non-portable irrigation systems that are permanently installed, anchored, or buried in place, such as center pivots (including towable center pivots), solid-set irrigation sprinklers, or drip irrigation.
- (n) 'Flint River basin' means the entire area of land which drains into the Flint River or its major tributaries.
- (o) 'Floridan aquifer' means those rocks and sediments described in United States Geological Survey Open File Report 95 321 (1996) that are capable of yielding ground water to wells or discharging water into the Flint River or its tributaries.
- (p) 'Irrigated land' means farm land which is irrigated by ground water or surface water pursuant to a water withdrawal permit issued by the Director pursuant to Code Section [12-5-31](#) or [12-5-96](#).

- (q) 'Irrigation efficiency' means the percentage of the total amount of water withdrawn from a source which is beneficially used to meet crop water requirements or for other agronomic practices in accordance with applicable best management practices.
- (r) 'Irrigation reduction auction' means the procedure established by subsection (b) of Code Section [12-5-546](#) pursuant to which permittees submit offers to cease irrigation of a specified number of acres in exchange for a certain sum of money.
- (s) 'Major tributaries' of the Flint River means those flowing rivers and streams which flow into the Flint River.
- (t) 'Perennial Stream' means a stream which normally flows throughout the whole year. One way, but not necessarily the only way, of identifying perennial streams is to determine if they are shown as an unbroken blue line on the United States Geological Survey quadrangle map.
- (u) 'Permit' means a valid irrigation certificate of farm use has been approved and issued by the Division, used for agricultural withdrawals from either surface water or groundwater.
- (v) 'Permittee' means a person holding a valid agricultural withdrawal permit issued before December 1, 2000, pursuant to Code Section [12-5-31](#) or [12-5-96](#).
- (w) 'Severe drought conditions' means any forecast condition which may result in a stream flow that is lower than the acceptable Flint River stream flow. The prediction or declaration of when severe drought conditions exist or are expected to exist during a given year shall be based on historical, mathematical, meteorological, or other scientific considerations which may be published by the director and which may be developed in consultation with the state climatologist, the state geologist, or other appropriate experts.
- (x) 'Stream flow' means the quantity of water passing a given location of the Flint River or its tributaries over a given time period expressed in cubic feet per second (cfs).
- (y) 'Watershed' means a smaller drainage basin associated with one of the tributaries of the Flint River, and assigned an 8-digit Hydrologic Unit Code by the United States Geological Survey.

Authority: O.C.G.A. § [12-5-540](#) *et seq.*

History. Original Rule entitled "Definitions" adopted. F. Jan. 20, 2006; eff. Feb. 9, 2006.

Repealed: New Rule of same title adopted. F. June 23, 2006; eff. July 13, 2006.

Amended: F. May 18, 2015; eff. April 3, 2015, as specified by the Agency.

Rule 391-3-28-.03. Drought Fund Establishment and Operation.

The expenditure of these funds is to be considered an incentive to agricultural permittees not to irrigate lands after a severe drought declaration and is therefore deemed by the legislature a valid

use of state moneys to promote valid land and water use practices which result in the protection of the riverine environment by ensuring that such lands not be irrigated for specified periods of time. No expenditure of funds under this article shall be considered full or partial compensation for any losses, financial or otherwise, experienced due to nonirrigation, a lease or repurchase of any irrigation permit issued by the Director, nor shall it be considered an acknowledgment by the State of Georgia of a property right in any permit issued by the Director.

Amended: F. May 18, 2015; eff. April 3, 2015, as specified by the Agency.

Rule 391-3-28-.04. Severe Drought Declaration.

Within the affected areas, the Division may predict or declare when severe drought conditions exist or are expected to exist during a given year, based on historical, mathematical, meteorological indicators, or other scientific considerations including, but not limited to, stream flows, ground-water levels, precipitation forecasts, or the Palmer Drought Severity Index administered by the National Oceanographic and Atmospheric Administration. The severe drought predictions or declarations shall be developed in consultation with the state climatologist, the state geologist, or other appropriate experts.

- (a) On or before March 1 of each year, the Division may issue a prediction as to whether severe drought conditions are expected during that calendar year.
 - (1) If the historical, mathematical, meteorological indicators or other scientific considerations do not predict a severe drought for that specific year, there shall be no implementation of the rules related to the Flint River Drought Protection Act's auction provisions.
 - (2) If the historical, mathematical, meteorological indicators or other scientific considerations predict a severe drought for that specific year, and the Division predicts or otherwise declares a severe drought on or before March 1, then the rules related to the Flint River Drought Protection Act's auction provisions may be implemented.
- (b) The Director shall establish acceptable Flint River stream flow measures (in cubic feet per second), at one or more defined locations.

Repealed: New Rule entitled "Severe Drought Declaration" adopted. F. June 23, 2006; eff. July 13, 2006.

Amended: F. May 18, 2015; eff. April 3, 2015, as specified by the Agency.

Rule 391-3-28-.05. Eligibility.

To be eligible for consideration to receive money from the drought protection fund, the agricultural permit holder must possess an auction certificate from the Division. To acquire this auction certificate, the agricultural permit holder shall submit to the Division, before any further consideration, documentary evidence including, but not necessarily limited to, the following information:

(a) Location within the affected areas. The geographic area for eligible permits is defined as follows:

(1) Surface-water permits.

(i) Watersheds within the Flint River Basin as designated by the Director at the time of drought declaration.

(2) Ground-water permits.

(i) Areas designated by the Director at the time of drought declaration. Such areas shall be in or within 3 miles adjacent to the Flint River or its tributaries where geologic studies indicate that Floridan aquifer ground-water withdrawals in such areas may directly decrease stream flow in the Flint River or its tributaries.

(b) The Agricultural Permit or the Permit Number;

A copy of the agricultural ground water or surface water permit or its associated permit number must be provided to the Division. The agricultural Permittee must have previously applied to the Division for a surface water or groundwater withdrawal permit prior to December 1, 1999, and must have already received a surface water or groundwater withdrawal permit from the Division prior to December 1, 2000.

(1) If the Director fails to act on a permit application by December 1, 2000, which was received by the Division prior to December 1, 1999, the time for receipt of a permit shall be extended until such time as the Director makes a decision on that application.

(2) If the Director's decision is to deny the permit and that decision is reversed on appeal, the date of receipt of a permit shall be deemed to be the date of the Director's decision.

(c) The latitude-longitude location of the permitted surface water or groundwater point of withdrawal;

The existence of the withdrawal location must be validated by a representative of the Division using Global Positioning System (GPS) or equivalent technology capable of determining latitude/longitude to within 5 meter accuracy. Such validation shall occur when the Division representative;

- (1) visits the physical location of the point of water withdrawal,
 - (2) verifies that the specific water withdrawal actually exists,
 - (3) takes GPS or equivalent readings of the geographic location of the point of withdrawal, and
 - (4) establishes the connection between that specific validated withdrawal location and a particular agricultural permit number.
- (d) The irrigated acreage associated with that specific point of agricultural water withdrawal; and Division representatives, in conjunction with the permit holder, shall determine the amount of irrigated acreage irrigated by a fixed irrigation system and associated with that particular permitted groundwater or surface water point of water withdrawal. Sufficient documentation for the calculation of irrigated field acreage may include, but is not limited to, aerial photos, digital delineation or any other additional process. If a single well or surface-water pump supplies multiple irrigation systems, the acreage irrigated by individual fixed irrigation systems may be removed from irrigation in accordance with [391-3-28-.07](#).
- (e) Previous Irrigation Usage.

The agricultural Permittee shall have installed an approved flow meter consistent with the provisions of the Water Quality Act O.C.G.A. [12-5-20](#)*et seq.* and the Groundwater Use Act O.C.G.A. [12-5-90](#)*et seq.* and demonstrate previous usage within the previous three years of the irrigation system delineated above, on the same acres of land that the Permittee agrees not to irrigate in that given year. Evidence of previous irrigation may include, but not be limited to, the following:

- (1) Farm receipts dating the installation of the irrigation system,
- (2) Existence of center pivot signature on past aerial photos,
- (3) Flow-meter data, or
- (4) Other methods acceptable to the Division.

Holders of permitted surface-water and ground-water withdrawals within the geographic area for eligible permits, and who can provide the documentary evidence listed above for those withdrawals, shall be issued an auction certificate.

Rule 391-3-28-.06. Irrigated Acreage Determination.

- (1) If severe drought conditions are declared on or before March 1 of the year, in accordance with [391-3-28-.04](#), the Division may determine:
 - (a) the total number of acres of irrigated agricultural land serviced by irrigation systems located within the affected area,
 - (b) the maximum amount of agricultural acreage which may be safely irrigated that year within the affected area, and
 - (c) the corresponding amount of ground-water-irrigated acreage and surface-water-irrigated acreage which should not be irrigated that year in order to maintain an acceptable Flint River stream flow. These acceptable stream flow levels shall be determined by the Director.

- (2) This acreage determination may be done by the following process:
 - (a) Calculated level of unreasonable impact.

The Division shall conduct computer modeling or other methods of evaluating the surface water-groundwater interactions using cumulative irrigation acreage, which is the total amount of acreage actually irrigated or proposed to be irrigated (TA). The Division shall also determine the amount of proposed irrigation acreage where the models or other methods first indicate that unreasonable flow reductions below acceptable stream flow levels on the Flint River or its tributaries may occur. This defines the maximum amount of acreage which may be irrigated (MA) during that year.

- (b) If the total amount of actual irrigation acreage (TA) is found to be less than the calculated level of unreasonable impact acreage (MA), then no reduction of agricultural irrigation usage by limiting irrigation acreage is required during that declared severe drought year.

- (c) If the total amount of actual irrigation acreage (TA) is found to be greater than the calculated level of unreasonable impact acreage (MA), then a situation exists where reductions in irrigation acreage should be implemented to avoid unreasonable impacts on river flows. The total amount of acreage reduction (RA) shall be found by subtracting the calculated amount of unreasonable impact acreage from total irrigation acreage amount. The resulting acreage amount shall be the total number of acres of irrigated land which should be taken out of irrigation during that declared severe drought year.

Rule 391-3-28-.07. Irrigated Acreage Reduction Auction.

- (a) Upon determination of [391-3-28-.06](#) above, the Division may conduct an irrigation reduction auction whereby a withdrawal permit holder with an irrigation system located within the affected areas is given an opportunity to enter into an irrigation agreement with the Division. The nature of the agreement is that in exchange for a certain sum of money per acre of irrigated land serviced by the irrigation system, the Permittee will not irrigate those particular acres for the remainder of that calendar year. The Authority shall pay the sum so agreed upon when so directed by the Director from the unexpended balance of the drought protection funds.
- (1) Participation in the irrigated acreage reduction auction shall be open to all eligible agricultural permit holders or their representatives, defined in [391-3-28-.05](#) above.
 - (2) The Director shall determine the amount of acreage which should be removed from irrigation that particular announced severe drought and auction year.
 - (3) The money offered from the drought protection fund shall be for a permit holder's suspension of irrigation, from the particular irrigation system and associated particular agricultural withdrawal permit, for the duration of the announced severe drought and auction year. Acceptance by the Division of an offer to sell shall only relate to that acreage in that severe drought and auction calendar year and shall not impact the ability of the permit holder to continue to farm this acreage without irrigation during that year.
 - (4) The Director, at the outset of the auction process, may determine a maximum offer to sell price per acre level acceptable to the Division for payment from the drought protection fund. Even if insufficient acreage is offered up once that maximum offer to sell price level is reached, no further increases in offers to sell can be

accepted. To assure an efficient auction, this maximum dollar figure does not need to be announced prior to the auction itself.

(b) Since the ultimate purpose of the auction is to protect flows in the Flint River, strong consideration shall be given by the Division to the different and recognizable impacts caused by the type of withdrawal and the water source for the various Permittees.

(c) Auction Process;

The Director shall determine the auction process by which irrigation offers to sell and the associated irrigation acreage amounts are tendered to the Division and then selected by the Division. This may be a process by which:

(1) An interactive, computerized offer to sell, bid-improvement process shall be established with an actual auction to be held.

(2) Other auction methodologies acceptable to the Director.

(d) If the auction selection is defined Rule 391-3-28-.07(c)(1) above, then the eligible permittees, holders of an auction certificate, shall be able to submit offers to sell through telecommunications equipment set up by the Division or its agents in multiple locations throughout the Flint River basin. This system shall allow the eligible permittee or their designated representative to make any number of modifications to their offers to sell throughout the select day of the auction. A "bid-improvement" auction format shall be established wherein:

(1) Auction offers to sell must apply for all acreage served by a permit-specific auction certificate. For example, consider a farmer with two certificates related to two specific water use permits. Suppose each certificate provides for the irrigation of the following certified number of acres: certificate A for 1,000 acres; certificate B for 1,100 acres. If the farmer wishes to offer to remove from irrigation lands permitted under one or both of these certificates, the farmer must submit offer prices for each individual auction certificate A and B. If offers are submitted for both certificates, the offer price for one certificate can be the same or different from the offer price rendered for a different certificate. However, the farmer cannot offer to retire 500 acres from certificate A and 250 acres from certificate B unless the smaller acreages are irrigated by the same fixed irrigation system that irrigates the remaining acres. Offer prices apply to all acreage intended for irrigation suspension and served by the certificate for which the offer is made. Once the auction process has begun, the number of acres offered by the permittee for irrigation suspension cannot change.

(2) Irrigation reduction prices offered by permittees for their auction offers shall be on a price per acre basis; in other words, a price offered by a permittee is the price per acre required for removing from irrigation all acreage for a specific certificate, or

a portion of certificate acreage irrigated by a fixed irrigation system, during the balance of the calendar year. If the permittee's offer is accepted by the Division, the permittee will receive this offered price-per-acre times the certified number of acres the permittee has agreed to not irrigate.

- (3) An "auction day" will be announced by the Director. On the auction day interested auction certificate holders or their representatives may go to the designated facilities for the auction. The auction process may last several hours.
- (4) At the same designated time in all the auction facilities an initial auction "round" is opened. Previously determined auction certificate holders, permittees or their representatives will have some set amount of time to submit their price per acre offers on forms provided by the Division. These offers will be entered into a telecommunications system, which will allow all offers to be gathered from the separate auction facilities, and then ordered by bid offer price from low to high. These offers will be made available to the Director. The Director will use these offers to identify potential "candidate sellers". Candidate sellers are auction certificate holders whose offer prices have been provisionally accepted.
- (5) The Auction Certificate numbers for all candidate sellers will be announced at all auction facilities, and a second "round" of the auction may then be opened. Any auction certificate holder or their representative who wishes to revise their initial offer price for any certificate has some time announced by the Division from the opening of this second auction round to do so. If a certificate holder or their representative does not wish to revise their first-round offer, no additional action is required on their part. The first-round offer is maintained for the second and all subsequent rounds, until the offer is revoked or modified by the certificate holder or their representative.
- (6) At the close of round 2, the Director again identifies "candidate sellers" in the manner described above. The new set of potential "candidate sellers" is announced. Because of potential bid modifications, the candidate sellers at the end of the first round may or may not be included in the set of candidate sellers chosen at the end of the second round on the basis of lowest revised offer prices. A new round, may then be announced and auction certificate holders or their representatives may again have the opportunity to revise offer prices for any certificate during the following time period.
- (7) This iterative auction process continues until:
 - (i) no certificate holder or their representative revises an offer price, in which case the auction closes and the latest set of candidate sellers become the final sellers, and will receive their offer price per acre for accepted auction certificates; or

- (ii) the Director chooses to end the auction, in which case the latest set of candidate sellers automatically become final sellers, and will receive their offer price per acre for accepted auction certificates.

- (e) Based on considerations related to the available drought protection funds and desired levels of acreage reduction, the Director will determine the number of certificates whose offer price will be accepted, beginning with the lowest ordered offer price and continuing then to each higher offer price. The Division shall tabulate the offers received by price per acre and the cumulative suspension of irrigation acreage amounts tendered to the Division. When this cumulative acreage equals the targeted amount of acreage reduction (RA) established by the Division, the auction process is complete. If money is available from the drought protection fund, all offers below this determined offer to sell amount shall be accepted, and all offers above this offer to sell amount shall be rejected. If there is more than one offer at that particular select offer to sell price, the offers to sell at that price shall be prioritized for acceptance based on the acreage amount from greatest to smallest. To maximize the acreage suspended from irrigation, acceptable selections shall start at the greatest amount of acreage offered at that offer to sell price and proceed to lesser amounts until the required actual acreage amount is reached. In case of ties at any determining offer to sell price and acreage amount, acceptable selections shall be chosen at random until the cumulative amount of suspended acreage is reached or no further offers are available.

- (f) If insufficient acreage amounts are offered during the auction to meet the required acreage reduction total set in above, the Director may then implement the measures for Non-voluntary Irrigation Acreage Reductions below.

- (g) Regardless of the auction process used, the Division shall complete the entire auction process for voluntarily determining the acreage required to suspend irrigation prior to March 22 of any announced severe drought and auction year.

History. Original Rule entitled "Irrigated Acreage Determination" adopted. F. Jan. 20, 2006; eff. Feb. 9, 2006.

Repealed: New Rule entitled "Irrigated Acreage Reduction Auction" adopted. F. June 23, 2006; eff. July 13, 2006.

Amended: F. May 18, 2015; eff. April 3, 2015, as specified by the Agency.

Rule 391-3-28-.08. Payment for Irrigated Acreage Reduction.

The agreement between the final seller and the Division, entered into in accordance with the above auction process, shall be upon such terms and conditions as the Division may deem necessary. The agreement shall provide for payment of the agreed upon sum within 30 days of the date of execution of the agreement by the parties. Failure of a final seller to comply with all terms of the agreement for the duration thereof shall be deemed a violation of such agreement and this article and shall be subject to enforcement by the Director as provided in this article.

- (1) The permit holder or their representative submitting offers must be eligible for participation in the irrigated acreage reduction auction as evidenced by their holding a valid auction certificate for each permit which is offered in the auction.
- (2) Once the permittee has obtained an auction certificate, the total amount of money due the holder in instances where they are a Final Seller shall be determined by multiplying the accepted offer price-per-acre times the number of acres covered by the certificate, which is the certified number of irrigated acres allowed by a permit, or the portion of certificate acres that the permittee has agreed to not irrigate as defined in [391-3-28-.07\(d\)\(1\)](#).
- (3) For any final accepted offer, the Director shall then inform the Authority that money in that amount shall be debited from the Flint River Drought Protection Fund and disbursed to that designated final seller.
- (4) Cumulative offers from final sellers may only be accepted by the Division up to, but not exceeding, the total amount of money remaining in the drought protection fund.

Repealed: New Rule entitled "Payments for Irrigated Acreage Reductions" adopted. F. June 23, 2006; eff. July 13, 2006.

Rule 391-3-28-.09. Non-Voluntary Irrigated Acreage Reductions.

- (a) If the Director determines that the total number of non-irrigated acres needed during a given year cannot be sufficiently obtained through the irrigation reduction auction held in accordance with Rule [391-3-28-.08](#), the Director is authorized to issue an order, in accordance with rules adopted by the board, requiring certain Permittees not to irrigate a specified number of acres of irrigated land until the end of the calendar year. When issuing such orders, the Director shall begin with the Permittees whose surface water withdrawal permits were issued most recently and then work chronologically backward with each order issued. A Permittee who is issued such an order shall be compensated for such restriction if such Permittee applied to the Division for a surface-water withdrawal permit prior to December 1, 1999, received a surface-water withdrawal permit from the Division prior to December 1, 2000, and is able to demonstrate actual previous irrigation on the same acres of land which the owner has been ordered not to irrigate. The per acre dollar amount received by a Permittee pursuant to this section shall be equal to the average agreed upon sum per acre paid pursuant to the irrigation reduction auction during the same year. The amount of the payment shall be that average offer to sell price multiplied by the acreage determination. The total amount of irrigated land chosen by the Division on a non-voluntary acreage reduction basis may be limited by the amount of money present in the drought protection fund. Additional acreage may only be selected if the resulting monetary liability does not exceed the total amount of money remaining in the drought protection fund.

- (b) Strong consideration shall be given by the Division to the different and recognizable impacts caused by the type of withdrawal and the water source for the various Permittees. In this regard, the retirement of irrigated acres under permits to divert surface waters from perennial streams will have a greater impact on protecting river flows than the suspension of irrigation from ground water or those surface water users using non-perennial streams or withdrawing from ponds not on streams. Therefore, because of the direct and immediate impact caused by surface water withdrawals on the Flint River and its tributaries, the Director's orders to not irrigate from surface water permit holders withdrawing water from perennial streams shall take precedence over similar orders not to irrigate from those surface water users using non-perennial streams or withdrawing from ponds not on streams. For suspension of groundwater irrigation withdrawals, the Director shall consider, based on geologic studies, the degree to which the withdrawal will affect stream flow in the Flint River or its tributaries. The Director's orders to not irrigate from those permitted wells determined to have the greatest impact will have precedence over similar orders not to irrigate from those ground-water withdrawals determined to have a lesser impact.
- (c) Additional consideration during the non-voluntary phase of selection may be given to different priorities for the suspension of irrigation on these irrigated lands, as established by the Director. This may take into account annual versus perennial crop types, planted versus non-planted acreage or any other relevant factors determined.
- (d) The steps to implement this non-voluntary approach are as follows:
- (1) If insufficient irrigation suspension acreage has been offered the Division during the auction, either because no further offers are being tendered by auction certificate holders or their representatives, or because the Director's chosen maximum offer to sell price has been reached, the Director may then determine the amount of additional remaining agricultural acreage which may be removed from irrigation during that particular severe drought year.
 - (2) The Director may then issue an order to existing agricultural permit holders requiring designated Permittees not to irrigate a specified number of acres of irrigated land until the end of that calendar year. Acceptance of this Division order does not impact the ability of the permit holder to continue to farm this acreage without irrigation. The priority for selection shall again be considered in terms of the water source, irrigated acreage amount, date of withdrawal application and by withdrawal source type.
 - (3) The Division may begin sending suspend irrigation orders to those permit holders who have most recently been issued an agricultural withdrawal permit from the affected area in question, and then move through all the agricultural withdrawal permits granted, stepping chronologically backwards through the list by application date, until sufficient acreage totals have been reached to fulfill the previously calculated amount of acreage needed to be taken out of irrigation that

severe drought year. Permit holders selected must meet the eligibility requirements established above.

- (4) If more permit holders than required are found with the same application submission date, then the appropriate number of permit holders and their acreage shall be selected by consideration of equivalent acreage impacts, or if more remain than can be approved, with a selection by random draw or lottery.
- (5) The selection and notification process shall be completed on or before March 30 of any officially announced severe drought year.
- (6) Any permit holder meeting the eligibility requirements above and who receives a suspend irrigation order shall be compensated from the drought fund at a rate equal to the average agreed upon offer to sell price per acre paid to all other auction certificate holders during that announced severe drought year times their number of certified acres.

Rule 391-3-28-.10. Inspections and Compliance.

The Division shall investigate and inspect to ensure compliance with this rule and any agreement or order that the Division or Director enters into or issues pursuant to this rule;

- (1) The Division shall have the authority to conduct such on-site investigations and inspections as may reasonably be necessary to carry out its duties prescribed in this rule and to ensure compliance with this rule and any agreement or order that the Division or Director enters into or issues pursuant to this rule. For these purposes, the Division shall have the authority to enter at reasonable times any property, public or private, and conduct such investigations or inspections.
- (2) No person shall refuse entry or access to any authorized representative of the Division who requests entry for the purposes of a lawful inspection and who presents appropriate credentials, nor shall any person obstruct, hamper, or interfere with any such representative while in the process of carrying out his or her official duties consistent with the provisions of this rule.
- (3) Use and non-use of an irrigation system shall be determined by the eligibility measures found above.

Rule 391-3-28-.11. Violations.

- (1) Except as may otherwise be provided in Rule [391-3-28-.10](#), whenever the Director has reason to believe that a violation of any provision of this article or any rule or regulation adopted pursuant to this article has occurred, he or she shall attempt to obtain compliance therewith by conference, conciliation, or persuasion, if the making of such an attempt is appropriate under the circumstances. If he or she fails to obtain compliance in this manner, the Director may order the violator to take whatever corrective action the Director deems necessary in order to obtain such compliance within a period of time to be prescribed in such order.
- (2) Except as may otherwise be provided in Rule [391-3-28-.10](#), any order issued by the Director under this article shall become final unless the person or persons named therein file with the Director a written request for a hearing within 30 days after such order or permit is served on such person or persons.
- (3) Except as may otherwise be provided in Rule [391-3-28-.10](#), hearings on contested matters and judicial review of final orders and other enforcement actions under this article shall be provided and conducted in accordance with subsection (c) of Code Section [12-2-2](#).
- (4) The Director may file in the superior court of the county wherein the person under order resides, or if the person is a corporation, in the county wherein the corporation maintains its principal place of business, or in the county wherein the violation occurred or in which jurisdiction is appropriate, a certified copy of a final order of the Director unappealed from or a final order of the Director affirmed upon appeal, whereupon the court shall render judgment in accordance therewith and notify the parties. Such judgment shall have the same effect, and all proceedings in relation thereto shall thereafter be the same, as though the judgment had been rendered in an action duly heard and determined by such court.
- (5) Institute, in the name of the Division, proceedings of mandamus, injunction, or other proper administrative or civil proceedings to enforce this article, the rules and regulations promulgated under this article, or any agreements or orders entered into or issued under this article;
- (6) For purposes of this Code section, a violation of an agreement entered into in accordance with Rule [391-3-28-.08](#) or an order issued by the Director in accordance with Rule [391-3-28-.10](#) shall be prima facie established upon a showing that:

- (i) During the effective period of the agreement or order, the irrigation system was observed in person or via remote sensing or otherwise established by representatives of the Division or others to have been operating and disbursing water; or
 - (ii) During the effective period of the agreement or order, a seal, lock, or other device placed by the Division on the system to prevent operation of the system has been broken or otherwise tampered with.
- (7) A Permittee who enters into an agreement in accordance with Rule [391-3-28-.08](#) or Rule [391-3-28-.10](#) shall not irrigate during the period covered by the agreement on those acres that the owner has agreed not to irrigate. If the Permittee irrigates said acres during the period covered by the agreement, such action shall be deemed a violation of the agreement and this article and shall be subject to a penalty as determined by the Director as provided in this article.

Rule 391-3-28-.12. Penalties.

The Division shall have the authority to receive and collect all repayment penalties paid pursuant to this article and to transfer same to the Authority for inclusion in the drought protection funds;

- (a) A repayment penalty in the amount of three times the dollar amount of payments received from the drought protection funds shall be paid by any person who irrigates in violation of an agreement entered into in accordance with Rule [391-3-28-.08](#) or in violation of an order issued by the Director in accordance with Rule [391-3-28-.10](#). Such penalties may be assessed on a per violation basis. A violation shall be deemed to have occurred each time a person irrigates in violation of an agreement or order.
- (b) Within 30 days after discovery that a Permittee violated an agreement entered into pursuant to Rule [391-3-28-.08](#) or an order issued by the Director in accordance with Rule [391-3-28-.10](#), the Director shall send via certified mail a notice of violation to the Permittee stating:
 - (1) The date on which the violation occurred;
 - (2) The facts constituting the violation and a statement that such facts will be deemed admitted unless denied by petition for hearing; and

- (3) The total dollar amount of repayment penalties owed by the Permittee, together with a demand that said amount be paid in full within 30 days of the Permittee's receipt of the notice.
- (c) A Permittee receiving a notice of violation pursuant to this Chapter shall have 30 days from receipt thereof either to pay in full the total amount of repayment penalties set forth in the notice or to submit a petition challenging such notice to the Director. If a petition is filed within the required time, then a hearing shall be conducted with respect to same in accordance with Chapter 13 of Title 50, the 'Georgia Administrative Procedure Act,' and the rules and regulations applicable thereto.
- (d) If a Permittee receiving a notice of violation pursuant to this Chapter does not either pay the total amount of repayment penalties or submit a petition challenging the notice, then the facts set out in the notice shall be deemed admitted and the Director shall issue an order to the Permittee, assessing the total repayment penalties due from the Permittee as set forth in the notice of violation and requiring payment of same within 30 days of issuance of the order. Any order issued by the Director pursuant to this subsection shall be deemed final, and no hearing or appeal may be taken.

Rule 391-3-28-.15. Irrigation Efficiency Requirements.

- (1) Definitions. Notwithstanding the definitions provided in [391-3-28-.02](#), the following terms as used in this rule shall be interpreted in accordance with definitions as set forth in the relevant sections of the Flint River Drought Protection Act and as defined herein:
- (a) 'Permittee' means any person holding a valid farm use permit within the affected areas issued pursuant to Code Section [12-5-31](#) or [12-5-96](#), which respectively provide for the withdrawal of groundwater and surface water.
 - (b) 'Irrigation system' means any center pivot, lateral (linear) move, traveling gun, solid set, permanent set, mobile, micro, drip, cable-tow traveler or hose-pull traveler, or other water delivery system used for irrigation purposes operating under the Division's farm water withdrawal permitting requirement.
 - (c) 'Mobile irrigation system' means any traveling gun, cable-tow traveler or hose-pull traveler operating under the Division's water withdrawal permitting requirement.
- (2) Irrigation System Efficiencies
- (a) All irrigation systems applying water withdrawn pursuant to active surface water and groundwater withdrawal permits for farm use in the affected areas are required to achieve irrigation efficiencies of 80 percent or greater. These irrigation efficiencies shall be achieved:
 - 1. By January 1, 2016 for all irrigation systems applying water withdrawn pursuant to active permits issued on or after January 1, 2006;
 - 2. By January 1, 2018 for all irrigation systems applying water withdrawn pursuant to active permits issued from 1991 through 2005; and
 - 3. By January 1, 2020 for all irrigation systems applying water withdrawn pursuant to active permits issued before 1991.

- (b) Notwithstanding (a) above, all mobile irrigation systems and solid-set irrigation sprinklers operating under active surface water and groundwater withdrawal permits for farm use in the affected areas are required to achieve irrigation efficiencies of 60 percent or greater. These irrigation efficiencies shall be achieved:
 - 1. By January 1, 2016 for irrigation systems applying water withdrawn pursuant to active permits issued on or after January 1, 2006;
 - 2. By January 1, 2018 for irrigation systems applying water withdrawn pursuant to active permits issued from 1991 through 2005; and
 - 3. By January 1, 2020 for irrigation systems applying water withdrawn pursuant to active permits issued before 1991.
 - (c) All irrigation systems applying water withdrawn pursuant to new farm use permits issued after the effective date of this rule must, upon permit issuance, meet an irrigation efficiency of 80 percent. Notwithstanding the 80 percent irrigation efficiency requirement, all mobile irrigation systems and solid-set irrigation sprinklers applying water withdrawn pursuant to new farm use permits issued after the effective date of this rule must, upon permit issuance, meet an irrigation efficiency of 60 percent.
 - (d) Animal Feeding Operations and Concentrated Animal Feeding Operations. For all agricultural irrigation system operations that require a farm use surface water permit from the Division to withdraw from a waste water lagoon for land application to a spray field, appropriate best management practices will be employed to land apply the effluent uniformly at an appropriate nutrient agronomic rate. An appropriate nutrient agronomic rate may be specified in an approved nutrient management plan for animal feeding and concentrated animal feeding operations that operate under an NPDES or LAS permit.
 - (e) All new or modified permits issued by the Director shall follow applicable rules and guidance, including any applicable regional water development and conservation plans developed pursuant to O.C.G.A. § [12-5-31](#) and O.C.G.A. § [12-5-96](#).
- (3) Certification of Irrigation System Efficiencies.
- (a) Certification of irrigation system efficiencies will be conducted in accordance with certification forms specified by the Division. Such certification forms shall consider current technologies, best management practices, and the effects of soil type and topography, among other factors deemed necessary.

1. All permittees shall complete a certification of irrigation system efficiency using certification forms specified by the Division by the deadlines listed under sections (2)(a) and (2)(b).
 2. The certification of irrigation system efficiency will be kept by the permittee, and provided to the Division upon the request of the Division. Any permittee may provide a certification of irrigation system efficiency to the Division prior to the deadlines listed under sections (2)(a) and (2)(b).
 3. All applications for new farm use permits submitted on or after the effective date of this rule must provide a certification of irrigation system efficiency to the Division.
- (b) To be certified, all irrigation systems must incorporate a leak correction and operational maintenance procedure. In addition, all center pivot and lateral (linear) move irrigation systems must incorporate an operational pump safety shutdown or any other device that halts water flow in the event of irrigation system failure.
- (c) Certifications of irrigation system efficiencies may be submitted by the applicant, or on behalf of the applicant by an irrigation system manufacturer, agent of the Division, or any agent of the Georgia Department of Agriculture, Georgia Soil and Water Conservation Commission, or University of Georgia County Extension Service.
- (4) The Division shall coordinate with any federal or state agencies, or other entities deemed appropriate by the Division, that offer incentive programs aimed at improving the efficiency of irrigation systems. Such coordination will identify opportunities to refine and target relevant incentive programs as practicable to assist permittees with achieving irrigation efficiency requirements.

Adopted: New rule entitled "Irrigation Efficiency Requirements." F. May 18, 2015; eff. April 3, 2015, as specified by the Agency.

Rule 391-3-28-.16. Management of Augmented Flows.

- (1) Definitions. Notwithstanding the definitions provided in [391-3-28-.02](#), the following terms as used in this rule shall be interpreted in accordance with definitions as set forth in the relevant sections of the Flint River Drought Protection Act and as defined herein:

- (a) "Permittee" means any person holding a valid surface water withdrawal permit within the affected areas issued pursuant to Code Section [12-5-31](#) which provides for the withdrawal of surface water.
 - (b) "Vulnerable aquatic life" means any species found in the affected areas that is dependent, for any portion of its lifecycle, on the aquatic ecosystem and that has been listed as threatened, endangered, or is proposed in the Federal Register for listing under the federal Endangered Species Act ([16 U.S.C. 1531](#)*et seq.*).
- (2) Director Notification. Once a state funded augmentation project has been permitted to operate for the sole purpose of maintaining the minimum stream flows sufficient to protect habitat critical for vulnerable aquatic life within the affected areas, the Director shall inform specified downstream permittees about the project. In addition, notifications to specified downstream permittees to let the flow provided by the augmentation project pass his or her point of withdrawal shall be conducted in accordance with section (4).
- (3) Permittees Subject to Notification.
- (a) The specifics of such notifications, including those permittees subject to the notification, are defined by site-specific characteristics. Therefore, once any such augmentation project is sited but before it begins operation, the Director shall, based on the project purpose, location, design and planned operations, specify all of the permittees downstream of each project that may be subject to such notifications.
 - (b) When specifying such permittees and preparing such notifications, the Director may consider the following:
 1. The best available modeling and monitoring data for the relevant project location, watershed, stream reaches, and tributaries;
 2. The best available information on occurrence and habitat for vulnerable aquatic species;
 3. The date the project is expected to commence operation;
 4. The distance downstream for which protection of augmented flows is appropriate;
 5. The degree to which protection of augmented flows will assist in mitigating the effects of droughts, provide ecological or other environmental benefits, and ensure sustainable, long-term access to water resources for existing and future water users;
 6. Available climatic data and information;

7. The hydrology of the relevant stream reaches including, but not limited to, any surface water and groundwater interactions arising from the Flint River Basin's karst geology;
8. The location of tributaries downstream of the project and the amount of flow such tributaries contribute to the relevant stream reach;
9. The potential for water loss from the relevant stream reaches that may occur due to evaporation and/or other factors;
10. The potential for water gain that may occur due to precipitation, inflows from other tributaries and/or other factors;
11. The number and type of permitted withdrawals that may impact flows in the relevant stream reaches;
12. Meteorological conditions or other circumstances that may result in surface water flows greater than the flow provided by the project which would continue to be subject to withdrawal in accordance with the permittee's water withdrawal permit; and
13. Any other data or information the Director deems relevant.

(c) When specifying the permittees subject to the notification required by (b) above, the Director shall also establish those permittees that shall not be subject to such notification.

(4) Notification of Onset, and Conclusion, of Augmentation and Notification Contents. Those permittees who are required to let the flow provided by the augmentation project pass his or her point of withdrawal shall be notified by the Director of the onset, and conclusion, of each period of augmentation.

- (a) The notification to each permittee of the onset of each period of augmentation shall contain at a minimum:
1. The location of the upstream augmentation project;
 2. The amount of augmented flow the project is expected to provide, and the proportion of that flow a permit holder must let pass their point of withdrawal;
 3. The distance downstream of the flow augmentation project to which the notification applies; and
 4. The procedure for the permittee to quantify the amount of flow in the relevant stream reach and determine if that flow is greater than the flow that

the permit holder must let pass their point of withdrawal and is therefore subject to withdrawal in accordance with the permittee's withdrawal permit. Procedures may include but are not limited to accessing online information from appropriate water monitoring gages.

- (b) As provided in subsection (d) of Code Section [12-5-546.2](#), the Director's notification shall also contain notice of opportunity for a hearing and shall be served by certified mail, return receipt requested, to the most recent address provided by the permittee. Any permittee to whom such notification is directed shall comply therewith immediately, but shall be afforded a hearing within five business days of the Director's receipt of a petition filed by such permittee. Such hearing shall be before an administrative law judge of the Office of State Administrative Hearings and shall be conducted in accordance with subsection (c) of Code Section [12-2-2](#). Based upon findings adduced at such hearing, the notification shall be modified, reversed, or continued by the Director.
- (5) The permit holder responsible for operation of any state funded augmentation project operated for the sole purpose of maintaining the minimum stream flows sufficient to protect habitat critical for vulnerable aquatic life within the affected areas shall, as part of the process of permitting water withdrawal under this rule and under the Rules for Groundwater Use, 391-3-2, specify the vulnerable aquatic life of concern, design flows under specific conditions, and other parameters relevant to the specific site. The permit holder responsible for operation of such project shall inform the Director when such project becomes operational as well as at the onset, and conclusion, of each period of augmentation conducted to maintain minimum stream flows sufficient to protect habitat critical for vulnerable aquatic life within the affected areas. Information to be submitted at the onset of each period of augmentation includes the following:
- (a) Amount of augmented flow the project is expected to provide; and
 - (b) Any other information or data the Director determines is needed to allow specification of affected downstream permittees and preparation of notifications during specified periods of the project's operations.

Subject 391-3-30. DROUGHT MANAGEMENT.

[Rule 391-3-30-.01. Purpose of Rule.](#)

To establish rules and regulations relating to drought management, including: provisions for a drought response committee; drought indicators and triggers; a drought declaration process; and state and local predrought mitigation strategies and drought response strategies. Predrought mitigation strategies are designed to minimize the potential effects of drought. Drought response strategies include measures or actions to be implemented during various stages of drought.

Authority: O.C.G.A. §§ [12-5-8](#).

History. Original Rule entitled "Definitions" adopted. F. June 8, 2004; eff. June 28, 2004.

Amended: New title "Purpose of Rule." F. July 15, 2015; eff. August 4, 2015.

[Rule 391-3-30-.02. Definitions.](#)

When used in this Chapter:

- (1) "Affected drought area" means any area subject to a drought declaration made in accordance with Rule [391-3-30-.05](#).

- (2) "Director" means the director, or his/her designee, of the Environmental Protection Division of the Department of Natural Resources.
- (3) "Division" means the Environmental Protection Division of the Department of Natural Resources.
- (4) "Drip irrigation" means the use of an irrigation system manufactured and sold specifically for delivering water through small flexible pipes and emitters slowly and directly to the soil around the base of individual plants in a manner that minimizes evaporative losses, pooling, runoff and wetting of plant foliage. This type of system may be part of a larger automated irrigation system or may operate as a stand-alone system connected to a typical outdoor faucet.
- (5) "Farm uses" means irrigation of any land used for general farming, forage, aquaculture, pasture, turf production, orchards, or tree and ornamental nurseries; or provisions of water supply for farm animals, poultry farming, or any other activity conducted in the course of a farming operation. Farm uses shall also include the processing of perishable agricultural products.
- (6) "Permittee" is defined as:
 - (a) Any person that holds a water withdrawal permit issued by the Director pursuant to the Georgia Water Quality Control Act, O.C.G.A. § [12-5-20](#)*et seq.*;
 - (b) Any person that holds a water withdrawal permit issued by the Director pursuant to the Groundwater Use Act, O.C.G.A. § [12-5-90](#)*et seq.*; or
 - (c) Any person that holds a permit issued by the Director pursuant to the Georgia Safe Drinking Water Act, O.C.G.A. § [12-5-170](#)*et seq.*, that uses water obtained from any person meeting the criteria in paragraphs (a) or (b);
 - (d) Permittee does not include any person that holds a water withdrawal permit for farm uses.
- (7) "Public water system" means a system for the provision to the public of piped water for human consumption.
- (8) "Soaker hose" means a hose that is connected to a typical outdoor faucet and that is manufactured and sold specifically for delivering water slowly and directly to the soil around the base of individual plants by allowing water to seep from it in a manner that minimizes evaporative losses, pooling, runoff and wetting of plant foliage.

Authority: O.C.G.A. §§ [12-5-8](#), [12-5-20](#)*et seq.*, [12-5-90](#) *et seq.*, and [12-5-170](#) *et seq.*

History. Original Rule entitled "Applicability of Rule" adopted. F. June 8, 2004; eff. June 28, 2004.

Amended: New title "Definitions." F. July 15, 2015; eff. August 4, 2015.

Rule 391-3-30-.03. Predrought Mitigation Strategies.

- (1) During non-drought periods, irrigation outdoors for purposes of planting, growing, managing, or maintaining ground cover, trees, shrubs, or other plants shall be in accordance with O.C.G.A. § [12-5-7](#)(a.1)(1) and (2).
 - (a) Persons may irrigate outdoors daily for purposes of planting, growing, managing, or maintaining ground cover, trees, shrubs, or other plants only between the hours of 4:00 p.m. and 10:00 a.m.
 - (b) Paragraph (a) shall not create any limitation upon the following outdoor water uses:
 1. Commercial agricultural operations as defined in Code Section [1-3-3](#);
 2. Capture and reuse of cooling system condensate or storm water in compliance with applicable local ordinances and state guidelines;
 3. Reuse of gray water in compliance with Code Section [31-3-5.2](#) and applicable local board of health regulations adopted pursuant thereto;
 4. Use of reclaimed waste water by a designated user from a system permitted by the Environmental Protection Division of the department to provide reclaimed waste water;
 5. Irrigation of personal food gardens;
 6. Irrigation of new and replanted plant, seed, or turf in landscapes, golf courses, or sports turf fields during installation and for a period of 30 days immediately following the date of installation;
 7. Drip irrigation or irrigation using soaker hoses;
 8. Handwatering with a hose with automatic cutoff or handheld container;
 9. Use of water withdrawn from private water wells or surface water by an owner or operator of property if such well or surface water is on said property;
 10. Irrigation of horticultural crops held for sale, resale, or installation;
 11. Irrigation of athletic fields, golf courses, or public turf grass recreational areas;
 12. Installation, maintenance, or calibration of irrigation systems; or
 13. Hydroseeding.

- (c) Paragraph (a) shall not create any limitation upon outdoor water uses for purposes other than planting, growing, managing, or maintaining ground cover, trees, shrubs, or other plants.

- (2) The state has already made, and continues to make, extensive investments in water efficiency since conservation measures play such an important role in water stewardship. Therefore, with the exception of the outdoor irrigation requirements in O.C.G.A. § [12-5-7](#)(a.1)(1) and (2) and the Drought Contingency Plans and Water Conservation Plans required under Rules [391-3-2-.04\(11\)](#), [391-3-6-.07\(4\)\(b\)8](#), and [391-3-6-.07\(4\)\(b\) 9](#), this rule does not repeat or modify any existing predrought mitigation strategy or create any new predrought mitigation strategies.

Amended: New title "Predrought Mitigation Strategies." F. July 15, 2015; eff. August 4, 2015.

Rule 391-3-30-.04. Drought Indicators and Triggers.

- (1) The Director shall monitor climatic indicators and water supply conditions as needed to assess drought occurrence and severity, and its impact upon the ability of permittees that are public water systems to provide adequate supplies of water and avoid or relieve local water shortages. Such indicators and conditions may include but may not be limited to the following:
 - (a) Precipitation;
 - (b) Streamflow;
 - (c) Groundwater;
 - (d) Reservoir Levels;
 - (e) Soil Moisture;
 - (f) Short Term Climate Predictions;
 - (g) U.S. Drought Monitor; and
 - (h) Water Supply Conditions.

- (2) The Division shall periodically make available to the public reports of current climatic indicators. These reports shall be released at least semi-annually; however, when any area of the state has, for at least two consecutive months, been under severe or higher intensity

drought conditions, as indicated by the U.S. Drought Monitor, the reports shall be released at least monthly. These reports shall compare current climatic conditions to historical levels and/or reservoir rule curves, if appropriate, for each indicator. The Division shall employ an adaptive approach to these reports, as resources permit, to pursue improvements to the drought indicators and triggers to make the reports as effective as possible. These reports shall include, at a minimum, the following drought indicators:

- (a) Precipitation: Precipitation during the prior 3, 6, and 12 months, compared to the same time periods historically.
 - (b) Streamflow from the following United States Geological Survey gage locations: Chattooga River at Summerville (02398000), Etowah River at Canton (02392000), Chestatee River near Dahlonega (02333500), Broad River near Bell (02192000), Chattahoochee River near Cornelia (02331600), Flint River at GA 26 near Montezuma (02349605), Oconee River at Dublin (02223500), Ocmulgee River at Macon (02213000), Ogeechee River near Eden (02202500), Spring Creek near Iron City (02357000), Ichawaynochaway Creek at Milford (02353500), Alapaha River at Statenville (02317500), Satilla River near Waycross (02226500).
 - (c) Groundwater: CD4 well: 11AA01, CD5 well: 21T001, CD7 wells: 13L180, 12M017, 11K003, 13J004, 12K014, 10G313, 08K001, 08G001, 09F520.
 - (d) Reservoir Levels: Allatoona Lake, Lake Hartwell, Clarks Hill Lake, Lake Lanier.
- (3) Permittees that are public water systems shall notify the Division in writing within 7 days if a trigger level in the drought contingency plan required by Rules [391-3-2-.04\(11\)\(d\)](#) or [391-3-6-.07\(4\)\(b\)9](#) is surpassed. The notification shall include the relevant drought condition(s) or event(s) such as streamflow levels, ground water levels, reservoir storage or levels, system demands, and/or other approved indicator(s) which required the notification.
 - (4) Prior to making a drought response level declaration pursuant to Rule [391-3-30-.05](#), except for non-drought conditions, the Director shall convene a conference call, or similar communication medium, for all permittees for whom climatic indicators and water supply conditions are such that the Director is considering making a drought declaration. Within three business days of the Director's communication, potentially affected permittees may submit information to the Division regarding climatic indicators and/or their water supply conditions. For permittees whose principal source of water supply is surface water, they may submit a water supply and demand analysis as described in Rule [391-3-30-.08\(1\)\(b\)](#).
 - (5) During a declared drought pursuant to Rule [391-3-30-.05](#), the Director shall convene a conference call, or similar communication medium, at least quarterly for all permittees subject to Drought Response Strategies in the affected drought area(s). The purpose of this communication will be to review the latest climatic indicators and water supply conditions as they relate to the permittees.

- (6) Prior to making a drought response level declaration pursuant to Rule [391-3-30-.05](#), the Director may consult with state and federal entities charged with collecting, interpreting and disseminating data used as a basis for developing drought indices. Such agencies may include but not be limited to the following:
 - (a) State Climatologist;
 - (b) National Oceanic and Atmospheric Administration;
 - (c) United States Geological Survey; and
 - (d) United States Army Corps of Engineers.

History. Original Rule entitled "Outdoor Water Use Schedule During Declared Drought Response Levels" adopted. F. June 8, 2004; eff. June 28, 2004.

Amended: New title "Drought Indicators and Triggers." F. July 15, 2015; eff. August 4, 2015.

Rule 391-3-30-.05. Drought Declaration.

- (1) Based upon an evaluation in accordance with Rule [391-3-30-.04](#), the Director may declare non-drought conditions and various drought response levels for the affected drought area(s). Such declaration shall be based upon the severity of drought conditions and their impact on the ability of permittees that are public water systems to provide adequate supplies of water within the affected drought area(s) and avoid or relieve local water shortages.
- (2) The Director may declare non-drought conditions and drought response Level 1, 2 or 3, with Level 1 being the least severe and Level 3 being the most severe drought response level.
- (3) The Director shall designate the geographical boundary of the affected drought area(s). The geographical delineation of a drought response level shall be based upon the severity of climatic indicators and condition of water supplies occurring within all or a portion of defined hydrologic units, counties or other areas. The drought response level shall apply to all permittees, except as described in subparagraph (4), within the affected drought area(s).
- (4) The Director may differentiate between surface water drought and ground water drought in any affected drought area(s).
- (5) Upon declaring a drought response level, including non-drought conditions, the Director shall provide notice of such declaration to all permittees and the general public within the affected drought area(s). At a minimum, the Director shall issue a press release and send

each affected permittee a letter which shall include the drought response level and a summary of the requirements for that particular drought response level.

Rule 391-3-30-.07. Drought Response Strategies.

- (1) Within 5 days of receipt of notice from the Division of a drought response level declared pursuant to Rule [391-3-30-.05](#), each permittee within an area subject to a drought response level declaration shall implement the applicable drought response strategies listed below.
- (2) Drought Response Level 1.
 - (a) Permittees that are public water systems shall implement a public information campaign that shall include, at a minimum, public notice regarding drought conditions and drought specific public-service messages in one or more of the following ways: newspaper advertisements, bill inserts, website homepage, social media, and notices in public libraries.
- (3) Drought Response Level 2. During Drought Response Level 2, permittees shall implement all Drought Response Level 1 measures plus the following additional Drought Response Level 2 measures:
 - (a) General Outdoor Watering. Outdoor irrigation for purposes of planting, growing, managing, or maintaining ground cover, trees, shrubs, or other plants, as described in Rule [391-3-30-.03\(1\)\(a\)](#), shall be limited to two days a week on an odd-even schedule. Even numbered addresses may irrigate on Wednesday and Saturday between the hours of 4:00 p.m. and 10:00 a.m. Odd numbered addresses may

irrigate on Thursday and Sunday between the hours of 4:00 p.m. and 10:00 a.m. "Even numbered address" means an address number ending with the number 0, 2, 4, 6, 8, or the site does not have a numbered address. "Odd numbered address" means an address ending with the number 1, 3, 5, 7, or 9.

- (b) Specific Categories of Outdoor Water Use. The outdoor water uses listed in Rule [391-3-30-.03\(1\)\(b\)](#) shall be allowed.
 - (c) The following outdoor water uses shall not be allowed, except as provided below:
 - 1. Washing hard surfaces such as streets, gutters, sidewalks and driveways, except when necessary for public health and safety;
 - 2. Using water for ornamental purposes, such as fountains, reflecting pools, and waterfalls;
 - 3. Use of fire hydrants, except for the purposes of firefighting, public health, safety, or flushing;
 - 4. Washing vehicles, such as cars, boats, trailers, motorbikes, airplanes, or golf carts;
 - 5. Non-commercial washing, or pressure washing, of buildings or structures, except for immediate fire protection; and
 - 6. Charity, or non-commercial fund-raiser, car washes.
 - (d) Permittees that are public water systems shall select and implement four, or more, additional practices from the Drought Response Strategies Menu in paragraph (5). Such permittees shall submit monthly reports to the Division by the 10th of each following month detailing the drought response strategies the system has selected, the extent of implementation, and enforcement strategy, if applicable.
- (4) Drought Response Level 3. During Drought Response Level 3, permittees shall implement all Drought Response Level 1 and 2 measures plus the following additional Drought Response Level 3 measures:
- (a) General Outdoor Watering. Outdoor irrigation for purposes of planting, growing, managing, or maintaining ground cover, trees, shrubs, or other plants, as described in Rule [391-3-30-.03\(1\)\(a\)](#), is not permitted.
 - (b) Specific Categories of Outdoor Water Use. The outdoor water uses listed in Rule [391-3-30-.03\(1\)\(b\)](#) shall be allowed, subject to the following additional requirements:

1. Irrigation of personal food gardens shall be conducted between the hours of 4:00 p.m. and 10:00 a.m., unless done using drip irrigation or soaker hoses. Irrigation of personal food gardens using drip irrigation or soaker hoses may be done at any time;
 2. Handwatering with a hose with automatic cutoff or handheld container may be conducted between the hours of 4:00 p.m. and 10:00 a.m.;
 3. Irrigation of athletic fields or public turf grass recreational areas may be conducted between the hours of 4:00 p.m. and 10:00 a.m., subject to the two days a week odd-even schedule described in Drought Response Level 2;
 4. Irrigation of golf courses shall be conducted in accordance with the "Golf Irrigation Prediction and Estimation Worksheet" and only between the hours of 4:00 p.m. and 10:00 a.m., provided, however, irrigation of golf course greens may occur at any time of day;
 5. Use of reclaimed waste water by a designated user from a system permitted by the Division to provide reclaimed waste water shall not be allowed for general outdoor watering as described in Rule [391-3-30-.03\(1\)\(a\)](#). It shall be allowed for any use described in Rule [391-3-30-.03\(1\)\(b\)](#) subject to the limitations in Rule 391-3-30-.07(4)(b);
 6. Installation, maintenance, or calibration of irrigation systems is allowed, provided that it is done by professional landscapers or golf course superintendents.
- (c) Permittees that are public water systems shall implement all practices from the Drought Response Strategies Menu in paragraph (5).
- (d) Rate Structures. Within 1 year of the effective date of this Rule, permittees that are public water systems shall develop a drought surcharge program as a temporary price incentive for customers to reduce water demand during a declared drought. Permittees with tiered conservation rates that comply with specific criteria for tiered conservation rates in the applicable Regional Water Plan are not required to develop a drought surcharge program. Permittees are not subject to requirements regarding Rate Structures if they do not serve retail customers.
1. The drought surcharge program shall meet the following criteria:
 - (i) Drought surcharge rate(s) shall be implemented within 60 days of receipt of drought response level declaration notice.
 - (ii) Drought surcharge rate(s) shall be distinct from established water rates;

- (iii) Drought surcharge rate(s) shall apply only to the volumetric water rates; and
- (iv) Drought surcharge rate(s) shall be approximately revenue neutral relative to non-drought periods. The Division will give deference to public water systems for their reasonable definition of revenue neutral.
- (v) The drought surcharge program is not required to include industrial customers.

2. Permittees shall be exempted from the requirement to have drought surcharge rate(s) that are distinct from established water rates if they demonstrate to the Division that their billing system is unable to make such distinction. Such permittees shall notify all affected customers of the drought surcharge rate(s) through a billing insert whenever the drought surcharge program is initiated.
3. Permittees shall be exempted from the requirement to have drought surcharge rate(s) that apply only to the volumetric water rates if they demonstrate to the Division that their billing system is unable to apply a surcharge rate only to the volumetric use of water.
4. If the applicable Regional Water Plan does not have specific criteria for tiered conservation rates then permittees are exempted from the requirement to develop a drought surcharge program if their conservation rates are designed and implemented consistent with the Division's "Conservation-Oriented Rate Structures" guidance dated August 2007 or Conservation Action Item 5.1 in the Metropolitan North Georgia Water Planning District's 2009 Water Supply and Water Conservation Plan.

(e) Numeric Water Usage Reduction Requirements.

1. The Division may establish numeric reduction requirements for permittees that are public water systems and whose monthly average water use is greater than one million gallons per day. The numeric reduction requirements may vary based on time of year (i.e., warmer months and cooler months). The Division shall consider economic and climatic conditions during the baseline period when establishing the numeric reduction requirements. The Division shall also consider the public water system's peaking factor or their "Baseline Water Use and Efficiency Profile for Public Water Systems", if provided to the Division by the public water system, when establishing the numeric reduction requirements.

2. Permittees that are public water systems and whose industrial customers comprise more than 90 percent of water use shall be exempt from Numeric Water Usage Reduction Requirements.

(5) Drought Response Strategies Menu.

- (a) Public information campaign that goes significantly beyond the minimum notice and public service messages associated with Drought Response Level 1;
- (b) Glasses of water provided to restaurant customers only upon request;
- (c) Distribute retrofit kits and water saving devices to customers. These kits and devices may include, but not be limited to, shower heads, leak dye tabs, toilet tank displacement devices, and hose shut off nozzles;
- (d) Technical assistance outreach program to target high users to identify and/or recommend opportunities to reduce water usage;
- (e) Reduce system pressure, unless such reduction would create unsafe water supply conditions;
- (f) Pool cover requirements;
- (g) Implement a drought surcharge program, or tiered conservation rates, that satisfy the criteria of this rule;
- (h) Suspension of street cleaning program(s);
- (i) Implement, or accelerate, leak detection and repair program(s);
- (j) Impose monetary penalties or terminate water services to customers to reduce outdoor water waste due to excessive application, outdoor leaks, improper irrigation, or other similar reasons.

(6) Professional Exemptions. The following commercial outdoor water uses are exempt from the Outdoor Water Use restrictions of this rule:

- (a) Pressure washing;
- (b) Permanent car wash facility, provided that it is connected to a sanitary sewer system of a political subdivision or local government authority or recycles used wash water;
- (c) Construction sites;
- (d) Watering-in of pesticides and herbicides on turf; and

- (e) Other activities essential to daily business.

History. Original Rule entitled "Drought Response Strategies" adopted. F. July 15, 2015; eff. August 4, 2015.

Rule 391-3-30-.08. Variance Requests.

- (1) Any application for a variance pursuant O.C.G.A. § [12-5-7\(a\)\(1\)](#) to impose restrictions on outdoor water use that are more stringent than those described in this Rule shall provide the following information demonstrating that the outdoor water use restrictions required by Chapter 391-3-30 will not avoid or relieve a local water shortage and the degree to which additional restrictions will avoid or relieve such water shortage:
 - (a) A statement of which Drought Response Level (Level 1, Level 2, Level 3, or Level 3 plus) the public water system seeks to apply, the duration of those restrictions, and a description of why such restrictions are necessary. For the purposes of this Rule, "Level 3 plus" means all Level 3 water usage restrictions plus additional restrictions proposed by the public water system in order to avoid or relieve a local water shortage.
 - (b) For permittees whose principal source of water is surface water, a water supply and demand analysis which includes a quantitative analysis of the effect that additional restrictions will have upon the permittee's source of water in terms of increased storage or streamflow available to the permittee for each month during which they will be implemented. The water supply and demand analysis shall, at a minimum, consist of a 24-month projection of the response of reservoir storage, or water withdrawals as a percent of streamflow, whichever is applicable, to demands represented by monthly water use for each month of the preceding calendar year, assuming calendar year 2007 - 2008 hydrologic conditions, and shall be conducted in accordance with the "Water Supply and Demand Analysis Worksheet."
 - (c) Quantity estimate of reduced water use on a monthly basis expected from implementing such restrictions for each month during which they will be implemented compared to a quantity estimate of reduced water use on a monthly basis expected from implementing the restrictions otherwise required by Chapter 391-3-30;
 - (d) Quantity estimate of the effect such restrictions will have upon the permittee's source of water in terms of increased storage or streamflow available to the permittee for each month during which they will be implemented.

- (2) As provided for in O.C.G.A. § [12-5-7\(a\)\(2\)](#), a political subdivision of this state or local government authority shall not be prohibited from imposing more stringent restrictions on outdoor water use than those required by Chapter 391-3-30 in case of an emergency which immediately threatens the public health, safety, or welfare; provided, however, that such emergency restrictions shall be valid for a period not to exceed seven days unless a variance is granted by the Director.
- (3) Any application for a variance pursuant O.C.G.A. § [12-5-7\(b\)](#) requesting restrictions on outdoor water use that are less stringent than those described in this Rule shall provide the following information demonstrating that the outdoor water use restrictions required by this Rule are not needed to avoid or relieve a local water shortage:
 - (a) A statement of which Drought Response Level (non-drought, Level 1, or Level 2) the public water system seeks to apply, the duration of the less stringent restrictions, and a description of why the restrictions described in the Rule are not necessary.
 - (b) For permittees whose principal source of water is surface water, a water supply and demand analysis which includes a quantitative analysis of the effect that the proposed less stringent restrictions will have upon the permittee's source of water in terms of storage or streamflow available to the permittee for each month during which they will be implemented. The water supply and demand analysis shall, at a minimum, consist of a 24-month projection of the response of reservoir storage, or water withdrawals as a percent of streamflow, whichever is applicable, to demands represented by monthly water use for each month of the preceding calendar year, assuming calendar year 2007 - 2008 hydrologic conditions, and shall be conducted in accordance with the "Water Supply and Demand Analysis Worksheet."
 - (c) Permittees whose water supply is obtained in whole or in part from storage in or releases from any project owned and operated by the United States Army Corps of Engineers may request a variance requesting restrictions on outdoor water use that are less stringent than those described in this Rule. However, for permittees that get more than 25 percent of their water supply from such projects, because these permittees have little control over the management of their water supply source, there shall be a rebuttable presumption that such variance requests should be denied by the Director.
- (4) Upon consideration of the "good cause" showing required in subsections 391-3-30-.08(1) or (3) of these Rules, as provided for in O.C.G.A. § [12-5-7\(c\)](#), the Director shall render a decision on an application for a variance within five business days after receipt thereof and grant a variance to the applicant of the restrictions required by this Rule if the applicant has provided sufficient evidence to support a reasonable conclusion that a variance is warranted.

- (5) In order to provide for efficient implementation of the variance program and to facilitate effective communication to the media and the public regarding drought requirements, it is necessary and appropriate that variance requests be consistent with the framework of the Rule. Therefore, variance requests are limited to the Drought Response Levels (non-drought, Level 1, Level 2, Level 3, or Level 3 plus), and their corresponding Drought Response Strategies, as articulated in the rule.

Subject 391-3-31. RULES FOR WATER CONSERVATION BEST MANAGEMENT PRACTICES AND CERTIFICATION.

[Rule 391-3-31-.01. Definitions.](#)

When used in this Chapter:

- (1) "Best Management Practices" or "BMPs" means those practices that, when implemented by a facility, result in an efficient use of water.
- (2) "Car Wash" means a permanent facility car wash such as a self-serve car wash, a conveyor car wash, or a roll over/in bay car wash, generally available for use by the public.
- (3) "Certification" means the Division has determined a facility is in compliance with the applicable best management practices.

Authority: O.C.G.A. Secs. [12-5-31](#), [12-5-102](#)*et seq.*

History. Original Rule entitled "Definitions" adopted. F. May 27, 2009; eff. June 16, 2009.

[Rule 391-3-31-.02. Applicability of Rule.](#)

- (1) These rules may apply to any facility for which the Division has adopted best management practices, such as a permanent facility car wash.
- (2) Car washes, which the Division has certified as meeting best management practices, are not considered to be an outdoor water use for purposes of any outdoor watering restrictions.

Authority: O.C.G.A. Secs. [12-5-31](#), [12-5-102](#)*et seq.*

History. Original Rule entitled "Applicability of Rule" adopted. F. May 27, 2009; eff. June 16, 2009.

Rule 391-3-31-.03. Carwash Best Management Practices and Certification.

(1) Best Management Practices for car washes:

- (a) The facility will have a backflow prevention device installed on the potable water supply.
- (b) All spray nozzles will be changed annually.
- (c) All water leaks will be repaired as they occur.
- (d) All hoses and faucets will be attended or shut off. All hoses will utilize an automatic shutoff valve.
- (e) All hand-held hoses must have a flow no greater than 3 gallons a minute.
- (f) Driveways and impervious surfaces may be washed with high pressure, low volume systems for health/safety purposes only.
- (g) If spot-free reverse osmosis water is used, the reverse osmosis reject water shall be reused in the vehicle wash process.
- (h) For Self-Serve Car Washes, the wash nozzle and pump system will be high-pressure and flow at no greater than 3 gallons per minute.
- (i) For Conveyor Car Washes, automatic high-level water cut-offs will be installed in all towel and chamois washing machines.
- (j) For Conveyor Car Washes constructed after January 1, 2000, a minimum of 50% of water utilized will be recycled.

(2) Carwash Certification:

- (a) Certification Program Requirements:
 - 1. Car washes must be inspected at least annually by a backflow assembly tester, accredited per [391-3-5-.13\(7\)](#), for compliance with the applicable best management practices using an inspection form developed by the Division.
 - 2. Car washes that fail inspection and do not provide an adequate remedy within 30 days of the inspection failure will have their certifications revoked.

3. The inspector shall issue an accreditation, which shall have the date of issuance, date for reaccreditation, the name of the car wash, and the name, license or certification number, and signature of the inspector.
4. The individual car wash must submit a copy of the accreditation and \$50.00 for each individual permanent facility car wash to the Division. Such certification and payment of fee must occur annually.

(b) Certification:

1. A car wash shall be considered certified when it has been issued a certification by the Division and the certification has not expired.
2. Failure to renew a certification shall mean the car wash is considered an outdoor water use for purposes of any outdoor watering restrictions.

Subject 391-3-32. REGIONAL WATER PLANNING.

Rule 391-3-32-.01. Preparation of Regional Water Development and Conservation Plans.

- (1) **Purpose.** The purpose of Section 391-3-32-.01 is to provide minimum uniform statewide regulations for the preparation of Regional Water Development and Conservation Plans. As authorized by O.C.G.A. §§ [12-5-31](#) and [12-5-96](#), in a manner consistent with O.C.G.A. §§ [12-5-520](#), *et seq.*, and as provided in the Comprehensive State-wide Water Management Plan, Regional Water Development and Conservation Plans shall promote the sustainable use of Georgia's waters through the selection of an array of management practices, to support the State's economy, to protect public health and natural systems, and to enhance the quality of life for all citizens.
- (2) **Policy.** As provided in the Comprehensive State-wide Water Management Plan, the characteristics of water resources and water users vary significantly in differing regions across Georgia. Protecting the ability of the State's water resources to meet needs for water supply and assimilation of waterborne contaminants requires regional, resource-based plans that identify the management practices appropriate to the resources and users in each region.

- (3) **Definitions.** All terms used in this Section shall be interpreted in accordance with the definitions as set forth in this Paragraph, or in any other Paragraph of this Section:
- (a) "Aquifer" means a geological formation, group of such formations, or a part of such a formation that is water bearing;
 - (b) "Assimilative capacity" is a determination describing the amount of contaminant load that can be discharged to a specific water body without exceeding water quality standards or criteria. Assimilative capacity is used to define the ability of a water body to naturally absorb and use a discharged substance without water quality becoming impaired or aquatic life being harmed;
 - (c) "Comprehensive State-wide Water Management Plan" is the plan provided for by O.C.G.A. § [12-5-520](#)*et seq.* whose purpose is to help guide the stewardship of Georgia's water resources to ensure that those resources continue to support the State's economy while maintaining healthy natural systems. The Comprehensive State-wide Water Management Plan mandates preparation of regional Water Development and Conservation Plans;
 - (d) "Consumptive use" is the difference between the total amount of water withdrawn from a defined hydrologic system of surface water or groundwater and the total amount of the withdrawn water that is returned to that same hydrologic system over a specified period of time;
 - (e) "Consumptive use assessment" is a determination describing the water reliably available for consumptive use over a specified period of time from a defined hydrologic system of surface water or groundwater sources in a dry year, beyond the quantities needed to meet flow regime requirements or in-aquifer needs, which the Division will establish. A consumptive use assessment will establish a baseline that may be increased through either selected modifications of the source, such as increasing water storage capacity, or supplementing the source. This baseline for the water available from each water source will be provided for the purposes of regional planning. Water use above the baseline defined by the dry year consumptive use assessments may be permitted by the Division in normal and wet years;
 - (f) "Director" is the Director of the Environmental Protection Division of the Department of Natural Resources;
 - (g) "Division" means the Environmental Protection Division of the Department of Natural Resources;
 - (h) "Dry year" means the time period of lowest precipitation and/or streamflow for which water supply and wastewater facilities are designed and operated;

- (i) "Flow regime" is a description of the pattern of flow variability for an individual surface water source. Flow regime involves the magnitude, timing, duration, frequency and rate of water movement;
- (j) "Future" means the time period over which one might reasonably forecast water uses and users;
- (k) "Human use" refers to all the ways in which water is employed for human benefit, including, without limitation, public health purposes, human consumption, agricultural and industrial production, recreation, municipal, and commercial purposes. This list of uses is not in priority order and does not alter priorities for water use established by the Georgia Code;
- (l) "Hydrologically connected" means the situation in which defined surface areas and/or subsurface areas drain to common points or regions under natural conditions;
- (m) "Instream uses" means all those human and ecological uses of water which occur within the banks of rivers and streams, including, without limitation, waste assimilation, hydropower production, recreation, maintenance of aquatic habitats, and support of biological integrity;
- (n) "Management practices" are reasonable methods, considering available technology and economic factors, for managing water demand, water supply, return of water to its sources, and prevention and control of pollution of the waters of the state;
- (o) "Natural systems" means the biological, ecological, and physical systems that arise and persist through mechanisms of nature as opposed to having been designed, constructed, and operated by mankind;
- (p) "Offstream uses" means the purposes for which water is withdrawn from streams, rivers, lakes, or aquifers;
- (q) "Stormwater" means stormwater runoff, snow-melt runoff, and surface runoff and drainage;
- (r) "Sustainable" means using water resources to meet current needs without unreasonably foreclosing the ability of future generations to meet their own water needs;
- (s) "Water conservation" is the beneficial reduction of water use, water waste, and water loss;
- (t) "Water Development and Conservation Plan," as provided in O.C.G.A. §§ [12-5-31\(h\)](#) and [12-5-96\(e\)](#), means a regional resource-based plan, developed in

accordance with O.C.G.A. §§ [12-5-520](#)*et seq.*, that promotes the efficient use of water resources, promotes the conservation and reuse of water, guards against a shortage of water, and is consistent with the public welfare of the state, or an addendum to any statutorily required water management plan(s) prepared to satisfy the purposes of this rule and the Comprehensive State-wide Water Management Plan. Such plans include water development, conservation, and sustainable use and are based upon detailed scientific analysis of water sources, the projected future condition of the resources, current demand, and estimated future demands on the resources. Furthermore, as provided in the Comprehensive State-wide Water Management Plan, such plans identify the water management practices to be employed in each Water Planning Region to ensure that current and future needs for water supply and assimilative capacity are met within the capacity of the water resources;

- (u) "Water Planning Council" means a regional planning entity responsible for overseeing the preparation of a recommended Regional Water Development and Conservation Plan for a Water Planning Region. This includes, without limitation, those entities to whom the Director has designated as responsible for overseeing preparation of such plans, and any statutorily designated regional planning entity with water management responsibilities that may include, but are not limited to watershed, storm-water, waste-water, and water supply and conservation management within that entity's area;
- (v) "Water Planning Region" is a defined area that includes one or more water quantity and/or quality resources;
- (w) "Water resource" is a body of surface water or groundwater that is available or potentially available for off stream and/or instream use, including, without limitation, agricultural, industrial, residential, recreational, or environmental activities, among others. Water resources may include freshwater bodies, brackish waters, and ocean water;
- (x) "Water resource assessment" is comprised of the assimilative capacity determination and the consumptive use assessment for both groundwater and surface water for a given area.
- (y) "Water use" means utilization of water for natural and human uses. See also human use, instream use and offstream use;
- (z) "Water users" means those who utilize water for human uses;
- (aa) "Watershed" means the land area tributary to a given point along a stream or river;

(4) Regional Water Development and Conservation Plans.

- (a) All Regional Water Planning Councils, shall oversee preparation of recommended Regional Water Development and Conservation Plans;
- (b) No Water Planning Council whose duties have been designated by the Director, shall commence the preparation of recommended Regional Water Development and Conservation Plans until that Council has received, from the Director, a letter of delegation providing notice of delegation of duties and a notice to proceed with preparation of such plans;
- (c) All Regional Water Planning Councils shall execute a memorandum of agreement (MOA) with the Division and the Department of Community Affairs (DCA) according to a schedule established by the Division and DCA. The execution of an MOA shall be a condition precedent to issuance of the Director's letter of delegation. For any statutorily designated regional Water Planning Council, MOAs shall be consistent with that entity's enabling legislation, the purposes of this rule and the Comprehensive State-wide Water Management Plan. As provided in paragraph (3) of Section 14 of the Comprehensive State-wide Water Management Plan, MOAs for those entities designated by the Director for preparing recommended Regional Water Development and Conservation Plans shall, include but not be limited to the following:
 - 1. Have at minimum a three-year term and be subject to renewal. Renewal of MOAs shall be contingent on performance, which shall be evaluated according to regional water planning guidance;
 - 2. Establish procedures including but not limited to:
 - (i) Decision-making procedures;
 - (ii) Provisions for appropriate public sector involvement in Water Development and Conservation Plan development and implementation of management practices;
 - (iii) Provisions for an advisory body of local elected officials, composed of one representative from each county and city in the Water Planning Region, to provide recommendations and input on regional population, economic and employment forecasts and on other data and information required for preparation of the Water Development and Conservation Plan. Water Planning Councils shall also consider input from this advisory body on elements of Water Development and Conservation Plans that impact the fiscal responsibilities of local governments;
 - (iv) Specifications for other advisory bodies and processes as necessary, including opportunities for meaningful public participation in Water Development and Conservation Plan development;

- (v) Provisions for consultation with local governments located outside the planning region boundary that rely on, or impact, water resources within the planning region;
- (vi) Provisions necessary to ensure communication and coordination among Water Planning Councils, across the boundaries of adjoining planning regions, among councils using hydrologically connected water resources, and among councils affected by water management activities in adjacent planning regions;
- (vii) Procedures for coordination with the Department of Community Affairs to ensure implementation of Regional Water Development and Conservation Plans is coordinated with the regional and local government comprehensive planning process in accordance with O.C.G.A. §§ [12-2-8](#) and [50-8-30](#)*et seq.*;
- (viii) Provisions for alternatives for dispute resolution as provided in guidance;
- (ix) Other requirements established by the Director.

(d) Regional Water Development and Conservation Plans shall:

1. For any statutorily designated regional planning council responsible for preparing recommended Regional Water Development and Conservation Plans, be consistent with that entity's enabling legislation, the purposes of this rule and the Comprehensive State-wide Water Management Plan;
2. Incorporate technical assistance provided by the Division, including water quantity and water quality assessments, forecasts, following guidance on the use of this technical assistance and other guidance as provided by the Division. Regional Water Development and Conservation Plan preparation shall also follow guidance for the preparation of recommended Regional Water Development and Conservation Plans. Such guidance includes those elements identified in paragraph (6) of Section 14 of the Comprehensive State-wide Water Management Plan;
3. Identify actions that will be taken to ensure forecasted needs are met within the water resources' capabilities, as specified in the water resource assessments provided by the Division to the regional Water Planning Councils;
4. Address those areas, local governments, and other major water users lying wholly within or in part of (i.e. at the periphery) a water planning region;

5. Include surface water and groundwater sources and their conditions, as provided in guidance issued by the Director;
6. Include forecasts of 10-, 20-, 30-, and 40-year population expectations, employment characteristics, water demands, wastewater returns, land surface types and distribution, developed in consultation with the Division. Water demand and wastewater return forecasts will identify domestic, commercial, agricultural, industrial and power-generation water uses;
7. Provide forecasted uses of water bodies for water supply, wastewater discharge, and storm flows for each forecast period;
8. Provide water quantity and quality management objectives for 10-, 20-, 30-, and 40-year time horizons, and any recommended actions required of the state to support those objectives;
9. Compare forecasts with the consumptive use assessments and assimilative capacities of water resources as determined by the water quantity and water quality assessments.
10. Provide recommendations for appropriate management practices for stormwater management, wastewater treatment, water supply, water conservation, and the general protection of water quality within the planning region;
11. Provide proposals for addressing data and information needs;
12. Define benchmarks for assessment of Water Development and Conservation Plan effectiveness and identification of required revisions;
13. Provide other elements as required by guidance issued by the Director, including any guidance specific to any statutorily designated regional planning council.

(5) Regional Water Development and Conservation Plan Review and Adoption.

- (a) Regional Water Planning Councils shall submit recommended regional Water Development and Conservation Plans to the Director. The Director will review such plans and any amendments thereto to determine if they are consistent with this Chapter and guidance adopted pursuant to this rule. The Division will consult with the Department of Community Affairs to ensure implementation of the Water Development and Conservation Plan is coordinated with the regional and local government comprehensive planning process in accordance with O.C.G.A. §§ [12-2-8](#) and [50-8-30](#)*et seq.*

- (b) Upon review of recommended Water Development and Conservation Plans, the Division will take one of the three following actions:
 - 1. Adopt a recommended Water Development and Conservation Plan if it is complete and consistent with the provisions of this chapter and guidance provided by the Director; or
 - 2. Advise the regional Water Planning Council as to additional measures that must be taken to complete a recommended Water Development and Conservation Plan and make it consistent with the provisions of this Rule and guidance provided by the Director; or
 - 3. Adopt a recommended Water Development and Conservation Plan with conditions.
- (c) For any Water Planning Region for which a recommended Water Development and Conservation Plan is not submitted by the date specified in the guidance for plan development, the Director shall prepare the regional Water Development and Conservation Plan consistent with the provisions of this Rule and guidance provided by the Director.
- (d) Before taking action to adopt any regional Water Development and Conservation Plan, the Director shall provide state-wide public notice of the recommended plan and a state-wide comment period of at least forty-five days.

(6) Review and Revision of Regional Water Development and Conservation Plan.

- (a) Water Development and Conservation Plans will be subject to review by the appropriate regional Water Planning Council every five years, unless otherwise required by the Director for earlier review. Such review will be conducted as provided in guidance provided by the Director and shall include:
 - 1. Consideration of the current resource assessments and regional population and employment forecasts provided by the Division;
 - 2. Assessment of progress against Water Development and Conservation Plan objectives and benchmarks for water quality and quantity;
 - 3. Assessment of the need for further scientific assessment of issue(s) relevant to water planning in the region;
 - 4. Updates, where necessary, of water and wastewater forecasts; and
 - 5. Recommended changes in the Water Development and Conservation Plan.

- (b) Revisions and adoption of revised Water Development and Conservation Plans shall be conducted in accordance with this Rule and guidance provided by the Director.

(7) Use by Division of Adopted Regional Water Development and Conservation Plans.

- (a) As provided in O.C.G.A. §§ [12-5-31](#), [12-5-96](#), and [12-5-522](#), the Director shall ensure that the issuance of any permit for the use of water is based upon the Comprehensive State-wide Water Management Plan and all applicable Water Development and Conservation Plans. Additionally, any political subdivision or local water authority not in compliance with the Comprehensive State-wide Water Management Plan shall be ineligible for state grants or loans for water projects, except for those projects designed to bring such political subdivision or local water authority into compliance with the plan.

Subject 391-3-33. RULES FOR PUBLIC WATER SYSTEMS TO IMPROVE WATER SUPPLY EFFICIENCY.

[Rule 391-3-33-.01. Purpose of Rule.](#)

The purpose of these Rules is to establish policies, procedures, requirements and standards to implement Chapter 5 of Title 12 of the Official Code of Georgia Annotated (O.C.G.A), relating to water resources as amended in the new Code Section [12-5-4.1](#), and as included in the Georgia Water Stewardship Act of 2010 to carry out the purposes of adopting standards for public water systems to improve the efficiency of water supply through the development and improvement of water loss abatement programs and to implement the industry's best management practices for controlling water loss by achieving recommended standards.

Cite as Ga. Comp. R. & Regs. R. 391-3-33-.01

Authority: O.C.G.A. Secs. [12-5-4](#) and [12-5-4.1](#).

History. Original Rule entitled "Purpose of Rule" adopted. F. July 15, 2015; eff. August 4, 2015.

[Rule 391-3-33-.02. Definitions.](#)

When used in this Chapter:

- (1) "Apparent losses" means the sum of unauthorized consumption (theft or illegal use), customer water meter under-registration (inaccuracies with customer water meters) and data handling errors (meter reading and billing).
- (2) "Billed metered consumption" means all metered consumption which is billed from all groups of customers, such as domestic, commercial, industrial or institutional. It does not include water that is metered and then billed, and exported to neighboring public water systems.
- (3) "Certification statement" means that a Qualified Water Loss Auditor has certified that the auditor has examined the annual water loss audit results and the results meet the requirements in the Georgia Water System Audits and Water Loss Control Manual and the American Water Works Association methodology for water loss auditing.
- (4) "Current Annual Real Losses (CARL)" means the real losses determined during the reporting year.
- (5) "Director" means the Director of Environmental Protection Division of the Department of Natural Resources.
- (6) "Division" means the Environmental Protection Division of the Department of Natural Resources.
- (7) "Economic Level of Leakage" means the determination of the level of real (leakage) losses where the sum of the cost of the real loss reduction and the cost impact of the real losses is at a minimum. Reducing leakage levels below the Economic Level of Leakage is not cost-effective, as the cost of the leak abatement activities exceeds the value of water saved. Economic Level of Leakage is used for leakage reduction target setting and setting the frequency of leak survey investigations.
- (8) "Infrastructure Leakage Index (ILI)" means the dimensionless performance indicator calculated by dividing the Current Annual Real Loss by the Unavoidable Annual Real Loss (i.e., CARL / UARL) best used for benchmarking leakage within a public water system.
- (9) "Non-Revenue Water" means the sum of apparent losses, real losses, and authorized water consumption (unbilled metered and unmetered) that does not provide any revenue to the utility.
- (10) "Operational Basic Apparent Losses" means a basic performance indicator that assesses Apparent Losses in gallons per service connection per day.
- (11) "Operational Basic Real Losses" means a basic performance indicator that assesses Real Losses in gallons per service connection per day or gallons per miles of water distribution mains per day depending on the public water system's connection density.

- (12) "Public water system" means a system for the provision to the public of piped water for human consumption, if such system regularly serves at least 3,300 individuals. Such term includes but is not limited to any collection, treatment, storage, and distribution facilities under the control of the operator of such system and used primarily in connection with such system and any collection or pretreatment storage facilities not under such control which are used primarily in connection with such system.
- (13) "Qualified Water Loss Auditor" means an individual who has completed a basic water loss auditing course approved by the Division and who demonstrates the knowledge, skills and ability to validate water loss audits in accordance with the Georgia Water System Audits and Water Loss Control Manual.
- (14) "Real Losses" means the physical water losses from reservoir(s), the water treatment facility(ies), the pressurized public water system and the finished water storage tanks, up to the point of customer consumption. In metered systems this is the customer meter; in unmetered situations this is the first point of consumption within the property. The annual volume lost through all types of leaks, breaks and overflows depends on frequencies, flow rates, and average duration of individual leaks, breaks and overflows.
- (15) "Unavoidable Annual Real Losses (UARL)" means a theoretical reference value representing the technical low limit of leakage that could be achieved if all of current best technology could be successfully applied and is a key variable in the calculation of the Infrastructure Leakage Index.
- (16) "Unbilled metered consumption" means metered water consumption which is, for any reason, unbilled and does not include water exported to neighboring public water systems or utilities that is metered but unbilled.
- (17) "Unbilled unmetered water consumption" means any kind of water consumption authorized by the public water system which is neither billed nor metered, and may include items such as fire-fighting, flushing of mains and sewers, or street cleaning, and does not include water exported to neighboring public water systems or utilities that is unmetered and unbilled.
- (18) "Water audit data validity score" means a weighted scale, from 0 to 100, for the components of consumption and water loss that demonstrates a public water system's confidence and accuracy of data entered into a water audit software application.
- (19) "Water loss audit" means the investigation and completion of an assessment of public water system infrastructure leakages and other losses in conformance with the Georgia Water Loss Audit guidance, International Water Association (IWA) and American Water Works Association (AWWA) methodology for water loss auditing and the latest release of the AWWA Water Loss Audit software application package.
- (20) "Water exported" means the water sold to a neighboring water utility, public water system or regional water authority.

- (21) "Water use efficiency" means the minimal amount of water that is technically and economically feasible to achieve an intended water use function and reduce water waste.

Rule 391-3-33-.04. Water Loss Audits.

- (1) **Water Loss Audits.** Public water systems shall conduct an annual water loss audit in accordance with the International Water Association (IWA) and American Water Works Association (AWWA) methodology for water loss auditing as provided by the Division in the most current versions of the Georgia Water System Audits and Water Loss Control Manual and AWWA Water Audit Software.
- (2) **Reporting.** By March 1 of each calendar year, annual water loss audit results for the previous calendar year shall be submitted to the Division in a form and manner prescribed by the Division and shall include documentation of the basis of the audit in the comments section of the Reporting Worksheet. A certification statement shall be included with each annual water loss audit reporting that a Qualified Water Loss Auditor has examined the annual water loss audit results and the results meet the requirements in the Georgia Water System Audits and Water Loss Control Manual and the American Water Works Association methodology for water loss auditing.
- (3) **Review by the Division.** Public water systems shall cooperate with the Division during Division review of the submitted water loss audits, including providing responses to follow up questions by the Division and the submittal of additional supporting information for the audits. If the Division determines that an audit is of poor quality, the Division may require the Public water system to have their audit reviewed and resubmitted by a third party Qualified Water Loss Auditor.

Authority: O.C.G.A. Secs. [12-5-4](#) and [12-5-4.1](#).

History. Original Rule entitled "Water Loss Audits" adopted. F. July 15, 2015; eff. August 4, 2015.

Rule 391-3-33-.05. Water Supply Efficiency Improvement.

- (1) **Water Loss Control Program.** By July 1, 2016, Public water systems shall develop and conduct a water loss control program to investigate, assess, and implement efforts to improve water supply efficiency. Water loss control programs shall be updated periodically as needed. Water loss control programs may include, but are not limited to, the following:
 - (a) Leakage Management, including distribution system water leakage detection and repairs;
 - (b) Finished Water Meter Flow Verification;
 - (c) Customer Water Meter Testing and Calibration;
 - (d) Resource Allocation, including planned preventive maintenance; and
 - (e) Revenue Recovery Activities.

- (2) **Individualized Goals.** Each public water system shall establish individual goals to set measures of water supply efficiency and to improve water supply efficiency. These measures may include, but are not limited to:
 - (a) Infrastructure Leakage Index;
 - (b) Water Audit Data Validity Score;
 - (c) Operational Basic Apparent Losses;
 - (d) Operational Basic Real Losses; and
 - (e) Economic Level of Leakage

- (3) **Demonstration of Progress.**
 - (a) Public water systems shall make progress toward improving water supply efficiency. Progress may be demonstrated through process and performance measures:
 1. Improvement in data validity score to the extent practicable for a specific utility as a process measure of data reliability;
 2. The development and implementation of the water loss control program;
 3. Improvement in performance measures once a reliable level of validity score has been achieved:

* Operational Basic Real Losses;

* Operational Basic Apparent Losses; and

4. Economic Level of Leakage has been achieved and maintained.

(b) Demonstration of progress shall be documented by public water systems upon application to the Division for a water withdrawal permit or a Permit to Operate a Public Water System as listed below, and may be evaluated by the Division as part of the review of the following applications:

1. An application to renew a water withdrawal permit under the Georgia Groundwater Use Act of 1972, O.C.G.A. Section [12-5-90](#) et seq., or the Georgia Water Quality Control Act, O.C.G.A. Section [12-5-20](#) et seq.;
2. An application to modify an existing water withdrawal permit which includes an increase in the permitted water supply under the Georgia Groundwater Use Act of 1972, O.C.G.A. Section [12-5-90](#) et seq., or the Georgia Water Quality Control Act, O.C.G.A. Section [12-5-20](#) et seq.;
3. An application to renew a Permit to Operate a Public Water System for a purchased water system (one that does not otherwise hold a water withdrawal permit from the Division) under the Georgia Safe Drinking Water Act of 1977, O.C.G.A. Section [12-5-170](#) et seq.; or
4. An application to increase the number of permitted service connections issued to a public water system under the Georgia Safe Drinking Water Act of 1977, O.C.G.A. Section [12-5-170](#) et seq.

(c) For applications submitted after July 1, 2016 as described under paragraph (3)(b) above, failure to demonstrate progress toward improving water supply efficiency may result in an action by the Director including, but not limited to, the following:

1. A reduction under paragraph (3)(b)1. above in the permitted water quantity for a water withdrawal permit issued to the public water system under the Georgia Groundwater Use Act of 1972, O.C.G.A. Section [12-5-90](#) et seq., or the Georgia Water Quality Control Act, O.C.G.A. Section [12-5-20](#) et seq.;
2. A denial under paragraph (3)(b)2. above of an application to modify any water withdrawal permit issued to the public water system under the Georgia Groundwater Use Act of 1972, O.C.G.A. Section [12-5-90](#) et seq., or the Georgia Water Quality Control Act, O.C.G.A. Section [12-5-20](#) et seq.;

3. A denial under paragraph (3)(b)3. above of an application to renew a Permit to Operate a Public Water System for a purchased water system under the Georgia Safe Drinking Water Act of 1977, O.C.G.A. Section [12-5-170](#) et seq.; or
4. A denial under paragraph (3)(b)4. above of an application to increase the number of permitted service connections issued to the public water system under the Georgia Safe Drinking Water Act of 1977, O.C.G.A. Section [12-5-170](#) et seq.

(4) Administration and Enforcement.

The administration and enforcement of this Rule shall be in accordance with the Georgia Water Quality Control Act, the Georgia Groundwater Use Act, the Georgia Safe Drinking Water Act, and the Georgia Administrative Procedure Act.

Rule 391-4-2-.03. Harvest Recording and Reporting Requirements.

- (1) It is unlawful for any person killing a black bear, deer, wild turkey, or alligator to:
 - (a) remove such carcass from the place of killing without first recording all information specified by the department in the manner specified by the department.
 - (b) fail to report the harvest of each black bear, alligator, deer, or turkey within 24 hours of carcass recovery by providing such information specified by the department in the manner specified by the department; provided, however, that such wildlife killed by a motor vehicle (O.C.G.A. Sec. [27-3-28](#)), taken under authorization of a department-issued permit (O.C.G.A. Secs. [27-2-18](#), [27-2-21](#), or [27-2-31](#)) or tagged by authorized personnel at a public land hunt are exempt from harvest recording and reporting requirements.
 - (c) transfer possession to any private or commercial cold storage or processing facility without first providing the harvest-reporting confirmation number unless the

animal was killed by a motor vehicle, taken under authorization of a department-issued permit, or tagged by authorized personnel at a public land hunt.

- (d) transport a carcass (not processed for human consumption) killed by another person unless the following written information is attached to the carcass: name and address of the hunter who killed such black bear, deer, turkey, or alligator, date and county of kill, and the harvest-reporting confirmation number, if applicable in accordance with (b) above.
 - (e) provide false harvest recording or reporting information.
- (2) It is unlawful for any private or commercial cold storage or processing facility to take possession of a black bear, deer, wild turkey, or alligator without first recording the following information for each carcass: name of the hunter who killed the animal, date and county of kill, and sex of the animal.
- (3) It is unlawful for a person to hunt black bear, deer, wild turkey, or alligator without first procuring from the department an annual Harvest Record for the current season. The Harvest Record must be carried on the hunter's person either in printed paper or electronic format when hunting.

Rule 391-4-2-.04. Required Clothing.

It is unlawful for any person to hunt deer or bears or for any person to accompany another person hunting deer or bears during firearms and primitive weapons deer or bear seasons unless each person shall wear a total of at least 500 visible square inches of daylight fluorescent orange material as an outer garment. This also includes any deer or bear firearms and primitive weapons hunt on a wildlife management area, or any other hunt so designated in [391-4-2-.70](#) or [391-4-2-.71](#) regardless of state season. Such clothing must be worn above the waistline and may include a head covering.

Rule 391-4-2-.05. Hunter Education Courses.

- (1) Recognized courses of hunter education instruction shall align with educational standards established by a national governing body for hunter education, including but not limited to those endorsed by the International Hunter Education Association or the Association of Fish and Wildlife Agencies.
- (2) Upon the successful completion of a recognized course established under this rule, the trainee shall receive a hunter education certificate according to policies and procedures approved by the Department. This certificate is evidence of successful completion of the prescribed course of study and shall satisfy the requirements of O.C.G.A. § [27-2-5](#).
- (3) The Department may accept similar certificates issued outside the State for completion of a course that meets educational standards established by a national governing body for hunter education such as the International Hunter Education Association or the Association of Fish and Wildlife Agencies, as valid for the requirements of this section that persons have successfully completed firearm safety, hunter education, or similar courses as evidence of compliance with O.C.G.A. § [27-2-5](#).
- (4) Classroom courses shall be free of charge to participants with the exception that volunteers may charge nominal fees, in accordance with policies established by the Department, to cover training costs such as facility fees or instructional supplies. The Department may charge participants for special training courses, home study, equivalency testing, educational materials, and other programs as approved by the Department.
- (5) The Department may offer an online or electronic course of instruction under the hunter education program in hunter ethics, wildlife laws and regulations, and competency and safety in the handling of firearms provided that such course meets educational standards established by a national governing body for hunter education including but not limited to those endorsed by the International Hunter Education Association or the Association of Fish and Wildlife Agencies.
- (6) The Wildlife Resources Division Director is authorized to issue a conditional hunter education certificate to a resident with developmental disabilities as defined in O.C.G.A. § [37-1-1](#).

- (7) A resident with developmental disabilities shall be required to complete the hunter education course as provided in § [27-2-5](#) in the presence of a licensed adult, but is not required to attain a particular score on the course examination or take the course more than once.
- (8) A person issued a conditional hunter education certificate shall be accompanied by an adult at least twenty-five (25) years of age or older, while the individual with the developmental disability is hunting. The accompanying adult shall have a valid hunting license unless otherwise license exempt while hunting.

Rule 391-4-2-.11. Quota Hunts.

- (1) Applicants for department administered quota hunts shall complete an online application provided by the department, except as otherwise instructed in Rule [391-4-2-.70](#).
- (2) Only selected applicants may hunt, except that selected applicants for waterfowl, quail, and rabbit may bring no more than two hunting guests; selected parties for dog-deer may bring no more than eighteen hunting guests; selected applicants for a dog-bear hunt may bring no more than nine guests, and selected applicants for dog-feral hog may bring no more than four hunting guests. The individual selected for the hunt shall be present except that only one member of a selected dog-deer party must be present, and may designate up to eighteen hunting guests at check-in on the day of the hunt.
- (3) The total hunting party size shall not exceed 5 for deer, State Park, dove, 10 for dog-bear hunts and feral hog hunts; 20 for dog-deer hunts; and 3 for alligator and turkey quota hunts unless otherwise specified in Rule [391-4-2-.70](#).

- (4) Only persons aged sixteen (16) years or less may apply for Youth hunts.
- (5) An individual shall not participate in more than 3 quail quota hunts in a single season.
- (6) A drawn hunter may be accompanied afield by a non-hunting assistant who shall be licensed but shall not take or attempt to take game. Such assistant shall not carry a firearm or archery tackle (except as provided in O.C.G.A. § [16-11-125](#)) and must remain within 15 feet of the drawn hunter.

Rule 391-4-2-.12. Trapping.

- (1) The trapping season for raccoon, mink, otter, fox, opossum, muskrat, skunk, bobcat and weasel is December 1 through the last day of February except that on private lands not managed by the department there is no closed season on trapping of beaver, coyotes, opossum, and raccoon.
- (2) Within thirty (30) days after the close of trapping season, all trappers must report to the department in writing the number of furs, hides or pelts which have been taken during the open season. Completion of the annual trapping survey distributed by the department satisfies the reporting requirements herein.

- (3) All bobcats and otters trapped in Georgia and exported out of Georgia shall be tagged with a department-provided Federal Export Tag. The tag must be attached to the hide or carcass no later than thirty (30) days after closure of trapping season.
- (4) Snares may be used for trapping beaver provided that snares are set in water or on land within ten (10) feet of water, including swamps, marshes, and tidal areas. All snares must be marked with the trapper's name or identification number.

Rule 391-4-2-.18. Confinement of White-tailed Deer.

- (1) Definitions. As used in these Rules and Regulations, the following term is defined as follows:
 - (a) "Confine" is to capture, possess or impede free egress of white-tailed deer with a fenced enclosure on an area less than 640 contiguous acres.
 - (b) "Contiguous" means a single unit of land that shall not be transected by public roads, creeks, rivers, or rights-of-way of public service corporations.
- (2) It shall be unlawful to confine live white-tailed deer in an enclosure less than 640 contiguous acres except as permitted in O.C.G.A. § [27-2-12](#), § [27-2-13](#), AND § [27-2-22](#)

and in enclosures more than 300 but less than 640 acres registered with the Department of Natural Resources as required in paragraph (5).

- (3) White-tailed deer shall be considered to be confined in an enclosure where any portion of the fence is equal to or exceeds six feet in total height. Such fencing includes but is not limited to game fencing, high fencing, deer-proof fencing, game-proof fencing, high tensile wire, woven wire, red top, hog wire or electric wires.
- (4) Anyone installing a high-fence (6 feet or higher) that encloses a contiguous land area less than 640 acres must either ensure:
 - (a) that no deer are captured, on purpose or inadvertently, inside the enclosure;
 - (b) that multiple ground-level locations are provided on all sides of an enclosure for deer to egress; or
 - (c) that no less than 25% of the total length of the fence is 4 feet in height or less.
- (5) Owners of existing enclosures which confine white-tailed deer on more than 300 but less than 640 contiguous acres must register the site with the Department of Natural Resources within ninety days after the effective date of this regulation. No such enclosure shall be eligible for registration unless it is complete requiring no further expenditure of labor or material. Any enclosure registered with the Department of Natural Resources must be maintained for the registration to remain in effect. If any registered enclosure suffers damage through neglect or due to natural causes and ceases to be effective in confining white-tailed deer for a period exceeding ninety days, the registration becomes invalid and the enclosure cannot be renovated or repaired in the future for the purpose of confining white-tailed deer.
- (6) In the event that a parcel of property including an enclosure, or an enclosure itself, as herein described is sold or transfer of ownership is effected, the new owner shall re-register such enclosure with the Department of Natural Resources within ninety days after the effective date of such sale or transfer.
- (7) It is unlawful to construct any mound, platform, one-way door, one-way gate, or other device designed to allow white-tailed deer into an enclosed area regardless of size of the enclosure.
- (8) Upon registration, the owner or his registering agent shall provide a means of access to the enclosure to law enforcement personnel of the Department of Natural Resources to allow them to exercise their authority to enforce all Game and Fish laws and regulations.
- (9) The provisions of paragraphs (2), (3) and (4) shall not apply to local, state or federally-owned public lands or airport authority on which fences are erected to protect public health, safety or national security.

Rule 391-4-2-.20. General Regulations for Hunting Alligators.

- (1) It is unlawful to:
 - (a) hunt alligators except for hunters with a valid alligator harvest permit issued by the department for such purpose and except for assistants directly accompanying the alligator harvest permit holder if the assistant has in their possession a required valid license to hunt.
 - (b) transfer an alligator harvest permit to another person.
 - (c) hunt alligators in any management zone or any harvest period not designated on the alligator harvest permit.
 - (d) to fail to affix a department issued CITES (Convention on the International Trade in Endangered Species) tag to an alligator carcass as specified by the department in the manner specified by the department.
 - (e) transfer a CITES tag to another person or use a CITES tag more than once.

Rule 391-4-2-.21. Alligator Seasons, Zones, Quotas and Limits.

- (1) The open season for alligators is from sunset on the day immediately preceding the 3rd Saturday in August through sunrise the day immediately following the 1st Sunday in October for persons in possession of a valid alligator harvest permit only.
- (2) The bag limit on alligators is one (1), greater than or equal to forty-eight (48) inches in length as measured from the end of the snout to the tip of the tail, per season, except that in Zone 1A only alligators greater than or equal to ninety-six (96) inches in length as measured from the end of the snout to the tip of the tail may be taken.
- (3) For the purpose of hunting alligators, the State is divided into eleven hunting zones with established quotas:

ZONE	COUNTY	QUOTA
1	Calhoun, Chattahoochee, Clay, Early, Harris, Marion, Muscogee, Quitman, Randolph, Stewart, Talbot, Terrell, and Webster Cos.	39
1A	Lake Walter F. George	30
2	Baker, Decatur, Grady, Miller, Mitchell, and Seminole Cos.	243
3	Crawford, Crisp, Dooly, Dougherty, Houston, Lee, Macon, Monroe, Peach, Schley, Sumter, Taylor, Upson, and Worth Cos.	66
4	Berrien, Brooks, Colquitt, Cook, Irwin, Lanier, Lowndes, Thomas, Tift, and Turner Cos.	94
5	Baldwin, Ben Hill, Bibb, Bleckley, Coffee, Dodge, Jeff Davis, Jones, Laurens, Montgomery, Pulaski, Telfair, Treutlen, Twiggs, Wheeler, Wilcox, and Wilkinson Cos.	110
6	Atkinson, Bacon, Brantley, Camden, Charlton, Clinch, Echols, Pierce, and Ware Cos.	88
7	Appling, Glynn, Long, McIntosh, Tattnall, Toombs, and Wayne Cos.	165
8	Bryan, Bulloch, Candler, Chatham (excluding the Bradley River, Cane Patch Creek, and Rush Creek areas located within the boundaries of Ossabaw Island), Effingham, Evans, and Liberty Cos.	176
8A	Fort Stewart	30
9	Burke, Columbia, Emanuel, Glascock, Hancock, Jefferson, Jenkins, Johnson, McDuffie, Richmond, Screven, Warren, and Washington Cos.	88

Rule 391-4-2-.22. Bear.

- (1) Bears may be taken with archery equipment during the statewide archery deer season, with primitive weapons during the statewide primitive weapons deer season, and with firearms during the statewide firearms deer season in Barrow, Carroll, DeKalb, Fulton, Gwinnett, Hart, Jackson, Madison, and Walton counties and all counties north of these counties except that county specific weapons restrictions enumerated in [391-4-2-.25](#) and [391-4-2-.26](#) shall apply to bear hunting in such counties. Youth under 16 years of age may hunt bears with any firearm legal for hunting deer during the northern zone primitive weapons season for bears.
- (2) Bears All harvested bears in the counties specified in subsection (1) must be reported within 24 hours of carcass recovery pursuant to [391-4-2-.03](#).
- (3) The entire hide and skull of any harvested bear in the counties specified in subsection (1) shall be taken during normal business hours to any Game Management facility or participating processor or taxidermist listed as open for bear check-in in the annual Hunting Seasons and Regulations guide for tagging by the department within 3 business days of harvest.
- (4) Bears may be taken in Brantley, Camden, Charlton, Clinch, Echols, Lanier, Lowndes and Ware counties on the last two (2) Thursdays of September and the Friday and Saturday immediately following each, and the first two (2) Thursdays of October and the Friday and Saturday immediately following each. Hunting with dogs is allowed except that still hunting only is allowed in Lanier and Lowndes counties. Bears must be checked and tagged within 24 hours of harvest at the Georgia Forestry Commission Office at Fargo, the Georgia Forestry Commission Office at Folkston, or the Dixon Memorial check station during the hours and dates listed as open for bear check-in in the annual Hunting Seasons and Regulations guide.
- (5) Bears may be taken in Bibb, Bleckley, Houston and Twiggs counties on the third Saturday in December. If fewer than 6 female bears are killed by hunters during the December season, the 1st Saturday after January 1 will be open to hunting. Hunting with

dogs is prohibited. Bears must be checked and tagged at the Oaky Woods WMA check station from 12 noon through 9 p.m. on the day of hunt.

- (6) It is unlawful to kill a female with cubs or kill a cub having a live weight of less than 75 pounds.
- (7) It is unlawful to possess a bear unless it is reported and tagged as stated in subsections (1), (2) and (3) above.
- (8) Bag limit 2; provided, however, that an individual may take no more than 1 bear per season from Bibb, Brantley, Bleckley, Camden, Charlton, Clinch, Echols, Houston, Lanier, Lowndes, Twiggs or Ware counties.

Rule 391-4-2-.24. General Regulations for Hunting Deer.

- (1) Except as otherwise provided in this Rule 391-4-2-.24, the season bag limit shall be 10 antlerless deer and 2 antlered bucks per hunter. One of the antlered bucks must have at

least 4 points, one inch or longer, on one side of the antlers or a minimum outside antler spread of fifteen (15) inches.

- (2) Deer harvested on public land during bonus deer hunts do not count toward the statewide bag limit when such deer are tagged with department issued single-use tags.
- (3) Still hunting for deer is permitted in any area at any time during the legal season for hunting deer with dogs.
- (4) In Dooly and Macon Cos., antlered bucks may be taken on private land only if they have a minimum outside antler spread of fifteen (15) inches.
- (5) In Hancock, Harris, Meriwether, Montgomery, Randolph, Talbot, and Troup Cos., antlered bucks may be taken on private land only if they have a minimum of 4 antler points 1 inch or longer on one side of the antlers or a minimum outside antler spread of fifteen (15) inches.
- (6) In accordance with O.C.G.A. Sec [27-3-15\(a\) and \(b\)](#), the department is authorized to prescribe property-specific harvest objectives, based solely on sound wildlife management principles, relating to bag limit and season on properties enrolled in a deer management assistance program as established by the department.

Repealed: New Rule of same title adopted. F. June 2, 2023; eff. June 22, 2023.

Rule 391-4-2-.29. Hunting Deer with Dogs, Permits and Violations.

- (1) For purposes of administering O.C.G.A. Sec. [27-3-17](#) and issuance of permits, the following terms are defined:
 - (a) "Contiguous acres" means a single unit of land described on an application for a permit to hunt deer with dogs that may include multiple ownerships and may be transected by public roads, creeks, rivers, or rights-of-way of any public service corporation.
 - (b) "Eligible tracts" are those tracts of real property that contain a minimum of 1000 contiguous acres or a minimum of 250 contiguous acres owned by the applicant; provided, however, that any eligible tract or any part thereof which was included in an application for a permit pursuant to this Chapter which has been the subject of a revocation or non-renewal pursuant to O.C.G.A. Sec. [27-2-25](#) shall not be eligible for inclusion in any subsequent application for a permit for a period up to 2 years regardless of a change in the name or membership of the applicant until the expiration period of revocation or non-renewal.

- (c) "Hunting deer with dogs" includes the act of placing, releasing or in any other manner causing or procuring the cause of dog(s) to be, or attempting to be, in the pursuit of running, trailing or baying deer, whether such act results in a taking or attempted taking or not. Once the owner of the dog(s), his agents, or permittees place, release or otherwise cause dog(s) to be in the pursuit of running, trailing or baying deer, then the owner, his agents or permittees are deemed to be "hunting deer with dogs" until such time that the dog owner, his agents or permittees have regained physical possession and control of the dog(s), or the dog(s) have otherwise ceased in the pursuit or attempted pursuit of running, trailing or baying deer.
- (2) Permit applications are to include a written description of the eligible tract boundaries and associated acreage. Acceptable documents are limited to certified plats, recorded deeds, surveys, tax maps or notarized leases. Additionally, any person not included on the membership list provided with the application for the permit and hunting under the authority of the permit is considered a guest of the permittee and must possess written permission on his or her person from the permittee. Finally, permit applications are to be received by the department not less than 30 days prior to the first day for hunting deer with dogs on an eligible tract.
- (3) It is unlawful to:
 - (a) enter or exit permitted property for any purpose other than points of access from public roads marked on the map without the express written permission of the adjacent landowner upon whose land entry or exit is made. The express written permission of the adjacent landowner or a copy thereof must be carried on the person making the entry or exit; or,
 - (b) fail to control hunting dogs to keep them on the permitted property; or,
 - (c) interfere with the right of any person to freely, and in an unrestricted manner, travel any public road or stream transecting or bordering the permitted property; or,
 - (d) violate any of the terms and/or conditions of a permit; or,
 - (e) submit false information on a permit application. The submission of false information makes said permit invalid and persons hunting under authority of that permit may be considered hunting in violation of the laws, rules and regulations authorizing the hunting of deer with dogs.
- (4) A serious or habitual violation of laws, rules and regulations or conditions of a permit while engaged in deer hunting with dog activities on or commencing from permitted tracts provide justification for revocation and or denial of permitted activities.

- (5) The Commissioner, pursuant to O.C.G.A. Sec. [50-13-18\(c\)\(1\)](#) may, upon a finding that the public health, safety, or welfare imperatively requires emergency action, incorporate such a finding into his order and order a summary suspension of a permit pending proceedings for revocation or other action, which proceeding shall be promptly instituted and determined. Evidence of physical harm or threats of physical harm to adjacent landowners, interference with the free and unrestricted travel of public roads or streams, significant destruction of the property of adjacent landowners or multiple violations of a permit in a single season is sufficient for a finding that the public health, safety, or welfare imperatively requires emergency action.
- (6) Revocation or denial of a permit is for an eligible tract in its entirety, regardless of size, and remains in effect for a period of up to two years.

Rule 391-4-2-.41. Baiting of Federally Regulated Migratory Game Birds.

No person shall take migratory game birds by the aid of baiting, or on or over any baited area, where a person knows or reasonably should have known that the area is or has been baited. As used in this paragraph, "baiting" shall mean the direct or indirect placing, exposing, depositing, distributing, or scattering of grain, salt, or other feed that could serve as a lure, or attraction for migratory game birds to, on, or over any areas where hunters are attempting to take them; and "baited area" means any area on which grain, salt, or other feed has been placed, exposed, deposited, distributed, or scattered if that grain, salt, or other feed could serve as a lure or attraction for migratory game birds to, on, or over any areas where hunters are attempting to take them and such area shall remain in a baited area for ten (10) days following complete removal of all such grain, salt, or other feed; "normal agricultural planting, harvesting, or post-harvest manipulation" means a planting or harvesting undertaken for the purpose of producing and gathering a crop, or manipulation after such harvest and removal of grain that is conducted in accordance with official recommendations of State Extension Specialists of the Cooperative Extension Service of the U.S. Dept. of Agriculture; "normal agricultural operation" means a

normal agricultural planting, harvesting, post-harvest manipulation, or agricultural practice that is undertaken for purposes other than to produce and gather a crop - such as livestock feeding or wildlife management, and is conducted in accordance with official recommendations of State Extension Specialists of the Cooperative Extension Service of the U.S. Dept. of Agriculture; "manipulation" means the alteration of natural vegetation or agricultural crops by activities that include but are not limited to mowing, shredding, discing, rolling, chopping, trampling, flattening, burning, or herbicide treatments. This term does not include the distributing or scattering of grain, seed, or other feed after removal from or storage on the field where grown; and "natural vegetation" means any non-agricultural, native, or naturalized plant species that grows at a site in response to planting or from existing seeds or other propagules. This term does not include planted millet. However planted millet that grows on its own in subsequent years after the year of planting is considered natural vegetation. However, nothing in this paragraph prohibits:

- (1) The taking of any migratory game birds, including waterfowl, on or over the following lands or areas that are not otherwise baited areas: standing crops or flooded standing crops (including aquatics); standing, flooded, or manipulated natural vegetation; flooded harvested croplands; or lands or areas where seeds or grains have been scattered solely as the result of a normal agricultural planting, harvesting, postharvest manipulation, or soil stabilization practice; and
- (2) The taking of any migratory game birds, except waterfowl, on or over any lands or areas that are not otherwise baited areas, and where grain or other feed has been distributed or scattered solely as the result of manipulation of an agricultural crop or other feed on land where grown, or solely as the result of a normal agricultural operation.

Amended: Rule repealed and a new Rule of the same title adopted. Filed July 22, 1974; effective August 11, 1974.

Amended: Rule repealed and a new Rule of the same title adopted. Filed December 9, 1975; effective December 29, 1975.

Amended: Filed March 29, 1976; effective April 18, 1976.

Amended: Rule repealed and a new Rule entitled "Grouse" adopted. Filed August 5, 1976; effective August 25, 1976.

Amended: Rule repealed and a new Rule entitled "Squirrel" adopted. Filed September 14, 1977; effective October 4, 1977.

Amended: Rule repealed. Filed September 6, 1978; effective September 26, 1978.

Adopted: New Rule entitled "Baiting of Federally Regulated Migratory Game Birds." F. Jun. 13, 2013; eff. July 3, 2013.

Rule 391-4-2-.42. Special Regulations for Hunting Waterfowl on Certain Reservoirs.

- (1) No vegetation shall be cut or removed on Corps of Engineers or Georgia Power property. Temporary hunting blinds may be constructed, but are to be removed completely at the end of each day.
- (2) The following U. S. Army Corps of Engineers Lakes are open to hunting during statewide seasons and during federal special opportunity hunting days, unless otherwise specified: Allatoona Lake, Carters Lake, George W. Andrews Lake, Hartwell Lake, J. Strom Thurmond Lake (Lake Clarks Hill), Lake Seminole, Lake Sidney Lanier (after Labor Day), Richard B. Russell Lake, Walter F. George Lake (Lake Eufaula), and West Point Lake.
- (3) Special regulations for Walter F. George Lake:
 - (a) A permit purchased from the US Army Corps of Engineers Resource Management in Ft. Gaines, Georgia is required to hunt waterfowl.
 - (b) Hunting from land is prohibited outside of specified hunting areas and wildlife management areas.
 - (c) Waterfowl hunting is prohibited on the waters of Walter F. George Lake within the Eufaula National Wildlife Refuge unless otherwise specified by the U. S. Fish and Wildlife Service.
 - (d) Hunting is prohibited within 600 feet of docks, structures, vessels, roads, public parks, public walking/biking trails, and other developed areas such as subdivisions.
- (4) Special regulations for Lake Sidney Lanier:
 - (a) No hunting without written permission is allowed within 600 feet of any dock, house, structure, bridge, road, boat ramp, marina, or open recreation area outside of Lula Bridge WMA.
 - (b) Hunting hours are from 30 minutes before sunrise to 10:00 AM daily during September and conform to federal legal hunting hours thereafter.
 - (c) Waterfowl hunting is permitted on closed parks as designated by the U. S. Army Corps of Engineers. The 600 feet restriction does not apply within closed parks where waterfowl hunting is permitted.
- (5) Special Regulations for Lake Allatoona:
 - (a) No hunting without written permission is allowed within 600 feet of any dock, house, structure, bridge, road, boat ramp, marina, or open recreation area.

- (b) Waterfowl hunting is permitted on closed parks as designated by the U. S. Army Corps of Engineers. The 600 feet restriction does not apply within closed parks where waterfowl hunting is permitted.
- (6) No hunting without written permission is allowed within 300 feet of any dock, house, structure, bridge, road, boat ramp, marina, or open recreation area on Lake Seminole or Lake Blackshear.
- (7) The following Georgia Power Lakes are open to hunting during statewide seasons and during federal special opportunity hunting days unless otherwise specified: Lake Burton, Lake Seed, Lake Rabun, Tallulah Falls Lake, Lake Tugalo, Lake Yonah, Lake Oconee, Lake Sinclair, Lake Oliver, Lake Harding, Goat Rock Lake, Lake Worth, and the Langdale and Riverview Projects.
- (8) No hunting without written permission is allowed within 300 feet of any dock, house, structure, bridge, road, boat ramp, marina, or open recreation area on Lake Burton, Lake Seed, Lake Rabun, Tallulah Falls Lake, Lake Tugalo, Lake Yonah, Lake Oconee, Lake Sinclair, and that portion of Lake Oliver south of Standing Boy Creek.
- (9) It is unlawful to hunt waterfowl on Lake Sinclair from the confluence of Shoulder Bone Creek north to Wallace Dam except as may otherwise be provided.
- (10) The main portion of Lake Jackson is closed to waterfowl hunting. Those portions of Lake Jackson lying north of Georgia Highway 36 and north of Newton Factory Bridge Road are open under statewide regulations.
- (11) It is unlawful to hunt waterfowl on Lake North Highlands.
- (12) Waterfowl regulations specific to Rum Creek Wildlife Management Area shall apply to Lake Juliette.

Amended: Rule repealed. Filed August 5, 1976; effective August 25, 1976.

Amended: Rule entitled "Federal Migratory Bird Hunting Stamp" adopted. Filed October 26, 1976; effective November 15, 1976.

Amended: Rule repealed and a new Rule of same title adopted. Filed September 16, 1977; effective August 26, 1977; the date of adoption, in accordance with Ga. L. 1977, pp. 396, 455.

Amended: Rule repealed. Filed September 6, 1978; effective September 26, 1978.

Amended: Rule entitled "Federal Migratory Bird Hunting Stamp" adopted. Filed November 2, 1978; effective September 29, 1978, as specified by Certification of said Rule in accordance with Ga. Code Sec. 45-513(d).

Repealed: F. Jun. 13, 2013; eff. July 3, 2013.

Rule 391-4-2-.60. General Regulations on Wildlife Management Areas.

- (1) It is unlawful for any person to place bait or any wildlife food on a Wildlife Management Area (WMA).
- (2) It is unlawful for any person to consume or use alcoholic beverages on any WMA except in houses or at campsites on these areas; provided, however, that this provision does not apply to national forest lands.
- (3) The use of paintballs, paintball guns and related activities is prohibited on WMAs except on WMAs located on national forest lands.
- (4) Dogs entering WMAs must be kept on a leash or otherwise confined except when hunting or while training dogs during designated seasons and on designated areas. Dog owners are responsible for their dogs and any damage the dogs may do to wildlife not being legally hunted.

- (5) Except for Public Fishing Areas, fishing on WMAs is allowed in accordance with statewide seasons and limits, unless otherwise indicated or posted at the WMA check station.
- (6) U.S. Forest Service regulations shall apply on all WMAs located on National Forest lands.
- (7) It is unlawful for any person to unreasonably disturb or annoy others through abrasive, insulting or threatening words or actions, or physically harm or threaten any other person, or disobey any lawful order of a law enforcement official or act in a manner resulting in a breach of the peace.
- (8) Camping, pre-season scouting, hiking, picnicking, horse riding, canoeing, and other recreational uses are allowed year-round unless otherwise indicated or posted at the WMA check station or at a specific recreation site. The department may close specific sites as needed for management purposes by posting at the site.
- (9) It is unlawful for any unauthorized person to close or restrict access to roads, trails or other access features using motor vehicles, signage, or other methods. Roads, trails and other access features may be closed at the discretion of the department.
- (10) It is unlawful to shoot from a motor vehicle except that disabled hunters on a designated handicapped access road or hunters who have been issued a department Special Use Permit as specified in said permit may shoot from a vehicle provided such vehicle is stationary and not under power.
- (11) It shall be unlawful for any person to possess a loaded firearm in designated camping areas except as provided in O.C.G.A. § [16-11-126](#).
- (12) O.C.G.A. § [27-3-1.1](#) prohibits loaded long guns being carried in a motor vehicle on WMAs except for provisions stated in (10) above. Handguns may be loaded only as provided in O.C.G.A. § [16-11-126](#). A firearm shall be considered loaded if a shell is in the chamber or magazine except that muzzle-loading firearms are considered loaded only if a cap is on the nipple or powder is present on the frizzen pan. Crossbows must be un-cocked while being transported in a vehicle on a WMA.
- (13) Suppressed firearms may be used for hunting on WMAs.
- (14) Buckshot may be used to hunt deer and bear when hunting seasons for those species are open on a WMA, unless otherwise specified in [391-4-2-.70](#), and during such seasons, feral hogs and coyotes may be taken incidentally.
- (15) The use of centerfire rifles to hunt at night is prohibited on WMAs, state parks, voluntary public access areas, and federal lands unless otherwise specified in [391-4-2-.73](#).

Repealed: New Rule of same title adopted. F. June 2, 2023; eff. June 22, 2023.

Rule 391-4-2-.61. Camping Regulations on Wildlife Management Areas.

- (1) All camps or fires shall be in designated campgrounds unless otherwise posted at the check station, except that camping is allowed anywhere on National Forest lands unless otherwise indicated or signed. U.S. Forest Service regulations govern camping on WMAs located on National Forest lands. All campers must comply with any conditions of use as posted or provided by the site.
- (2) Unless otherwise provided through written permission by the Department, camping, or establishment of a campsite, shall be limited to a period of time not to exceed 14 consecutive days; after which the campsite shall be vacated and all personally owned property or physical features of the camp removed for a period of not less than 7 days. During such 7-day period a new campsite may neither be established within the boundaries of the same WMA nor within a 1-mile straight-line radius of the vacated campsite on any other WMA by the same person(s).
- (3) It is unlawful for any person to use any musical instruments, radios, televisions, generators or other noise making devices after 10:00 p.m. daily, in such a manner that such devices may be heard by other WMA visitors. Nothing in this regulation shall be construed to prevent use of medically needed devices or aids to disabled persons.

Rule 391-4-2-.62. Vehicle, Horse, ATV and Other Conveyance Use on Wildlife Management Areas.

- (1) As used in this Rule:
 - (a) "all-terrain vehicle" or "ATV" means a tracked or wheeled motor vehicle powered by an electrical or motor fuel engine and generally characterized by low-pressure tires, an open operator area, a seat designed to be straddled by the operator or a bench style seat, handlebars, lever arms or steering wheel for steering, and is intended for off-road use by an individual or multiple riders on natural terrain. This includes off-road motorcycles (dirt bikes), utility vehicles, golf carts, 4 and 3-wheeled cycles and other off road vehicles.
 - (b) "Open roads" shall mean those roads not closed with a gate, sign, earthen berm, or similar device.
 - (c) "Bicycle" includes electric assisted bicycles as defined in O.C.G.A [40-1-1](#).
- (2) Horses, bicycles and all motor vehicles, including off-road vehicles, are restricted to open roads. Provided, however, that horses and bicycles may use designated trails or designated areas; bicycles may be used on closed roads for hunter access; horses may be used off roads and trails during permitted field trials.
- (3) Vehicles, including ATVs, marked by official handicap license plates, placard, or sticker for special handicap access may be used on roads otherwise closed for vehicular access but specifically designated by the department for handicapped hunter access. WMA users

possessing a Department issued Other Power-Driven Mobility Device (OPDMD) Special Use Permit may also use OPDMD's on handicap access roads or any other closed roads and locations as specified by the Department in the OPDMD Special Use Permit.

- (4) Motor vehicles must meet safety, insurance, licensing, and registration requirements for use on public roads. However, 3-wheel and 4-wheel All-Terrain Vehicles, (ATVs) need not be licensed (tagged) to be operated on a WMA unless the WMA is on National Forest lands.
- (5) ATVs may be operated only on roads within WMAs during the period between 2 hours before sunrise and 2 hours after sunset one day prior to and during big game, small game, and special hog only hunts by hunters actively participating in the hunt except where otherwise specified in [391-4-2-.70](#).
- (6) ATV operators must be at least 16 years old.
- (7) Trails and areas open to horses and bicycles may be closed during certain hunting seasons or certain times of day to avoid user conflicts.
- (8) Horses and non-motorized bicycles may be used on National Forest lands not otherwise closed.
- (9) No person may operate any motor vehicle, including off-road vehicles, in a reckless and negligent manner, or in a manner that willfully causes damage to improved roads, open roads, seasonal roads, ditches, wildlife openings, wildlife habitat, berms, firebreaks, campgrounds, or parking areas.

Rule 391-4-2-.63. Hunting Structures on Wildlife Management Areas.

- (1) For purposes of this Rule, "hunting structure" means any portable tree stand, ground blind, stool, chair, bucket, waterfowl blind, or other similar device used for hunting.
- (2) For small game hunts, hunting structures may be placed and shall be removed from the WMA only on the day of the hunt, except that on opening day of dove season hunters shall not enter a managed dove field and hunting structures shall not be placed on a managed dove field prior to 10 a.m. or as otherwise noted in Rule [391-4-2-.70](#).
- (3) For big game and feral hog/coyote hunts, hunting structures shall not be placed any sooner than one day prior to the hunt and shall be removed from the WMA no later than 12:00 noon the day following the hunt.
- (4) It is unlawful for any person to place any tree stand on utility poles or other structures supporting utility lines.

Rule 391-4-2-.64. Youth Hunting on Wildlife Management Areas.

- (1) As used in this Rule, "Youth" means persons 16 years of age and younger, "Adult" means persons 18 years and older, and "direct supervision" or "directly supervised" means uninterrupted, unaided visual contact and auditory communication of a child by an adult.
- (2) All persons under sixteen (16) years of age shall be accompanied by and under direct supervision of an Adult when hunting.
- (3) On Youth Hunts for big game, only one firearm is allowed and only the Youth may hunt. An Adult shall supervise no more than one Youth.

- (4) On Youth Hunts for small game, one Adult may directly supervise no more than two (2) Youth. Except as otherwise specified in [391-4-2-.70](#), adults and Youth may possess firearms and hunt on small game Youth hunts, provided that an Adult hunting on such hunts shall be directly supervising the Youth or Youths participating in the hunt.
- (5) On Youth hunts, a person of 16 years of age may hunt unsupervised provided that person is properly licensed. The 16- year old may bring an Adult for supervision, provided that the Adult is directly supervising the 16-year old for a big game hunt or directly supervising the 16-year old and no more than one other Youth during a small game hunt.
- (6) On Youth hunts for quail, bird dog handlers may accompany youth parties provided, however, that such handlers may not hunt or carry a firearm except as provided in O.C.G.A. [16-11-129](#).

Rule 391-4-2-.66. Big Game Regulations on Wildlife Management Areas.

- (1) Two (2) deer may be killed during any one bonus deer hunt. However, on bonus hunts when antler restrictions are in effect, no more than one (1) of the two (2) deer allowed may be an antlered buck.
- (2) On bonus deer hunts, hunters should not record deer on the harvest record nor enter it in the Georgia Game Check harvest reporting system, but deliver the deer on the date of kill to the Wildlife Resources Division check station on the area where department personnel will provide a single-use tag. On all other deer hunts, the hunter's deer harvest record must be completed and the harvest must be reported pursuant to Rule [391-4-2-.03](#).
- (3) All deer hunts are either sex unless otherwise specified in [391-4-2-.70](#).
- (4) A hunter shall harvest no more than 1 gobbler per season on any single wildlife management area, department-managed property, the Oconee National Forest outside of wildlife management areas or the Chattahoochee National Forest outside of wildlife management areas, unless otherwise specified in [391-4-2-.70](#).
- (5) Turkeys harvested on WMAs must be recorded on the hunter's harvest record and reported pursuant to Rule [391-4-2-.03](#).
- (6) The head and hide of all bears killed during open seasons must be presented at the check station on same date as killed on hunt dates when the check station is staffed. If the check station is unstaffed, the hunter shall report the harvest pursuant to [391-4-2-.03](#).
- (7) Sign in is required for all big game hunts unless otherwise specified in Rule [391-4-2-.70](#).
- (8) Man-drives are prohibited during deer hunts. A man-drive is defined as an organized hunting technique involving three (3) or more hunters using a coordinated effort to drive animals from cover to another hunter for the purpose of shooting.

Rule 391-4-2-.67. Small Game Regulations on Wildlife Management Areas.

- (1) During small game hunts, hunters may hunt any small game in season subject to state seasons, regulations and bag limits except as may otherwise be provided in Rule [391-4-2-.70](#) and:
 - (a) The daily bag limit on fox squirrels is 1 per hunter.
 - (b) The daily bag limit on bobwhite quail is 3 per hunter, unless otherwise specified in Rule [391-4-2-.70](#).
 - (c) During a quota hunt for any species, only drawn hunters and their party members may hunt.
- (2) Sign-in is not required for small game hunting (including migratory birds) unless otherwise provided in Rule [391-4-2-.70](#).
- (3) Small game and furbearer hunting are not allowed during quota hunts unless otherwise provided in Rule [391-4-2-.70](#).
- (4) Small game hunters hunting on dates concurrent with deer and bear primitive weapons or firearm hunts must wear fluorescent orange as specified in Rule [391-4-2-.04](#), except for dove hunters hunting on managed dove fields, furbearer hunters hunting at night, and waterfowl hunters hunting on managed waterfowl impoundments or other water bodies.
- (5) Only waterfowl hunting can take place on managed impoundments during waterfowl hunting dates. Waterfowl on all other WMA locations may be taken any day of the waterfowl seasons whenever the area is open for small game hunting unless otherwise specified.
- (6) On quota waterfowl hunts, hunters must hunt from assigned areas. Shooting hours begin in accordance with applicable federal regulations and end at 12:00 noon except that on the last Saturday of the season, hunters may shoot until sunset.
- (7) No night hunting is allowed on any WMA except for raccoon, fox, opossum, or bobcat on open dates. Coyotes and feral hogs may be taken at night, with small game weapons, while hunting raccoon, fox, opossum, or bobcat. Centerfire weapons may not be used for hunting at night on WMAs.
- (8) Raccoon, opossum, fox and bobcat may be hunted within statewide seasons during small game and furbearer dates, unless otherwise specified.
- (9) Permitted alligator hunters may hunt during day or night on open small game and big game dates unless otherwise specified in Rule [391-4-2-.70](#).
- (10) Coyotes and feral hogs may be taken during all hunts but weapon types are restricted to only those weapons allowed for the game species in season. Coyotes and feral hogs may be taken during small game season with any weapon legal for small game except that centerfire rifles may not be used, unless otherwise specified in Rule [391-4-2-.70](#).

- (11) Special coyote season:
- (a) May 16-May 31 on department managed WMAs unless otherwise specified in [391-4-2-.70](#). Not open on State Parks, Voluntary Public Access Areas, or federal lands unless otherwise specified in Rule [391-4-2-.70](#).
 - (b) Hunters may use any weapon legal for small or big game unless otherwise specified in [391-4-2-.70](#).
 - (c) Hunters and any person accompanying a hunter afield shall wear a total of at least 500 visible square inches of daylight fluorescent orange material as an outer garment above the waistline.
 - (d) Night hunting is prohibited.
 - (e) Feral hogs may not be taken unless otherwise specified in [391-4-2-.70](#).
 - (f) Dogs may not be used to hunt hogs unless otherwise specified in [391-4-2-.70](#). Where allowed, hunting dogs must be marked with the hunter's name and a valid telephone number.
 - (g) Hogs must be killed immediately upon capture.
- (12) Unless otherwise specified in [391-4-2-.70](#), small game may be taken on WMAs by permitted falconers at any time during the state falconry season pursuant to O.C.G.A. [27-3-15](#) except during any quota big game or small game hunts for which the falconer has not been drawn.
- (13) Centerfire rifles may be used for fox and bobcat during daylight hours from December 1 through the last day of February only if a non-quota big game season is open on the area, unless otherwise specified in Rule [391-4-2-.70](#).

Authority: O.C.G.A. § [27-1-4](#).

History. Original Rule entitled "Small Game Regulations on Wildlife Management Areas" adopted. F. Jun. 13, 2013; eff. July 3, 2013.

Repealed: New Rule of same title adopted. F. May 26, 2015; eff. June 15, 2015.

Repealed: New Rule of same title adopted. F. June 1, 2017; eff. June 21, 2017.

Repealed: New Rule of same title adopted. F. June 4, 2019; eff. June 24, 2019.

Amended: F. June 7, 2021; eff. June 27, 2021.

Repealed: New Rule of same title adopted. F. June 2, 2023; eff. June 22, 2023.

Rule 391-4-2-.68. Training of Hunting Dogs on Wildlife Management Areas.

- (1) The training of hunting dogs for hunting any particular species may occur only during dates open for hunting such species on each WMA, unless otherwise specified, and in accordance with O.C.G.A. Section [27-3-16](#).
- (2) There is no limit on the number of trail dogs for rabbit, fox, squirrel, raccoon, bobcat or opossum unless otherwise provided in Rule [391-4-2-.70](#).
- (3) Trail dogs for rabbit are limited to beagles, bassets and dachshunds only.
- (4) Dogs are not allowed for pursuing big game or for pursuing or catching hogs unless otherwise specified in rules [391-4-2-.70](#), [391-4-2-.71](#) and [391-4-2-.73](#). Hunters whose dogs are found in violation of this regulation shall be deemed in violation of O.C.G.A. Section [27-1-33](#).
- (5) On bird dog training areas, as indicated in [391-4-2-.70](#) for individual WMAs, dog training is restricted to designated portions of WMA only and is allowed year-round and during daylight hours only unless otherwise specified in [391-4-2-.70](#). Pen-reared quail or pigeons may be used during training exercises on bird dog training areas in accordance with O.C.G.A. [27-3-16](#).
- (6) Dog training is prohibited during quail or rabbit hunts.
- (7) Field trials may be held on WMAs provided the organizer has the proper permit authorized by O.C.G.A. Section [27-2-21](#). The conditions provided in the permit shall be met. No permits will be issued if there are conflicts with area objectives as determined by the department.
- (8) It is unlawful for any person to fail to remove his/her dog(s) from a WMAs upon his/her departure from such WMA.

All trails are closed all day during firearms deer hunts and before 10:00 AM during archery and turkey seasons. Special rules apply to horse, bicycle, and camping use; rules are posted at trailhead, camping areas, & WMA check station. Permits are required for horse, bicycle, and camping use. Permits must be completed and on person to be valid. Roads on the city of Atlanta Tract are closed to vehicles daily from 10:00 p.m. to 6:00 a.m. except for individuals legally camping, hunting, or fishing on the area.

Coyote

May 16-31. Feral hogs may also be hunted and taken with dogs. Dogs must be marked with the hunter's name and a valid telephone number; no night hunting; hogs must be killed immediately upon capture.

Deer

Antlered bucks must have at least 4 points (1 inch or longer) on either side OR a 15 inch outside spread to be legal.

***Special Regulations**

No dog training Mar. 20-July 31, 2023, 2024 & 2025, Sept. 9, 2023-Jan. 1, 2024 and Sept. 14, 2024-Jan. 1, 2025. Pursuit of bears with dogs is prohibited. Hogs may be taken only during daylight hours consistent with regulations above. Coyotes may be taken during deer, turkey and small game hunts; weapons are restricted to legal firearms and archery equipment for the game species specified for a particular hunt as indicated heretofore; electronic calls may be used; night hunting is prohibited. Placing, leaving, or depositing any food, bait or refuse in a manner likely to attract or concentrate any wildlife, whether for purposes of hunting or viewing animals, is prohibited. It is also prohibited to fail to properly store food or refuse to prevent access by wildlife. For public health and safety, the transportation of a loaded long gun or cocked crossbow in a motor vehicle is prohibited. NOTE: A firearm is considered "loaded" if a round of ammunition is in the chamber or magazine, a percussion cap is on the nipple, or powder is present in the frizzen pan. A "Long gun" is a firearm with an extended barrel, usually designed to be fired braced against the shoulder. It shall include all rifles, shotguns, carbines, muzzleloaders, and/or other such weapons. For public health and safety, the possession of an alcoholic beverage as defined by state law, while hunting, is prohibited.

Sapelo Island WMA

***Special Regulations**

Reservations for transportation on state boat for Check-In hunts must be made through the Sapelo Island Visitors Center (912) 437-3224. No reservations will be accepted until you receive your selection notice. Visitor Center Hours: Tues.-Fri. 7:30 AM-5:30PM, Sat. 8:00AM-5:30PM; Closed Sunday & Monday. Stream anchorage may be required for hunters using their own boats. Hunter access is allowed only at Moses Hammock Dock at head of Duplin River. No motorized vehicles allowed on island. Hunters may check-in starting at 9:00AM EST one day prior to hunt. Camps must be removed by noon on the day following each hunt. Departures and returns from deer hunting must be made from Moses Hammock campsite. Hunters are required to stay outside the boundaries of the safety zones. Ferry Restrictions: There is limited space on the ferry, so please limit the amount and size of your gear; propane fuel only; guns must be unloaded and cased for transport on ferry; no folding chairs or tables, ladder stands, bicycles, or excessively large boxes; climbing stands are OK; coolers are limited to one 48 qt. per guest or one 96 qt. per two guests. Rolling garbage cans and carts are not allowed on the ferry. For information on local charter options or transportation to the Moses Hammock hunt camp, please contact the Sapelo Island Visitors Center (912) 437-3224. If you do not take the ferry to the island you may not return to the mainland via the ferry.

Coyote

Mar. 1-May 31. Feral hogs may also be taken. Feral hogs may be taken with dogs May 16-31 only. Dogs must be marked with the hunter's name and a valid telephone number; no night hunting; hogs must be killed immediately upon capture.

Rule 391-4-2-.71. Voluntary Public Access Areas.

- (1) A Voluntary Public Access (VPA) Area is a privately owned parcel or parcels of land enrolled through the USDA Voluntary Public Access Grant Program for limited and specific public hunting opportunity. Unless otherwise specified in [391-4-2-.70](#), rules and regulations for each area are posted on-site and on the department's website.
- (2) VPAs are closed to coyote and hog hunting during the statewide May 16-May 31 coyote season unless otherwise specified in [391-4-2-.70](#).

Rule 391-4-2-.73. Pursuit of Bears with Dogs on Wildlife Management Areas, Other State Lands and Federal Areas.

- (1) The purpose of this rule is to establish regulations governing the use of dogs to pursue bears for training and hunting purposes on wildlife management areas, other state lands and federal areas.
- (2) It is unlawful for any person to allow their dog(s) to pursue a bear(s) on any wildlife management area, other state land or federal land during any time other than the season(s) specified for such wildlife management area, other state land or federal land in rule [391-4-2-.70](#).
- (3) On wildlife management areas, other state lands or federal lands that have a season(s) specified for pursuing bears for the purposes of training hunting dogs or hunting bears pursuant to rule [391-4-2-.70](#):
 - (a) It is unlawful for any person to participate or assist in a lawful open season for pursuing bears with dogs without first procuring a valid hunting license and big game license pursuant to O.C.G.A. Title 27; and
 - (b) Any person participating or assisting in a lawful open season for pursuing bears for the purpose of training hunting dogs shall comply with the provisions of O.C.G.A. Sec. [27-3-16](#); and
 - (c) It is unlawful for any person participating or assisting in a lawful open season for pursuing bears for the purpose of training hunting dogs to fail to check-in once per season online via the departments website or application, or as otherwise specified in the annual popular guide to Hunting Regulations; and
 - (d) It is unlawful for any person to fail to mark each dog used for pursuing bears with such person's first name, last name, address, and valid telephone number; and
 - (e) It is unlawful for any person to fail to remove their dog(s) from any such area upon departure; and

- (f) It is unlawful for any person participating or assisting in a lawful open season for pursuing bears with dogs to allow their dog(s) to pursue any bear onto property for which permission has not been granted in accordance with O.C.G.A. Sec. [27-3-1](#) or onto any wildlife management area, other state land or federal land at any time not specified in Rule [391-4-2-.70](#).
- (4) In accordance with O.C.G.A. Sec. [27-2-25](#), the commissioner may revoke the hunting privileges, big game privileges, and/or wildlife management area privileges of any person who fails to comply with subsections (2) or (3)(a) through (3)(f) of this rule.

Rule 391-4-3-.03. Seasons and Trout Water Designations.

- (1) The season for taking striped bass and for spearfishing shall be November 1 through April 30 in:
 - (a) The Flint River and its tributaries from the Georgia Power Company dams at Albany to the U.S. Highway 84 bridge in Bainbridge;
 - (b) The Chattahoochee River and its tributaries from the Columbia Lock and Dam to the Georgia Highway 91 bridge at the upper end of the Lake Seminole; and

- (c) Spring Creek and its tributaries down to Georgia Highway 253 in Lake Seminole.
- (2) The season for all fishing shall be from November 1 through April 30 in the marked areas around the following springs in Lake Seminole:
- (a) Sealey's Spring near Sealey's Point;
 - (b) Whiddon's Spring near Flint River mile 8.2;
 - (c) Wheat Spring near Flint River mile 24;
 - (d) State Dock Spring near Flint River mile 26; and
 - (e) Shackleford Spring near Flint River mile 6.8.
- (3) The following waters and all streams within the following watersheds, excluding any impoundments thereon unless specifically included, are designated, in the counties listed, trout waters and shall be open for trout fishing throughout the year:
- (a) Bartow County:
 - 1. Boston Creek watershed upstream from Georgia Highway 20;
 - 2. Connesena Creek watershed;
 - 3. Dykes Creek watershed;
 - 4. Pine Log Creek watershed;
 - 5. Pyle Creek watershed;
 - 6. Salacoa Creek watershed;
 - 7. Spring Creek watershed;
 - 8. Stamp Creek watershed upstream from Bartow County Road 269;
 - 9. Toms Creek watershed upstream from Bartow County Road 82;
 - 10. Two Run Creek watershed; and
 - 11. Ward Creek watershed;
 - (b) Carroll County: Tallapoosa River watershed north of Interstate Highway 20, not including Little Tallapoosa River watershed;
 - (c) Catoosa County:

1. Dry Creek watershed, which is a part of the East Chickamauga Creek watershed, upstream of Catoosa County Road 257;
2. Hurricane Creek watershed upstream from Peters Branch;
3. Little Chickamauga Creek watershed upstream from Catoosa County Road 387; and Creek watershed;

(e) Cherokee County:

1. Bluff Creek watershed upstream from Cherokee County Road 114;
2. Boston Creek watershed;
3. Pine Log Creek watershed;
4. Salacoa Creek watershed;
5. Soap Creek watershed upstream from Cherokee County Road 116;
6. Stamp Creek watershed; and
7. Wiley Creek watershed;

(f) Cobb County: Chattahoochee River upstream from the mouth of Peachtree Creek;

(g) Dade County:

1. Allison Creek watershed;
2. East Fork Little River watershed;
3. Lookout Creek watershed, upstream from Dade County Road 197; and
4. Rock Creek watershed;

(h) Dawson County:

1. Amicalola Creek watershed upstream from Georgia Highway 53;
2. Anderson Creek watershed;
3. Long Swamp Creek watershed;
4. Nimblewill Creek watershed;
5. Shoal Creek watershed upstream from the mouth of Burt Creek; and

6. Sweetwater Creek watershed;

(i) Fannin County:

1. Charlie Creek watershed;
2. Conasauga River watershed;
3. Ellijay River watershed;
4. Etowah River watershed;
5. Fightingtown Creek watershed;
6. Flat Creek watershed;
7. Jacks River watershed;
8. Mountaintown Creek Watershed;
9. Owenby Creek watershed;
10. Persimmon Creek watershed;
11. Rock Creek Lake;
12. South Fork Rapiel Mill Creek watershed;
13. Star Creek watershed;
14. Toccoa River watershed downstream from Lake Blue Ridge to the Georgia-Tennessee boundary and upstream from the mouth of Stanley Creek;
15. Tumbling Creek watershed; and
16. Wilscot Creek watershed;

(j) Floyd County:

1. Dykes Creek watershed;
2. Johns Creek watershed upstream from Floyd County Road 212;
3. Kings Creek watershed;
4. Lavender Creek watershed upstream from Floyd County Road 893;

5. Little Cedar Creek watershed;
6. Mt. Hope Creek watershed;
7. Silver Creek watershed upstream from Georgia Highway 1E (Floyd County Road 631);
8. Spring Creek watershed, which flows into Etowah River; and
9. Toms Creek watershed;

(k) Forsyth County: Chattahoochee River

(l) Fulton County: Chattahoochee River upstream from the mouth of Peachtree Creek;

(m) Gilmer County:

1. Ball Creek watershed;
2. Cartecay River watershed;
3. Conasauga River watershed, not including Jacks River watershed;
4. Coosawattee River from confluence of Cartecay and Ellijay rivers downstream to old Georgia Highway 5 bridge (Gilmer County Road 239);
5. Ellijay River watershed;
6. Fightingtown Creek watershed;
7. Harris Creek watershed;
8. Johnson Creek watershed;
9. Mountaintown Creek watershed;
10. Noontootla Creek watershed;
11. Sevenmile Creek watershed;
12. Tails Creek watershed;
13. Town Creek watershed;
14. Wildcat Creek watershed; and

15. All other streams or parts of streams not listed in this subparagraph, except:
 - (i) Coosawattee River downstream from old Georgia Highway 5 (Gilmer County Road 239);
 - (ii) Talking Rock Creek; and
 - (iii) Tributaries to Carters Reservoir not listed in this subparagraph;

(n) Gordon County:

1. Johns Creek watershed upstream of Floyd County Road 212;
2. Pin Hook Creek watershed upstream from Gordon County Road 275;
3. Pine Log Creek watershed upstream from Georgia Highway 53;
4. Rocky Creek watershed upstream from Gordon County Road 210;
5. Salacoa Creek watershed upstream from U.S. Highway 411; and
6. Snake Creek watershed;

(o) Gwinnett County: Chattahoochee River;

(p) Habersham County:

1. Amy's Creek watershed upstream from Georgia Highway 17;
2. Chattahoochee River watershed upstream from the Georgia Highway 255 crossing of the Chattahoochee River;
3. Liberty Creek watershed;
4. Middle Fork Broad River watershed;
5. Nancytown Creek watershed upstream from Nancytown Lake;
6. North Fork Broad River watershed;
7. Panther Creek watershed;
8. Roberts Branch watershed;
9. Soque River watershed upstream from the mouth of Deep Creek; and

10. Toccoa Creek watershed;

(q) Haralson County:

1. Flatwood Creek watershed;
2. Lassetter Creek watershed;
3. Mann Creek watershed upstream from Haralson County Road 162;
4. Tallapoosa Creek watershed; and
5. Tallapoosa River watershed upstream from County Road 222;

(r) Hart County: Savannah River from Hartwell Dam downstream to Richard B. Russell Lake;

(s) Lumpkin County:

1. Amicalola Creek watershed;
2. Cane Creek watershed upstream from the Georgia Highway 52 bridge;
3. Cavender Creek watershed;
4. Chestatee River watershed upstream from the mouth of Tesnatee Creek;
5. Dockery Lake;
6. Etowah River watershed upstream from Castleberry Bridge;
7. Shoal Creek watershed; and
8. Yahoola Creek watershed upstream from Georgia Highway 52;

(t) Murray County:

1. Conasauga River watershed upstream from the Georgia-Tennessee state line;
2. Holly Creek watershed upstream from the mouth of Dill Creek, including Dill Creek watershed;
3. Jacks River watershed;
4. Mill Creek watershed upstream from Murray County Road 27;

5. Mill Creek (Hasslers Mill Creek) watershed, which is within Holly Creek watershed;
6. North Prong Sumac Creek watershed;
7. Rock Creek watershed, the most southern of two Rock Creek watersheds which are in the Holly Creek watershed, upstream from Murray County Road 4;
8. Rock Creek watershed, the most northern of two Rock Creek watersheds which are in the Holly Creek watershed, upstream from Murray County Road 301;
9. Sugar Creek watershed upstream from Murray County Road 4; and
10. Sumac Creek watershed upstream from Coffey Lake;

(u) Paulding County:

1. Possum Creek watershed upstream from Paulding County Road 64;
2. Powder Creek (Powder Springs Creek) watershed;
3. Pyle Creek watershed;
4. Pumpkinvine Creek watershed upstream from Paulding County Road 231;
5. Raccoon Creek watershed upstream from State Route 2299 (Paulding County Road 471);
6. Tallapoosa River watershed;
7. Thompson Creek watershed; and
8. Ward Creek watershed;

(v) Pickens County:

1. Amicalola Creek watershed;
2. Ball Creek watershed;
3. Bluff Creek watershed;
4. Cartecay River watershed;

5. Clear Creek watershed;
6. Cove Creek watershed upstream from Pickens County Road 294;
7. Fausett Creek watershed;
8. Fisher Creek watershed;
9. Hobson Creek watershed;
10. Little Scarecorn Creek watershed;
11. Long Swamp Creek watershed, including Darnell Creek watershed, upstream from Cove Creek;
12. Mud Creek watershed;
13. Pin Hook Creek watershed;
14. Rock Creek watershed;
15. Salacoa Creek watershed;
16. Scarecorn Creek watershed upstream from Georgia Highway 53;
17. Sevenmile Creek watershed;
18. Sharp Mountain Creek watershed;
19. Soap Creek watershed;
20. Talking Rock Creek watershed upstream from Road S1011 (Georgia Highway 136);
21. Town Creek watershed;
22. Turkey Creek watershed; and
23. Wildcat Creek watershed;

(w) Polk County:

1. Cedar Creek watershed upstream from Polk County Road 121;
2. Lassetter Creek watershed;
3. Little Cedar Creek watershed;

4. Pumpkinpile Creek watershed upstream from Polk County Road 437;
5. Silver Creek watershed;
6. Spring Creek watershed;
7. Swinney Creek watershed;
8. Thomasson Creek watershed; and
9. Thompson Creek watershed upstream of Polk County Road 441;

(x) Rabun County:

1. Bad Branch watershed (flows into Lake Seed);
2. Bad Creek watershed (flows into Tugaloo Lake);
3. Bridge Creek watershed;
4. Chattooga River upstream from the mouth of Warwoman Creek;
5. Crow Creek watershed (flows into Lake Seed; includes Slick Shoal Creek);
6. Dicks Creek watershed (flows into Lake Burton);
7. Dickenson Branch (flows into Lake Burton);
8. Falls Branch watershed (flows into Lake Rabun);
9. Flat Creek watershed;
10. Joe Creek watershed (flows into Lake Rabun);
11. LaCounts Creek watershed (flows into Lake Seed);
12. Little Tennessee River watershed upstream from the North Carolina state line;
13. Moccasin Creek watershed;
14. Popcorn Creek watershed;
15. Seals Creek watershed (flows into Lake Seed);
16. Stekoa Creek watershed;

17. Tallulah River watershed upstream from Lake Burton;
18. Timpson Creek watershed;
19. Warwoman Creek watershed;
20. West Fork Chattooga River watershed;
21. Wildcat Creek watershed;
22. Worse Creek watershed (flows into Tugaloo Lake); and
23. All other streams or parts of streams not listed in this subparagraph, except:
 - (i) The Tallulah River downstream from Lake Burton Dam; and
 - (ii) Tributaries to Burton, Seed, Rabun, Tallulah Falls, Tugaloo and Yonah reservoirs not listed in this subparagraph;

(y) Stephens County:

1. Little Toccoa Creek watershed;
2. Middle Fork Broad River watershed upstream from NRCS flood control structure No.44;
3. North Fork Broad River watershed upstream from NRCS flood control structure No. 1;
4. Panther Creek watershed; and
5. Toccoa Creek watershed upstream from Toccoa Falls;

(z) Towns County:

1. Bearmeat Creek watershed;
2. Bell Creek watershed;
3. Brasstown Creek watershed;
4. Bugscuffle Branch watershed (Allen Mill Creek);
5. Burch Branch watershed;
6. Fodder Creek watershed;

7. Hightower Creek watershed;
8. Hiwassee River watershed downstream to Towns County Road 87;
9. Hog Creek watershed;
10. Shake Rag Branch watershed;
11. Tallulah River watershed; and
12. All other streams or parts of streams not listed in this subparagraph, except:
 - (i) Hiwassee River downstream from Towns County Road 87; and
 - (ii) Tributaries to Chatuge Reservoir not listed in this subparagraph;

(aa) Union County:

1. Bracket Creek watershed;
2. Brasstown Creek watershed;
3. Butler Creek watershed;
4. Camp Creek watershed;
5. Conley Creek watershed;
6. Coosa Creek watershed;
7. Ivylog Creek watershed;
8. Kiutuestia Creek watershed;
9. Low Creek watershed;
10. Nottely River watershed upstream from Nottely Reservoir
11. Toccoa River watershed;
12. Youngcane Creek watershed; and
13. All other streams or parts of streams not listed in this subparagraph, except:
 - (i) Butternut Creek watershed;

- (ii) Nottely River downstream from Nottely Dam; and
- (iii) Tributaries to Nottely Reservoir not listed in this subparagraph;

(bb) Walker County:

1. Allen Creek watershed;
2. Chappel Creek watershed;
3. Chattanooga Creek watershed upstream from Walker County Road 235;
4. Concord Creek watershed;
5. Dry Creek watershed, which is a tributary to East Armuchee Creek;
6. Duck Creek watershed;
7. East Fork Little River watershed, which flows into Dade County;
8. East Fork Little River watershed, which flows into Chattooga County, including Gilreath Creek;
9. Furnace Creek watershed;
10. Gulf Creek watershed;
11. Harrisburg Creek watershed, including Dougherty Creek watershed, upstream from Dougherty Creek;
12. Johns Creek watershed;
13. Left Fork Coulter Branch watershed;
14. Little Chickamauga Creek watershed;
15. Rock Creek watershed, including Sawmill Branch, upstream from Sawmill Branch;
16. Ruff Creek watershed;
17. Snake Creek watershed;
18. West Armuchee Creek watershed; and

19. West Chickamauga Creek watershed upstream from Walker County Road 107;

(cc) White County:

1. Chattahoochee River watershed upstream from the Georgia Highway 255 crossing of the Chattahoochee River;
2. Little Tesnatee Creek watershed upstream from the mouth of Turner Creek;
3. Town Creek watershed upstream from the mouth of Jenny Creek; and
4. Turner Creek watershed, which is the Turner Creek watershed nearest to Cleveland city limits;

(dd) Whitfield County:

1. Coahulla Creek watershed upstream from Whitfield County Road 183;
2. Dry Creek watershed, which is a part of East Chickamauga Creek watershed;
3. Snake Creek watershed;
4. Spring Creek (Deep Spring Creek) watershed;
5. Swamp Creek watershed upstream from Whitfield County Road 9; and
6. Tiger Creek watershed.

(4) The season for taking lake sturgeon from the Coosa River and its tributaries shall be closed.

(5) Except as otherwise provided by law or rule or regulation, all other seasons for taking fish in freshwater shall be open and continuous.

Rule 391-4-3-.05. Creel and Possession Limits.

In keeping with sound principles of wildlife research and management, creel and possession limits are:

- (1) Ten (10) of any one or a combination of the following species, except only one (1) fish may be greater than twenty-two (22) inches from Lake Lindsay Grace:

- (a) Largemouth bass;
 - (b) Smallmouth bass;
 - (c) Shoal bass;
 - (d) Suwannee bass;
 - (e) Spotted bass or Kentucky bass;
 - (f) Redeye or Coosa bass.
- (2) Eight (8) of any one or a combination of mountain trout.
- (3) Fifteen (15) of any one or a combination of the following species; provided, however, only two (2) fish may be twenty-two (22) inches or longer in length:
- (a) White bass;
 - (b) Striped bass;
 - (c) Striped-white bass hybrids.
- (4) Notwithstanding the provisions of paragraph (3) to the contrary, from the North Newport River, the Medway River including Mount Hope Creek, the Little Ogeechee River, the Ogeechee River, the Oconee River downstream of Georgia Highway 22 in Milledgeville, the Ocmulgee River downstream of the Georgia Highway 96 bridge between Houston and Twiggs counties, the Altamaha River, and the Satilla River; from the tributaries to such described sections; and from salt water as defined in O.C.G.A. [27-4-1](#) two (2) of any one or a combination of the following species each of which must be twenty-two (22) inches or longer:
- (a) White bass;
 - (b) Striped-white bass hybrids;
 - (c) Striped bass.
- (5) Notwithstanding the provisions of paragraph (3) to the contrary, from the Savannah River and its tributaries downstream of J. Strom Thurmond Dam two (2) of any one or a combination of the following species each of which must be twenty-seven (27) inches or longer:
- (a) White bass;
 - (b) Striped-white bass hybrids;

- (c) Striped bass.
- (6) Fifty (50) of any one or a combination of the game species, as defined by O.C.G.A. [27-1-2](#) of bream or sunfish;
- (7) Eight (8) walleye (walleyed pike);
- (8) Eight (8) sauger;
- (9) Fifteen (15) of any one or a combination of the following species of pickerel:
 - (a) Chain;
 - (b) Grass;
 - (c) Redfin.
- (10) Thirty (30) of any one or a combination of the following species:
 - (a) Black crappie;
 - (b) White crappie.
- (11) Eight (8) of any one or a combination of the following species:
 - (a) American shad;
 - (b) Hickory shad.

[Rule 391-4-3-.06. Size Limits.](#)

(1) Pursuant to O.C.G.A. § [27-4-10](#) and in keeping with sound principles of wildlife research and management, fish of the following sizes may not be taken.

(a) It shall be unlawful to take or possess largemouth bass as follows:

1. Less than fourteen inches (14") in total length from Lake Oconee;
2. Less than fourteen inches (14") in total length from West Point Reservoir;
3. Less than fourteen inches (14") in total length from all public fishing areas operated by the

Department; provided, however, this shall not apply to lakes at public fishing areas which have been posted as having a different length limit for largemouth bass;

4. Less than fourteen inches (14") in total length from Walter F. George Reservoir;
5. Less than fourteen inches (14") in total length from Lake Blackshear;
6. Less than fourteen inches (14") in total length from Lake Lanier; and
7. From fifteen inches (15") to twenty two inches (22") in total length from Lake Lindsay Grace in Wayne County.
8. Less than twelve inches (12") in total length from all other waters of this state; provided, however, there shall be no limitations on the sizes of largemouth bass taken from lakes Burton, Juliette on the Rum Creek Wildlife Management Area, and Blue Ridge.

(b) It shall be unlawful to take or possess spotted bass less than fourteen inches (14") in total length from Lake Lanier.

(c) It shall be unlawful to take or possess shoal bass less than fourteen inches (14") in total length from Lake Lanier.

(d) It shall be unlawful to take or possess shoal bass less than twelve inches (12") in total length from the Flint River or any of its tributary streams downstream of Warwick Dam.

(e) It shall be unlawful to take or possess shoal bass less than fifteen inches (15") in total length from the Flint River or any of its tributary streams upstream of Warwick Dam.

- (f) It shall be unlawful to take or possess brook trout less than eighteen inches (18") in total length or rainbow or brown trout less than twenty-two inches (22") in total length from Waters Creek upstream from its junction with Dick's Creek.
 - (g) It shall be unlawful to take or possess mountain trout less than sixteen inches (16") in total length from Noontootla Creek or its tributaries within the Blue Ridge Wildlife Management Area.
- (2) Except as otherwise provided by law, rule or regulation, there shall be no other size limits on freshwater fish species listed in O.C.G.A. § [27-4-10](#).

Rule 391-4-3-.07. Fishing on and Using State Owned or Operated Property.

- (1) No person shall fish in that portion of Moccasin Creek from Lake Burton Hatchery water intake downstream to a sign marking the approximate normal pool level of Lake Burton, except those persons under twelve (12) years of age and those persons holding honorary fishing licenses.
- (2) On Wednesdays, Saturdays and Sundays only, persons may fish in Dukes Creek and its tributaries on the Smithgall Woods-Dukes Creek Conservation Area, including the Highway 75 Alternate right-of-way, after obtaining a permit from the Department. Registered guests of the Smithgall Woods-Dukes Creek Conservation Area may fish in Dukes Creek and its tributaries on the Smithgall Woods-Dukes Creek Conservation Area upstream from the Georgia Highway 75 Alternate Bridge any day they are registered as guests. The Department may close certain portions of Dukes Creek or its tributaries on

the Smithgall Woods-Dukes Creek Conservation Area, including the Highway 75 Alternate right-of-way, to fishing at any time for fisheries management purposes.

- (3) Persons may not fish from service piers at boat ramps owned or operated by the department which have been posted with a sign stating that fishing is prohibited.
- (4) Open containers of alcoholic beverages are prohibited at boat ramps and fishing piers owned or operated by the department where signs have been posted stating said prohibition. This provision does not apply to national forest lands.

Rule 391-4-3-.09. Public Fishing Areas.

- (1) Drivers of vehicles parking at the Rocky Mountain public fishing area must obtain a daily or annual Rocky Mountain public fishing area parking permit (which is not a Parks, Recreation and Historic Sites Division Parking Pass).
- (2) On ponds or portions of ponds where fisheries resources are limited, area managers may limit fishing to persons under 16 years of age by posting a sign at the pond which indicates said limitations.

- (3) Except as provided by O.C.G.A. Sec. [27-4-11.1](#), the creel and possession limits for fish caught from public fishing areas are:
- (a) Fifteen (15) of any one or a combination of the game species of bream or sunfish;
 - (b) Five (5) largemouth bass;
 - (c) Five (5) channel catfish;
 - (d) All grass carp must be immediately returned to the waters from which they were caught unless otherwise posted; and
 - (e) All fish or designated fish species taken from ponds and lakes posted as open only to catch and release fishing must be immediately returned to the waters from which they were taken. Possession of fish or designated fish species in ponds and lakes open only to catch and release fishing is not allowed.
- (4) Camping shall not be allowed on public fishing areas except under the following circumstances:
- (a) Any activity that disturbs other campers between the hours of 10:00 p.m. and 7:00 a.m. is prohibited;
 - (b) No musical instrument, radio, television or other noise making device may be used after 10:00 p.m. or before 7:00 a.m. in such a manner that it may be heard by other campers;
 - (c) Occupancy of campsites is limited to fourteen consecutive days. Any camper who has used a campsite for 14 consecutive days must vacate the camping area for a period of not less than 7 days before again occupying a campsite;
 - (d) Any tents, trailers, automobiles, other vehicles or other personal property left unattended at the campsite overnight or beyond the designated time limit shall be removed and any expenses, including towing charges, incurred by such removal shall be paid by the person under whose name the campsite is registered;
 - (e) Dishwashing is prohibited at drinking faucets and at comfort stations;
 - (f) Picnic supplies and other personal property shall not be left unattended in the picnic shelters;
 - (g) Campers may cut only dead and fallen trees for firewood to be used on the area;
 - (h) Persons who wish to camp on areas where gates are usually locked at night must contact area managers in advance to make arrangements for camping; and
 - (i) Rules for camping on wildlife management areas shall apply on areas which are both public fishing areas and wildlife management areas; and

- (j) Camping on the Rocky Mountain public fishing area is prohibited except from April 1 until October 31, and except at other times as designated by the public fishing area manager for special purposes.
- (5) Persons may not fish with any gear other than pole and line, as the term is defined in O.C.G.A. Sec. [27-1-2\(51\)](#), and no person shall fish with more than two poles and lines at any public fishing area:
- (6) Persons may not use or possess live fish for bait at any public fishing area except in lakes or ponds posted as being open to the use of live fish for bait.
- (7) Except as provided herein, persons may not operate any vessel as defined in O.C.G.A. Sec. [52-7-3](#) on any public fishing area owned or operated by the department; provided, however, that fishing boats propelled by paddles, oars, or electric motors may be used on ponds or lakes unless they are posted as being closed to the use of such fishing boats, and provided further, that:
 - (a) Persons may operate any fishing boat being propelled by a motor at idle speed on any public fishing area lake designated open to the use of fishing boats with motors; and
 - (b) Personal watercraft (jet skis), sailboats and sailboards are not permitted on any public fishing area lake; and
- (8) Persons may not utilize the waters of any public fishing area for recreational swimming; provided, however, this subsection shall not apply to the designated beach area at Rocky Mountain Public Fishing Area between Memorial Day and Labor Day during the hours designated by the public fishing area manager.
- (9) No person may consume or use alcoholic beverages on any public fishing area except in designated facilities or at campsites on these areas; provided, however, no alcoholic beverages are allowed on the Rocky Mountain Public Fishing Area.
- (10) No horses are allowed on public fishing areas except in those areas designated as open to equestrian use.
- (11) Persons may not rappel, rock climb or hang glide on the Rocky Mountain public fishing area.
- (12) No person shall disobey any lawful order of a law enforcement officer or the area manager.
- (13) If hunting is authorized, hunters may access specified portions of the public fishing area during legal hunting hours for the purpose of hunting.

- (14) Notwithstanding any other provision of this Rule 391-4-3-.09 to the contrary, Department sponsored special events are authorized on public fishing areas twenty-four hours a day, subject to any special conditions for the event established by the Department.

Rule 391-4-3-.10. Commercial Fishing. Amended.

- (1) It shall be lawful to commercially fish with gill nets on Lake Seminole as follows:
- (a) From November 1 through January 31 in the Flint River Arm from Faceville Landing upstream to but not including the mouth of Big Slough, in the Spring Creek Arm from State Route 253 upstream to U.S. Route 84 and in Fish Pond Drain from State Route 253 upstream to County Road 1659 at the north end of Ray's Lake.
 - (b) Nets may not be set in waters exceeding eight (8') feet in depth or in stream channels.
 - (c) All game fish and catfish taken in gill nets must be released.
 - (d) All gill nets must be marked by visible buoys.
 - (e) Fisherman are limited to three hundred (300) linear feet of netting. Gill net mesh must be two inches (2") on the square.
 - (f) All nets must be clearly labeled with the name and commercial fishing license number of the person fishing them.

- (g) A commercial fishing license and a Lake Seminole Gill Net commercial fishing species endorsement are required. All other commercial fishing laws and regulations shall apply.
- (2) It shall be lawful to commercially fish with a basket in the Georgia portion of Clark Hill Reservoir, Richard Russell Reservoir, Hartwell Reservoir, Yonah Lake, Tugaloo (Toogaloo) Lake, Stevens Creek Lake and the impounded waters of the New Savannah Bluff Lock and Dam as follows:
- (a) The basket must be constructed of one inch (1") mesh wire and must not be more than seventy-two inches (72") in length and sixty inches (60") in circumference.
 - (b) One throat of such basket shall be located at the extreme front of the basket and a second throat shall be located seventeen inches (17") behind the first. The second throat shall have one inch (1") square mesh webbing attached so that when such mesh is drawn taut by cords attached to each side, a horizontal opening is created which is not more than one inch (1") in height.
 - (c) It shall be unlawful to take any game fish except flathead catfish and channel catfish with such baskets.
 - (d) A commercial fishing license and a Catfish Basket commercial fishing species endorsement are required. All other commercial fishing laws and regulations apply.
- (3) A commercial fishing license and a Catfish Basket commercial fishing species endorsement are required to commercially fish with a basket as authorized by O.C.G.A Section [27-4-92](#). All other commercial fishing laws and regulations apply.
- (4) It shall be lawful to commercially fish for mussels in fresh water as follows:
- (a) The following waters shall be opened from sunrise to sunset on Monday through Friday of each week from 1 April to 31 August each year, except Memorial Day and Independence Day, to the lawful harvest of mussels:
 1. Fresh waters of all streams are open to the lawful harvest of mussels that will not pass through a round ring with an inside diameter of four inches; and
 2. Reservoirs over 500 acres in size which are not owned or operated by the Department are open to the lawful harvest of washboard mussels (*Megalonaias* sp.) that will not pass through a round ring with an inside diameter of four inches and to the harvest of all other mussels whose longest dimension will not pass through said ring.

- (b) It shall be unlawful to harvest mussels in fresh water by any form of dredging, brailing, pumping, any form of mechanical scooping or by dragging any material over the mussels. Any person violating this provision is subject to the civil penalty provisions of O.C.G.A. Section [27-1-36](#).
- (c) A commercial fishing license and a Freshwater Mussel commercial fishing species endorsement are required. All other commercial fishing laws and regulations shall apply.

Rule 391-4-3-.12. Possession, Sale and Importation of Fish or Fish Eggs.

- (1) When the Commissioner finds that a specific shipment of live fish or fish eggs found in the State or sought to be introduced into the State will or may introduce or spread disease or parasites or otherwise be harmful to endemic fish populations he may, by appropriate order, prohibit their possession or sale within the State, or prohibit their entry into the State.
- (2) If the Commissioner finds that any live fish or fish eggs from a specific fish hatchery or geographic area, either within or outside of the State, will or may introduce or spread disease or parasites or otherwise be harmful to endemic fish populations, he may, by appropriate order, prohibit their possession and any further sales thereof within the State or prohibit any future shipments thereof into the State.
- (3) Live fish or fish eggs subjected to regulation under either subsection (1) or (2) above shall remain subject to the order issued thereunder unless and until a fisheries expert, recognized by and acceptable to the Commissioner, has certified the live fish or fish eggs from said shipment or said fish hatchery or geographical area to be free from any such harmful characteristics.
- (4) Any live fish or fish eggs possessed or sold within the State or introduced into the State in violation of any order issued under either subsection (1) or (2) above shall, in the absence of the certificate provided in the subsection (3) above, be presumed to possess the same harmful characteristics upon which the order was based and shall be subject to immediate, summary seizure and destruction by conservation rangers or other duly authorized agents or officials of the Department.

Rule 391-4-3-.13. Fishing Methods.

- (1) The following streams are artificial-lure streams:
 - (a) That portion of the Chattahoochee River from Georgia Highway 20 downstream to the boat ramp at the National Park Service Medlock Bridge Park immediately upstream of Georgia Highway 141;
 - (b) Noontootla Creek and its tributaries on the Blue Ridge Management Area;

- (c) Coleman River and its tributaries from the junction with Tallulah River upstream to Forest Service Bridge No. 54;
 - (d) Jones Creek and its tributaries on U.S. Forest Service property upstream from the junction with the Etowah River;
 - (e) Mountaintown Creek and its tributaries above Mountaintown Creek Watershed Structure No. 2;
 - (f) Stanley Creek and its tributaries on the Rich Mountain Management Area;
 - (g) Hoods Creek and its tributaries on the Warwoman Management Area;
 - (h) Walnut Fork and its tributaries on the Warwoman Management Area; and
 - (i) Conasauga River upstream of the Georgia-Tennessee state line and its tributaries to that portion of the river; provided, however, Conasauga River and its tributaries shall not be artificial-lure streams from the last Saturday in March through October 31 of each year.
- (2) It is lawful to fish with or possess only artificial lures with barbless hooks in that portion of Dukes Creek and its tributaries in White County on the Smithgall Woods-Dukes Creek Conservation Area, including the Georgia Highway 75 Alternate right-of-way.
- (3) It is lawful to fish with or possess only artificial lures with single hooks on the following waters; provided, however, this restriction does not apply to said waters from May 15 through October 31 of each year:
- (a) Amicalola Creek from County Road 192 (Steele Bridge Road) downstream to Georgia Highway 53;
 - (b) Chattahoochee River from Sope Creek (off Columns Drive) downstream to US Highway 41 (Cobb Parkway);
 - (c) Chattooga River (in Rabun County) from Georgia Highway 28 upstream to the mouth of Reed Creek (Georgia);
 - (d) Smith Creek on Unicoi State Park from Unicoi Dam downstream to the Unicoi State Park property boundary; and
 - (e) Toccoa River on U.S. Forest Service land from 0.4 miles above the Shallowford Bridge upstream to a point 450 feet upstream of the Sandy Bottom Canoe Access.
- (4) Use of live blueback herring for bait and possession of live blueback herring is prohibited in all freshwaters of the state; provided, however, this provision shall not apply to the following waters:

- (a) Lake Allatoona;
- (b) Lake Bartlett's Ferry;
- (c) Lake Blue Ridge;
- (d) Lake Chatuge;
- (e) Lake Goat Rock;
- (f) Lake Juliette;
- (g) Lake Lanier;
- (h) Lake Nottely;
- (i) Lake Oliver;
- (j) Lake West Point;
- (k) Altamaha River watershed downstream of the following dams:
 - 1. Juliette on the Ocmulgee River;
 - 2. Lake Juliette on Rum Creek;
 - 3. Lake Tobesofkee on Tobesofkee Creek; and
 - 4. Lake Sinclair on the Oconee River;
- (l) watersheds of all other streams that flow directly into the Atlantic Ocean. The penalties of this paragraph are enforceable by all penalties applicable, including civil penalties.

Rule 391-4-3-.14. Catch and Release Fishing.

- (1) The following streams or portions of streams are declared to be delayed harvest streams, and all mountain trout caught from these streams must be immediately returned unharmed to the waters from which they were caught; provided, however, this restriction shall not apply to said streams or portions of streams from May 15 through October 31 of each year:
 - (a) That portion of Amicalola Creek from County Road 192 (Steele Bridge Road) downstream to Georgia Highway 53;
 - (b) That portion of the Chattahoochee River from Sope Creek (off Columns Drive) downstream to US Highway 41 (Cobb Parkway);
 - (c) That portion of Chattooga River (in Rabun County) from Georgia Highway 28 upstream to the mouth of Reed Creek (Georgia);
 - (d) That portion of Smith Creek on Unicoi State Park from Unicoi Dam downstream to the Unicoi State Park property boundary; and
 - (e) That portion of the Toccoa River on U.S. Forest Service land from 0.4 miles above the Shallowford Bridge upstream to a point 450 feet upstream of the Sandy Bottom Canoe Access.
- (2) The following stream is declared to be a catch and release stream, and all fish caught from this stream must be immediately returned unharmed to the waters from which they were caught:
 - (a) That portion of Dukes Creek and its tributaries flowing through the Smithgall Woods-Dukes Creek Conservation Area, including the Georgia Highway 75 Alternate right-of-way;
- (3) Possession of trout while fishing on a catch and release stream is prohibited; and
- (4) Possession of trout while fishing on a delayed harvest stream is prohibited from November 1 through May 14 of each year.

Rule 391-4-3-.16. Use of Minnow Seines and Minnow Traps.

- (1) It is unlawful to use a minnow seine:
 - (a) exceeding 20 feet in length.
 - (b) with a mesh size exceeding three-eighths of an inch square. or in diameter if the mesh is not square.
- (2) It is unlawful to use a minnow trap:
 - (a) exceeding 24 inches in length, 18 inches in width, or 9 inches in height for a rectangular trap; or,
 - (b) exceeding 24 inches in length or 30 inches in circumference for cylindrical traps; and,
 - (c) with a round throat (opening) exceeding one (1) inch in diameter, and,
 - (d) with a bar mesh size smaller than one-quarter (1/4) of an inch square or in diameter if the mesh is not square.

- (3) Each minnow trap must have attached thereto a tag bearing the name and address of the trap owner or must have tethered to each trap a float bearing the name and address of the person using such gear.
- (4) No individual may deploy more than 2 traps at any time.
- (5) No more than 50 nongame fishes can be collected per licensed angler per day and may only be used as bait or released into the waters from which they were taken.
- (6) Any species that is not a nongame fish or crayfish taken shall be immediately released unharmed into the waters from which they were taken.
- (7) In addition to trout streams, the use of minnow seines or minnow traps is prohibited in the following areas to protect threatened and endangered species:
 - (a) the mainstem of the Etowah River upstream of Lake Allatoona and all Etowah River tributary streams that enter the Etowah River within or upstream of Lake Allatoona.
 - (b) Raccoon Creek and its tributary streams in Paulding and Bartow counties
 - (c) the entire mainstem of the Conasauga River and all Conasauga River tributary streams entering the Conasauga mainstem from the east.
 - (d) the Coosawattee River and all tributary streams upstream from Carter's Lake Dam and the Coosawattee River between Carters Lake and its confluence with the Conasauga River.
 - (e) the mainstem of Talking Rock Creek.
 - (f) the mainstem of South Chickamauga Creek downstream from Swanson Mill dam.

Subject 391-4-4. RESERVED.

Subject 391-4-5. BOATING REGULATIONS.

Rule 391-4-5-.01. Purpose.

The purpose of these Rules is to implement the public safety and natural resource protection responsibilities assigned to the Department with respect to the various types of boating activities which occur on the waters of the State.

Cite as Ga. Comp. R. & Regs. R. 391-4-5-.01

Authority: Ga. L. 1937, p. 264 and Ga. L. 1973, p. 1427.

History. Original Rule entitled "Initial Registration Period" was received in the Office of Secretary of State on July 11, 1975, in accordance with Section 22 of the Georgia Boat Safety Act of 1973, Ga. Laws 1973, p. 1443.

Amended: Rule repealed and a new Rule entitled "Definitions" adopted. Filed October 6, 1976; effective October 26, 1976.

Amended: Rule repealed and a new Rule entitled "Purpose" adopted. Filed December 12, 1979; effective January 1, 1980.

Rule 391-4-5-.02. Definitions.

For the purpose of these rules, the term:

- (a) "Applicant" means any person who files an application with the Department for permission to hold a marine event;
- (b) "Commissioner" means the Commissioner of Natural Resources of the State of Georgia;
- (c) "Department" means the Department of Natural Resources of the State of Georgia;
- (d) "Marine events" means any organized and/or advertised regatta, boat race, marine parade, water event, tournament or exhibition, excluding fishing tournaments, which by its nature, circumstance or location will introduce extra or unusual hazards to the public safety or the life of any person on the waters of this State or to the natural resources of this State;
- (e) "Person" means any municipal corporation, county or legal consolidation thereof, individual, partnership, corporation, public or private authority and shall include the State

of Georgia and all its departments, boards, bureaus, commissions, authorities, and any other agencies or instrumentalities;

- (f) "Sponsor" means the person to whom the Department issues a permit to hold a marine event.

Authority: Ga. L. 1937, p. 264 as amended; and Ga. L. 1973, p. 1427 *et seq.* as amended.

History. Original Rule entitled "Lights" was received in the Office of Secretary of State on July 11, 1975, in accordance with Section 22 of the Georgia Boat Safety Act of 1973, Ga. Laws 1973, p. 1443.

Amended: Rule repealed and a new Rule of the same title adopted. Filed October 6, 1976; effective October 26, 1976.

Amended: Rule repealed and a new Rule entitled "Definitions" adopted. Filed December 12, 1979; effective January 1, 1980.

Amended: Filed January 30, 1981; effective February 19, 1981.

Amended: Filed July 1, 1982; effective July 21, 1982.

Rule 391-4-5-.03. Application for Marine Event Permit.

- (1) Any person seeking to conduct a marine event shall submit an application to the Department at least thirty (30) days prior to the date of the proposed marine event; provided, however, a person seeking to conduct a marine event which is likely to attract 10,000 or more participants and spectators shall submit an application to the Department at least ninety (90) days prior to such proposed event.
- (2) Permit applications shall be on forms furnished by the Department and may be submitted for single or multiple events.
- (3) The issuance of a permit for a marine event to be held on the waters of this state shall be conditioned upon the receipt of either an indemnity bond or forfeiture bond as outlined in subparagraphs (a) and (b) below:
 - (a) The issuance of a permit for a marine event to be held on the waters of this State, when it is anticipated that such event will attract 10,000 or more participants shall be conditioned upon the receipt of an indemnity bond as required in subsection (c) of Section 6, of the Georgia Boat Safety Act, as amended, and Rule [391-4-5-.18](#) herein.
 - (b) The issuance of a permit for a marine event to be held on the waters of this State, when it is anticipated that such event will attract 10,000 or more participants *and spectators*, shall be conditioned upon the receipt of a forfeiture bond as required in subsection (c) of Section 6, of the Georgia Boat Safety Act, as amended, and Rule [391-4-5-.18](#) herein.

- (4) Prior to the issuance of a permit for a marine event proposed to be held in an area where two or more governmental entities have jurisdiction, the Commissioner may consult with any of the affected governmental entities concerning said permit.
- (5) Non-compliance with the provisions of the Georgia Boat Safety Act or these regulations may constitute basis for revocation of permit.
- (6) Any person seeking to conduct an organized and/or advertised regatta, boat race, marine parade, tournament or exhibition, who believes that such event may not introduce the degree of extra or unusual hazard that would require the event to be defined as a "marine event", may request a determination, in advance of the times specified in subsection (1) above, of whether a permit will be required.
- (7) The sponsor's written certification of the following circumstances and conditions will justify a determination that no permit is required unless the Commissioner determines that despite said certification, the proposed event does pose an extra or unusual hazard so as to require a permit:
 - (a) The event will not attract more than 500 spectators and/or participants.
 - (b) All participants in the event are either knowledgeable or have been notified of the requirements of the Georgia Boat Safety Act, as amended, with special attention to the safety equipment provisions.
 - (c) The event will not be publicized by paid advertising in the public media.
 - (d) The event will not preempt the public's unrestricted use of the resource base.
 - (e) The person responsible for the management of the water body upon which the event will be held has been notified thereof and appropriate consultation with such person has occurred.
- (8) **Repealed.**
- (9) Notice of Denial.
 - (a) Whenever the Commissioner has denied a permit for an event which has been advertised sufficiently to allow him to reasonably infer that prospective participants, in the absence of notice of said denial, would gather at the advertised time and place and be likely to attempt to proceed with the event despite the lack of a permit, he may require the sponsor to notify the public of the denial of the permit and that such event will not be held. The notice shall be disseminated at a time and in a manner calculated to effectively reach the members of the public to whom the previous advertising was directed.
 - (b) Whenever the Commissioner has received information on the basis of which he can reasonably conclude that any person has, without submitting an application

therefor, promoted, organized or advertised a proposed marine event the conduct of which requires a permit, he may notify said person that he shall not conduct or participate in such marine event without the required permit therefor. In the event said person fails or refuses to apply for a permit within a reasonable time thereafter, the Commissioner may require such person to notify the public that the advertised marine event will not be held due to failure or refusal to apply for or the denial of a permit. Such notice shall be disseminated at a time and in a manner calculated to effectively reach the members of the public to whom the previous advertising was directed.

History. Original Rule entitled "Fire Extinguishers" was received in the Office of Secretary of State on July 11, 1975, in accordance with Section 22 of the Georgia Boat Safety Act of 1973, Ga. Laws 1973, p. 1443.

Amended: Rule repealed and a new Rule entitled "Rules of the Road" adopted. Filed October 6, 1976; effective October 26, 1976.

Amended: Rule repealed and a new Rule entitled "Application for Marine Event Permit" adopted. Filed December 12, 1979; effective January 1, 1980.

Amended: Filed January 30, 1981; effective February 19, 1981.

Amended: Filed July 1, 1982; effective July 21, 1982.

Rule 391-4-5-.04. Marine Event Public Safety Requirements.

The applicant shall submit written verification that the person responsible for management of the waters in question has been notified of the proposed marine event(s). In addition, any application for a permit to conduct a marine event requiring a bond shall provide written verification that the appropriate authorities have acknowledged to the applicant their capability and willingness to supply adequate safety, security, traffic control, law enforcement, emergency medical assistance, and appropriate protection or denial of access to private property or that the applicant has the capability and is willing to provide the above stated services.

Amended: Rule repealed and a new Rule of the same title adopted. Filed July 1, 1982; effective July 21, 1982.

Rule 391-4-5-.05. Marine Event Boating Safety Requirements.

The sponsor shall ensure that all participants are either knowledgeable or have been notified of the requirements of the Georgia Boat Safety Act, as amended, with special attention to the safety

equipment provisions. Such equipment shall include, but shall not be limited to, Type I, II, III, or IV, U.S. Coast Guard approved personal flotation devices.

The Department may require that because of the special hazards posed by some types of marine events, participants and spectators on the water during such events shall at all times wear the above - mentioned personal flotation devices.

Vessel operators in a sanctioned motor vessel race with an approved Marine Event Permit are exempt from the age restrictions on vessel operation set forth in Chapter 7 of Title 52 of the Official Code of Georgia Annotated while they are operating a vessel within the area approved for the race as a participant in the race.

Nothing in this section shall be construed to relieve participants and spectators of their responsibility for compliance with the Georgia Boat Safety Act.

Amended: F. Dec. 16, 2013; eff. Jan. 5, 2014.

Rule 391-4-5-.06. Marine Event Construction and Buoyancy Requirements.

- (1) The Department may restrict the participation in such events to vessels whose construction materials are inherently buoyant (e.g. wood) or which have buoyancy materials built into them, unless the sponsor agrees to remove from the water body any nonbuoyant vessels that may sink during the event.
- (2) The Department may restrict the participation of vessels in such events to those constructed in such a manner that they can reasonably be expected to be put in, floated upon and removed in one piece.
- (3) Buoyancy materials for those vessels whose construction materials are not inherently buoyant will be limited to those which will not easily fragment or become separated from the vessel. Polystyrene blocks will be allowed only if suitably encased to prevent fragmentation.

Repealed: New Rule entitled "Marine Event Time Limits" adopted. F. Dec. 12, 1979; eff. Jan. 1, 1980.

Rule 391-4-5-.08. Marine Event Solid Waste Disposal Requirements.

To minimize the degradation of the natural resources involved, the Department may require the sponsor:

- (a) to ensure that sufficient solid waste containers are available to accommodate the convenient deposit of all solid waste generated by the marine event.
- (b) to ensure that participants and sponsor-approved concessionaires are notified of the requirements of the Georgia Litter Control Law; and
- (c) any other requirements deemed reasonably necessary to prevent the degradation of the natural resources.

Nothing in this section shall be construed to relieve participants, spectators and sponsor-approved concessionaires of their responsibility for compliance with the Georgia Litter Control Law. Ga. Laws 1970, p. 494.

Rule 391-4-5-.12. Marine Event Special Boating Restrictions.

The Department may establish restrictions on the movements of vessels or other types of watercraft and flotation devices, including but not limited to inner tubes, and inflatable rafts, and other water activities in the immediate area of the event. Whenever the Commissioner issues a marine event permit under circumstances in which the permitted event will fully utilize the recreative capacity of the water body or portion thereof upon which it will be held, or the nature or size of the event or public safety considerations dictate that the water body be closed, for the duration of the permitted event, to use by anyone not an official participant in the event, he may declare that the exclusive use of the said water body or portion thereof is devoted to the permitted event. This exclusive use declaration shall limit the use of the waters so designated to only those persons who are authorized to participate in the permitted marine event. The sponsor of an exclusive use marine event shall be required as specified by the conditions of the permit to mark, by means of buoys, signs or other appropriate means, the said water body or portion thereof so as to notify the public of the extent and duration of exclusive use. Such sponsor may also be required, when the exclusive use is likely to pre-empt a large number of potential users, to notify the public of the exclusive use, its extent and duration by an appropriate form of public notice, including use of news media. It shall be unlawful for any person not an official

participant in a permitted event to fail to obey markers, buoys, or signs designating water bodies or portions thereof as closed for exclusive use for the duration of the permitted marine event.

Rule 391-4-5-.15. Criteria for Issuing Marine Event Permits.

In the issuance of a marine event permit, the Commissioner may, based on the application submitted, the magnitude of the event, the water body on which it will be held, the capability of the applicant or his agents, representatives or employees to comply with the public safety and natural resource protection requirements contained in these regulations, the applicant's previous experience, the Department's previous experience in regulating similar events and such other information as may be pertinent, require of the applicant the following additional information for the purpose of determining his eligibility to receive such a permit:

- (a) for marine events likely to attract 10,000 or more participants and/or spectators, the ability to meet the bonding requirements of subsection (c) of Section 6 of the Georgia Boat Safety Act and rule 391-45-.18 herein;

- (b) assurance that the public safety requirements listed in Rule [391-4-5-.04](#) can be provided, each listed service, the type and amount of services and manpower to be provided by such persons and the plan for coordinating the activities of the public safety authorities assisting in the conduct of the event;
- (c) the ability to notify participants of the boating safety requirements contained in Rule [391-4-5-.05](#), including a plan for disseminating these requirements to participants and water-borne spectators;
- (d) the ability to assure that all vessels entered in the event will be restricted to those constructed in such a manner and having buoyancy materials complying with Rule [391-4-5-.06](#);
- (e) the submittal of an agenda indicating the schedule of activities which will take place during the time allotted for the permitted event as provided in Rule [391-4-5-.07](#);
- (f) the ability to meet the solid waste disposal requirements contained in Rule [391-4-5-.08](#), including plans specifying the types of containers which will be used to accommodate solid waste generated during the event, the location of such containers during the event and plans for the disposition of the solid waste at the conclusion of the event, explanations of how participants and sponsor-approved food and beverage concessionaires will be notified of the requirements of the Georgia Litter Control Law;
- (g) the ability to meet the requirements for sanitary facilities as required in Rule [391-4-5-.09](#), including plans for determining an adequate number of facilities for a permitted event, plans for the placement of the facilities in the area of the permitted event and plans for removal of sanitary facilities and disposal of waste materials;
- (h) plans for debris recovery as required in Rule [391-4-5-.10](#) including provisions for the recovery of sunken and floating debris in the area of the permitted event, plus all debris generated by the event down-stream of the finish point if the event is to be held on a river or stream;
- (i) the ability to meet the site restoration requirements contained in Rule [391-4-5-.11](#), including plans for restoring areas within the permitted event to their pre-event condition when such areas have been negatively impacted by large crowds which disrupt vegetation, soils and other natural or man-made features present at the event site; and
- (j) overall ability to coordinate the requirements contained in this subsection into a single comprehensive plan for the conduct of a marine event.

Authority: Ga. L. 1937, p. 264 and Ga. L. 1973, p. 1427 *et seq.*, as amended.

History. Original Rule entitled "Criteria for Issuing Marine Event Permits" was filed on December 12, 1979; effective January 1, 1980.

Amended: Filed July 1, 1982; effective July 21, 1982.

Rule 391-4-5-.16. Criteria for Selecting Among Competing Applicants.

If two or more applicants otherwise meeting the requirements of this chapter desire to conduct marine events on the same body of water during the same period of time, and if the Commissioner determines that in his best judgment a particular body of water has the natural resource capacity to support only one marine event during a given period of time, he may determine that one exclusive marine event permit is in the best interest of the public. In such an instance, the Commissioner shall issue a permit to one of the applicants after carefully evaluating all applications on the basis of the following additional considerations:

- (a) the past experience of the applicant in conducting marine events or other similar activities in a manner consistent with the protection of public safety and of natural resources;
- (b) the balance of public costs associated with conducting each applicant's proposed marine event, i.e. public safety, environmental degradation, and the financial and manpower burden of public agencies, as compared with the public recreational benefits likely to result from each applicant's proposed marine event.

History. Original Rule entitled "Criteria for Selecting Among Competing Applicants" was filed on December 12, 1979; effective January 1, 1980.

Amended: Filed January 30, 1981; effective February 19, 1981.

Rule 391-4-5-.17. Restriction of Waters.

Whenever the Commissioner determines in advance that any of the waters of this State and their adjoining upland resource are not capable, without sustaining damage, of withstanding an unlimited number of marine events in any period of time, he may restrict the size, number, or duration of events that will be permitted for the said period of time on said waters and their adjoining upland resource. In determining an appropriate period of time for which to impose such restrictions, the Commissioner shall consider the size of the water body, the fragility of the ecosystem in the water body and its adjoining upland resource, the likelihood of applications for large marine events to be held thereon and his ability to protect the natural resource values of the potentially affected area by means of permit conditions. Such restrictions and their duration shall be publicly announced in a manner calculated to provide a reasonable time for preparation and submittal of applications for permits for marine events within the restricted area and in any event no less than 90 days prior to the effective date of such restriction.

History. Original Rule entitled "Restriction of Waters" was filed on December 12, 1979; effective January 1, 1980.

Amended: Rule repealed and a new Rule of the same title adopted. Filed January 30, 1981; effective February 19, 1981.

Rule 391-4-5-.18. Criteria for Requiring Indemnity and Forfeiture Bonds and for Declaring Default Thereon.

(1) Indemnity bonds.

- (a) In determining when the sponsor of a marine event shall be required to post an indemnity bond, in establishing the amount of such indemnity bond up to the maximum amount set forth in law, in determining when the Commissioner may make a demand on the bond, and in determining the amount of such demand, the Commissioner may consider the following:
1. the type and amount of services and manpower to be provided by such sponsor and the plan for coordinating the activities of public service agencies assisting in the conduct of and cleanup after the proposed event;
 2. the ability of the sponsor to ensure that all vessels entered in the event are restricted to those constructed in such a manner and having buoyancy materials complying with Rule [391-4-5-.06](#);
 3. the ability of the sponsor to meet the solid waste disposal requirements contained in Rule [391-4-5-.08](#); including plans specifying the types of containers which will be used to accommodate solid waste generated during the event, the location of such containers during the event and plans for the disposition of the solid waste at the conclusion of the event and explanations of how participants and sponsor-approved food and beverage concessionaires will be notified of the requirements of the Georgia Litter Control Law;
 4. the ability of the sponsor to meet the requirements for sanitary facilities as required in Rule [391-4-5-.09](#), including plans for determining an adequate number of facilities for a permitted event, plans for the placement of the facilities in the area of the permitted event and plans for removal of sanitary facilities and disposal of waste materials;
 5. the sponsor's plans for debris recovery as required in Rule [391-4-5-.10](#) including provisions for the recovery of sunken and floating debris in the area of the permitted event, plus all debris generated by the event downstream of the finish point if the event is to held on a river or stream;
 6. the ability of the sponsor to meet the site restoration requirements contained in Rule [391-4-5-.11](#), including plans for restoring areas within the permitted event to their pre-event condition;
 7. the total number of anticipated participants and spectators;

8. the past experience of the Department in dealing with and/or regulating previous events of the same type, size, nature, structure or within the same type geographical or topographical area or previous events conducted by the proposed sponsor;
 9. the actual extent of compliance by the sponsor with cleanup, site restoration and waste disposal requirements;
 10. the actual extent of demand upon the Department including actual expenses, labor, equipment usage, etc., to provide cleanup and site restoration due to failure of the sponsor to adequately fulfill the requirements related to cleanup, site restoration and waste disposal.
- (b) Whenever the sponsor of a marine event for which an indemnity bond has been posted fails or refuses to comply with the conditions of its permit relating to clean up after the event or whenever it becomes apparent to the Department that the said sponsor will be unable to comply with those conditions within the time limit set forth in the said permit, the Department shall notify the sponsor and the bonding company of its finding of the sponsor's present or imminent default and its intent to proceed with the necessary clean up unless, within a specified period, the sponsor and the bonding company achieve full compliance with the said permit conditions. Upon a failure of the sponsor or the bonding company or both to achieve full compliance with the said permit conditions within the period specified in the notice, the Department will proceed with the necessary clean up, calculate its costs, including labor, equipment use and maintenance, materials and supplies, and declare the indemnity bond forfeited to the extent of its costs in accomplishing the clean up.

(2) Forfeiture Bonds.

- (a) In determining when the sponsor of a marine event shall be required to post a forfeiture bond, in establishing the amount of such forfeiture bond up to the maximum amount set forth in law, in determining when the Commissioner may make demand on the bond, and in determining if such demand will be for an amount less than the face amount of the bond, the Commissioner may consider the following:
1. the type and amount of services and manpower to be provided by such sponsor and the plan for coordinating the activities of public service agencies assisting in the conduct of and clean up after the proposed event;
 2. the ability of the sponsor to ensure that all vessels entered in the event are restricted to those constructed in such a manner and having buoyancy materials complying with Rule [391-4-5-.06](#);

3. the ability of the sponsor to meet the solid waste disposal requirements contained in Rule [391-4-5-.08](#), including plans specifying the types of containers which will be used to accommodate solid waste generated during the event, the location of such containers during the event and plans for the disposition of the solid waste at the conclusion of the event and explanations of how participants and sponsor-approved food and beverage concessionaires will be notified of the requirements of the Georgia Litter Control Law;
4. the ability of the sponsor to meet the requirements for sanitary facilities as required in Rule [391-4-5-.09](#), including plans for determining an adequate number of facilities for a permitted event, plans for the placement of the facilities in the area of the permitted event and plans for removal of sanitary facilities and disposal of waste materials;
5. the sponsor's plans for debris recovery as required in Rule [391-4-5-.10](#) including provisions for the recovery of sunken and floating debris in the area of the permitted event, plus all debris generated by the event downstream of the finish point if the event is to be held on a river or stream;
6. the ability of the sponsor to meet the site restoration requirements contained in Rule [391-4-5-.11](#), including plans for restoring areas within the permitted event to their pre-event condition;
7. the total number of anticipated participants and spectators;
8. the past experience of the Department in dealing with and/or regulating previous events of the same type, size, nature, structure or within the same type geographical or topographical area, or previous events conducted by the proposed sponsor:
9. the ability of the sponsor to ensure compliance with the public safety requirements listed in Rule [391-4-5-.04](#);
10. the ability of the sponsor to enlist a sufficient number of authorized peace officers as required by law;
11. the ability of the sponsor to ensure compliance with the boating safety requirements contained in Rule [391-4-5-.05](#) and in the Georgia Boat Safety Act;
12. the overall ability of the sponsor to coordinate the requirements of the applicable laws, rules, regulations and permits issued into a single comprehensive plan for the conduct of a water event;

13. the anticipated size and magnitude of the proposed event;
 14. the actual extent of compliance by the sponsor with cleanup, site restoration and waste disposal requirements;
 15. the existence of unusual public safety hazards inherent in the event;
 16. the fragility of the ecosystem in which the event is sought to be conducted.
- (b) Whenever the sponsor of a marine event for which a forfeiture bond has been posted fails or refuses to comply with any provision of the Georgia Boat Safety Act, these Rules or any of the conditions of its permit, the Commissioner may declare a forfeiture of the face amount of said bond or that portion of the face amount of the bond which he deems appropriate based on the extent of failure or refusal on the part of the sponsor. In making his decision, he may consider the following:
1. violations relating to public safety;
 2. violations relating to requirements for the provision of facilities for the comfort and convenience of participants and spectators;
 3. violations of requirements relating to preventing, minimizing or mitigating damage to the water body and surrounding area.
- (c) The Commissioner shall have the discretion to determine the precise amount to be declared forfeited, depending upon the seriousness and degree of the noncompliance.

Authority: Ga. L. 1973, p. 1427, *et seq.*, as amended.

History. Original Rule entitled "Repealer" was filed on December 12, 1979; effective January 1, 1980.

Amended: Rule repealed and a new Rule entitled "Criteria for Requiring Indemnity and Forfeiture Bonds and for Declaring Default Thereon" adopted. Filed July 1, 1982; effective July 21, 1982.

Rule 391-4-5-.19. Designated Swimming Areas.

In order to implement certain provisions of the Georgia Boat Safety Act, as amended, and specifically those provisions of paragraph (5) of subsection (c) of Section 11 of said Act relating to boating safety zones within the boundaries of designated swimming areas, the following swimming areas and beaches are identified as designated swimming, areas:

- (a) Allatoona Lake

1. Sweetwater Camping Area
2. Cushing Memorial Park
3. CS-Ta Recreation Area
4. Payne Campground
5. Galt's Public Use Area
6. McKaskey Creek Campground
7. Red Top Mountain State Park
8. Allatoona Beach
9. Clark Creek South Campground
10. Tanyard Creek Public Use Area
11. FORSCOM Recreation Area
12. Dallas Road Public Use Area
13. U.S. Naval Recreation Area
14. Bartow County Park
15. Bartow Carver Park
16. Old Highway 41 Public Use Area #1
17. Old Highway 41 Campground #3
18. Atlanta Boys' Club
19. Camp Pine Acres
20. Camp Scout Haven
21. Chapel Knoll Beach

(b) Lake Blue Ridge

1. Morganton Point Beach

(c) Carters Lake

1. Harris Branch Public Use Area Beach

(d) Lake Lanier

1. West Bank Park Beaches (3)
2. Lanier Beach South
3. Two Mile Creek Park
4. Chattahoochee Country Club Beach
5. Laural Park
6. Holly Park
7. Van Pugh Park
8. University Yacht Club Beach
9. Big Creek Park Beaches (3)
10. Lake Lanier Islands Beach
11. Lanier Park Beach
12. Pine Isle Beach

(e) Lake Hartwell

1. Long Point #1
2. Long Point #2
3. Hart State Park
4. Tugaloo State Park
5. Hartwell Shores
6. Bruce Creek
7. Elrod's Ferry
8. Big Oaks
9. Chandler's Ferry

- (f) Lake Chatuge
 - 1. Towns County Recreation Area
- (g) Lake Nottely
 - 1. Nottely Swimming Area
- (h) Lake Burton
 - 1. Lake Burton Public Swimming Area
- (i) Lake Rabun
 - 1. Rabun Beach
- (j) West Point Lake
 - 1. Pyne Road Park
 - 2. Earl Cook Access Area
 - 3. Yellowjacket Access Area
- (k) Lake Oliver
 - 1. Green Island Hill Swimming Area
- (l) Clark Hill Lake
 - 1. West Dam Access Area
 - 2. Wildwood Park
 - 3. Fort Gordon Recreation Center
 - 4. Mistletoe State Park
 - 5. Raysville Boat Club
 - 6. Elijah Clark State Park
 - 7. Lake Springs Park
- (m) Lake Oconee
 - 1. Park's Ferry Public Use Area
 - 2. Old Salem Public Use Area

3. Lawrence Shoals Public Use Area
- (n) Lake Sinclair
1. Lake Sinclair Recreation Area (Federal Park)
 2. Little River Park
 3. Rocky Creek Park
 4. Oconee Springs Park
- (o) Lake Jackson
1. Georgia Power Park - West side of Lloyd Shoals Dam
 2. Turtle Cove - East side of Alcovy River directly south of Will White Neck
 3. Kersey's Marine
- (p) Lake Walter F. George
1. Cotton Hill Park Public Use Area
 2. Sandy Creek Park
 3. East Bank Public Use Area
- (q) Lake Seminole
1. Seminole State Park
 2. Bainbridge Boat Basin
 3. Bass Island
 4. East Bank Public Use Area.
- (r) Ogeechee River - U.S. Highway 17
1. King's Ferry Park
- (s) Diamond Causeway (Skidaway Island Road at Intracoastal Waterway-Chatham County)
1. Diamond Causeway Park
- (t) Lake Tobesofkee

1. Sandy Beach Park
 2. Claystone Park Beach
 3. Flintrock Park Beach
 4. Arrowhead Park Beach
- (u) Lake Blackshear
1. Georgia Veterans State Park
- (v) Lake Richard B. Russell
1. Coldwater State Park
- (w) Hard Labor Creek State Park (Lake Rutledge)
1. State Park Swimming Beach
- (x) Reed Bingham State Park Lake
1. State Park Swimming Beach

Authority: Ga. L. 1973, p. 1427, *et seq.* as amended.

History. Original Rule entitled "Designated Swimming Areas" was filed on July 1, 1982; effective July 21, 1982.

Amended: Filed May 1, 1984; effective May 21, 1984.

Amended: Filed December 9, 1986; effective December 29, 1986.

Rule 391-4-5-.20. Restricted Use Areas.

In order to implement certain provisions of the Georgia Boat Safety Act, as amended, and specifically those provisions of subsection (b) of Section 17 of said Act relating to restricted use of public waters in the vicinity of properly marked marinas, bridges, public access ramps and blind points, the followings areas are identified as restricted use areas:

- (1) **Marinas:**
- (a) Allatoona Lake
 1. Cushing Memorial Park
 2. CS-Ta Recreation Area

3. Victoria Landing
4. Galt's Ferry Landing
5. Atlanta Yacht Club
6. Allatoona Yacht Club
7. Park Marina
8. Red Top Mountain State Park, Little Marina
9. Allatoona Marina and Landing
10. King's Camp
11. Holiday Marina
12. U.S. Naval Recreation Area
13. Wilderness Camp
14. FORSCOM Recreation Area
15. Little River Landing

(b) Lake Blue Ridge

1. Blue Ridge Marina

(c) Carters Lake

1. Carters Blue Ridge Mountain Marina

(d) Lake Lanier

1. Habersham Marine
2. Baldrige Marine
3. Gerald's Marina
4. Stouffer's Marina
5. Holiday Marina
6. University Yacht Club

7. Lanier Yacht Club
8. Kelley's Marina
9. Aqualand Marina
10. Aqualand Sail Boat Docks
11. Lake Lanier Sailing Club
12. Snug Harbor Marina
13. Lan-Mar Marina
14. Long Hollow Boat Docks
15. Athens Boat Club
16. Gainesville Marina
17. Chattahoochee Boat Club
18. American Legion Boat Docks
19. Lanier Beach South Boat Docks
20. Rockport Boat Docks
21. Lazy Days Dry Storage Boat Docks
22. Lake Lanier Island Authority Docks and Boat Rental

(e) Lake Hartwell

1. Hartwell Marina
2. Harbor Light Marina

(f) Lake Chatuge

1. Mountain View Cottages
2. Lake Chatuge Marina
3. Shady Rest Marina
4. One-Stop Marina, Inc.

- 5. B & B Marina

- (g) Lake Nottely
 - 1. Terry's Marina

- (h) Lake Burton
 - 1. Cherokee Landing
 - 2. Leprade's Marina
 - 3. Anchorage Marina

- (i) Lake Rabun
 - 1. Hall's Boat House
 - 2. Rabun Beach Grocery

- (j) West Point Lake
 - 1. Highland Marina

- (k) Bartlett's Ferry Lake
 - 1. Syferrette Marina

- (l) Lake Oliver
 - 1. Municipal Marina

- (m) Clark Hill Lake
 - 1. Augusta Sailing and Boat Club
 - 2. Tradewinds Marina
 - 3. Fort Gordon Recreation Center Marina
 - 4. Tommy Shaw's Little River Sportsman Camp
 - 5. Raysville Boat Club
 - 6. Raysville Marina
 - 7. Thomson Boat Club

8. Soap Creek Lodge

(n) Lake Oconee

1. Granite Shoals Marina
2. Collis Brothers' Marina
3. Blue Springs Marina
4. Sugar Creek Marina

(o) Lake Sinclair

1. Haslam's Marina
2. Sinclair Marina
3. Bass Boat House
4. Little River Park Marina
5. Lakeside Marina
6. Crooked Creek Marina
7. Oconee Springs Park Marina

(p) Lake Jackson

1. Martin's Marina
2. Kersey's Marina
3. Rocky Point Marina (Jackson Lake Marina)
4. Walker Harris' Marina
5. Betty's Boat Dock
6. Bear Creek Marina

(q) Lake Blackshear

1. Smoak Bridge Marina
2. Lakeshore Marina

3. Camper's Haven Marina
 - (r) Lake Walter F. George
 1. Clay County Marina
 2. Florence Marina
 - (s) Lake Seminole
 1. Dunn's Landing
 2. Kelley's Marina
 3. Stone's Landing
 4. Wingate's Lodge
 5. Holley Isles
 - (t) Altamaha River -- Wayne County
 1. Jaycee Landing
 - (u) Ogeechee River -- U.S. Highway 17
 1. Ogeechee Marine
 - (v) Lake Richard B. Russell
 1. Beaverdam Marina
 - (w) South Brunswick River
 1. Blythe Island Regional Park Marina
- (2) **Bridges:**
- (a) Allatoona Lake
 1. Knox Bridge -- Georgia Highway 20
 2. Little River Bridge -- Georgia Highway 205
 3. Kellogg Creek Bridge
 4. Bethany Bridge

5. Clark Creek Bridge
6. Railroad Bridge
7. Interstate 75 (dual span)
8. Georgia Highway 293 Bridge
9. U.S. Highway 41 Bridge

(b) Lake Lanier

1. Six Mile Creek Bridge -- Georgia Highway 369
2. Two Mile Creek Bridge -- Georgia Highway 369
3. Wilkie Bridge -- Georgia Highway 136
4. Peck's Bridge -- Georgia Highway 283, Wahoo Creek
5. Bell's Mill Bridge -- U.S. Highway 129, East Fork Little River
6. Lula Bridge -- Georgia Highway 52
7. Clark's Bridge -- Georgia Highway 284
8. Clark's Bridge -- McEver Road, Flowery Branch Creek
9. Russell Bridge -- Lake Lanier Islands

(c) Lake Hartwell

1. Flat Shoals Bridge -- Georgia Highway 51
2. Little Lightwood Log Bridge -- Georgia 51
3. Vandiver Bridge -- Interstate 85
4. U.S. Highway 123 Bridge
5. Southern Railroad Trestle
6. Prather's Bridge -- Georgia Highway 184
7. Gum Log Creek Bridge -- Georgia Highway 328
8. Lightwood Log Creek Bridge -- Georgia Highway 77

(d) Lake Burton

1. Lake Burton -- U.S. Highway 76

(e) West Point Lake

1. Glass Bridge
2. Wehadkee Creek Bridge -- Georgia Highway 109
3. Chattahoochee River Bridge -- Georgia Highway 109
4. Seaboard Coastline Railroad Trestle -- Wehadkee Creek
5. Seaboard Coastline Railroad Trestle -- Chattahoochee River
6. Liberty Hill Bridge -- Whitewater Creek
7. Cameron Mill Bridge -- Yellowjacket Creek
8. Yellowjacket Creek Bridge -- Georgia Highway 219
9. Chattahoochee River Bridge -- Georgia Highway 219
10. Beech Creek Bridge -- U.S. Highway 27
11. Yellowjacket Creek Bridge -- U.S. Highway 27
12. New River Bridge -- U.S. Highway 27
13. Chattahoochee River Bridge -- U.S. Highway 27

(f) Bartlett's Ferry Lake

1. Lickskillet Bridge

(g) Lake Oliver

1. Standing Boy Bridge

(h) Clark Hill Lake

1. Keg Creek Bridge
2. Price Legg Bridge -- Georgia Highway 47
3. Raysville Bridge -- Georgia Highway 43

4. Soap Creek Bridge -- Georgia Highway 220
5. Soap Creek Bridge -- U.S. Highway 278
6. McCormick Bridge -- U.S. Highway 278
7. Fishing Creek Bridge -- Georgia Highway 79
8. Broad River Bridge -- Georgia Highway 79

(i) Lake Oconee

1. Oconee River Bridge -- U.S. Highway 278
2. Apalachee River Bridge--County Road 149, Swords, Georgia
3. Georgia Railroad Trestle
4. Interstate 20 Bridge--(dual span)
5. Sugar Creek Bridge--State Road 926, Buckhead Road
6. Oconee River Bridge--Georgia Highway 44
7. Lick Creek Bridge--State Road 2167, Old Phoenix Road
8. Beaverdam Creek--County Road 63, Walker Church Road

(j) Lake Sinclair

1. Taylor Creek Bridge--Georgia Highway 212
2. Twin Bridges--County Road over Little River
3. Railroad Trestle--Little River at Haslam's Marina
4. Little River Bridge--U.S. Highway 441
5. Beaverdam Creek--U.S. Highway 441
6. Crooked Creek--County Road
7. Oconee River Bridge--Georgia Highway 16

(k) Lake Jackson

1. Barnett's Bridge--at Kersey's Marina on Tussahaw Creek

2. Water's Bridge--Georgia 212 at Alcovy River
 3. Conley's Cove Bridge--Crossing Conley Cove approximately 1/4 mile East of Georgia Highway 212
- (l) Lake Blackshear
1. Smoak Bridge--Georgia Highway 257
 2. Seaboard Coastline Railroad
 3. U.S. Highway 280 Bridge (both old and new spans)
- (m) Lake Walter F. George
1. Pataula Creek Bridge--Georgia Highway 39
- (n) Lake Worth
1. Philema Road Bridge--Georgia Highway 91
 2. Old Leesburg Road Bridge--Georgia Highway 3
 3. Seaboard Railroad Trestle--40 yards upstream from Georgia Highway 3 Bridge on Kinchafoonee Creek
 4. North Slappey Bridge--U.S. Highway 19
 5. Old Albany Northern Railroad Trestle
- (o) Lake Seminole
1. Georgia Highway 253 Bridge--Fish Pond Drain
 2. Georgia Highway 374 Bridge--Fish Pond Drain
 3. Cypress Pond Bridge
 4. Swinging Bridge--Bainbridge Boat Basin
- (p) Ogeechee River--U.S. Highway 17
1. U.S. Highway 17 Bridge
 2. Old Highway 17 Bridge

- (q) Diamond Causeway (Skidaway Island Road at Intracoastal Waterway--Chatham County)
 - 1. Diamond Causeway (Bridge)

- (r) Lake Tobesofkee
 - 1. Sike's Cove Bridge--Mosely-Dixon Road
 - 2. Langley's Cove Bridge - Mosely-Dixon Road
 - 3. Christopher's Cove Bridge - Mosely-Dixon Road
 - 4. Water's Cove Bridge - Mosely-Dixon Road
 - 5. Lower Thomaston Road Bridge

- (s) Lake Chatuge
 - 1. U.S. Highway 76 Bridge (West of Hiawassee between Hiawassee and the Georgia Mountain Fairgrounds)

- (t) Lake Nottely
 - 1. Cowell Bridge - Pat Cowell Road
 - 2. Youngcane Creek Bridge - Pat Cowell Road

- (u) Lake Richard B. Russell
 - 1. Coldwater Creek Bridge - Ruckersville Road
 - 2. Beaverdam Creek Bridge - Herndon Mill Road
 - 3. Little Van Creek Bridge - Little Van Creek Road
 - 4. Beaverdam Creek Bridge - Pearl Mill Road
 - 5. Pickens Creek Bridge - Pickens Creek Road
 - 6. Heardmont - Dry Fork Creek Road Bridge (Road Number 244)
 - 7. Coldwater Creek Bridge - Georgia Highway 368
 - 8. Savannah River Bridge - Georgia Highway 368
 - 9. Beaverdam Creek Bridge - (Middleton - Ruckersville Road)

10. Savannah River - Old Sanders Ferry Bridge
11. Savannah River Bridge - Georgia Highway 72
12. Savannah River Bridge- Georgia Highway 181
13. Savannah River - (Old Smith - McGee Bridge)
14. Seaboard Coastline Railroad Trestle - Savannah River
15. Seaboard Coastline Railroad Trestle - Beaverdam Creek

(3) Public Access Ramps:

(a) Allatoona Lake

1. Bartow Carver Park
2. CS-Ta Recreation Area
3. Holiday Marina
4. Red Top Mountain State Park (Bethany Bridge)
5. Red Top Mountain State Park (Iron Hill)
6. Old Highway 41 Public Use Area #3
7. Wilderness Camp
8. FORSCOM Recreation Area
9. Blockhouse No. 2
10. Cooper Branch No. 1
11. Little River Landing (two ramps)
12. Cherokee County Park
13. McKaskey Creek Campground
14. Clark Creek
15. Kings Camp (two ramps)
16. Macedonia Campground

17. McKinney Campground

Rule 391-4-5-.22. Education Requirement for Vessel Rental.

- (1) For the purposes of this Rule, the following definitions shall apply:
 - (a) "Boat Livery" means a business which holds any vessel for renting, leasing, or chartering.
 - (b) "Person" means an individual, partnership, firm, corporation, association, or other legal entity.
- (2) A boat livery may not rent, lease, or let for hire any vessel ten horsepower or more to any person under 16 years of age. On and after July 1, 2014, a boat livery may rent, lease, or let for hire a vessel ten horsepower or more to a person 16 years of age or older if such person has completed a Rental Education Course approved by the Department's Law Enforcement Division and if all persons 16 years of age or older who intend to operate such vessel have also completed the Rental Education Course.
- (3) Rental Education Courses provided by boat liveries must be approved by the Department's Law Enforcement Division and must result in a Rental Education

Certificate being issued upon successful completion of the Course. Rental Education Certificates shall be effective for six months after the date of issuance and shall be valid anywhere in the State of Georgia. Boat liveryes may use Rental Education Course materials provided by the Department, or they may use Rental Education Course materials approved by the Department. At a minimum, a Rental Education Course must consist of a ten minute operator operation familiarization video followed by a renter orientation checklist. Such video must address the following topics in order to be approved:

- (a) Operator responsibility (ethics), courtesy and good judgment on the water;
 - (b) Safety Equipment;
 - (c) Navigation Rules;
 - (d) Aids to navigation; buoys and other waterway markers; and
 - (e) Identification requirements.
- (4) The requirement to complete a Rental Education Course does not apply to any person licensed by the United States Coast Guard as a master of a vessel, any person who has in his or her possession a valid boater education identification card showing that he or she has completed a boating education course approved by the Department's Law Enforcement Division, or a nonresident who has in his or her possession proof that he or she has completed a National Association of State Boating Law Administrators approved boater education course or equivalency examination from another state.
- (5) Any person who violates this Rule shall be guilty of a misdemeanor.

Subject 391-4-6. SAPELO ISLAND GENERAL OPERATING AND ACCESS PROCEDURES.

Rule 391-4-6-.01. Introduction.

- (1) The State of Georgia owns most of Sapelo Island. The Island consists of three management units assigned to the custody of the Department of Natural Resources (hereinafter sometimes referred to in this Chapter as DNR):

- (a) Richard J. Reynolds Wildlife Management Area (hereinafter sometimes referred to in this Chapter as Reynolds WMA): management of forest and wildlife resources; public hunting, fishing, camping and beach use.
 - (b) Sapelo Island National Estuarine Research Reserve (hereinafter sometimes referred to in this Chapter as the SINERR): protection of the Duplin River estuary; scientific research; public education; public hunting and fishing.
 - (c) Sapelo Island Natural Area (hereinafter sometimes referred to in this Chapter as the Natural Area): public education; low-intensity recreation; scientific research.
- (2) There is considerable public interest in Sapelo Island, which is created by the value of its natural and cultural resources, the amount of State investment in the Island, and the benefits which members of the general public receive from visiting it. The State, acting through DNR, is responsible to protect the natural and cultural resources of and the public interest in this unique Island.
- (3) State lands surround private lands known as the Hog Hammock Community. Some of its current permanent residents and their forebears have lived on Sapelo for generations. The State has acknowledged its duty to protect Hog Hammock's heritage by creating the Sapelo Island Heritage Authority, which furthers the preservation of the community's cultural and historic values (Official Code of Georgia Annotated (O.C.G.A.) Section [12-3-440](#)*et seq.*).
- (4) The State may provide certain essential services and water transportation for permanent residents and State employees living on Sapelo Island and their families. O.C.G.A. Section [12-2-5](#) grants DNR the authority to provide these services.

Cite as Ga. Comp. R. & Regs. R. 391-4-6-.01

Authority: O.C.G.A. Title 27, Secs. [12-2-5](#), [12-2-24](#), [12-3-9](#).

History. Original Rule entitled "Introduction" adopted. F. Jan. 25, 1996; eff. Feb. 14, 1996.

Rule 391-4-6-.02. Purpose.

The public interest in Sapelo Island requires that DNR establish rules for operation of and access to the Island. These rules are established to protect Sapelo Island and its fragile environment for the public's benefit while protecting the rights of those who have a property interest in the Island. These rules are promulgated to guide Island managers in performing their duties and to give the public notice of the Department's practices in managing state-owned property on the Island.

Rule 391-4-6-.03. Definitions.

Unless the context clearly requires otherwise, the following terms as used in this Chapter shall have the following meanings:

- (a) **"All-terrain vehicle"** or **"ATV"** means a small motorized three or four wheeled vehicle capable of carrying one or two passengers astride the vehicle and designed primarily for off-road travel such as in fields and forests.
- (b) **"Department"** and **"DNR"** mean the Department of Natural Resources of the State of Georgia.
- (c) **"Dependent family members"** mean family members residing in a single household and the children of that household who receive their financial support from that household while temporarily residing away from that household to attend school or college.
- (d) **"Essential services"** means those services enumerated in sub-paragraph 2. of the definition of "state official business" set out in this Chapter.
- (e) **"Family, family members or families"** mean persons related by blood or marriage, including adoption, regardless of age or degree of kinship.
- (f) **"General public"** means persons who are not included in any of the other classes of persons designated by these rules.
- (g) **"House"** means a structure built for residential use, including a preconstructed home.
- (h) **"Household"** means the house located on Sapelo Island of a permanent resident.
- (i) **"Guest for pay"** means a person who is hosted while visiting Sapelo Island by a permanent resident and who pays his or her host for food, lodging or transportation.
- (j) **"Invited guest"** means a person invited by a permanent resident to visit Sapelo Island without charge by the inviting party for food, lodging or transportation.
- (k) **"Institute"** or **"Marine Institute"** means the Marine Institute operated on the south end of Sapelo Island by the University of Georgia, a unit of the University System of Georgia, pursuant to a 50 year lease by and between the Department of Natural Resources and the Board of Regents of the University System of Georgia.
- (l) **"Island landowner"** means a person or other legal entity, other than the State of Georgia or an agency, authority or instrumentality thereof, which has a claim to title to real property on Sapelo Island; provided, however, that no undivided interest in a lot or parcel of land less than a one-fifth interest will be recognized unless a majority of the total number of persons holding an undivided interest in that lot or parcel of land, regardless of the total sum of their undivided interests, are related by blood or marriage.

- (m) **"Island manager"** means the DNR employee who has responsibility for managing Sapelo Island on a daily basis or his or her designee. The Island Manager may be reached at the following address:

Island Manager

DNR Wildlife Resources Division

Post Office Box 15

Sapelo Island, GA 31327

Phone: (912) 485-2251

- (n) **"Permanent residents"** mean Island landowners and persons domiciled on Sapelo Island and the dependent family members of all such persons.
- (o) **"Pets"** mean those animals which have traditionally lived in a state of dependence on and under the domination and control of humans and have been kept as tame pets, including cats and dogs.
- (p) **"Preconstructed homes"** means a manufactured home, a modular home, or a mobile home as those terms are Zoning Ordinance of McIntosh County adopted July 11, 1995.
- (q) **"Regents"** means the Board of Regents of the University System of Georgia.
- (r) **"State official business"** when used in this chapter, means any or all of the activities described in this sub-paragraph.
1. Regents operates the Marine Institute (hereinafter sometimes referred to as "UGAMI"), which is located on the south end of Sapelo Island, under the terms of a 50-year lease with DNR.
 2. DNR operates the Reynolds WMA, the SINERR and the Natural Area. DNR also may provide for permanent residents both water transportation to Sapelo Island and essential services on the Island. These essential services include:
 - (i) Transporting mail for DNR and for permanent residents;
 - (ii) Transporting school children between the Island and the mainland, under contract with the McIntosh County Board of Education;
 - (iii) Providing volunteer fire protection and waste disposal services on the Island;
 - (iv) Maintaining the State-owned roads on the Island;

- (v) To the extent that the well and pump in place on the effective date of this Rule are adequate to do so, providing the permanent residents of the Hog Hammock Subdivision with a drinking-water system;
- (vi) When permitted by budgetary resources and when the proper equipment necessary to do the job is present on the Island, mowing rights of way in the Hog Hammock Subdivision;
- (vii) Providing law enforcement services as authorized by the Game and Fish Code (O.C.G.A., Title 27). These services include enforcing:
 - (I) all State laws on property owned or controlled by DNR; and
 - (II) any State laws pertaining to functions assigned to DNR; and
 - (III) any State law when the violation of that law is committed in conjunction with a violation of State law pertaining to functions assigned to DNR; and
 - (IV) any State law on orders from the Governor or to protect any life or property when the circumstances demand action; and
 - (V) removing willing persons from Sapelo Island in the event of a life-threatening emergency such as an individual health crisis, uncontrollable wildlife or a major storm.

3. State official business includes business conducted by federal and local governmental officials in performance of their official duties.

- (s) **"Temporary official visitor"** means a person who is not a permanent resident but who temporarily visits the Island at the invitation of DNR or the University of Georgia Marine Institute (UGAMI) for State official business or for federal or local governmental business.

Rule 391-4-6-.04. Status As A Permanent Resident.

- (1) Those persons who desire the status of a permanent resident for purposes of this Chapter shall apply to the Commissioner or the Commissioner's designee.

- (2) The Commissioner or the Commissioner's designee in determining that an applicant for status as a permanent resident either owns an interest in land on Sapelo Island or is domiciled on Sapelo Island, may consider, but is not limited to consideration of, the presence or absence of the following indicators:
 - (a) The status of the applicant or the applicant's spouse as the lessee of a dwelling in a written rental agreement or lease having a term of six months or longer.
 - (b) The listing of the dwelling of the applicant or the applicant's spouse located on Sapelo Island for purposes of insurance as the principal residence of the insured.
 - (c) A deed to an interest in land on Sapelo Island which conveys at least a one-fifth undivided interest in the land described in the deed.
 - (d) Genealogies which demonstrate the familial relationships of the applicant.
 - (e) Any information presented by the applicant or others in the form of affidavits or certifications that tend to establish that Sapelo Island is or is not the place of the applicant's domicile or that the applicant is an Island landowner.
- (3) The Commissioner or the Commissioner's designee may call upon the applicant to produce any indicators as may appear to be applicable or copies thereof and may place such weight on the presence or lack of any of the indicators listed in this rule and any other indicators which may be presented, as he or she may determine to be appropriate. Any decision of the Commissioner or the Commissioner's designee on an application for status as a permanent resident shall be appealable pursuant to the Administrative Procedure Act.

Rule 391-4-6-.05. Authorized Uses of State-owned Land, Facilities and Roads on Sapelo Island.

- (1) Use of state-owned land, facilities and roads on Sapelo Island is a privilege and is restricted as provided in this Chapter to the following individuals or groups:
 - (a) Permanent residents;
 - (b) Temporary official visitors, such as research scientists associated with the Marine Institute, or DNR employees who are not domiciled on the Island;
 - (c) Guests of permanent residents, but only as provided in this Chapter;

- (d) Conference groups associated with the Marine Institute or DNR; and
 - (e) Members of the general public but only as set forth in subparagraph (b) of paragraph (2) of this rule.
- (2) DNR does not regulate personal business conducted entirely on private property; however, DNR recognizes there is an increasing need to prohibit uncontrolled roaming of the state-owned lands on the Island.
- (a) Activities on State-owned lands on Sapelo Island by permanent residents, the invited guests of permanent residents, and the guests for pay of permanent residents are restricted as follows:
 1. Permanent residents may gather deadwood and handicraft materials on the state-owned parts of Sapelo Island so long as the activities do not conflict with DNR program goals. DNR's Island manager may designate areas in which such activities are prohibited.
 2. Permanent residents may fish from the docks, bridges and beaches within the Reynolds WMA and may also gather oysters and clams within approved shellfish harvesting areas unless such docks, bridges, beaches and shellfish harvesting areas are closed for such activities. DNR's Island manager may designate areas in which such activities are prohibited.
 3. Permanent residents may use DNR's boat hoist for work on their small boats, but only as individually authorized by DNR's Island manager.
 4. Permanent residents may hunt on State-owned land during legal seasons. DNR's Island manager may designate areas in which such activities are prohibited.
 5. The invited guests and the guests for pay of permanent residents may fish from the docks, bridges and beaches within the Reynolds WMA and may gather oysters and clams within approved shellfish harvesting areas, but only as specifically authorized by DNR's Island manager and only if accompanied by their host or a family member of their host.
 6. The invited guests and the guests for pay of permanent residents may also accompany their host or a family member of their host as he or she travels about the remainder of the state-owned parts of the Island; however, if unaccompanied by their host or a family member of their host, such guests are restricted to the activities permitted members of the general public.
 7. Activities other than the above by permanent residents, the invited guests of permanent residents, and the guests for pay of permanent residents on the

state-owned portions of the Island, including any use of the Reynolds WMA, will be only as specifically authorized by DNR's Island manager.

- (b) Members of the general public may engage in the following activities on those portions of Sapelo Island which are state-owned:
 - 1. Managed hunts, legal hunting, tours offered by DNR or by permanent residents domiciled on Sapelo Island entering into concession agreements with DNR for conducting tours, or Cabretta camping offered by DNR;
 - 2. Conferences hosted by the Marine Institute or DNR;
 - 3. The gathering of oysters in the Duplin River when the river is open for those purposes;
 - 4. Fishing, hunting waterfowl, or operating boats in the tidal waters surrounding Sapelo Island; and
 - 5. Using the beach below the high water mark.
 - 6. Activities other than those enumerated in subparagraphs 1. through 5. of this paragraph (b) by members of the general public, including any use of the Reynolds WMA, the SINERR, and the Natural Area, will be only as specifically authorized by DNR's Commissioner or the Regional Supervisor of the Department's Wildlife Resources Division.

- (3) With regard to participants in public tours, hunting, camping, and conferences, the following uses are permitted:
 - (a) Reservations for regular DNR tours are permitted. DNR schedules special tours through its office on Sapelo Island.
 - (b) Persons who participate in hunts at the Reynolds WMA may camp in the Moses Hammock hunting camp for the duration of the hunt and must remain within designated hunting areas while actually hunting.
 - (c) DNR limits use of the Cabretta camping area to organized groups, scheduling its use through the DNR office on Sapelo Island. Campers may use the designated Cabretta camping area, open portions of the Reynolds WMA, and the beach. Access to other parts of Sapelo Island for members of such groups will be only as specifically authorized by DNR's Island manager.
 - (d) Conference participants may use buildings and lands under the control of DNR and the Marine Institute as authorized by those agencies. They may also use the State-owned roads south of the Reynolds WMA and may use the beach.

- (e) Use of Sapelo Island other than the uses enumerated in subparagraphs (a) through (d) of this paragraph (3) by members of tour groups, hunters, campers and conference participants will be only as specifically authorized by the Marine Institute or DNR, whichever agency is responsible for managing the property in question.

Authority: O.C.G.A. Title 27, Secs. [12-2-5](#), [12-2-24](#), 12-3-9.

History. Original Rule entitled "Authorized Uses of State-Owned Land, etc." adopted. F. Jan. 25, 1996; eff. Feb. 14, 1996.

Rule 391-4-6-.06. Access and Transportation Rules.

- (1) **Aircraft.** DNR and the Marine Institute may use the Sapelo Island airstrip and associated facilities for State official business. Other uses of aircraft at Sapelo Island are as follows:
 - (a) The U.S. Army may also use the airstrip as part of its Military Assistance to Safety and Traffic (MAST) Program housed at Fort Stewart. The MAST Program enables military personnel to provide emergency medical assistance to persons on Sapelo Island.
 - (b) The Federal Aviation Administration has designated the airstrip for emergency use. DNR allows use of the strip in the event of an aviation emergency, at the pilot's own risk.
- (2) **Boats.**
 - (a) **Ferry Service.**
 1. DNR provides regularly scheduled ferry service between Sapelo Island and the mainland.
 2. Prior written requests and approval by DNR are required for use of the ferry by guests of permanent residents. DNR further reserves the right to provide ferry service to approved guests only as space is available and only in the order of receipt of written requests for such ferry service. Requests for groups of more than ten persons must be submitted two weeks in advance. The Boat Request form should reveal the number of guests but need not reveal their names.
 3. Requests for boat runs other than those regularly scheduled must be made to DNR's Wildlife Resources Division Regional Supervisor two weeks in advance and must be approved by the Regional Supervisor.

4. DNR will endeavor to notify all persons filing Boat Request forms of its approval or disapproval of their requests at least twelve hours in advance of the scheduled ferry trip for which the request was made, but cannot guarantee that such advance notice can be given due to factors beyond the control of DNR.

(b) **Ferry Fees and Passes.**

1. **Permanent Residents.** Permanent residents and their dependent family members not otherwise provided for in the Institute's pass system or the Department's pass system will pay a fee of \$1.00 each way or may purchase a \$25.00 per year pass which will entitle them to ride on any scheduled trip.
2. **Marine Institute.**
 - (i) Personnel assigned to or employed by the Institute and others as identified below may be provided a non-transferrable ferry pass, or may be covered by a letter of request to the department at the discretion of the Institute.
 - (I) Institute staff, faculty, students and technicians who are Island residents and their dependent family members.
 - (II) Scientific personnel not directly employed by the Institute but who are Island residents while carrying out research programs at the Institute and their dependent family members.
 - (III) Staff and faculty members from the University of Georgia who are required to make official visits to the Institute.
 - (IV) Faculty, students and technicians, from any institution, who are involved in ongoing research programs at the Institute.
 - (V) All employees of the Institute who commute daily to and from the facility.
 - (VI) All University of Georgia students doing course-related work at the Institute, including authorized field trips and their supervisors.
 - (VII) Repairmen who come to the Institute facility regularly for performing repair work. This category is restricted to those whose names are submitted to the department and listed on the passenger list.

- (ii) The following individuals will be required to pay a fee of \$5.00 per round trip or oneway trip:
 - (I) Unofficial guests of the Institute, including personal guests of Institute staff, personnel, students and technicians.
 - (II) Faculty, students and technicians from any institution, except those individuals covered by paragraph (1)(a).
 - (III) Institute related groups and individuals on personal (non-official) visits to the Island.
- (iii) The Institute will issue passes to the Institute related personnel identified in subparagraph (I) and will provide the department with a list of names to whom these passes are issued. At such times as names are added and/or deleted the Institute will inform the department by letter that a name(s) should be added or deleted and will collect the passes previously issued to individuals whose names are deleted.
- (iv) The Institute will follow the policy involving guests, i.e., a "Boat Request" form will be sent to the department office two (2) days in advance of proposed visits for groups of less than ten people and two weeks in advance for groups of ten or more. This procedure will enable the department to keep load limits within U.S. Coast Guard Regulations and will indicate to the boat captain that the visitor(s) has been permitted to ride the boat.

3. Department of Natural Resources.

- (i) Department personnel residing on the Island and their dependent family members will be issued a non-transferable ferry pass and will not be required to pay a fee.
- (ii) Department personnel who are non-Island residents but who must, from time to time, must, from time to time, travel to the Island for meetings and to carry out work activities, will not be required to pay a fee.
- (iii) All department personnel will follow the policy and will submit a "Boat Request" form for any invited guest(s) two (2) days prior to the proposed visit for groups of less than ten people and two weeks in advance for groups of ten or more.

4. **U.S. Postal Service.** U.S. Postal Service employees will be transported in accordance with the provisions of the Postal Service's contract with the department.
5. **School Children.** Children who reside on the Island while attending elementary and high schools on the mainland will be provided one (1) round-trip per school day to and from the Island to attend school under the contract between the department and McIntosh County Board of Education. In addition, all McIntosh County school groups visiting the Island for educational purposes will be issued a pass to ride the ferry.
6. **Repairmen, Employees of Contractors and Field Trip Participants.**
 - (i) Repairmen and employees of contractors who commute to department facilities on a regular basis for performing work will be placed on the passenger list and issued a pass to ride the ferry.
 - (ii) Repairmen and employees of contractors who are engaged by permanent residents will pay a fee of \$5.00 per round trip or one-way trip.
 - (iii) Participants in field trips to the refuge portion of the Island will pay a fee of \$5.00 per round trip or one-way trip.
7. **Guests of Permanent Residents.** All guests of permanent residents will pay a fee of \$5.00 per round trip or one-way trip. In addition, a "Boat Request" form for groups of less than ten invited guests must be sent by the host to the department office two (2) days in advance of a proposed visit; forms for groups of ten or more invited guests must be sent two weeks in advance. The Boat Request form should reveal the number of guests but need not reveal their names. This procedure will enable the department to keep load limits within U.S. Coast Guard Regulations and will indicate to the boat captain that the visitor(s) are to be permitted to ride the ferry for the \$5.00 rate.
8. **Children.** Children under six (6) years of age may ride free regardless of their category as a passenger or the category of an accompanying adult.
9. **Other Visitors.**
 - (i) Participants in regularly scheduled DNR tours, R. J. Reynolds Mansion conference participants, hunters, users of the Cabretta campground, and all other visitors must purchase round-trip tickets at the McIntosh County Chamber of Commerce or at a DNR facility at a

cost of \$15.00 for adults and \$10 for children to be eligible to ride the ferry, except as provided in subparagraph (ii) of this paragraph 9.

- (ii) Participants in unscheduled DNR tours and organized youth groups using the Cabretta campground shall pay the same fee as participants in regularly scheduled DNR tours and other users of the Cabretta campground; however, the fee may be waived by DNR's Wildlife Resources Division Regional Supervisor for temporary official visitors.

(c) **Passenger Priority.** U.S. Coast Guard regulations limit the number of passengers that may be transported on the boat(s) operated by the department as ferries to Sapelo Island. To insure the maximum availability of space for key personnel while simultaneously complying with Coast Guard limitations, the priority system outlined below is hereby established. This system will be applied by the Boat Captain at any time passenger demand exceeds rated passenger capacity of the boat in service.

1. **Priority No. 1.** The persons identified below will be issued a "Priority No. 1" pass and will be entitled to first consideration whenever an overload situation becomes evident.
 - (i) All permanent residents and their dependent family members.
 - (ii) Institute and department personnel residing off the Island who require daily transportation to and from their work area.
 - (iii) Repair and service technicians going to and from the Institute or department facilities for the purpose of performing repair or service work.
2. **Priority No. 2.** The following persons will be issued a "Priority No. 2" pass and may board the vessel after all Priority No. 1 passengers have embarked.
 - (i) State employees other than those covered by Priority No. 1, who must visit the Island for official business.
 - (ii) Staff and faculty members from the University of Georgia who are required to make official visits to the Institute.
 - (iii) University of Georgia students visiting the Institute on official business or an authorized field trip.

3. **Priority No. 3.** All guests and visitors, including repair and service technicians not otherwise covered.

(d) **Barge Operations.**

1. The department operates barges to transport heavy freight, motor vehicles, bulk fuel and other cargo between the mainland and Sapelo Island for use of the department and the Institute.
2. The department offers transportation without charge for household goods and motor vehicles belonging to Marine Institute and DNR employees while living on Sapelo Island.
3. Permanent residents may be granted the privilege of using the state-owned docks for a private barge to transport building materials, building equipment, preconstructed homes and motor vehicles (except ATVs) to the Island. All persons transporting such items must complete a DNR permit application for use of state-owned docks to unload the building materials, building equipment, preconstructed homes or motor vehicles and receive approval of the request prior to transporting the cargo to the Island.
 - (i) All persons utilizing the state-owned docks for transporting such items to the Island must also complete an affidavit disclosing what specific building materials, building equipment, motor vehicle or preconstructed home they propose to bring to the Island. In the case of motor vehicles, the affidavit must state whether or not the motor vehicle will be utilized for personal use or as a rental vehicle to be rented to paying guests. In the case of preconstructed homes or building materials, the destination lot and the existence of ownership or the source of the person's right to use that particular lot must be disclosed. Copies of a current McIntosh County building permit, if applicable, and a septic tank certification must be attached to the affidavit. A letter from the McIntosh County Building and Zoning Inspector shall also be attached to the affidavit stating that he or she has personally inspected the destination lot and that the proposed building structure or proposed use conforms in all respects to the provisions of the McIntosh County zoning ordinance and other applicable regulations. A letter from the designated representative of the McIntosh County Board of Health shall also be attached to the affidavit stating that he or she has personally inspected the destination lot and that the proposed building structure or proposed use conforms in all respects to the provisions of the McIntosh County ordinance adopting and enacting a Code of Enforcement of Rules and Regulations of the McIntosh County Board of Health. A mobile

home must be titled in the name of the person causing it to be transported to the Island and must be currently state registered.

- (ii) Permanent residents may be granted the privilege of utilizing the state's docking facilities to possess on the Island no more than three (3) motor vehicles per household for personal use at any given time. Prior to scheduling the transport of an additional personal use vehicle to the Island, persons who already possess three personal use motor vehicles on the Island must remove one of the personal use vehicles already possessed from the Island.
 - (iii) Motor vehicles which are transported to the Island to be rented to guests for pay must be properly insured and display a current Georgia license plate.
 - (iv) All-terrain vehicles (ATVs) may not be transported to the Island except in the conduct of State official business.
4. A permanent resident may deliver a non-functioning motor vehicle to the Department's designated holding lot for transport back to the mainland, together with his or her agreement that the Department may, at its convenience and expense, transport the non-functioning motor vehicle to the mainland and dispose of it. Until transported by the Department to the mainland, permanent residents will be allowed to salvage parts from a non-functioning motor vehicle on the holding lot with the permission of the person who delivered the non-functioning motor Vehicle to the holding lot.
 5. DNR may authorize persons under contract with the State to remove timber from Sapelo Island using a barge. These persons may bring to the Island vehicles and equipment which are necessary for the timber harvesting operations but those vehicles and equipment must be removed upon completion of the timber harvesting contract unless a subsequent contract has been awarded to the same person. Persons under contract with the State to remove timber may also contract with permanent residents to utilize their equipment to perform such work as the digging of holes for septic tank installation and the removal of stumps, provided that such work is done at a time which does not conflict with the duties of the timber person with regard to the State timber removal.
 6. Private barge operators, including the State's timber barge operator, who transport building materials, pre-constructed homes, automobiles or other goods and equipment to or from the Island for persons other than DNR or the Institute, shall pay a docking fee of \$50.00 for use of the state-owned docks.

- (e) **Docking and Use of Small Boats.** DNR and the Marine Institute operate research vessels, patrol boats and other small watercraft for State official business, docking these vessels at designated Island and mainland locations. These docks are identified on maps located in the office of the Island manager which maps are incorporated herein by reference. Other authorized docking and uses of small watercraft at Sapelo Island are as follows:
1. Permanent residents may operate small boats to and from the Island. They and their guests must use the Foundation dock located in Barn Creek immediately behind the former post office but only for the purposes authorized by this Chapter.
 2. Participants in the managed hunts on Sapelo Island may use the Moses Hammock dock during their stay but only for the purposes authorized by this Chapter.
 3. Members of the general public may use boats in the tidal waters surrounding Sapelo Island. They may anchor boats off the beach for access to the beach below the high water mark during daylight hours. They may not beach or dock their boats on state-owned property without specific permission from the Island manager.
 4. Any uses of state-owned docks other than as specified above will be only as specifically approved by DNR or the Marine Institute, whichever agency has responsibility for managing the dock in question.
- (3) **Motor Vehicles.** DNR and the Marine Institute operate motor vehicles for State official business on Sapelo Island; however, due to the remoteness of Sapelo Island and its fragile environment, there is a need to limit the use of motor vehicles on the state-owned roads on the Island. Uses of non-state owned motor vehicles on the Island over the state-owned road system are authorized only as follows:
- (a) A permanent resident may operate motor vehicles owned or rented by the permanent resident on the state-owned road system of Sapelo Island for the uses of the Island permitted him or her by this Chapter.
 - (b) Rented motor vehicles may be used on the open portions of the state-owned roads but only if the persons who own or control the motor vehicles have entered into a concession agreement with DNR which sets forth the terms and conditions of such use.
 - (c) The invited guests and the guests for pay of permanent residents may not use the State-owned roads in rented vehicles unless either engaged in one of the activities enumerated in subparagraphs (b) or paragraph (2) of Rule [391-4-6-.05](#) or accompanied by their host or a member of the host's family.

- (d) Any motor vehicles utilized for transportation of guests for pay, whether accompanied or unaccompanied by their host or a member of the family of the host, must be titled in the name of the person renting the motor vehicle to the user, be properly insured, be currently state registered and display a current state license plate.
 - (e) Non-state owned all-terrain vehicles (ATVs) may not be used on the state-owned roads except in the conduct of State official business.
 - (f) No person may operate any motor vehicle on, over, or across the dynamic dune fields, sand dunes, or beaches, as those terms are defined in O.C.G.A. [12-5-232](#), of Sapelo Island, except as authorized by the State of Georgia' Shore Protection Committee, except that individual disability vehicles, emergency vehicles, and governmental vehicles utilized for beach maintenance or research may operate within the dynamic dune fields, sand dunes, and beaches without authorization from the Shore Protection Committee as long as those vehicles operate across existing cross-overs, paths, or drives.
 - (g) As authorized by contract, persons harvesting timber for DNR may bring to the Island motor vehicles necessary for their operations. Such vehicles shall be removed from the Island immediately if they become unserviceable and upon expiration or termination of the contract unless a subsequent contract has been awarded to the same person. Such vehicles shall be used only in furtherance of the contract for the harvesting of timber or as authorized by subparagraph (1)(d)(5) of this Rule and shall not be rented or loaned to other persons.
 - (h) Employees of DNR and the Marine Institute, their dependent family members, and their invited guests may with prior authorization by DNR operate privately owned vehicles on the open portions of the state-owned road system.
 - (i) The privilege of operating motor vehicles within the Reynolds WMA, the SINERR, and the Natural Area, is subject to restriction without prior notice and the Regional Supervisor of the Department's Wildlife Resources Division may close the state-owned roads on Sapelo Island to such travel.
- (4) **Pets.** Pets are not permitted within the dynamic dune fields and sand dunes, as those terms are defined in O.C.G.A. Section [12-5-232](#), of Sapelo Island at any time. Pets are permitted on the beaches, as that term is defined in O.C.G.A. Section [12-5-232](#), below the ordinary high-water mark. In order to protect sea turtles, beach-nesting and colonial-nesting birds, and other wildlife during critical periods such as nesting and hatching, DNR's Island Manager may post signs prohibiting pets on the beaches or segments of the beaches below the ordinary high-water mark during certain months of the year or during certain hours of the day. The prohibitions contained in this subsection do not apply to guide animals assisting disabled persons.

Rule 391-4-6-.08. Water Service For The Permanent Residents of Hog Hammock Subdivision.

To the extent that the well and pump in place on the effective date of this Chapter are adequate to do so, water service from DNR is available for the dwellings and other structures of permanent residents located within that tract of land commonly known as Hog Hammock Subdivision located on Sapelo Island, Georgia, which is more particularly shown and described on that certain plat of survey dated March 12, 1980, prepared by Wilder Surveying & Mapping - Paul D. Wilder #1559, a copy of which is on file with the Island manager. Applications for water service should be submitted to the Hog Hammock Community Foundation, Inc.

Subject 391-4-7. PROTECTED WILDLIFE HABITATS.

Rule 391-4-7-.01. Purpose.

The purpose of these rules is to implement the authority of the Board of Natural Resources to promulgate rules and regulations for wildlife protection, preservation, and management pursuant to O.C.G.A. § [27-1-6\(1\)\(B\)](#); to protect natural areas as provided by the Georgia Natural Areas Act, O.C.G.A. § [12-3-90](#)*et seq.*; and pursuant to O.C.G.A. § [27-1-33](#); and for the management and use of heritage preserves as provided by O.C.G.A. § [12-3-74\(a\)\(1\)](#). The purpose also includes the implementation of the Governor's dedication of the islands named in Rule [391-4-7-.03](#) as heritage preserves.

History. Original Rule entitled "Definitions" adopted. F. Apr. 30, 1998; eff. May 20, 1998.

Rule 391-4-7-.03. Shorebird and Sea Bird Habitat Protection.

- (1) In order to protect habitat for shorebirds and sea birds, except as provided in paragraph (d) of this subsection (1), no person shall:
 - (a) Enter those natural areas known as Egg Island Bar Natural Area, Satilla River Marsh Island Natural Area, or St. Catherines Island Bar Natural Area at any time.
 - (b) Enter that portion of Williamson Island which has been designated by signs indicating that the area is closed to human access. This closed area will be approximately 1,000 feet in length and of varying width, depending upon the width of the dry sand beach, and will be located at least 50 feet landward of the mean high tide line. The closed area will not include the northern and southern ends of the island or the ocean-facing beach.
 - (c) Enter that portion of Pelican Spit Natural Area which has been designated by signs indicating that the area is closed to human access. This closed area will include the interior portion of the island and the southeastern spit. The closed area will not include the southwestern beach, Hampton River Beach, the northeastern spit, or the ocean-facing beach.
 - (d) The restrictions in this chapter do not apply to the properly authorized actions of contractors and associates of the department when conducting research and monitoring activities for birds on these islands, or when responding to stranded marine mammals or other emergencies.
- (2) Pets.
 - (a) Pets are not permitted on Egg Island Bar Natural Area, Pelican Spit Natural Area, Satilla River Marsh Island Natural Area, St. Catherines Island Bar Natural Area, or Williamson Island.

Subject 391-4-8. WILD ANIMALS.

Rule 391-4-8-.01. Purpose and Scope.

The purpose of these rules is to update the list of wild animals provided in O.C.G.A. Sec. [27-5-5](#). Pursuant to O.C.G.A. Sec. [27-5-2](#), these rules maintain and supplement the list of wild animals requiring a license, insurance, or both and prohibit certain species. These rules include all species originally listed in O.C.G.A. Sec. [27-5-5](#) and species appended by the Board of Natural Resources.

History. Original Rule entitled "Closing and Reopening of Certain Salt Waters to Fishing with Power-Drawn Nets" adopted. F. Aug. 26, 1977; eff. Sep. 15, 1977.

Note: By Certification of the Department of Natural Resources filed on December 28, 1979, Chapter 391-4-8, entitled "Saltwater Fishing Regulations," containing Rules 391-4-8-.01 and 391-4-8-.99, was renumbered as Chapter 391-2-4 and the Rules therein renumbered as [391-2-4-.01](#), and [391-2-4-.99](#); effective January 17, 1980.

Adopted: New Rule entitled "Purpose and Scope." F. Nov. 14, 2022; eff. Dec. 4, 2022.

Rule 391-4-8-.02. Definitions.

Unless the context clearly requires otherwise, the following terms as used in this Subject have the following meanings:

- (a) "Aquaria or tanks" means containers for holding freshwater or marine fishes or freshwater or marine invertebrates from which no water is discharged, except during periodic cleaning, and such discharged water is passed through a filtering system capable of removing all animals and eggs and is disposed of only in a septic tank permitted by the county or in a waste-water treatment system permitted by the Environmental Protection Division of the department. Further, aquaria, tanks, and related components shall be constructed, maintained, and located to contain such species under normal and adverse operating and environmental conditions.
- (b) "Tag" means uniquely marked as determined by the department.
- (c) "Wild animal" is as defined in O.C.G.A. Sec. [27-1-2\(75\)](#).

Adopted: New Rule entitled "Definitions." F. Nov. 14, 2022; eff. Dec. 4, 2022.

Rule 391-4-8-.03. Prohibited Wild Animals.

(1) The following wild animals are considered a significant threat to wildlife or other natural resources and live individuals are prohibited.

(a) **Mammals:**

1. Order Carnivora: Family Herpestidae (mongooses) - All species;

(b) **Birds:**

1. Order Gruiformes: Family Rallidae (rails) - *Porphyrio porphyrio* (Purple Swamphen);
2. Order Psittaciformes: Family Psittacidae - *Myiopsitta monachus* (monk parakeet or Quaker parrot) except those individuals possessing monk parakeets or Quaker parrots under a wild animal license that is current on the effective date of this rule may continue to possess these animals according to their license conditions;

(c) **Fishes:**

1. Order Anabantiformes: Family Channidae (snakeheads) - All species;
2. Order Characiformes: Family Alestidae-*Hydrocynus goliath* (African tigerfish);
3. Order Cypriniformes: Family Xenocyprididae:
 - (i) Genus *Hypophthalmichthys* (bighead and silver carps);
 - (ii) *Mylopharyngodon piceus* (black carp);
4. Order Perciformes: Family Latidae (lates perches): Genus *Lates* - All species;
5. Order Siluriformes: Family Siluridae (sheatfishes) - *Siluris glanis* (wels catfish);

(d) **Invertebrates:**

1. Order Myida: Family Dreissenidae (dreissenid mussels) - All species;

2. Order Stylommatophora: Family Achatinidae: Subfamily Achatininae (giant African land snails) - All species; and
3. Order Decapoda: Family Cambaridae (crayfishes) - *Procambarus virginalis* (marbled crayfish or "marmokrebs").

Rule 391-4-8-.04. Inherently Dangerous Wild Animals, License and Insurance Required.

- (1) The following wild animals are considered inherently dangerous to human beings and pursuant to O.C.G.A. Sec. [27-5-4](#) are subject to licensing and liability insurance requirements.

(a) **Mammals:**

1. Order Artiodactyla (even-toed ungulates):
 - (i) Family Bovidae (ruminant mammals):
 - (I) Genera *Addax*, *Alcelaphus*, *Boselaphus*, *Connochaetes*, *Syncerus*, and *Taurotragus* (addax, hartebeests, nilgai, gnu, wildebeests, African buffalo, elands, etc) - All species;
 - (II) *Bos sauveli* (kouprey);
 - (III) *Hippotragus niger* (sable);
 - (IV) *Oryx gazella* (gemsbok);
 - (ii) Family Hippopotamidae - *Hippopotamus amphibius* (hippopotamus);
 - (iii) Family Suidae: Genus *Phacochoerus* (warthogs) - All species;
2. Order Carnivora:
 - (i) Family Canidae: Genera *Canis*, *Chrysocyon*, *Cuon*, and *Lycaon* (wolves, jackals, dingos, etc.) - All species, except as provided in Rule [391-4-2-.16](#) for coyotes;

- (ii) Family Felidae (cats) - All species;
 - (iii) Family Hyaenidae (hyenas) - All species;
 - (iv) Family Mustelidae - Gulo gulo (wolverine);
 - (v) Family Ursidae (bears) - All species;
3. Order Diprotodontia: Family Macropodidae (Kangaroos, wallabies, wallaroos, etc.) - All species;
 4. Order Perissodactyla: Family Rhinocerotidae (rhinoceroses) - All species;
 5. Order Proboscidea (elephants) - All species;
 6. Order Primates:
 - (i) Family Hominidae: Genera Gorilla, Pan, and Pongo (Gorillas, Chimpanzees, Orangutan, etc.) - All species;
 - (ii) Family Hylobatidae (gibbons, siamangs, etc.) - All species;
 - (iii) Family Cercopithecidae: Genera Macaca, Mandrillus, Theropithecus, and Papio (macaques, mandrills, drills, and baboons) - All species;

(b) Reptiles:

1. Order Crocodylia (alligators and caimans, crocodiles, gharials) - All species;
2. Order Squamata:
 - (i) Family Atractaspididae (mole-vipers or stiletto snakes) - All species;
 - (ii) Family Colubridae:
 - (I) Genera Balanophis, Macropisthodon, and Rhabdophis (keelbacks) - All species;
 - (II) Genus Dispholidus (boomslangs) - All species;
 - (III) Genus Thelotornis (twig snakes) - All species;
 - (IV) Genus Thrasops (bold-eyed tree snakes) - All species;
 - (iii) Family Elapidae - All species;

(iv) Family Helodermatidae (Gila monster and beaded lizards) - All species;

(v) Family Viperidae (vipers and pit vipers) - All species;

(c) Fishes:

1. Order Characiformes: Family Serrasalminidae: Subfamily Serrasalminae (pirhanas) - All species;
2. Order Gymnotiformes: Family Gymnotidae (gymnotid eels): Genus *Electrophorus* - All species;
3. Order Myliobatiformes: Family Potamotrygonidae (American stingrays) - All species;
4. Order Perciformes:
 - i. Family Synanceiidae (stonefishes): Genus *Synanceia* - All species;
 - ii. Family Trachinidae (weeverfishes) - All species;
5. Order Siluriformes: Family Trichomycteridae (candirus, etc.): Genus *Vandellia* - All species;
6. Species listed in subparagraphs (c)2 and (c)4 and held in aquaria or tanks in Georgia before the effective date of this rule may be possessed, sold, transported or transferred for a 12-month period following the effective date of this rule;

(d) Invertebrates:

1. Order Scorpiones:
 - (i) Family Buthidae:
 - (I) Genus *Androctonus* (fattail scorpions) - All species;
 - (II) Genus *Centruroides* (bark scorpions) - All species;
 - (III) Genus *Parabuthus* (burrowing thicktailed scorpions) - All species;
 - (IV) *Leiurus quinquestriatus* (deathstalker); and

- (ii) Family Scorpionidae - *Opisthophthalmus glabrifons* (yellow-legged creeping scorpion).

Rule 391-4-8-.05. Wild Animals, License Required.

- (1) The following wild animals are subject to licensing requirements pursuant to O.C.G.A. Sec. [27-5-4](#).

- (a) **Mammals**

- 1. Order Afrosoricida (golden moles, tenrecs) - All species;
- 2. Order Artiodactyla (even-toed ungulates) - All species except Bison bison (buffalo), Bubalus bubalus (water buffalo), Genus Lama (llamas), and Genus Vicugna (alpaca);
- 3. Order Carnivora (weasels, ferrets, cats, bears, wolves, etc.) - All species, except that European ferret (*Mustela putorius furo*) may be sold, purchased, exhibited, or held as a pet without a license or permit; provided, however, that the ferret owner has in possession valid documentation that each ferret was sexually neutered prior to seven months of age and is vaccinated against rabies with a properly administered vaccine approved for use on ferrets by the United States Department of Agriculture;
- 4. Order Chiroptera (bats) - All species;
- 5. Order Cingulata (armadillos, etc.) - All species;
- 6. Order Dermoptera (flying lemurs) - All species;
- 7. Orders Diprotodontia and Peramelemorphia (Marsupials) - All species except that *Petaurus breviceps* (sugar glider) may be sold, purchased, exhibited, or held as a pet without a license or permit if the owner thereof possesses valid documentation that the animal originated from a source inspected and regulated by the United States Department of Agriculture;
- 8. Order Erinaceomorpha (hedgehogs) - All species;

9. Order Hyracoidea (conies) - All species;
10. Order Lagomorpha (Rabbits, hares, etc) - All species;
11. Order Macroscelida (elephant shrews) - All species;
12. Order Perissodactyla (odd-toed ungulates) - All species;
13. Order Pholidota (pangolins, scaly anteaters, etc.) - All species;
14. Order Pilosa (sloths, etc.) - All species;
15. Order Primates (monkeys, apes, etc) - All species;
16. Order Rodentia (rats, mice, etc.) - All species except Genera Cavia, Chinchilla, Gerbillus, Meriones, Mesocricetus, and species Mus musculus, Rattus rattus, and Rattus norvegicus;
17. Order Sirenia (manatees, dugongs) - All species;
18. Order Scandentia (tree shrews) - All species;
19. Order Soricomorpha (shrews, moles, etc) - All species;
20. Order Tubulidentata (aardvark) - All species;

(b) **Birds:**

1. Order Accipitriformes (Hawks, eagles, hawk-eagles, sea-eagles, harriers, osprey, Old World vultures, and kites) - All species;
2. Order Cathartiformes (New World vultures and condors) - All species;
3. Order Cuculiformes: Family Cuculidae (cuckoos) - All species;
4. Order Falconiformes (Forest-falcons, falcons, and caracaras) - All species;
5. Order Galliformes: Family Phasianidae (turkeys) - Genus Meleagris;
6. Order Passeriformes:
 - (i) Family Alaudidae (larks) - Alauda arvensis (Eurasian sky lark);
 - (ii) Family Corvidae (crows, ravens, etc.) - All species;
 - (iii) Family Emberizidae (Old World buntings, etc.) - Emberiza citrinella (yellow hammer);

- (iv) Family Icteridae (New World blackbirds, grackles, orioles, etc.):
Genera *Molothrus*, *Quiscalus*, and *Agelaius* - All species;
 - (v) Family Ploceidae (sparrows, weavers, queleas, weaver finches, etc.):
 - (I) Genus *Passer* - All species except *Passer domesticus* (English house sparrow);
 - (II) *Ploceus capensis* (cape weaver);
 - (III) *Ploceus philippinus* (Baya weaver);
 - (IV) Genus *Quelea* - All species;
 - (vi) Family Pycnonotidae (bulbuls) - All species;
 - (vii) Family Turdidae (thrushes, Old World blackbirds, fieldfare, etc.):
Genus *Turdus* - All species;
 - (viii) Family Zosteropidae (white eyes): Genus *Zosterops* - All species;
 - (ix) Family Estrildidae (waxbills, ricebirds, munias, etc.) - *Padda oryzivora* (Java sparrow);
 - (x) Family Sturnidae (starlings, mynas, etc.) - All species, except *Sturnus vulgaris* (starling) and *Gracula religiosa* (Hill mynas);
7. Order Strigiformes (owls) - All species;
8. The species listed in subparagraphs (b)1, (b)4, and (b)7 may be possessed by individuals having a valid Georgia falconry license or permit without obtaining a wild animal license;

(c) **Reptiles:**

- 1. Order Squamata:
 - (i) Family Pythonidae - *Python molurus* (Indian rock python);
 - (ii) Family Pythonidae - *Python bivittatus* (Burmese python);
 - (iii) Family Teiidae - *Salvator merianae* (Argentine black-and-white tegu);
 - (iv) Family Varanidae - *Varanus niloticus* (Nile monitor);

2. Order Testudines:
 - (i) Family Pelomedusidae - Pelomedusa subrufa (African helmeted turtle);
 - (ii) Family Trionychidae (softshell turtles) - Pelodiscus sinensis (Chinese softshell turtle);
3. The species listed in subparagraph (c) shall only be licensed for scientific, educational, or public exhibition purposes consistent with O.C.G.A. Sec. [27-5-4](#); provided, however, that such species possessed on or before the effective date of this rule may be held as a pet without a license or permit provided that the owner tags and registers all individuals with the Georgia DNR Law Enforcement Division within 12 months following the effective date of this rule;

(d) Amphibians:

1. Order Anura: Family Bufonidae (true toads): Genus Rhinella (cane toads) - All species;

(e) Fishes:

1. Order Osteoglossiformes: Family Arapaimidae (Arapaimas) - All species;
2. Order Characiformes:
 - (i) Family Characidae (characins) - Psalidodon fasciatus (banded Astyanax);
 - (ii) Family Erythrinidae (trahiras) - All species;
3. Order Cypriniformes:
 - (i) Family Xenocyprididae (east Asian minnows) - Ctenopharyngodon idella (grass carp);
4. Order Siluriformes:
 - (i) Family Clariidae (airbreathing catfishes) - All species;
 - (ii) Family Heteropneustidae (airsac catfishes, giant walking catfishes) - All species;
 - (iii) Family Sisoridae (sisorid catfishes): Genus Bagarius (goonch catfishes) - All species;

5. Order Synbranchiformes: Family Synbranchidae (swamp eels) - All species;
6. All exotic fishes which are not held in aquaria or tanks. This includes any fish species meeting the definition of wild animals. This subparagraph shall not apply to any species of fish regulated by any rule in this Subject, to domestic fish as defined in 27-1-2(23), or by any other Georgia law;
7. Species listed in subparagraphs (e)1, (e)2(ii), (e)4(iii), and (e)5 and held in aquaria or tanks in Georgia before the effective date of this rule may be possessed, sold, transported, or transferred for a 12-month period following the effective date of this rule;

(f) Invertebrates:

1. Order Architaenioglossa:
 - (i) Family Ampulariidae: Genus Pomacea (apple snails) - All species;
 - (ii) Family Viviparidae: Genus Cipangopaludina (asian mystery snails) - All species;
2. Order Decapoda:
 - (i) Family Astacidae (crayfishes) - All species;
 - (ii) Family Cambaridae (crayfishes) - All species, except that *Cambarellus* spp., *Procambarus clarkii* (red swamp crayfish), and *Procambarus zonangulus* (White River crayfish) may be sold, purchased or possessed without a license or permit;
 - (iii) Family Cambaroididae (crayfishes) - All species;
 - (iv) Family Parastacidae (crayfishes) - All species;
 - (v) Family Penaeidae (penaeid shrimps) - All species, except that dead penaeid shrimps may be possessed without a license when purchased for human consumption;
3. Order Littorinimorpha; Family Tateidae: - *Potamopyrgus antipodarum* (New Zealand Mud Snail);
4. Order Neogastropoda: Family Nasseridae - *Anentome helena* (assassin/bumblebee snail);
5. Order Unionida:

- (i) Family Etheriidae (etheriid mussels) - All species;
 - (ii) Family Hyriidae (hyriid mussels) -All species;
 - (iii) Family Iridinidae (iridinid mussels) - All species;
 - (iv) Family Mycetopodidae (Mycetopodid mussels) - All species;
 - (v) Family Unionidae: Genera Anodonta and Sinanodonta (pond mussels) - All species;
6. All freshwater and marine invertebrate wild animals which are not held in aquaria or tanks. This subparagraph shall not apply to any species of invertebrate regulated by any other rule in this Subject;
7. Species listed in subparagraphs (f)1, (f)2, (f)3, (f)4, or (f)5 and held in aquaria or tanks in Georgia before the effective date of this rule may be possessed, sold, transported or transferred for a 12- month period following the effective date of this rule; and
8. The species listed in subparagraph (f)1 shall only be licensed for scientific purposes consistent with O.C.G.A. Sec. [27-5-4](#).

History. Original Rule entitled "Wild Animals, License Required" adopted. F. Nov. 14, 2022; eff. Dec. 4, 2022.

Subject 391-4-9. GENERAL REGULATIONS.

Rule 391-4-9-.01. Scientific Collecting Permits.

- (1) Purpose. The purpose of this rule is to establish administrative procedures to be followed by applicants and/or holders of scientific collecting permits and to discourage excessive duplication of effort and reduce excess collecting.
- (2) Definition. Unless the context clearly requires otherwise, the following terms as used in this rule shall have the following meanings:
- (a) "Collection report" means a summary, prepared by the permittee, which details collections of the previous year and includes data on species collected, dates, numbers, methods, locations, and disposition of specimens;

- (b) "Master permittee" means a person to whom a scientific collecting permit has been issued, which permit allows him to authorize students, assistants, aides, employees or field workers to assist with collections under his supervision;
- (c) "Project proposal" means a document which outlines proposed research activities that require scientific collecting permits and justifies the need for scientific collecting. The project proposal shall explain specific objectives, methods, location, frequency of collection, number of individuals needed, and the planned disposition of specimens to be taken;
- (d) "Scientific collecting permit" means a permit which authorizes one to take, possess, capture, kill, ship or transport any of the wildlife of this State, or the plumage, skin or body thereof, or the nest of eggs of the same for scientific purposes according to the rules and regulations promulgated by the Board of Natural Resources;
- (e) "Special purpose permit" means a permit that grants privileges beyond that of a scientific collecting permit, i.e., possession of specimens collected for longer than sixty days following expiration of the scientific collecting permit;
- (f) "Sub-permittee" means a student, assistant, aide, employee or field worker who is working under the supervision of and is authorized to collect wildlife by a master permittee.

(3) Application for Permit.

- (a) A specific request must be made for the issuance of a master permit. Applicants must clearly justify their need for a master permit.
- (b) Unless otherwise specified on the permit, scientific collecting permits shall be effective from April 1 through March 31.
- (c) Student collectors must submit a project proposal and a written and signed endorsement thereof by their major professor.
- (d) A five dollar (\$5.00) fee per permit must accompany the application. Payment must be made by certified check or money order made payable to the Georgia Department of Natural Resources.
- (e) A collection report detailing the previous year's collection activities is required with any renewal application.

(4) Use of Permit.

- (a) Permittees and sub-permittees must have their permit in their possession when collecting. Permits are non-transferable, except that a master permittee may

designate students, assistants, aides, employees, or field workers assistants in collecting. All such sub-permittees must have on their person a copy of the master permit and a letter of authorization issued by the master permittee to them. The master permittee shall be responsible for any violations by any such sub-permittees and shall be responsible for maintaining all records.

- (b) Instructors whose class members are directed to collect wildlife are responsible for assuring that only a representative sample of animals are retained and sacrificed for class use.
 - (c) All live specimens retained must be humanely cared for. All collectors are expected to use good judgment when exercising the privileges of their collecting permit. Collectors should be as prudent and humane as possible in collecting and capture activities.
 - (d) The District Law Enforcement Office of the Department of Natural Resources in each area of collection must be notified at least three (3) days in advance of the date and place specimens are to be collected, the species to be collected, the method of collection and the permit number.
- (5) Disposition of Specimens. In order to ensure the maximum use of all specimens collected under the auspices of a scientific collecting permit, the disposition of wildlife, their carcasses, parts, products, or progeny thereof shall be as follows:
- (a) Live, uninjured and unimpaired specimens which could reasonably be expected to survive in the wild, shall be returned to the location of capture and released. Records of such releases shall be indicated on the scientific collection report.
 - (b) All other specimens taken and possessed under authorization of a scientific collection permit must be denoted and transferred to a public, scientific, or educational institution within sixty (60) days following expiration of the permit, unless the permittee has been issued a special purpose permit authorizing possession for a longer period of time. Specimens not suitable for donation must be destroyed. Edible specimens shall be donated to a charitable institution and receipt obtained. Receipts must be attached to annual collection report.
- (6) Reports.
- (a) A collection report detailing the previous year's collecting activities must be submitted with any request for renewal of a permit. Individuals not renewing a permit must submit a report by March 31, or within sixty (60) days after collecting, whichever is later. Data should be provided on species collected, dates, location, and disposition of specimens.
 - (b) A listing of all publications, research papers, theses, progress reports, etc. derived from the study of such collections, shall be submitted with the annual collection

report. Copies of such material shall be made available to the Department of Natural Resources upon request.

- (7) State parks, municipal parks, public museums, public zoological parks, and public scientific or educational institutions may possess law-fully acquired wildlife without a permit, provided the wildlife may be acquired only from persons authorized by this paragraph; or persons authorized by permit from this department; or from Federal or State game authorities by the gift of seized, condemned, or sick or injured wildlife; or through salvage of wildlife which have been killed as the result of unintentional accident or an act of nature; and also provided that it shall be unlawful to possess migratory birds without authorization from the United States Fish and Wildlife Service.

Rule 391-4-9-.02. Firing Ranges.

- (1) Permissible Firearms and Ammunition on Ranges Owned or Operated by the Wildlife Resources Division:
 - (a) Only firearms utilizing single projectile ammunition may be used on firing ranges, except that shotguns utilizing multiple projectile ammunition may be fired at stationary targets positioned such that discharged pellets will strike between the base and halfway up the backstop.
 - (b) Sawed-off shotguns, sawed-off rifles, machine guns, dangerous weapons, and silenced weapons as defined in O.C.G.A. § [16-11-121](#), and any weapon firing more than once with a single trigger pull are prohibited on firing ranges unless approved by the department in advance for special events. However, sawed-off shotguns, sawed-off rifles and silenced weapons may be used by any person provided that such person has in possession proof of registration of such sawed-off shotgun, sawed-off rifle and silencer consistent with the National Firearms Act and such person is in compliance with O.C.G.A. § [16-11-124\(4\)](#).
 - (c) Rifles using centerfire cartridges .50 caliber or larger are prohibited.
- (2) General Range Rules:
 - (a) Alcoholic beverages as defined in O.C.G.A. [3-1-2](#) are prohibited on firing ranges.

- (b) No person under the influence of alcohol or drugs is permitted on a firing range.
 - (c) Smoking is prohibited on firing ranges.
 - (d) Non-shooters shall remain at least six feet behind the firing line when a shooter is at the firing line, except a coach or instructor aged eighteen (18) years or older while directly advising the shooter at the firing line.
 - (e) Tracer, incendiary or explosive ammunition is prohibited.
 - (f) Targets shall be constructed of materials that will not cause bullet ricochet. Metal targets are prohibited unless approved by the department in writing prior to use.
 - (g) Targets shall be positioned such that bullets will strike between the base and halfway up the backstop.
 - (h) Shooting at flying or thrown objects is prohibited except with shotguns and shot shells in areas specifically designated by the department for such shooting activities.
 - (i) Any person under eighteen (18) years of age shall be directly supervised by an adult eighteen (18) years old or older.
 - (j) All objects, trash, targets, and spent cartridge hulls must be removed by firing range users when leaving the range.
 - (k) Range use is allowed only in accordance with range hours and dates posted at the firing range.
 - (l) Shooters shall fire only at the target directly down range of that person's position.
 - (m) A person at or near the firing line shall wear hearing and eye protection when firearms are being discharged.
 - (n) Double tapping and rapid fire are prohibited. Shooters shall allow at least one second between shots.
 - (o) No person shall shoot a firearm or archery tackle when any other person is down range or otherwise between the shooter and the target.
- (3) Handling of firearms:
- (a) In the event of a firearm malfunction, hang-fire, misfire or squib load, the shooter shall keep the firearm pointed down range, advise all persons at the firing line of the malfunction, and unload as soon as possible. If the firearm cannot be cleared it must be removed from the range.

- (b) In the event of a firearm malfunction, all firearms at the firing line shall be unloaded with actions open for the duration of the malfunction.
 - (c) All firearms on the firing line shall be grounded and unloaded with actions open whenever anyone is downrange.
 - (d) The muzzle of any firearm on the firing line shall be pointed down range at all times.
 - (e) The muzzle of a firearm in the firing position shall be in front of the front edge of the bench upon which it rests.
 - (f) Muzzle loading firearms shall be loaded only with single charge dispensers; pouring powder from larger containers directly into a muzzleloader is prohibited.
 - (g) Loading muzzleloaders must be done at least six (6) feet behind the firing line whenever another muzzle loading firearm is on the firing line.
 - (h) Shooters must be at the firing line and the muzzle pointed downrange before capping or priming muzzle loading firearms.
 - (i) Containers of muzzleloader propellant shall remain closed except when filling a single charge dispenser.
- (4) Range Safety Officers:
- (a) Any person on the range shall obey the range commands of department Range Safety Officers. This includes, but is not limited to: Begin Fire commands, Cease Fire commands, and Resume Fire commands.
 - (b) Range Safety Officers may call a Cease Fire any time an unsafe condition is recognized on the range. Any person on the range shall immediately obey a Cease Fire command by grounding all firearms with actions open.
 - (c) It is unlawful for any person on the range to disregard safety related instructions issued by a Range Safety Officer.
- (5) Shotgun Ranges:
- (a) Shooting is permitted only from designated shooting stations on trap, skeet and 5-stand ranges, in a safe direction down range.
 - (b) Firearms shall be unloaded with the action open until the shooter is at the designated shooting stations on the trap, skeet or 5-stand range.
 - (c) No more than two (2) shells shall be loaded in a shotgun at any time.

- (d) Waiting shooters shall remain a minimum of 3 feet behind the shooter at the shooting station, except that a person aged eighteen (18) years or older who is coaching or pulling may stand directly behind the shooter.
 - (e) Shot sizes larger than 7 1/2 are prohibited.
 - (f) No one is permitted down-range from the shooting stations at any time for any reason, except for Range Safety Officers in accordance with normal duties.
 - (g) First time shotgun range users must undergo a safety briefing and range orientation by the Range Safety Officer.
 - (h) Shotguns capable of holding 2 different gauge shells at the same time are prohibited.
- (6) Archery Ranges:
- (a) Arrows shall only be nocked onto the bowstring when standing on the shooting line and preparing to shoot.
 - (b) Archers must shoot directly down range.
 - (c) Archers shall keep nocked arrows pointed down range at all times. Pointing the arrow upward while drawing (sky drawing) is prohibited.
 - (d) An archer may release an arrow only from the shooting line or position.
 - (e) Bows must be hung on the bowhanger behind the shooting line when waiting to shoot or any person is down range retrieving arrows.
 - (f) A person may place a paper face on an existing target provided that all paper is removed from the range or placed in a trash receptacle immediately after use. Personal targets are not allowed on range.
 - (g) Shooting at flying or thrown objects is prohibited.
 - (h) Non-shooters must remain at least six feet behind the archery line/post whenever any archer is shooting, except that a person aged eighteen (18) years or older who is coaching may stand immediately behind the pupil.
 - (i) Only arrows with field or target points shall be used or possessed on range.

Rule 391-4-9-.03. Wildlife Rehabilitation Permits.

- (1) Definitions. Unless the context clearly requires otherwise, the following terms as used in this Rule shall have the following meanings:
 - (a) Rehabilitation means the action or process of restoring wildlife to a condition of health and shall include maintaining a state of health in young wildlife to an age of independence;
 - (b) Veterinarian means any person possessing a valid license to practice veterinary medicine in the State of Georgia;
 - (c) All other terms shall have the meanings ascribed to them in Section [27-1-2](#) of the Game and Fish code.

- (2) Permits - When used.
 - (a) Pursuant to authority granted in Section [27-2-22](#) of the Game and Fish Code, the Department may issue a rehabilitation permit, conditioned as deemed appropriate to assure compliance with this Rule, to any person determined by the Department to possess the experience or training or both necessary to restore, or in the case of dependent young to maintain the health of ill, injured or dependent wildlife until it may be returned to the wild or otherwise disposed of in a manner approved by the Department. The qualifications for the permittee include, but are not limited to:
 1. Sufficient knowledge of the type(s) of wildlife sought to be rehabilitated to assure identification of the species(s) and familiarity with food preferences thereof.
 2. Training or experience or both in the handling, care and treatment of the type(s) of wildlife (including dependent young) sought to be rehabilitated.
 3. Applicants who are not licensed veterinarians must score a minimum of 80 percent on a general examination on wildlife rehabilitation developed by the Department. Any applicant not achieving this minimum score may retake the test after 30 days. Applicants may be exempted from this testing requirement upon demonstration of sufficient knowledge and skills as determined by the Game Management Regional Supervisor having jurisdiction in the geographical area where rehabilitation is to take place.

4. Injured or orphaned wildlife that, prior to being rehabilitated, are determined to be nonreleasable to the wild shall be euthanized unless the Department grants an exception for a specific animal. Injured or orphaned wildlife that subsequent to rehabilitation efforts are determined by the Department to be nonreleasable to the wild shall be disposed of in a manner approved by the Department.
- (b) College-level training and experience in the fields of veterinary medicine or wildlife biology are prima facie evidence of qualification. Training or experience as a veterinary assistant, zoo employee or pet shop employee working with animals, or as a falconer, may be some evidence of qualification depending upon the type(s) of wildlife sought to be rehabilitated. Permits for rehabilitation of birds of prey (raptors) may be issued only to veterinarians, falconers possessing a permit under Section [27-2-17](#) of the Game and Fish Code, or persons who are able to establish that they have had at least two years of experience in holding, training, and caring for raptors. Because of the public health risk associated with rabies infection in bats, bobcats, coyotes, foxes, raccoons, and skunks, rehabilitation permits for those species will be issued only to veterinarians; or persons that:
 1. Have a least two (2) years experience as a licensed wildlife rehabilitator and have taken in at least 20 individuals for care.
 2. Score a minimum of 85 percent on a qualifying examination covering all aspects of rabies including symptoms, reporting, and other areas as determined by the Department.
 3. Receive rabies pre-exposure vaccination and can demonstrate rabies antibody levels that are recommended for adequate protection before a permit is issued and at least every five years thereafter.
 - (c) The issuance of a rehabilitation permit is further conditioned upon the Department's determining that an applicant's rehabilitation services are needed or are likely to be utilized in the area he/ she proposes to operate.
 - (d) Applications for rehabilitation permits shall be submitted, on forms provided by the Department, to the Special Permit Unit at the address indicated on said form.
 - (e) Nothing in this rule shall be construed to limit or prohibit a licensed veterinarian or licensed veterinary technician from providing emergency care, vaccination or other veterinary care that otherwise falls within the scope of professional and ethical judgment.
 - (f) Persons permitted to rehabilitate bats, bobcats, coyotes, foxes, raccoons, and skunks shall be required to contact the appropriate rabies control authority as prescribed by the Department to report possible rabies exposures; to hold these

species in arrival groups and in isolation for the duration of convalescence and release rehabilitated animals only in areas designated by the Department; and to submit for rabies testing all bats, bobcats, coyotes, foxes, raccoons, and skunks accepted for care which are dead on arrival or which subsequently die during care.

(3) Permits - Term.

- (a) Rehabilitation permits may be issued for a period not to exceed five years and shall expire at the end of the fifth calendar year (i.e., December 31).
- (b) Prior to expiration of an initial permit, a permittee may apply for permit renewal. A renewal permit may be granted only if, upon inspection of the reports or records required by Section (6) hereof and reinspection of applicant's facilities, it appears that applicant has complied with Section [27-2-22](#) of the Game and Fish Code and this Rule and that there is a continuing need for his/her rehabilitation services in the area.
- (c) If the Department determines, in any case wherein a person has notified the Department that such person has found or is holding any recently found ill, injured, or dependent wildlife, that the circumstances clearly indicate it to be in the best interest of the wildlife that treatment or care not be delayed pending assignment to a permitted rehabilitator, it may, at the request of such person, waive such of the qualifications and facilities requirements herein as are necessary and justified under the circumstances and immediately issue to the finder or holder of such wildlife an emergency onetime rehabilitation permit. Such permits will not be issued for any wildlife requiring care of a nature which the Department concludes the wildlife finder or holder is incapable of providing. Such permits shall expire at the earlier of the date the wildlife is fully rehabilitated and released, or the date of expiration stated herein. If an expiration date is specified in the permit, the wildlife shall be surrendered to a Departmental representative for appropriate disposition on or before that date.

(4) Facilities - Generally. A rehabilitation permit will be issued only after the Department has inspected the applicant's wildlife holding facilities and has determined that they conform with Section [27-5-6](#) of the Game and Fish Code. In order to be approved, facilities must also be constructed in a manner sufficient and of a dimension adequate to provide security and protection for both the wildlife held therein and humans or other animals which may be or come in close proximity thereto. The facilities must also be located so as to provide the seclusion necessary for recuperation from illness or injury.

(5) Facilities for Raptors. In addition to the requirements of Section (4) above, raptors may be held in facilities that either:

- (a) Allow for the bird(s) to be tethered to a perch when appropriate, with sufficient room in the enclosure to allow full wing extension without breakage of flight feathers; or

- (b) Area equipped with an appropriate perch for each member of each specie held and with vertical bars over any windows and are free from any other hazards to the health and safety (including plumage) of the birds so held.
- (6) Other Rehabilitation Requirements.
- (a) In all other respects, e.g. relating to feeding, watering, sanitation, veterinary care, handling, separation, and transportation of wildlife, as well as qualifications of employees, permittee's rehabilitation practices must comply with Section [27-5-6](#) of the Game and Fish Code.
 - (b) Permittee shall maintain complete records on all wildlife held for purposes of rehabilitation, which records shall document at least the following information for each animal held; annually these data shall be compiled into a report which shall be submitted to the Department not later than January 31 following each year in which a permit is held:
 - 1. Date received;
 - 2. Species;
 - 3. Condition requiring rehabilitation;
 - 4. Treatment administered and results;
 - 5. Final disposition and date thereof.
 - (c) In the case of migratory birds, permittees shall also comply with any applicable federal regulations or requirements for rehabilitation.
- (7) Enforcement. Upon determination by the Commissioner that any permittee has violated Section [27-2-22](#) of the Game and Fish Code, any provision of this or any other applicable Rule of the Department, or any condition of his/her permit, he may, in his discretion, proceed:
- (a) Pursuant to Section [27-1-37](#) of the Game and Fish Code, to issue an administrative order to the permittee to take corrective action or authorizing other appropriate enforcement action including seizure of wildlife held by permittee; or
 - (b) To initiate criminal prosecution pursuant to Section [27-1-38](#) or civil penalty proceedings pursuant to Section [27-1-36](#) of the Game and Fish Code; or
 - (c) To deny, revoke, suspend or refuse to renew the rehabilitation permit pursuant to Section [27-2-25](#) of the Game and Fish Code.

History. Original Rule entitled "Wildlife Rehabilitation Permits" adopted. F. Aug. 10, 1981; eff. Aug. 30, 1981.

Amended: F. July 17, 1991; eff. August 6, 1991.

Amended: ER. 391-4-9-0.37-.03 adopted. F. Nov. 3, 1997; eff. Oct. 29, 1997, the date of adoption.

Amended: F. May 30, 2003; eff. June 19, 2003.

Rule 391-4-9-.04. Wildlife Exhibition Permits.

- (1) Purpose. The purpose of these regulations is to protect wildlife and the citizens of Georgia by establishing minimum requirements for obtaining a wildlife exhibition permit and establishing standards for holding and exhibiting wildlife.
- (2) General Regulations. A wildlife exhibition permit shall not be issued unless the following conditions are met:
 - (a) The applicant must be at least eighteen (18) years of age;
 - (b) Facilities for holding and exhibiting wildlife must comply with O.C.G.A. [27-5-6](#) and must meet minimum requirements as specified by the Department;
 - (c) Applicants proposing to exhibit mammals must first obtain an exhibitor's license from the United States Department of Agriculture, Animal and Health Inspection Service (USDA/APHIS), or provide documentation that the applicant is exempt from USDA/APHIS requirements; and
 - (d) Applicants proposing to exhibit migratory birds regulated by the United States Fish and Wildlife Service (USFWS) must obtain an appropriate permit from USFWS before obtaining or exhibiting migratory birds. A copy of USFWS permits shall be sent to the Department, Special Permit Unit.
- (3) Fixed facilities. Wildlife exhibition permits for fixed facilities shall not be issued unless the following criteria are met:
 - (a) A fixed facility for exhibiting wildlife shall be open to the public for a time no less than 30 hours per week for at least six (6) months each year during reasonable hours of the day. A sign specifying the days and hours the facility is open to the public shall be placed in a prominent location visible to the public and in close proximity to the facility.
 - (b) Each cage or pen shall be signed identifying the animal(s) by common and scientific name. Additional information about each species shall be provided through interpretative signs and/or audio-visual material.
- (4) Mobile Educational Programs. For the purpose of this rule, mobile educational program shall mean any educational program using live wildlife and which program is conducted

outside of the enclosure where the wildlife is permanently housed. Conditions for conducting mobile educational programs are as follows:

- (a) Residents holding wildlife for use in educational programs shall conduct a minimum of twelve (12) program hours per year. Program hours must be documented and provided at the time of renewal;
 - (b) Animals must be handled so there is minimal risk of harm to the public and animals with sufficient distance allowed between the animals and the viewing public to assure safety to both the public and the animals as determined by the Department. Animals shall not be handled by the public, except that nonvenomous reptiles and amphibians may be handled by members of the public under close supervision of the permittee.
- (5) Exhibition of rabies prone species.
- (a) Bats, bobcats, coyotes, foxes, raccoons, and skunks shall not be exhibited in mobile educational programs.
 - (b) In fixed facilities, the exhibition of bats, bobcats, coyotes, foxes, raccoons, and skunks will be made in a facility constructed in a manner satisfactory to the Department to ensure that the public cannot gain access to animals which may have exposure to free-living rabies vector species.
 - (c) Bats, bobcats, coyotes, foxes, raccoons, and skunks shall be kept in isolation from contact with other exhibit animals and free-living wildlife for a minimum of 180 days before exhibition in fixed facilities.
 - (d) Persons with specific responsibilities related to handling, feeding, or caring for animals at facilities which exhibit bats, bobcats, coyotes, foxes, raccoons, and skunks shall receive rabies pre-exposure vaccination and must demonstrate rabies antibody levels that are recommended for adequate protection before a permit is issued and at least every five years thereafter.
- (6) Exemptions.
- (a) Educational institutions; federal, state, city, county, or municipal governments or their agencies; or transient circuses, shall receive a wildlife exhibition permit at no cost, provided that such exhibition shall comply with all laws and regulations relating to handling, care, confinement, and transporting of wildlife and rules contained herein.
 - (b) Falconers licensed in Georgia shall not be required to purchase a wildlife exhibition permit to conduct mobile educational programs with raptors held under their Georgia State/Federal falconry license.

- (c) Residents exhibiting wildlife at both a fixed facility and at mobile educational programs shall meet the requirements of 391-4-99-.04(3)(a) or (4)(a), but shall not be required to comply with both paragraphs (3)(a) and (4)(a).
- (d) Persons issued wildlife exhibition permits or licenses prior to passage of this rule shall have until November 1, 1998 to comply with these regulations.
- (e) Nothing in this rule shall be construed to limit or prohibit a licensed veterinarian or licensed veterinary technician from providing emergency care, vaccination or other veterinary care that otherwise falls within the scope of professional and ethical judgment.

(7) Penalties.

- (a) Wildlife exhibitors in violation of this rule shall have their license or permit revoked or suspended by the Department for a period of not less than two (2) years.

Rule 391-4-9-.06. Georgia WRD Lands Pass.

- (1) The purpose of this regulation is to implement a Georgia WRD Lands Pass (Pass) system for use, other than hunting, fishing, trapping, or camping, of wildlife management areas, public fishing areas and other designated sites on lands operated or managed by the Wildlife Resources Division (WRD), provide for exemptions from the requirement to purchase a Pass, establish fees for Passes, and provide for the availability of a Pass.

- (2) The posting of signs at the entrance to a wildlife management area, public fishing area or other designated areas or sites on WRD lands stating that a Pass is required shall constitute sufficient notice for the entire wildlife management area, public fishing area or other designated site on WRD lands.
- (3) No person age 16 or older shall enter upon designated lands, areas or sites operated or managed by WRD without first obtaining a valid Pass except that any person who possesses a valid Georgia license that allows hunting or fishing on state land is exempt from this requirement. Provided further that individuals volunteering or participating in department sponsored events or activities on such lands are exempt from Pass requirements during the event or activity. Individuals that have paid WRD for camping and persons directly associated with paid camping, as prescribed by WRD, are exempt from the Pass requirement on such lands during their paid camping dates.
- (4) A Pass is an individual requirement. The cost of a Pass is: resident annual \$30, and nonresident annual \$60. A Pass is valid for not more than 365 days from the date of purchase.
- (5) Any organization or individual who desires to sponsor or conduct an event, activity, or series of events or activities on lands operated or managed by WRD may be required to obtain a "Right of Entry" agreement from the department. Such organization or individual shall formally request a "Right of Entry" agreement from the department not less than 30 days prior to the event, activity, or series of events or activities. A "Right of Entry" agreement may restrict the event, activity, or series of events or activities to specific locations, number of participants, and specific times; and may require the posting of damage deposits or bonds. Events that conflict with one or more of the primary uses of lands managed by WRD may not be allowed. If the event is approved, the "Right of Entry" agreement may require each participant to obtain a Pass. For wildlife management areas on U.S. Forest Service lands, special use permits, if issued by the U.S. Forest Service shall satisfy the requirement for a "Right of Entry" agreement.
- (6) Passes shall be issued and sold by the department as prescribed by the department.

Rule 391-4-9-.07. Falconry Permits.

- (1) **Purpose.** The purpose of this regulation is to implement rules and regulations pertaining to the issuance of falconry permits and practice of falconry in accordance with federal regulations so as to ensure the continuation of the sport of falconry and continue to conserve the state's birds of prey.

- (2) **Falconry Permitting and Standards.** Permittees shall comply with all standards, requirements, and limitations as provided in [50 C.F.R. 21.29](#), as now or hereafter amended.
- (3) **Golden Eagles.** It shall be unlawful for any person to trap, transport or possess a golden eagle (*Aquila chrysaetos*) unless authorized as provided in 50 C.F.R. Part 22, as now or hereafter amended.
- (4) **Raptor Propagation.** Raptor propagation and activities associated with raptor propagation are permitted in accordance with the provisions of 50 C.F.R. Part 21, as now or hereafter amended. No additional state permit is required; provided, however, that all persons engaging in such activities shall submit one copy of each federally required report to the department at the time such report is submitted to federal authorities.
- (5) **Importation Permits.** Holders of Georgia falconry permits may transport the raptors held under their permits within this state, may remove the raptors from this state for meets, trials, and hunting in other states, and may bring such raptors back into this state without obtaining a Georgia importation permit; provided, however, that any person transporting a raptor into another state shall obtain any permit or license required for such activities by the state into which the raptor is transported. A falconry permittee may import into this state a legally acquired raptor without obtaining a Georgia wildlife importation permit provided that a properly completed federal Form 3-186A Migratory Bird Acquisition/Disposition Report shall accompany each raptor during importation and the permittee complies with all applicable requirements of the state of origin.

Rule 391-4-9-.08. Film Production Wildlife Permit.

- (1) The purpose of this regulation is to protect wildlife and the citizens of Georgia by establishing regulations for the possession and exhibition of wildlife to be used in the film industry. This regulation provides and establishes permit requirements and requirements for animal origin, humane care, use and handling, and reporting.
- (2) Permit Requirements. A Film Production Wildlife (FPW) permit shall not be issued unless the following conditions are met:
 - (a) Application for a FPW permit shall be made on an official application form provided by the department. FPW permits are valid upon issuance date and expire annually on March 31.

- (b) An applicant wishing to possess or provide mammals must possess a valid U.S. Department of Agriculture Animal Welfare Act license and submit a copy of this license with the application for an FPW permit.
- (c) An applicant wishing to possess or provide FPW animals which are currently listed in the Migratory Bird Treaty Act, Bald and Golden Eagle Protection Act, or the Endangered Species Act must possess a valid United States Fish and Wildlife Service (USFWS) permit and submit a copy of this permit with the application for an FPW permit.
- (d) An applicant for a resident FPW permit must be a legal Georgia resident who has a minimum of five years of verifiable film/entertainment industry experience, and who is at least 21 years old. Verifiable experience requires a resume detailing at least five years of professional, documented animal training and handling for film/entertainment industry activities within the previous ten years and must be submitted with the application. Members of the family Cervidae and rabies vector species including: bats, bobcats, coyotes, foxes, raccoons and skunks shall not be imported into Georgia.
- (e) An applicant for a non-resident FPW permit must have a minimum of five years of verifiable film/entertainment industry experience and be at least 21 years old. Verifiable experience requires a resume detailing at least five years of professional, documented animal training and handling for film/entertainment industry activities within the previous ten years and must be submitted with the application. Members of the family Cervidae and rabies vector species including: bats, bobcats, coyotes, foxes, raccoons and skunks shall not be imported into Georgia.
- (f) Anyone who has been convicted of a wildlife or animal welfare violation in Georgia, or the equivalent in another state within the past five years is not eligible for a FPW permit.
- (g) All resident facilities where animals will be housed, maintained or trained shall be inspected by the department prior to issuance of an initial FPW permit. Facilities must comply with the specifications for the humane handling, care, confinement, and transportation of animals set forth in O.C.G.A. § [27-5-6](#) and must meet minimum requirements as specified by the department.
- (h) The application must contain an animal inventory list of the species and number of animals to be possessed under the permit. Once a FPW permit has been granted by the department, the applicant must obtain department approval prior to acquiring any additions to their inventory possessed under this permit.
- (i) Liability insurance is required for the possession of any wildlife to be utilized under the terms of this permit. Prior to the issuance of a FPW permit, any applicant other than a governmental agency or university research facility must provide

proof of liability insurance from a company licensed to do business in this state or an unauthorized insurer if permitted by Chapter 5 of Title 33. Such insurance must be maintained in force and effect and cover claims for injury or damage to persons or property in an amount equal to \$40,000.00 for each animal up to a maximum of \$500,000.00.

- (j) An applicant is responsible for, and shall so indicate on the application, any and all costs associated with the escape, capture and disposition of a permitted animal. This includes any such costs incurred by the Department.

(3) General Rules

- (a) This permit is valid only for wildlife species which are native to Georgia. Species not native to Georgia are considered Wild Animals (OCGA § [27-1-2\(75\)](#)) and must be held under a valid Wild Animal License (OCGA § [27-5-4](#)).
- (b) Georgia wildlife permitted under these regulations shall not be taken from the wild and no wildlife shall be released into the wild. Permitted animals must have been obtained from a source permitted or approved by the department.
- (c) Persons with specific responsibilities related to handling, feeding, or caring for rabies vector species including bats, bobcats, coyotes, foxes, raccoons and skunks shall receive rabies pre-exposure vaccination and shall demonstrate rabies antibody levels recommended for adequate protection before a permit is issued and at least every five years thereafter while the permit is valid.
- (d) Each permitted animal shall have an official health certificate signed by a licensed veterinarian. This health certificate shall reference a specific microchip identification tag that has been surgically implanted into the animal by the licensed veterinarian. Veterinary health inspections on all animals possessed under the FWP permit shall be performed annually.
- (e) Permit holder shall allow inspections of premises by department employees for purposes of enforcing these regulations. Inspections may be unannounced and may include, but are not limited to pens, stalls, holding facilities, records and examination of animals as necessary to determine species identification, sex, health and/or implanted microchip number.
- (f) Whenever an animal is present, the specifications for the humane handling, care, confinement, and transportation of animals set forth in OCGA § [27-5-6](#) must be provided in all FWP facilities, film production locations and venues, educational venues, permanent and temporary housing enclosures, and during transport.
- (g) Animals held under an FWP permit may be utilized in the film production industry, or utilized for educational purposes provided that the specific animal(s) being displayed is/are included in the most current animal inventory list submitted

to the department by the applicant. Animals held under an FWP permit may not be used in any photography opportunity with a patron which may allow physical contact between the animal and the patron. Animals held under a FWP permit may not be used in any activity which may allow physical contact between the animal and a member of the general public.

- (h) Animals held under an FWP permit, except rabies vector species, may be displayed at educational program venues by the permit holder or sub-permit holder outside of a secure enclosure provided that these animals are under constant control and immediate physical restraint of the permit holder or sub-permit holder, such restraint precluding any chance of escape or physical contact, intentional or accidental, with any individual other than the permit or a sub-permit holder.

(4) Reporting and Renewal Requirements

- (a) An Annual Report of activities completed under this permit is required when submitting a request for permit renewal. This Annual Report shall be completed on official forms provided by the department.
- (b) FWP permits will not be renewed until all renewal requirements indicated on the renewal application are received. Copies of current USDA, USFWS or other applicable license must also accompany the renewal application.
- (c) Certificate of Veterinary Inspection or other proof of veterinary health examinations for any and all animals held under this permit must be submitted with renewal application.
- (d) A report detailing injuries to any person involving an animal held under this permit, or an injury to any animal held under this permit during the previous year must accompany the renewal application. Reportable injuries include those occurring during housing at primary facility, transport, at temporary housing facilities and during film production activities. Report must contain a narrative describing the circumstances surrounding the injury, identification of remedial measures, conclusive identification of animal(s) involved and disposition of said animals. A reportable injury includes a bite, scratch, or claw wounding, no matter how minor or any other type of injury requiring first aid or more serious medical intervention. For an animal held under this permit, a reportable injury is one that causes unjustifiable physical pain, suffering or death to any living animal, including, but not limited to, any wound, bite, broken bone, damage to organ or tissue, or environment-related stress that requires first aid, veterinary attention, euthanasia or removal from availability for use in film production activities.
- (e) At least 24 hours prior to transporting any permitted animal to a film production or educational venue the FWP permit holder shall notify the Special Permit Unit with details of the job or appearance. These details shall include date, location, type of job, duration of job, travel times, specific animals involved, the permit holder or

sub-permit holder involved and any overnight housing/caging facilities to be used. Contact information for the agent or contractor should also be included.

- (f) Notification of any animal escape must be made to the Special Permit Unit immediately upon detection of the escape event. This notification must include date, time, location, the species of animal that escaped, a description of actions taken to recover the escaped animal and the outcome of the event. Escapes may result in suspension or revocation of the permit. Failure to notify the Special Permit Unit of any escape may result in immediate revocation of this permit.
- (g) Once an FPW permit has been granted by the department, the permit holder shall submit and maintain an up to date accurate written inventory list of animals in possession. This inventory list shall include species, sex, and microchip number of specific animals that are actually in possession of the permit holder. Individual animals must be identifiable through microchip implantation. Permit holder shall maintain records of microchip numbers and make such records available to the department upon demand. The Special Permit Unit must be notified within 48 hours of any changes to this animal inventory list. Deletions must be justified and contain the disposition of the animal. Additions to the list of species being held by a permit holder are subject to approval at the discretion of the department, and may require re-inspection of facilities. Failure to maintain an accurate, up to date animal inventory list may subject the permit holder to revocation or suspension of this permit.
- (h) Any injury (bite, scratch, or claw wounding, no matter how minor, or any other type of injury requiring first aid or more serious medical intervention), accidentally or otherwise incurred by an audience member or any individual of the general public, that is caused by an unpermitted animal, an animal not specifically listed on the most recent inventory submitted to the department, or an animal possessed by an FWP permit holder shall be reported to the department immediately following the incident. Such injuries may subject the permit holder to revocation or suspension of this permit.
- (i) Any unreported injury (bite, scratch, or claw wounding, no matter how minor, or any other type of injury requiring first aid or more serious medical intervention), accidentally or otherwise incurred by an audience member or any individual of the general public, that is caused by a permitted or unpermitted animal may result in a revocation of this permit.

(5) Penalties.

- (a) Film Production Wildlife Permit holders in violation of this rule shall be subject to revocation or suspension of their permit in accordance with O.C.G.A. § [27-2-25](#).

History. Original Rule entitled "Film Production Wildlife Permits" adopted. F. Sep. 6, 2016; eff. Sept. 26, 2016.

Subject 391-4-10. PROTECTION OF ENDANGERED, THREATENED, RARE, OR UNUSUAL SPECIES.

Rule 391-4-10-.01. Purpose.

The purpose of these rules and regulations is to establish the organizational structure and administrative procedures to be followed in the protection of endangered species of plant and animal life. The Department of Natural Resources is authorized by the Wildflower Preservation Act of 1973 (Ga. Laws 1973, p. 333, *et seq.*), the Endangered Wildlife Act of 1973 (Ga. Laws 1973, p. 932, *et seq.*), the laws relating to game and fish (Ga. Laws 1955, p. 483, *et seq.*) as amended, in particular by (Ga. Laws 1968, p. 497, *et seq.*) and other laws administered by the Department of Natural Resources, to promulgate rules and regulations for the protection of designated species. The Department of Natural Resources is required by the Endangered Wildlife Act of 1973 and the Wildflower Preservation Act of 1973 to designate all plant and animal species indigenous to the state which are determined by the Department to be "rare", "unusual", or in "danger of extinction". Such species are then "protected species" and subject to the provisions of the above-cited laws and the rules and regulations of the Department of Natural Resources. The Department is required to review periodically its "protected species" list and to make additions or deletions when appropriate.

Authority: Ga. L. 1973, p. 932.

History. Original Rule entitled "Purpose" was filed on August 5, 1976 as rule [391-4-13-.01](#); effective August 25, 1976.

Amended: Rule renumbered as 391-4-10-.01. Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-10-.02. Definitions.

All terms used in these rules and regulations shall be interpreted in accordance with the definitions as set forth in the Acts or as otherwise herein defined.

- (a) The "**Acts**" as used in these rules refer to the "Wildflower Preservation Act of 1973", the "Endangered Wildlife Act of 1973", and other laws relating to game and fish.
- (b) "**Department**" means the Department of Natural Resources.
- (c) "**Person**" means any natural person, firm, corporation, partnership, proprietorship, local government of the state, or other legal entity.
- (d) "**Protected species**" means those species of plants and animal life which the Department shall have designated as such and has made subject to the protection of these Acts. Protected species shall be interpreted to include those classified as follows:

1. **"Endangered species"** means any resident species which is in danger of extinction throughout all or a significant portion of its range, or one which is designated as endangered under the provisions of the Federal Endangered Species Act of 1973 (P.L. 93-205).
 2. **"Threatened species"** means any resident species which is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range or one that is designated as threatened under the provisions of the Federal Endangered Species Act of 1973 (P.L. 93-205).
 3. **"Rare species"** means any resident species which, although not presently endangered or threatened as previously defined, should be protected because of its scarcity.
 4. **"Unusual species"** means any resident species which exhibits special or unique features and because of these features deserves special consideration in its continued survival in the State.
- (e) **"Public lands"** means all those lands within this state which are owned by the State of Georgia.
- (f) **"Resident species"** means any species, sub-species or variety of plant or animal life that is genetically, morphologically, ecologically, or geographically distinct, and which interbreeds freely with its kind at maturity, and which exists in this state, including its waters, in the wild during any part of its life.
- (g) **"Status Undetermined species"** means a resident species which is not afforded protection under these rules and regulations, but should additional research show the need for protection these or any other species may be moved to the protected category.

Authority: Ga. L. 1973, p. 932, O.C.G.A. Secs. [12-6-172](#), [27-3-132](#).

History. Original Rule entitled "Definitions" was filed on August 5, 1976 as Rule [391-4-13-.02](#); effective August 25, 1976.

Amended: Rule renumbered as 391-4-10-.02. Filed December 22, 1980; effective January 11, 1981.

Amended: F. Nov. 4, 1992; eff. Nov. 24, 1992.

Rule 391-4-10-.03. Determination of Protected Species.

- (1) Criteria. The criteria for the determination as to whether any resident species is an endangered, threatened, rare, or unusual species are as follows:
 - (a) The present or threatened destruction, modification or curtailment of its habitat.
 - (b) Overutilization for commercial, sporting, scientific, or educational purposes.

- (c) Disease or predation.
 - (d) The inadequacy of existing regulatory mechanisms.
 - (e) Other natural or man-made factors affecting its continued existence.
- (2) Procedures. General procedures for modifying the state "protected species" list are as follows:
- (a) Any member of the public may nominate a species for consideration. An application for nomination, in the form prescribed by the Department, must be submitted to the Department with all supporting data.
 - (b) If the Department determines that review is warranted, additional data is solicited from all relevant sources and notice of the nomination is published in the Department news release.
 - (c) All available scientific and commercial data is evaluated by the Department and tentative determination is made regarding the status of the nominated species.
 - (d) If the nominated species is determined by the Department not to warrant review or not to be endangered, threatened, rare or unusual, the person making the nomination is notified in writing of such determination.
 - (e) If the nominated species is tentatively determined by the Department to be endangered, threatened, rare, or unusual, public notice is given by publishing the proposal in the Department news release and by any other method required by the Georgia Administrative Procedures Act (Ga. Laws, p. 338 *et seq.*) as amended. The Department shall also distribute a public notice to all persons who have requested to be placed on the mailing list. Such request shall be made in writing and shall be renewed in December of each year. Failure to renew the request shall result in the removal of such name from the mailing list.
 - (f) A minimum of 20 days is allowed for public comment, during which time a public hearing may be requested pursuant to the Georgia Administrative Procedure Act.
 - (g) The Department considers public comment and, if necessary, compiles and analyzes additional data.
 - (h) The Department will submit its recommendation to the Board of Natural Resources no later than one year after the initial nomination of the species.
 - (i) The Board will then determine appropriate classification of nominated species by either adopting, modifying and adopting, or rejecting the submitted classification.

- (3) General Procedures for deleting a species from the state "protected species" list are as follows:
- (a) Any member of the public, or the Department on its own initiative, may propose that a protected species be deleted from the state protected species list.
 - (b) If the Department determines that review of such proposed deletion is warranted, additional data is solicited from all relevant sources and notice of the proposed deletion is published in the Department news release.
 - (c) All available scientific and commercial data is evaluated by the Department and tentative determination is made regarding the status of the species proposed for deletion.
 - (d) If the species proposed for deletion is determined by the Department not to warrant review the person making the nomination is notified in writing of such determination.
 - (e) If a species proposed for deletion has been tentatively determined by the Department as appropriate for deletion from the list as endangered, threatened, rare, or unusual, public notice is given by publishing the proposal in the Department news release and by any other method required by the Georgia Administrative Procedures Act as amended. The Department shall also distribute a public notice to all persons who have requested to be placed on the mailing list. Such request shall be made in writing and shall be renewed in December of each year. Failure to renew the request shall result in the removal of such name from the mailing list.
 - (f) A minimum of 20 days is allowed for public comment, during which time a public hearing may be requested pursuant to the Georgia Administrative Procedure Act.
 - (g) The Department considers public comment and, if necessary, compiles and analyzes additional data.
 - (h) The Department will submit its recommendation to the Board of Natural Resources no later than one year after the initial proposal for deletion of the species.
 - (i) The Board will then determine whether the species proposed for deletion should be deleted or its current classification modified.

History. Original Rule entitled "Determination of Protected Species" was filed on August 5, 1976 as Rule [391-4-13-.03](#); effective August 25, 1976.

Amended: Rule renumbered as 391-4-10-.03. Filed December 22, 1980; effective January 11, 1981.

Amended: F, Nov. 4, 1992; eff. Nov. 24, 1992.

Rule 391-4-10-.04. Land Acquisition.

The acquisition of natural areas and/or unique habitats upon which are rare and endangered species depend shall be continued for the purposes of protection, conservation and preservation. Lands or aquatic habitats acquired for these purposes shall be managed or protected with this principal objective in mind. Acquisitions of lands, aquatic habitats, or interest herein may be made pursuant to any of the following:

- (a) through the Georgia Heritage Trust Program of the Department;
- (b) through joint State--Federal agreements;
- (c) by donation of gift to the State, in part, or in full; or
- (d) by any other means or by any combination of the above.

Amended: Rule renumbered as 391-4-10-.05. Filed December 22, 1980; effective January 11, 1981.

Rule 391-4-10-.06. Prohibited Acts.

- (1) The following acts regarding protected species of animals are prohibited:
 - (a) Any activities intended to harass, capture, kill, or otherwise directly cause death of any protected animal species, except as specifically authorized by law or by regulation as adopted by the Board of Natural Resources.
 - (b) The sale or purchase of any protected animal species or parts thereof and the possession of any such species or parts thereof unless the possession is authorized

by a scientific collecting, wildlife exhibition, or other permit or license issued by the department.

- (c) The destruction of the habitat of any protected animal species on public lands.
- (2) The authorization to take certain nongame animal species set forth in O.C.G.A. Section [27-1-28](#) does not apply to any protected species whether on public or private land.

[Rule 391-4-10-.07. Exceptions.](#)

- (1) **Permits.** The Department may issue permits for the collection, transportation, and/or possession of protected plant and animal species. Such permits do not alleviate the responsibility to acquire specific federal permits, if required.
- (2) **Protected Crayfish Species.** The collection of state protected crayfish species (those species included in [391-4-10-.09](#)) while collecting fishing bait is authorized without permit under the following conditions:
 - (a) State protected crayfish species may not be collected from crayfish burrows (i.e., "crayfish chimneys") in any manner, including burrow excavation or setting traps or other devices within, on or near the entrance to the burrow.
 - (b) State protected crayfish species may not be exported from the state of Georgia.
- (3) **Peregrine Falcon Take for Falconry Purposes.** The Department may issue up to five (5) annual permits for the trapping and possession of wild peregrine falcons for falconry purposes in accordance with the framework established by the United States Fish and Wildlife Service and as may be appropriate based on sound wildlife management principles. Trapping is allowed only during September 20 through October 20 and only within Chatham, Bryan, Liberty, McIntosh, Glynn, and Camden counties. Only wild peregrines trapped during their first year (passage birds) may be kept. Permits are issued based upon a random drawing of qualified applicants. Preference is given to Georgia residents such that most permits are issued to qualified resident applicants.
 - (a) To qualify, an applicant shall be a licensed Master Falconer, or a licensed General Falconer with at least 5 years of licensed falconry experience.

- (b) When trapping or attempting to trap a peregrine falcon, a person shall have on their person a current peregrine falcon take permit from the Department, a valid Georgia hunting license, and a valid falconry license.
- (c) A peregrine falcon take permit does not authorize any person possessing said permit to commit any act inconsistent with O.C.G.A. [27-2-17](#).
- (d) Said permit may be revoked in accordance with the provisions of the Game and Fish Code.

[Rule 391-4-10-.09. Protected Species of Plants and Animals.](#)

- (1) Mammals:
 - (a) **Corynorhinus rafinesquii:** Rafinesque's Big-eared Bat (rare)
 - (b) **Eubalaena glacialis:** North Atlantic Right Whale (endangered)
 - (c) **Geomys pinetis:** Southeastern Pocket Gopher (threatened)
 - (d) **Megaptera novaeangliae:** Humpback Whale (endangered)
 - (e) **Myotis grisescens:** Gray Bat (endangered)
 - (f) **Myotis sodalis:** Indiana Bat (endangered)
 - (g) **Neofiber alleni:** Round-tailed Muskrat (threatened)

- (h) **Puma concolor coryi:** Florida Panther (endangered)
- (i) **Sylvilagus obscurus:** Appalachian Cottontail (rare)
- (j) **Trichechus manatus:** West Indian Manatee (endangered)

(2) Birds:

- (a) **Aimophila aestivalis:** Bachman's Sparrow (rare)
- (b) **Ammodramus henslowii:** Henslow's Sparrow (rare)
- (c) **Calidris canutus:** Red Knot (rare)
- (d) **Campephilus principalis:** Ivory-billed Woodpecker (endangered)
- (e) **Charadrius melodus:** Piping Plover (threatened)
- (f) **Charadrius wilsonia:** Wilson's Plover (threatened)
- (g) **Corvus corax:** Common Raven (rare)
- (h) **Dendroica cerulea:** Cerulean Warbler (rare)
- (i) **Dendroica kirtlandii:** Kirtland's Warbler (endangered)
- (j) **Elanoides forficatus:** Swallow-tailed Kite (rare)
- (k) **Falco peregrinus:** Peregrine Falcon (rare)
- (l) **Falco sparverius paulus:** Southeastern Kestrel (rare)
- (m) **Haematopus palliatus:** American Oystercatcher (rare)
- (n) **Haliaeetus leucocephalus:** Bald Eagle (threatened)
- (o) **Mycteria americana:** Wood Stork (endangered)
- (p) **Picoides borealis:** Red-cockaded Woodpecker (endangered)
- (q) **Rynchops niger:** Black Skimmer (rare)
- (r) **Sterna antillarum:** Least Tern (rare)
- (s) **Sterna nilotica:** Gull-billed Tern (threatened)
- (t) **Vermivora chrysoptera:** Golden-winged Warbler (endangered)

(3) Reptiles:

- (a) **Caretta caretta:** Loggerhead Sea Turtle (endangered)
- (b) **Chelonia mydas:** Green Sea Turtle (threatened)
- (c) **Clemmys guttata:** Spotted Turtle (unusual)
- (d) **Dermochelys coriacea:** Leatherback Sea Turtle (endangered)
- (e) **Drymarchon couperi:** Eastern Indigo Snake (threatened)
- (f) **Eretmochelys imbricata:** Hawksbill Sea Turtle (endangered)
- (g) **Glyptemys muhlenbergii:** Bog Turtle (endangered)
- (h) **Gopherus polyphemus:** Gopher Tortoise (threatened)
- (i) **Graptemys barbouri:** Barbour's Map Turtle (threatened)
- (j) **Graptemys geographica:** Common Map Turtle (rare)
- (k) **Graptemys pulchra:** Alabama Map Turtle (rare)
- (l) **Heterodon simus:** Southern Hognose Snake (threatened)
- (m) **Lepidochelys kempii:** Kemp's Ridley Sea Turtle (endangered)
- (n) **Macrochelys temminckii:** Alligator Snapping Turtle (threatened)
- (o) **Malaclemys terrapin:** Diamondback Terrapin (unusual)
- (p) **Ophisaurus mimicus:** Mimic Glass Lizard (rare)

(4) Amphibians:

- (a) **Ambystoma cingulatum:** Flatwoods Salamander (threatened)
- (b) **Amphiuma pholeter:** One-toed Amphiuma (rare)
- (c) **Aneides aeneus:** Green Salamander (rare)
- (d) **Cryptobranchus alleganiensis:** Hellbender (threatened)
- (e) **Gyrinophilus palleucus:** Tennessee Cave Salamander (threatened)
- (f) **Haideotriton wallacei:** Georgia Blind Salamander (threatened)
- (g) **Notophthalmus perstriatus:** Striped Newt (threatened)

(h) **Plethodon petraeus:** Pigeon Mountain Salamander (rare)

(i) **Rana capito:** Gopher Frog (rare)

(5) Fishes:

(a) **Acipenser brevirostrum:** Shortnose Sturgeon (endangered)

(b) **Alosa alabamae:** Alabama Shad (threatened)

(c) **Ameiurus serracanthus:** Spotted Bullhead (rare)

(d) **Cyprinella caerulea:** Blue Shiner (endangered)

(e) **Cyprinella callitaenia:** Bluestripe Shiner (rare)

(f) **Cyprinella xaenura:** Altamaha Shiner (threatened)

(g) **Elassoma okatie:** Bluebarred Pygmy Sunfish (endangered)

(h) **Enneacanthus chaetodon:** Blackbanded Sunfish (endangered)

(i) **Erimystax insignis:** Blotched Chub (endangered)

(j) **Etheostoma brevirostrum:** Holiday Darter (endangered)

(k) **Etheostoma chlorbranchium:** Greenfin Darter (threatened)

(l) **Etheostoma chuckwachatte:** Lipstick Darter (endangered)

(m) **Etheostoma ditrema:** Coldwater Darter (endangered)

(n) **Etheostoma duryi:** Black Darter (rare)

(o) **Etheostoma etowahae:** Etowah Darter (endangered)

(p) **Etheostoma parvipinne:** Goldstripe Darter (rare)

(q) **Etheostoma rupestre:** Rock Darter (rare)

(r) **Etheostoma scotti:** Cherokee Darter (threatened)

(s) **Etheostoma tallapoosae:** Tallapoosa Darter (rare)

(t) **Etheostoma trisella:** Trispot Darter (endangered)

(u) **Etheostoma vulneratum:** Wounded Darter (endangered)

- (v) **Fundulus bifax:** Stippled Studfish (endangered)
- (w) **Fundulus catenatus:** Northern Studfish (rare)
- (x) **Hemitremia flammea:** Flame Chub (endangered)
- (y) **Hybopsis lineapunctata:** Lined Chub (rare)
- (z) **Ichthyomyzon bdellium:** Ohio Lamprey (rare)
- (aa) **Lucania goodei:** Bluefin Killifish (rare)
- (bb) **Macrhybopsis sp.:** Coosa Chub (endangered)
- (cc) **Micropterus notius:** Suwannee Bass (rare)
- (dd) **Moxostoma carinatum:** River Redhorse (rare)
- (ee) **Moxostoma robustum:** Robust Redhorse (endangered)
- (ff) **Moxostoma sp.:** Sicklefins Redhorse (endangered)
- (gg) **Notropis ariommus:** Popeye Shiner (endangered)
- (hh) **Notropis asperifrons:** Burrhead Shiner (threatened)
- (ii) **Notropis hypsilepis:** Highscale Shiner (rare)
- (jj) **Notropis photogenis:** Silver Shiner (endangered)
- (kk) **Notropis szepticus:** Sandbar Shiner (rare)
- (ll) **Noturus eleutherus:** Mountain Madtom (endangered)
- (mm) **Noturus munitus:** Frecklebelly Madtom (endangered)
- (nn) **Percina antesella:** Amber Darter (endangered)
- (oo) **Percina aurantiaca:** Tangerine Darter (endangered)
- (pp) **Percina aurolineata:** Goldline Darter (endangered)

Subject 391-4-11. COMMERCIAL ALLIGATOR FARMING.

Rule 391-4-11-.01. Purpose.

The purpose of these regulations are to establish the procedures for the permitting/licensing of commercial alligator farms and to prescribe the standards under which alligator farms must operate. They also prescribe the administrative requirements for the sale of alligators, or parts thereof, the control, harvest, and sale of alligator hides and meats of alligators produced on an alligator farm licensed under the provision of the Official Code of Georgia Annotated (O.C.G.A.), Section 272-10.

History. Original Rule entitled "Purpose" was filed on July 25, 1983; effective August 14, 1983.

Repealed: New Rule of same title adopted. F. Aug. 27, 1993; eff. Sept. 16, 1993.

Rule 391-4-11-.02. Licensing.

- (1) Application for license shall be submitted on forms provided by the Department and may be filed at any time. The license year is from April 1 to March 31 of the following year. The cost of the annual license as provided in Section [27-2-3](#) O.C.G.A. is \$50.00.
- (2) License shall not be issued to any applicant under 18 years of age.
- (3) Before a license is issued, Department personnel will inspect the facilities and/or review the specifications of proposed facilities to insure they meet the requirements for the safe handling, humane care and treatment of the alligators.

- (4) An alligator farming license shall not be issued to any person who has been convicted of any violation of O.C.G.A., Title 27, Sections [27-2-10](#) and [27-3-19](#) or rules of the Department of Natural Resources relating to the illegal taking of any crocodilian species, or their eggs, for two (2) years following such conviction.
- (5) The alligator farming license of any persons convicted of any violation of O.C.G.A., Title 27, Sections [27-2-10](#) and [27-3-19](#) or rules of the Department of Natural Resources relating to the illegal taking of any crocodilian species, or their eggs, shall be revoked.
- (6) Upon revocation of an alligator farming license as provided in 391-411-.02(5), the licensee shall have six (6) months to dispose of legally acquired alligator stock. Alligator stock may not be disposed of to corporations or partnerships to which the licensee is a principle.

Rule 391-4-11-.03. Acquisition of Alligators.

- (1) Alligator stock (alligators or alligator eggs) must be obtained from captive sources such as an established alligator farm or similar legal source or obtained from a licensed alligator agent-trapper. A permit as provided for in Section [27-2-10\(b\)](#) Official Code of Georgia Annotated must be obtained from the Georgia Game & Fish Division before any alligators or their eggs are acquired or transported from one alligator farm to another. If the stock is obtained from an out-of-state source, legal requirements of the state from which the alligators originate must be satisfied before live alligators or alligator eggs can be moved across state lines. A bill of lading identifying the source of the alligators, their number, length, and sex, if known, or similar evidence of the sale, must be retained by the buyer.
- (2) Alligator farmers licensed under the provisions of O.C.G.A. Section [27-2-10](#) may purchase from any legal source alligator carcasses, the hide and other products from which may then be sold subject to provisions in Chapter 391-4-13.

Repealed: New Rule of same title adopted. F. Aug. 27, 1993; eff. Sept. 16, 1993.

Rule 391-4-11-.04. Specifications for Alligator Farms.

- (1) Breeding ponds, grow-out ponds, or any other outside alligator holding facilities, shall be fenced around the perimeters with woven wire or board fences of sufficient height (minimum, 4 feet) and tightness, constructed so as to prevent the escape or entrance of any size of alligator. Fences shall be buried or otherwise secured at the bottom so as to prevent entrance or escape.
- (2) Holding houses containing an adequate number of artificial tanks will be provided for growing out alligators. Alligators six feet or less in length must be held in tanks or ponds that can be readily drained and are constructed so as to make all alligators visible upon draining.
- (3) A controlled environmental chamber complete with an artificial nesting area (incubator) will be provided for hatching of eggs.

Rule 391-4-11-.05. Harvest of Alligators.

- (1) Alligators, or the skins or products of such captive-reared alligators raised on a farm licensed under the provisions of O.C.G.A. Section [27-2-10](#), or alligators purchased from a licensed alligator agent-trapper or other legal source may be sold, but only in accordance with the following restrictions:
 - (a) Alligators may be harvested and skinned only at Department approved sites and only with approval of an authorized agent of the Department. Alligator hides must be held at a specified site until the date of sale. An alligator farmer may request authorization from the Department to skin and receive hide tags for no more than his current total farm inventory of alligators.
 - (b) The sale of alligators or alligator products from the captive-reared or otherwise legally-obtained alligators shall not be permitted until six (6) months have elapsed from the date of the initial issuance of an alligator farming license.
 - (c) Any alligator killed under authority of this section shall be tagged within 24 hours with a tag furnished by the Department. Such tag shall remain attached to the alligator hide until finally processed by the fabricator. Tags removed from hides

used to manufacture alligator products shall either be a) turned over to the U.S. Fish and Wildlife Service upon product export or b) turned over to the Georgia Department of Natural Resources, Game and Fish Division, if the product is not exported. It shall be unlawful for any farmer or processor to possess untagged alligator hides or carcasses following the 24 hour period allowed. All alligators that die due to accident, natural causes, or reasons other than harvest shall be tagged within 24 hours or destroyed and recorded in the farm inventory records.

- (d) Property rights to identifying hide tags issued to farmers shall be vested in the Department, and tags shall remain the property of the state. Unused tags will be returned to the Department within 15 days of the end of the calendar year. Possession of any alligator hide tags by persons other than licensed farmers or licensed nuisance alligator agent-trappers shall be prohibited.
- (e) The meat of any alligator legally harvested or purchased from a licensed alligator agent-trapper may be consumed by the farmer or his immediate family, but shall not be sold or transferred except as provided in Rule [391-4-11-.07](#) below. Other alligator products may be sold subject to Rule [391-4-11-.07](#) also. Meat not processed and packaged for sale may be kept for personal consumption, but shall not be sold. Each package of meat so processed shall be labeled in indelible ink to indicate the hide tag number of the alligator from which it came and the alligator farm or agent-trapper's name who harvested the alligator.

Rule 391-4-11-.06. Sale of Alligators.

- (1) Alligator farmers licensed under the provisions of O.C.G.A. Section [27-2-10](#), may sell, barter, exchange, give or loan any live alligators or their eggs provided a permit is first obtained from the Department. If sold, bartered, exchanged in the interstate commerce or foreign trade, legal requirements of the state or country involved in the transaction must also be satisfied. Live alligators or alligator eggs may not be sold and transported to any state or country outside of their historical range without written permission of the Director.
- (2) The request for such permits must contain the name and address of the proposed buyer, a reference to the buyer's license number or other authority for possession, and shall indicate the number and total lengths of alligators to be sold.

Repealed: New Rule of same title adopted. F. Aug. 27, 1993; eff. Sept. 16, 1993.

Rule 391-4-11-.08. Records.

- (1) Licensed alligator farmers shall maintain complete written records and documentation regarding initial inventory of breeding stock indicating the source of such stock, their numbers, length, and sex, if known. Complete, accurate written records will be maintained on a current basis reflecting subsequent population levels due to hatching success, mortality, sale of stock, purchases of additional stock, etc. Shipping documents, invoices, or bills of lading must be maintained to reflect the disposition made of any alligator stock. Farmers shall maintain records that show an accurate inventory of alligators present on each farm. Any change in the number of alligators and the cause of such change (i.e. escape, death, transport, harvest, etc.) shall be recorded. Such records shall be made available to Department personnel for inspection at their request.
- (2) Records shall be maintained at the alligator farm on all alligator carcasses purchased from nuisance alligator agent-trappers and shall include the length and hide tag number of the alligator purchased, the name of the agent-trapper, and the date of the purchase.

Rule 391-4-11-.09. Reports.

- (1) A complete and accurate Alligator Farm Annual Report form supplied by the Department must be submitted to the Department not later than March 1 of each year before an application for license renewal will be considered. The report must include the following information:
 - (a) number of alligators on the farm in the 0-2 feet, 2-4 feet, and over 4 feet size classes;
 - (b) number of breeding females, nests, eggs and hatching success ratio during the license year;
 - (c) total mortality (natural) during the year to include cause of death, if known, and disposition of hide and/or meat;
 - (d) number alligators harvested for market, identified by the size classes as outlined in (a) above;
 - (e) number of alligators or alligator carcasses purchased and identified by the size classes outlined in (a) above; and
 - (f) number of live alligators sold to other legal operatives, identified by the size classes as outlined in (a) above.

- (2) It shall be a violation of this section to submit inaccurate or incomplete reports. For the purpose of this section, an inaccurate report shall be one that deviates more than ten (10) percent from the actual total of alligators present on a farm.

Rule 391-4-11-.10. Inspections and Inventories of Alligator Farms.

- (1) Department personnel may at any time inspect alligator farms including alligators, eggs, hides and other products, records, lands, buildings, motor vehicles and other equipment that could be used in production, processing, or transportation of alligator, alligator eggs, or alligator products.

- (2) An alligator farm inspection will not include inventory by the Department except under one or more of the following conditions:
 - (a) upon lawful sale or transfer of farm ownership;

- (b) where inspections of alligator farms or alligator farm records indicate a failure to maintain accurate, complete alligator farming records;
 - (c) when inspection or other Department actions indicate a violation of alligator processing procedures;
 - (d) pursuant to an investigation wherein alligators or their eggs are suspected of being taken, illegally from the wild; or
 - (e) before the transfer of alligator stock occurs after a conviction resulting in revocation of an alligator farming license.
 - 1. An inventory may consist of a total count or a sample of a portion of the facility.
- (3) Should an inventory be required by the Department, the licensed alligator farmer shall cooperate fully (including providing labor as requested) to conduct said inventory. Failure to abide by this requirement shall result in the suspension of all hide tags and transportation permits until the inventory is completed.
- (4) If an inventory reveals a discrepancy in the reported numbers of alligators by a farmer in excess often (10) percent of the total, it shall be a violation of this section. Upon finding such a violation, all remaining hide tags will be seized as evidence and transportation permit requests held until the discrepancies are satisfactorily resolved or until the final disposition of the case by the court.

Rule 391-4-12-.02. Qualification and Liability of Agent-trappers.

- (1) Shall reside in the region where the agent-trapper is authorized to take, possess, or kill alligators.
- (2) Shall be capable of supplying all equipment necessary to perform the duties of an agent-trapper.
- (3) Shall have sufficient time available to promptly take designated alligators.
- (4) Shall not have been convicted of violating any law or rule protecting crocodylians within two years of the date of application.
- (5) Shall assume personal liability for their health, welfare and safety while acting as agent-trappers.
- (6) Shall not be engaged in alligator farming or employed by anyone so engaged.

Rule 391-4-12-.03. Selection and Review of Agent-trappers.

- (1) Applicants for agent-trapper shall be reviewed by a Game and Fish Division selection committee which will make recommendations for selection to the Director of the Game and Fish Division for appointment. The number of appointments shall be based on need.
- (2) Agent-trappers appointed shall enter into a contract with the Department to take and possess nuisance alligators in accordance with this rule. The sole consideration for this contract shall be the appointment as an agent-trapper and the right to keep and dispose of the alligator meat, hides, and other products.

Rule 391-4-12-.04. Conditions Governing Operations of Authorized Agent-trappers.

- (1) The agent-trapper will be issued a permit assigning in writing a specific nuisance alligator complaint by designated Department personnel. No agent-trapper shall possess any live alligator for more than 48 hours except as directed by designated Department personnel.
- (2) Alligators shall be humanely killed, but firearms (except a bang stick) shall not be used without specific authorization by the Department.
- (3) An alligator hide tag furnished by the Department shall be attached within 24 hours to any alligator killed by the agent-trapper and shall remain attached until consumed by the lubricator. No person shall possess any untagged alligator hide.
- (4) Alligators shall be skinned only at designated sites and in accordance with written skinning instructions provided by the Department. The tagged hides and parts of the alligators taken may be held by the agent-trapper at a designated site for purposes of salt curing or cold storage until time of sale.
- (5) The meat of the alligators taken may be consumed by the agent-trapper or his immediate family or may be sold or transferred only as provided in Chapter 391-4-13. Containers of meat processed for personal consumption by the agent-trapper or his immediate family shall be labeled in indelible ink with the hide tag number of the alligator from which it came and the agent-trapper's name.
- (6) Each agent-trapper may be assisted, providing that no such assistant shall transport or possess any alligator or conduct any trapping activity except in the presence of the agent-trapper. However, alligators may be skinned and processed by an assistant at a designated facility without the agent-trapper being present, and tagged hides or other properly packaged and labeled alligator products may be transported by an assistant provided they are accompanied by complete DNR shipping documents. Assistants shall assume personal liability for their own health, welfare, and safety while assisting an agent-trapper.
- (7) Property rights to nuisance alligator hide tags issued to agent-trappers shall be vested in the Department and shall remain the property of the Department. No person except an authorized agent-trapper shall possess any nuisance alligator tag at any time. Unused alligator hide tags must be returned to the Department within 15 days of the expiration date of the nuisance alligator collection permit.

- (8) Issuance of nuisance alligator collection permits and alligator hide tags shall be discontinued and agent-trapper contract terminated upon receipt of information verified by the Department that the agent-trapper has:
- (a) Attempted to generate alligator complaints;
 - (b) Failed to respond promptly to an assigned complaint;
 - (c) Been convicted of a violation of any regulation or law concerning the taking of alligators or alligator eggs;
 - (d) Violated any portion of this rule;
 - (e) Acted incompetently in carrying out the responsibilities of his assignments.
- (9) Agent-trappers must have a valid trapper's license in order to take nuisance alligators and sell alligator meat, hides or products.

Rule 391-4-13-.02. Sale of Alligator Meat.

- (1) Alligator meat that is lawfully acquired through production on a licensed alligator farm, harvested by approved nuisance alligator agent-trappers, or otherwise obtained from a legal source may be sold or transferred provided that:
 - (a) Any alligator meat sold or transferred shall be packaged in approved containers and labeled as specified by the Department indicating that it contains alligator meat, the weight of meat enclosed, the name of the seller, the hide tag number for the alligator from which the meat was taken, and the date of packaging. No more than five pounds of meat shall be included per container and containers shall be used only once. Alligator meat must be packaged and marked in accordance with regulations of the State of origin.
 - (b) Alligator farmers and agent-trappers shall maintain written records of all alligator meat sales or transfers. Such records shall be open to inspection by Department personnel. Meat sales or transfers by agent trappers, shall be reported on a form supplied or approved by the Department and a copy must be returned to the Department within 30 days of the date of sale. Alligator farmers shall report total pounds of alligator meat harvested on Department supplied annual farm reports at the end of each calendar year.
 - (c) Alligator meat shall be retained in the original container until prepared for consumption or processing. Alligator meat that has been processed or repackaged for sale must be replaced in a tamperproof container approved by the Director or his authorized agent. Such processed or repackaged meat must be labeled with the hide tag number of the alligator(s) from which the meat came. Purchasers of alligator meat from alligator farmers or nuisance alligator agent-trappers must retain an invoice or shipping document for a period of six months from the date of sale.
 - (d) All containers of alligator meat labeled in accordance with these regulations shall be shipped only with the State of Georgia or to those states or countries allowing the sale of alligator meat.
 - (e) Alligator meat shall only be sold and possessed for sale or transfer in compliance with all applicable sanitation and permit requirements of the Georgia Department

of Agriculture, Consumer Protection Division, the county health department of the county where the processing facility is located, and other federal, state, or local authorities.

- (f) Any person selling alligator meat must purchase a Wholesale Fish Dealer's license from the Georgia Department of Agriculture, provided that no permit shall be required for prepared alligator meat sold for food by restaurants.

Rule 391-4-13-.03. Sale of Alligator Hides and Other Products.

- (1) Alligator hides and other products, except meat, may be sold or transferred in accordance with the following:
 - (a) Alligator farmers, agent-trappers, permitted drawn quota hunters, and other persons authorized to take or possess alligators may sell or transfer the hides, feet, viscera or skeletal parts of alligators when all such sales or transfers are documented on a department supplied or approved report form which indicates the kind and quantity of items sold or transferred and the name and address of each buyer. A copy of such form must be returned to the Department within 30 days of the date of sale or transfer. Any packaged alligator parts must be labeled with a department-approved label that indicates the hide tag number(s) of the alligator(s) from which the parts came, the name and address of the seller, the date of the sale of transfer, and the number and kind of parts included.
 - (b) Any alligator skull sold or transferred shall be permanently labeled with the identifying alligator hide tag number of the alligator from which the skull was taken and the name of the hunter, farmer or agent-trapper selling or transferring the skull.
 - (c) Upon approval by the department, agent-trappers may collect oviductal eggs from gravid nuisance alligators for sale to licensed Georgia alligator farmers.
 - (d) Persons selling finished or unfinished alligator products shall maintain documentation of their legal acquisition.

- (e) No person shall sell or transfer any hide, meat, or other product manufactured from a crocodylian species which has been declared to be endangered or threatened by the United States Fish and Wildlife Service.
- (f) All alligator hides sold or transferred must be tagged by the State of origin, and all alligator parts from out-of-state sources must be packed and marked in accordance with regulations of the State of origin.

[Rule 391-4-15-.02. Purpose.](#)

The purpose of these rules and regulations is to establish the administrative procedures necessary to carry out the purposes of Article 2 of Title 27, Chapter 2, Wildlife Violator Compact. The Wildlife Violator Compact is a voluntary interstate agreement which provides participating states with a mechanism to participate in a reciprocal program to:

- (1) Promote compliance with the statutes, laws, administrative rules and regulations relating to management of wildlife resources in their respective states, and
- (2) Provide for the fair and impartial treatment of wildlife violators operating within the participating states in recognition of the individual's right of due process and the sovereign status of a party state.

[Rule 391-4-15-.03. Wildlife Violator Compact Manual.](#)

Subject to all applicable statutes and the constitution of the State of Georgia, including the provisions of Chapter 13 of Title 50, the "Georgia Administrative Procedure Act", and pursuant to the provisions of O.C.G.A. [27-2-41](#), the following Wildlife Violator Compact Manual hereby establishes the administrative and procedural guidelines for participation in the Wildlife Violator Compact.

WILDLIFE VIOLATOR COMPACT MANUAL

SECTION I

The following are the general procedures to be followed by Georgia Conservation Rangers in handling hunting, fishing, and trapping misdemeanor violations committed by individuals who are not residents of Georgia, but are a resident of a Wildlife Violator Compact (WVC) member state at the time of the violation. Georgia non-residents who are residents of a WVC member state at the time of the misdemeanor hunting, fishing, or trapping violation occurring in Georgia may be released on personal recognizance under the following conditions:

Violations Covered

1. Any misdemeanor hunting, fishing, or trapping violation enumerated in Title 27 of the Official Code of Georgia annotated subject to the provisions of a "Penalty Assessment", which allows a violator to comply with a citation by mailing a fine payment to a court, thereby admitting guilt without a formal appearance.
2. Any misdemeanor hunting, fishing, or trapping violation written as a summons requiring a violator to deal directly with the court, either in person, by mail or through an attorney.
3. In order for a violation to be subject to these provisions the person to whom the citation is issued must be a resident of a WVC member state, other than the issuing state, at the time the citation is issued.

Types of Violations Not Covered

1. Any violations that mandate a personal appearance.
2. Any petty offense or misdemeanor violation that has a jail term as a mandatory penalty.
3. Any felony violation.
4. Any violation that the issuing officer deems serious enough to arrest a resident violator.
5. Any violation or situation which the laws, policies or procedures of the State of Georgia dictate shall be handled otherwise.

I. Procedures for the Georgia Department of Natural Resources

A. The officer issues a citation to the violator on the standard form used by Georgia DNR.

1. When a non-resident is issued a citation and released on personal recognizance under the provisions of this compact, it is advisable that the signature of the recipient is contained on the citation, regardless of specific requirements on that issue. A physical description of the recipient (height, weight, eye color, and hair color) should also be listed.

2. The citation is returnable to the court at a future date specified on the document, in accordance with the laws, regulations, policies, or procedures of the State of Georgia and/or the Court of jurisdiction.

B. If the violator pays the fine or resolves the case with the court, as appropriate, the matter is closed and no further action is taken.

C. If the violator does not resolve the case by payment of the fine or with the court, action under the provisions of the WVC will be initiated.

1. The "Defendant's Notice of Failure to Comply" form will be completed and the original delivered to the violator by certified mail, return receipt requested, or in person. The remaining copies (Home State Notice of Failure to Comply, Defendant's Notice of Compliance, and Home State Notice of Compliance) are held in a suspense file pending a response from the violator.

a. Sufficient time will be allowed for the defendant to respond to the Defendant's Notice of Failure to Comply Form prior to initiating further action under the WVC. This will normally be not less than 14 days and not more than 28 days, or within any other grace period established by the Board of Compact Administrators, as defined in Code Section [27-2-40](#), Article VII, (a).

b. If the defendant complies with the terms of the citation within the grace period allowed, no further action is taken under the provisions of this section of the WVC. Final action in a court case is not a prerequisite for compliance.

2. If the defendant fails to respond within the time allowed, the "Home State Notice of Failure to Comply" will be sent to the home state of the defendant by Georgia DNR administrative personnel.

Any "Home State Notice of Failure to Comply" shall be processed by the issuing state and reported to the home state within six months of issuance of the citation, or within any other time frame that may be established by the Board of Compact Administrators.

a. If at any time beyond this point in the WVC process the defendant resolves the case with the court, it is imperative that copies 3 and 4, (Defendant's and Home State Notice of Compliance) be mailed immediately so that any pending or ongoing suspension of license privileges by the home state of the defendant which are the result of the action at hand may be canceled.

b. At any time subsequent to the mailing of the "Home State Notice of Failure to Comply" that the violator complies with the citation, no further actions under this Section of the WVC will take place.

Methods of Compliance

1. Payment by mail where provided for.
2. Responding to the citation in person.
3. Submission of a plea by mail where allowed.
4. Responding through an attorney where allowed. *Evidence of Compliance* (in response to a notice of suspension for non-compliance).

1. Certificate from the court.
2. Copy of the court judgment.

NOTE: personal representations, check stubs, money order receipts, etc. are not acceptable.

3. The violator copy of a Notice of Compliance sent by the issuing state.

SECTION II

The following are the general procedures to be followed by the home state of an individual committing hunting, fishing, or trapping violations in another WVC member state, who upon release on personal recognizance failed to resolve the case as appropriate, even after the "Defendant's Notice of Failure to Comply" has been sent, and the issuing state has had to send the "Home State Notice of Failure to Comply".

I. Procedures for the Home State

A. Upon receipt of the "Home State Notice of Failure to Comply" from the issuing state, the agency or licensing authority of the home state of the violator will review the form for the following:

1. Is it legible?
2. Is it complete?
3. Is it timely, within the six-month limit, or other limit established by the Board of Compact Administrators, of the compact?
4. Is the violation covered under the compact?

5. Are all other aspects of the case proper under applicable state laws, policies, and procedures?

B. If for any reason the case cannot be acted on, it will be returned to the issuing state within 14 days, or other time frame established by the Board of Compact Administrators, with an explanation of the problem. If all problems are resolved and the case is returned to the home state it will be processed as outlined in this section.

C. If the case is accepted, it will be entered into the suspension process of the home state.

D. A Notice of Suspension will be prepared and sent to the violator.

1. The Notice of Suspension should have a delayed effective date to permit the violator to contact the court in the issuing state and resolve the case. The length of this delay is subject to the laws, policies or procedures of the home state, but should be at least 14 days in length. Upon receipt of a "Home State Notice of Failure to Comply" by the Georgia DNR, the licensee or permit holder shall be notified of the proposed suspension or revocation personally or by a letter sent by certified mail or statutory overnight delivery to the last known address of the licensee or permit holder. The notice of proposed suspension or revocation shall be deemed received three days after mailing. The revocation or suspension shall become final 30 days after issuance if not appealed.

2. The Notice of Suspension must inform the violator of the facts behind the suspension with special emphasis on the procedures to be followed in resolving the matter with the court in the issuing state. Accurate information on the court (name, address, phone number) must be provided in the Notice of Suspension. This will help eliminate inquiries of the home state which are costly, time consuming and nonproductive as the home state can do nothing to resolve the case.

E. Should the defendant request a hearing on the suspension, it will follow the form appropriate to the laws, policies or procedures of the home state. Georgia residents receiving a Notice of Suspension from the Georgia DNR under the WVC provisions for failure to comply with the terms of a citation issued in another WVC member state shall request, in writing, a hearing within 30 days from the date of personal notice or receipt of notice sent by certified mail or statutory overnight delivery, return receipt requested, or the right to said hearing shall be deemed waived. Requests for hearings and the procedures for holding of hearings shall be governed by DNR Board Rule Chapter 391-1-2, Procedures For Disposition Of Contested Cases.

1. Such hearings will be restricted to challenging the right of the home state to suspend under the provisions of the WVC; to deny receiving the original citation (thus the importance of the violator's signature on the citation); or to claim that the case has been resolved.

2. The question of guilt or innocence regarding the original charge will not be a subject of hearings held under the provisions of this section.

3. If needed, assistance can be requested from the issuing state. This is normally limited to obtaining certified documentation.

4. NOTE: Suspensions levied for failure to comply with the terms of a citation are enforced in the home state of the violator and honored by all compact states. These administrative suspensions are not to be confused with suspensions which are the result of convictions of wildlife violations in one or more states which are participants in the WVC.

F. If the suspension is upheld, the defendant must then proceed to resolve the court case with the suspension remaining in effect.

G. If the suspension is denied for any reason, the case is terminated and the suspension order vacated. In such cases the issuing state will be informed of the reason for denial.

H. Appeals from suspension orders will be handled in accordance with the laws, policies and procedures of the home state.

1. Should a suspension order be overturned on appeal, the issuing state shall be notified.

I. When a violator resolves a case with the court in the issuing state, an acknowledgement of compliance will be issued directly to that person. It is the responsibility of the violator to present this document to the agency or licensing authority in the home state in order to terminate the suspension. The acknowledgement of compliance may take any form acceptable to the home state and the court.

1. If the acknowledgement of compliance is presented prior to the effective date of the suspension, the suspension is cleared immediately.

2. If the acknowledgement of compliance is presented after the effective date of the suspension, reinstatement will be handled in accordance with the laws, policies and procedures of the home state.

J. Any reinstatement or restoration fees shall be established and assessed in accordance with the laws, policies and procedures of the home state.

SECTION III

RECIPROCAL RECOGNITION OF SUSPENSIONS

States participating in the WVC shall recognize the suspension for cause of the license privileges or rights of any person by any other WVC participating state. This reciprocal recognition of suspensions is not to be confused with suspensions levied for failure to comply as outlined in Section I and II above. Suspensions for cause of license privileges are the result of a conviction, or an accumulation of convictions, of wildlife violations in one or more states which are participants in the WVC.

When the Georgia Department of Natural Resources receives notice of suspension of a person's hunting, fishing, or trapping privileges or licenses by a WVC member state, the Department shall determine whether the violation, or accumulation of violations, leading to the suspension could

have led to the suspension of rights, privileges, or licenses under Georgia law. If the Department determines that the person's privileges or licenses could have been suspended under Georgia law, the department shall suspend the person's licenses, rights, and privileges to hunt, fish, or trap in Georgia, pursuant to O.C.G.A. [27-2-40](#), Article V, for the same period as imposed by the WVC member state.

A. States participating in the WVC shall recognize the suspension for cause of the license privileges or rights of any person by any other WVC participating state.

1. The suspension is the result conviction for one or more of the following violations types:

a. Priority will be placed on the following violation types:

VIOLATION	WVC CODE
Illegal take or possession of big game	BGV
Illegal take or possession of threatened or endangered species	TEV
Felony wildlife violations	FEV
License violations, fraud, false statement	LIV
Waste of Wildlife	WAV
Accumulated wildlife violations	ACV
Violations while on revocation	REV
Sale/purchase of wildlife	SPV

b. The following violation types will also be subject to reciprocal revocation by member states depending on member state laws:

VIOLATION	WVC CODE
Illegal take or possession of small game or migratory birds	SGV
Illegal take or possession of fish	FIV
Illegal take or possession of other wildlife	OWV
Tag/permit/license transfer	TRV
Federal wildlife violations	FDV
Other criminal violations	OTV
Guide/outfitter violations	GUV

2. And, such recognition of suspension is not contrary to the laws of that state.

B. Recognition of suspensions which do not meet the criteria of this Section as outlined above will be up to the laws, policies and procedures of that state.

C. Each state participating in the WVC shall communicate suspension information to other participating states, using the Interstate Wildlife Violator Compact database. Participating states

will use the guidelines prescribed by database administration. The following information will be included but not limited to:

1. Positive identification of the subject of the suspension.

Including:

a. Name

b. Date of birth

c. Physical description

d. Last known address

2. The basis of the suspension including:

a. Violation(s) and convictions upon which the suspension is based

b. The scope of the suspension (i.e., Fishing, hunting, trapping, all privileges or rights)

c. Effective dates of the suspension and term of the suspension

D. In the event documentation of a violation and subsequent license suspension is needed by a member state for license suspension hearings or other purposes, the issuing state shall provide certified copies of the citation or other charging instrument, any arrest or investigation reports, suspension orders and the disposition of the matter.

SECTION IV

TRANSMITTAL OF CONVICTION INFORMATION TO THE HOME STATE OF THE VIOLATOR

When the Georgia Department of Natural Resources receives notice of a conviction of a Georgia resident from the agency or licensing authority of a WVC member state, the Department shall treat the conviction as if it had occurred in Georgia.

A. Upon a conviction, the issuing state shall forward to the home state of the violator the following information:

1. Personal Information

a. Name

b. Date of birth

- c. Sex
- d. Physical description (height, weight, hair, eyes)
- e. Last known address

2. Violation Information

- a. Citation number
- b. Violation description
- c. Fine assessed

B. For the purpose of consideration for license suspension, the home state shall treat such convictions in other WVC member states as if they had occurred in the home state.

C. In the event detailed information on a violation is needed by the home state, for license suspension hearings or other purposes, the issuing state shall provide certified copies of the citation or other charging instrument, any arrest or investigation reports and the disposition of the matter.

SECTION V

ADMINISTRATIVE MATTERS

I. Entry into the Compact

A. Entry into the WVC may be accomplished by the following methods.

1. A state legislature may accomplish WVC joinder by adopting the full compact as a statute.
2. A state legislature may authorize and direct that state's wildlife agency to enter into the compact.

B. Upon legislative action as specified above, entry into the WVC shall be finalized by the submission of a resolution of ratification and an informational application submitted to the chairman of the board of compact administrators.

The resolution of ratification shall be signed by the chief administrator of the wildlife agency or licensing authority and shall include:

1. A citation and copy of the authority by which the state is empowered to become a member of the Wildlife Violator Compact;
2. Statement of agreement to comply with the terms and provisions of the compact; and

3. A statement that compact entry is with all states then party to the Wildlife Violator Compact and with any state that legally becomes a party to the compact.

C. The effective date of entry shall be specified by the applying state but shall be at least sixty (60) days after notice has been given to each member state by the chairman of the board of compact administrators.

D. Only violations which are committed on or after the effective date of entry, and resulting suspensions, shall be subject to the provisions of the Compact.

II. *Withdrawal from the Compact*

A. A member state may withdraw from the WVC by submitting official written notice to the other member states. Such withdrawal shall not be effective until ninety (90) days after such notice is mailed.

B. Such notice must be directed to the compact administrator of each member state.

C. The withdrawal of one or more member states shall have no effect on the validity of the WVC as to the remaining member states.

Repealed: New Rule of same title adopted. F. Apr. 5, 2018; eff. Apr. 25, 2018.

Rule 391-4-16-.02. Definitions.

(1) As used in these rules and regulations, the term:

- (a) "Commercial Enterprise" means of or relating to the export, farming, buying, selling, exchanging, bartering or offering for purchase, sale, exchange or barter in order to derive income or other consideration.
- (b) "Export" means the transportation of native fresh-water turtles by any person from any point within this state to any point beyond the borders of this state.
- (c) "Sale" means the possession of native fresh-water turtles for commercial enterprise.
- (d) "Turtle Farm" means the possession of more than ten (10) native fresh-water turtles, including any act involving the production of native fresh-water turtles in captivity for commercial enterprise.
- (e) "Wild-caught" means trapped, taken, or captured by any method from any freshwater habitat, including but not limited to, waters of the state or private ponds.

Repealed: New Rule of same title adopted. F. Apr. 5, 2018; eff. Apr. 25, 2018.

Rule 391-4-16-.03. Unlawful Activities.

- (1) It is unlawful for any person to export native fresh-water turtles without a valid commercial turtle farming permit issued by the department.
 - (a) This does not apply to any person possessing a valid food sales establishment license issued by the Georgia Department of Agriculture, provided that such establishment is in compliance with provisions of O.C.G.A. [27-2-15](#).
 - (b) Any exportation requires an export permit from the department before any items leave the state of Georgia.
- (2) It is unlawful for any person to possess more than ten (10) native fresh-water turtles without a valid commercial turtle farming permit issued by the department.
 - (a) Any person holding a valid nuisance wildlife control permit issued by the department may capture, possess, or transport native fresh-water turtles, provided however that such turtles shall not be held for more than 72 hours. Provided further that such turtles may be:

- (i) euthanized;
 - (ii) released alive within their native range in the drainage where captured within the boundaries of the state; or
 - (iii) sold to a Georgia commercial turtle farm in accordance with this chapter.
 - (b) Any person holding a valid wildlife exhibition or wildlife rehabilitation permit may possess more than ten (10) native fresh-water turtles in accordance with such wildlife exhibition or wildlife rehabilitation permit. Nothing in this Chapter shall be construed to allow such person to engage in any commercial enterprise involving native fresh-water turtles.
 - (c) Any person holding a valid scientific collecting permit may collect or possess more than ten (10) native fresh-water turtles in accordance with such scientific collecting permit. Nothing in this Chapter shall be construed to allow such person to engage in any commercial enterprise involving native fresh-water turtles.
- (3) It is unlawful for any person to collect any native fresh-water turtle eggs from the wild.
- (4) It is unlawful for any person to sell, hold for sale, or to distribute viable native fresh-water turtle eggs or live fresh-water turtles with a carapace length less than 4 inches unless for export from the state or otherwise authorized by a permit in accordance with O.C.G.A. [27-2-12](#) and O.C.G.A. [27-2-13](#). Nothing in this Chapter shall be construed to be in conflict with any federal law or regulation, specifically, [21CFR 1240.62](#). It is unlawful to import live native fresh-water turtles or the eggs of such from another state unless such turtles or eggs were lawfully acquired in accordance with the laws and regulations of that state. Provided further that the following requirements shall also be met:
- (a) A wildlife importation permit shall be obtained from the department if such turtles, or eggs, are wildlife. Such permit shall be valid for the period indicated within the issued permit; and
 - (b) A bill of lading identifying the source of the turtles, species, age class (hatchling, juvenile, or adult) and sex, if known, of each turtle, or similar evidence of the sale must be retained by the buyer pursuant to this Chapter; or
 - (c) A person possessing a valid commercial turtle farming permit who acquires more than ten (10) native fresh-water turtles from direct trapping in another state shall document accurate and complete records in accordance with Chapter [391-4-16-.08](#) on a daily basis.
- (5) Nothing in this Chapter shall be construed to authorize the taking of any species which is protected under the federal Endangered Species Act of 1973, P.L. 93-205, as amended, or

under any state law which has as its purpose the protection of endangered or threatened species.

Rule 391-4-16-.04. Permits.

- (1) Application for a commercial turtle farming permit shall be submitted on forms provided by the department and may be submitted at any time. The permit year is from April 1 to March 31.
 - (a) The fee for a commercial turtle farming permit shall be \$50.00.
 - (b) Unless otherwise specified on the permit, commercial turtle farming permits shall be effective from April 1 through March 31.
 - (c) The department may issue a commercial turtle farming permit, at no charge, to an individual(s) who is (are) operating an established turtle farm prior to January 25, 2012. Provided, however, that such individual(s) must submit a completed application for a commercial turtle farming permit to the department and the completed application must be received by the department not later than February 29, 2012. A commercial turtle farming permit issued under this subparagraph shall be valid for the natural life of the individual(s) to whom such permit is issued. Individuals to whom such permits are issued may keep turtles that are in their possession at the time the permit is issued indefinitely.
- (2) Prior to issuing a commercial turtle farming permit to an individual who intends to operate a turtle farm, department personnel shall inspect the facilities and/or review the specifications of proposed facilities to ensure such facilities meet the requirements of [391-4-16-.07](#).
- (3) A commercial turtle farming permit shall not be issued to any person who has been convicted within the past five (5) years of any violation of O.C.G.A. Title 27.
- (4) In accordance with O.C.G.A. [27-4-90](#) and [27-4-91](#), and as provided for in O.C.G.A. [27-2-23](#), a commercial fishing license shall be an eligibility requirement for a commercial turtle farming permit.

Repealed: New Rule of same title adopted. F. Apr. 5, 2018; eff. Apr. 25, 2018.

Rule 391-4-16-.05. Limits.

- (1) The department may issue a "catch out" authorization for private ponds that allows a nuisance wildlife control operator to remove native fresh-water turtles and such turtles shall not be subject to the limits established in this paragraph.
- (2) Commercial turtle farming permit holders may annually stock up to two hundred (200) native, wild caught fresh-water turtles into a Georgia turtle farm, including up to one hundred (100) turtles provided from authorized "catch outs", notwithstanding other special permits as issued by the department.

Rule 391-4-16-.07. Specifications for Turtle Farms.

- (1) Outdoor facilities including, but not limited to, breeding ponds, grow-out ponds, holding ponds, and nesting areas shall meet the following conditions:
 - (a) All such facilities shall be contained within a perimeter fence not less than 24 inches in height from ground level;

- (b) The perimeter fence shall be sufficient to prevent egress and ingress of any turtle;
 - (c) All ponds shall be permanent earthen structures unless otherwise stipulated by the department; and
 - (d) Turtle nesting areas shall consist of non-compacted soil of sufficient depth and area to meet the biological reproductive needs of all species being bred and accommodate the density of the facility's breeding stock and shall provide unrestricted egress and ingress of nesting females from breeding and/or holding ponds, unless otherwise stipulated by the department.
- (2) Indoor housing facilities shall meet the following conditions:
- (a) The facility shall include a structurally sound barrier to prevent egress or ingress of any turtle and infrastructure for holding, breeding, turtle laying area(s), incubation and hatching areas;
 - (b) Suitable sanitary methods shall provide for rapid elimination of excess water and shall be properly constructed, and kept in good repair, to ensure the health of the turtles at all times. The method of drainage shall comply with applicable federal, state, and local laws and regulations relating to pollution control or the protection of the environment; and
 - (c) Turtle nesting areas shall consist of non-compacted soil of sufficient depth and area to meet the biological reproductive needs of all species being bred and accommodate the density of the facility's breeding stock and shall provide unrestricted egress and ingress of nesting females from breeding and/or holding ponds, unless otherwise stipulated by the department.
- (3) All indoor and outdoor facilities shall be in compliance with applicable provisions of O.C.G.A. [27-5-6](#).

Repealed: New Rule of same title adopted. F. Apr. 5, 2018; eff. Apr. 25, 2018.

Rule 391-4-16-.08. Records and Reports.

- (1) Any person possessing a valid commercial turtle farming permit issued by the department shall maintain accurate and complete written records and documentation on each transaction of a commercial enterprise involving native fresh-water turtles. Such records

shall include the source, species, age class (hatchling, juvenile or adult), and sex of each turtle. Such records shall be made available to department personnel for inspection at their request.

- (a) The department shall comply with the provisions of O.C.G.A. [50-18-72\(b\)\(1\)](#) as it relates to disclosure of trade secrets of a privileged and confidential nature.
- (2) Any person possessing a valid commercial turtle farming permit issued by the department shall submit annually to the department not later than March 1 a report that shall, where applicable, include:
- (a) the total number of turtles of each species possessed, including number of each sex, if determinable;
 - (b) the total number of turtles of each species captured, including number of each sex, if determinable;
 - (c) counties trapped;
 - (d) total mortality, by species, including cause of death, if known;
 - (e) number of turtles, by species, harvested for market;
 - (f) number of each species of turtles or eggs sold, offered for adoption, given away, bartered, or exchanged; and
 - (g) per transaction, the name and address of each supplier of native fresh-water turtles or eggs and the name and address of each purchaser or recipient of native fresh-water turtles, turtle eggs, or turtle products.

[Rule 391-4-16-.09. Inspection and Inventory of Turtle Farms.](#)

- (1) Department personnel may, at any time, inspect turtle farms, including importation and exportation shipments, turtles, eggs, records, lands, facilities and any other equipment that may be used in the production, processing, or transportation of turtles, turtle eggs, or turtle products.
- (2) A turtle farm inspection may include a complete census or scientific survey of the turtle stock by the department under the following conditions:

- (a) upon lawful sale or transfer of ownership; or
 - (b) when an inspection indicates a violation of this Chapter; or
 - (c) pursuant to an investigation wherein turtles or their eggs may have been unlawfully acquired; or
 - (d) prior to the transfer of turtle stock resulting from the revocation of a commercial turtle farming permit.
- (3) A permitted turtle farmer shall cooperate fully should an inventory or census be required by the department.

Rule 391-4-17-.02. Purpose.

The purpose of these rules and regulations is to establish the administrative procedures necessary to carry out the purposes of Article 1A of Title 52, Chapter 7, Boating Violator Compact. The Boating Violator Compact is a voluntary interstate agreement which provides participating states with a mechanism to participate in a reciprocal program to:

- (1) Promote compliance with the statutes, laws, administrative rules and regulations relating to boating safety in their respective states, and
- (2) Provide for the fair and impartial treatment of boating violators within the participating states in recognition of the individual's right of due process and the sovereign status of a party state.

Rule 391-4-17-.03. Boating Violator Compact Manual.

Subject to all applicable statutes and the constitution of the State of Georgia, including the provisions of Chapter 13 of Title 50, the "Georgia Administrative Procedure Act", and pursuant to the provisions of O.C.G.A. [52-7-31\(c\)](#), the following Boating Violator Compact Manual hereby establishes the administrative and procedural guidelines for participation in the Boating Violator Compact.

Boating Violator Compact Manual

Section I

The following are the general procedures to be followed by Georgia Conservation Rangers in handling boating misdemeanor violations committed by individuals who are not residents of Georgia, but are a resident of a Boating Violator Compact (BVC) member state at the time of the violation.

Georgia non-residents who are residents of a BVC member state at the time of the misdemeanor boating violation occurring in Georgia may be released on personal recognizance under the following conditions:

Violations covered

1. Any violation subject to the provisions of a "Penalty Assessment", which allows a violator to comply with a citation by mailing a fine payment to the issuing agency or a court.
2. Any violation written as a summons requiring a violator to deal directly with the court, either in person, by mail or through an attorney. Unless there are other restrictions in this document or in the laws, policies or procedures of the issuing state or the court of jurisdiction.
3. In order for a violation to be subject to these provisions the person to whom the citation is issued must be a resident of a Compact state, other than the issuing state, at the time the citation is issued.

Types of Violations Not Covered

1. Any violations that mandate a personal appearance.
2. Any petty offense or misdemeanor violation that has a jail term as a mandatory penalty.

3. Any felony violation.
4. Any violation that the issuing officer deems serious enough to arrest a resident violator.
5. Any violation or situation which the laws, policies or procedures of the State of Georgia dictate shall be handled otherwise.

I. Procedures for the Georgia Department of Natural Resources

- A. The officer issues a citation to the violator on the standard form used by Georgia DNR.
 1. When a non-resident is issued a citation and released on personal recognizance under the provisions of this compact, it is advisable that the signature of the recipient is contained on the citation, regardless of specific requirements on that issue. A physical description of the recipient (height, weight, eye color, and hair color) should also be listed.
 2. The citation is returnable to the court at a future date specified on the document, in accordance with the laws, regulations, policies, or procedures of the State of Georgia and/or the Court of jurisdiction.
- B. If the violator pays the fine or resolves the case with the court, as appropriate, the matter is closed and no further action is taken.
- C. If the violator does not resolve the case by payment of the fine or with the court, action under the provisions of the BVC will be initiated.
 1. The "Defendant's Notice of Failure to Comply" form will be completed and the original delivered to the violator by certified mail, return receipt requested, or in person. The remaining copies (Home State Notice of Failure to Comply, Defendant's Notice of Compliance, and Home State Notice of Compliance) are held in a suspense file pending a response from the violator.
 - a. Sufficient time will be allowed for the defendant to respond to the Defendant's Notice of Failure to Comply Form prior to initiating further action under the BVC. This will normally not be less than 14 days and not more than 28 days, or within any other grace period established by the Board of Compact Administrators, as defined in Code Section [52-7-30](#).
 - b. If the defendant complies with the terms of the citation within the grace period allowed, no further action is taken under the provisions of this section of the BVC. Final action in a court case is not a prerequisite for compliance.

2. If the defendant fails to respond within the time allowed, the "Home State Notice of Failure to Comply" will be sent to the home state of the defendant by Georgia DNR administrative personnel.

Any "Home State Notice of Failure to Comply" shall be processed by the issuing state and reported to the home state within six months of issuance of the citation, or within any other time frame that may be established by the Board of Compact Administrators.

- a. If at any time beyond this point in the BVC process the defendant resolves the case with the court, it is imperative that copies 3 and 4, (Defendant's and Home State Notice of Compliance) be mailed immediately so that any pending or ongoing suspension of license privileges by the home state of the defendant which are the result of the action at hand may be canceled.
- b. At any time subsequent to the mailing of the "Home State Notice of Failure to Comply" that the violator complies with the citation, no further actions under this Section of the BVC will take place.

Methods of Compliance

1. Payment by mail where provided for.
2. Responding to the citation in person.
3. Submission of a plea by mail where allowed.
4. Responding through an attorney where allowed.

Evidence of Compliance (in response to a notice of suspension for non-compliance).

1. Certificate from the court.
2. Copy of the court judgment.

NOTE: personal representations, check stubs, money order receipts, etc. are not acceptable.

3. The violator copy of a Notice of Compliance sent by the issuing state.

Section II

The following are the general procedures to be followed by the home state of an individual committing boating violations in another BVC member state, who upon release on personal recognizance failed to resolve the case as appropriate, even after the "Defendant's Notice of Failure to Comply" has been sent, and the issuing state has had to send the "Home State Notice of Failure to Comply".

I. Procedures for the Home State

- A. Upon receipt of the "Home State Notice of Failure to Comply" from the issuing state, the agency or licensing authority of the home state of the violator will review the form for the following:
 - 1. Is it legible?
 - 2. Is it complete?
 - 3. Is it timely, within the six-month limit, or other limit established by the Board of Compact Administrators, of the compact?
 - 4. Is the violation covered under the compact?
 - 5. Are all other aspects of the case proper under applicable state laws, policies, and procedures?
- B. If for any reason the case cannot be acted on, it will be returned to the issuing state within 14 days, or other time frame established by the Board of Compact Administrators, with an explanation of the problem. If all problems are resolved and the case is returned to the home state it will be processed as outlined in this section.
- C. If the case is accepted, it will be entered into the suspension process of the home state.
- D. A Notice of Suspension will be prepared and sent to the violator.
 - 1. The Notice of Suspension should have a delayed effective date to permit the violator to contact the court in the issuing state and resolve the case. The length of this delay is subject to the laws, policies or procedures of the home state, but should be at least 14 days in length. Upon receipt of a "Home State Notice of Failure to Comply" by the Georgia DNR, the licensee or permit holder shall be notified of the proposed suspension or revocation personally or by a letter sent by certified mail or statutory overnight delivery to the last known address of the licensee or registration holder. The notice of proposed suspension or revocation shall be deemed received three days after mailing. The revocation or suspension shall become final 30 days after issuance if not appealed.

2. The Notice of Suspension must inform the violator of the facts behind the suspension with special emphasis on the procedures to be followed in resolving the matter with the court in the issuing state. Accurate information on the court (name, address, phone number) must be provided in the Notice of Suspension. This will help eliminate inquiries of the home state which are costly, time consuming and nonproductive as the home state can do nothing to resolve the case.
- E. Should the defendant request a hearing on the suspension, it will follow the form appropriate to the laws, policies or procedures of the home state. Georgia residents receiving a Notice of Suspension from the Georgia DNR under the BVC provisions for failure to comply with the terms of a citation issued in another BVC member state shall request, in writing, a hearing within 30 days from the date of personal notice or receipt of notice sent by certified mail or statutory overnight delivery, return receipt requested, or the right to said hearing shall be deemed waived. If a request for hearing is timely made by such a Georgia resident, the hearing shall be conducted in accordance with Chapter 13 of Title 50, the "Georgia Administrative Procedure Act". The hearing shall be recorded.
1. Such hearings will be restricted to challenging the right of the home state to suspend under the provisions of the BVC; to deny receiving the original citation (thus the importance of the violator's signature on the citation); or to claim that the case has been resolved.
 2. The question of guilt or innocence regarding the original charge will not be a subject of hearings held under the provisions of this section.
 3. If needed, assistance can be requested from the issuing state. This is normally limited to obtaining certified documentation.
 4. **NOTE: Suspensions levied for failure to comply with the terms of a citation are enforced in the home state of the violator and honored by all compact states.** These administrative suspensions are not to be confused with suspensions which are the result of convictions of boating violations in one or more states which are participants in the BVC.
- F. If the suspension is upheld, the defendant must then proceed to resolve the court case with the suspension remaining in effect.
- G. If the suspension is denied for any reason, the case is terminated and the suspension order vacated. In such cases the issuing state will be informed of the reason for denial.
- H. Appeals from suspension orders will be handled in accordance with the laws, policies and procedures of the home state.

1. Should a suspension order be overturned on appeal, the issuing state shall be notified.
- I. When a violator resolves a case with the court in the issuing state, an acknowledgement of compliance will be issued directly to that person. It is the responsibility of the violator to present this document to the agency or licensing authority in the home state in order to terminate the suspension. The acknowledgement of compliance may take any form acceptable to the home state and the court.
 1. If the acknowledgement of compliance is presented prior to the effective date of the suspension, the suspension is cleared immediately.
 2. If the acknowledgement of compliance is presented after the effective date of the suspension, reinstatement will be handled in accordance with the laws, policies and procedures of the home state.
 - J. Any reinstatement or restoration fees shall be established and assessed in accordance with the laws, policies and procedures of the home state.

Section III

Reciprocal Recognition of Suspensions

States participating in the BVC shall recognize the suspension for cause of the license privileges or rights of any person by any other BVC participating state. This reciprocal recognition of suspensions is not to be confused with suspensions levied for failure to comply as outlined in Section I and II above. Suspensions for cause of license privileges are the result of a conviction, or an accumulation of convictions, of boating violations in one or more states which are participants in the BVC.

When the Georgia Department of Natural Resources receives notice of suspension of a person's boating privileges or licenses by a BVC member state, the Department shall determine whether the violation, or accumulation of violations, leading to the suspension could have led to the suspension of rights, privileges, or licenses under Georgia law. If the Department determines that the person's privileges or licenses could have been suspended under Georgia law, the department shall suspend the person's licenses, rights, and privileges to operate a vessel in Georgia, pursuant to O.C.G.A. [52-7-30](#), Article VI, for the same period as imposed by the BVC member state.

- A. States participating in the BVC shall recognize the suspension for cause of the boating license, privileges or rights of any person by any other party state if:
 1. The suspension is the result of a conviction for one or more of the following violations or a failure to appear on a boating citation:

- a. Priority will be placed on the following violation types:

VIOLATION	BVC CODE
Operating vessel under the influence	BUI
Reckless operation	REK
Navigation Rules of the Road	NAV
License violations, fraud, false statement	LIV
Accumulated boating violations	ACV
Violations while on revocation	REV
Safety Equipment violations	SFV
Other criminal violations	OTV
Failure to Appear	FTA
Homicide/Feticide by Vessel	HBV
Serious Injury by Vessel	SIV
Interfering with an Officer	IWO

2. And, such recognition of suspension is not contrary to the laws of that state.

B. Recognition of suspensions which do not meet the criteria of Section III.A.1 and 2 as outlined above will be up to the laws, policies and procedures of that state.

C. Each state participating in the BVC shall communicate suspension information to other participating states, using the Interstate Boating Violator Compact database. Party states will use the guidelines prescribed by database administration. At a minimum the following information will be included:

1. Positive identification of the subject of the suspension. Including:
 - a. Name
 - b. Date of birth
 - c. Physical description
 - d. Last known address
2. The basis of the suspension including:
 - a. Violation(s) and convictions upon which the suspension is based.
 - b. The scope of the suspension (i.e. operating, licenses, all privileges or rights).
 - c. Effective dates of the suspension and term of the suspension

- D. In the event documentation of a violation and subsequent license suspension is needed by a member state for suspension hearings or other purposes, the issuing state shall provide certified copies of the citation or other charging instrument, any arrest or investigation reports, suspension orders and the disposition of the matter.

Section IV

Transmittal of Conviction Information to the Home State of the Violator

When the Georgia Department of Natural Resources receives notice of a conviction of a Georgia resident from the agency or licensing authority of a BVC member state, the Department shall treat the conviction as if it had occurred in Georgia.

- A. Upon a conviction, the issuing state shall forward to the home state of the violator the following information:
 - 1. Personal Information
 - a. Name
 - b. Date of birth
 - c. Sex
 - d. Physical description (height, weight, hair, eyes)
 - e. Last known address
 - 2. Violation Information
 - a. Citation number
 - b. Violation description
 - c. Fine assessed
- B. For the purpose of consideration for license suspension, the home state shall treat such convictions in other BVC member states as if they had occurred in the home state.
- C. In the event detailed information on a violation is needed by the home state, for license suspension hearings or other purposes, the issuing state shall provide certified copies of the citation or other charging instrument, any arrest or investigation reports and the disposition of the matter.

Section V.

Administrative Matters

I. Entry into the Compact

- A. Entry into the BVC may be accomplished by the following methods.
 - 1. A state legislature may accomplish BVC joinder by adopting the full compact as a statute.
 - 2. A state legislature may authorize and direct that state's boating enforcement agency to enter into the compact.
- B. Upon legislative action as specified above, entry into the BVC shall be finalized by the submission of a resolution of ratification and an informational application submitted to the chairman of the board of compact administrators.

The resolution of ratification shall be signed by the chief administrator of the boating agency or licensing authority and shall include:

- 1. A citation and copy of the authority by which the state is empowered to become a member of the Boating Violator Compact;
 - 2. Statement of agreement to comply with the terms and provisions of the compact; and
 - 3. A statement that compact entry is with all states then party to the Boating Violator Compact and with any state that legally becomes a party to the compact.
- C. The effective date of entry shall be specified by the applying state but shall be at least sixty (60) days after notice has been given to each member state by the chairman of the board of compact administrators.
- D. Only violations which are committed on or after the effective date of entry, and resulting suspensions, shall be subject to the provisions of the Compact.

II. Withdrawal from the Compact

- A. A member state may withdraw from the BVC by submitting official written notice to the other member states. Such withdrawal shall not be effective until ninety (90) days after such notice is mailed.
- B. Such notice must be directed to the compact administrator of each member state.
- C. The withdrawal of one or more member states shall have no effect on the validity of the BVC as to the remaining member states.

Chapter 391-5. HISTORIC PRESERVATION.

Subject 391-5-1. STATE PARKS AND HISTORIC SITES SYSTEM.

Rule 391-5-1-.01. Purposes.

The purposes of the State Parks and Historic Sites System are:

- (a) To develop and implement a long-range comprehensive plan for identifying and acquiring suitable tracts of land containing unique, natural, scenic, historic, or archaeological resources.
- (b) To preserve, conserve, protect and enhance the resources under the custody of the State Parks and Historic Sites System for the enjoyment of present and future generations.
- (c) To provide appropriate recreational opportunities for Georgia residents and visitors that will permit maximum enjoyment of parks and historic sites consistent with the protection of their resources.
- (d) To operate a balanced, ongoing interpretation, education and outdoor recreation program designed to expand the knowledge and understanding of Georgia's history, prehistory, fauna, flora, geography, geology, and other aspects of its natural and cultural resources in a manner consistent with the protection of the environment.

History. Original Rule, entitled "Purposes," was filed on June 30, 1977; effective July 20, 1977.

Repealed: New Rule, same title, adopted F. Jun. 30, 1994; eff. July 20, 1994.

Rule 391-5-1-.02. Definitions.

For the purpose of these rules and regulations, the following definitions shall apply:

- (a) "Abandon" means to voluntarily relinquish property with no intent to retain possession.
- (b) "Aircraft" means a device that is used or intended to be used for human flight in the air, including powerless flight.
- (c) "Associate" means a paid staff employee of the division.

- (d) "Authorized representative" means an associate or agent of the division with delegated authority to enforce the provisions of this chapter.
- (e) "Department" means the Georgia Department of Natural Resources.
- (f) "Designated" means indicated by a sign or delegated authority received in writing.
- (g) "Division" means the Parks, Recreation and Historic Sites Division of the department.
- (h) "Director" means the director of the division or his designee.
- (i) "Historic site" means any real property subject to the jurisdiction and control of the department where a significant event, a prehistoric or historic occupation or activity, or a building or structure, whether standing, ruined, or vanished, possessing historic, cultural, or archaeological value are interpreted and where appropriate recreational activities may be provided.
- (j) "Licensed concessionaire" means any person who is licensed by the department to operate a site which sells, rents, leases or provides goods (perishable or non perishable) or services for site visitors.
- (k) "Motor vehicle" means any wheeled conveyance for the transportation of persons or materials, which conveyance is powered or drawn by a motor, including but not limited to automobiles, trucks, buses, motorcycles and scooters, and all-terrain vehicles, but excluding motorized wheelchairs.
- (l) "Park" means any real property subject to the jurisdiction and control of the department whose primary function is to provide recreation, natural preservation and interpretation. As used herein, "park" shall mean "state park".
- (m) "Parking area" means any part of a site designated for parking or stationing vehicles.
- (n) "Permit" means a written authorization to engage in uses or activities that are otherwise prohibited, restricted, or regulated.
- (o) "Person" means any individual, corporation, firm, partnership, group, society, association, or private or public body.
- (p) "Pet" means those taxa of animals which have traditionally lived in a state of dependence on and under the domination and control of humans and have been kept as tame pets, including cats and dogs. The term "pet" does not include animals raised as livestock. Animals which live in a captive or tame state and which lack a genetic distinction from members of the same taxon living in the wild are presumptively wild animals.
- (q) "Possession" means exercising direct physical control or dominion, with or without ownership, over property, or archaeological, historical, or natural resources.

- (r) "Public use limit" means the number of persons; number and type of animals; amount, size and type of equipment, vessels, mechanical modes of conveyance, or food/beverage containers allowed to enter, be brought into, remain in, or be used within a designated geographic area or facility; or the length of time a designated geographic area or facility may be occupied.
- (s) "Road" means any surfaced area, either paved or unpaved, within a site which is designed for public vehicular traffic, except a through highway.
- (t) "Site" means either a park or a historic site.
- (u) "Site manager" means an official of the department in charge of a site or an authorized representative of such person.
- (v) "Smoking" means the carrying of lighted cigarettes, cigars or pipes, or the intentional and direct inhalation of smoke from these objects.
- (w) "Swimming area" means a designated swimming or bathing area, including buildings, structures, apparatuses, and water and land areas in connection with swimming and bathing at a natural pond, lake, stream, or any body of fresh or salt water in, or contiguous to, a site.
- (x) "Through highway" means a road maintained and owned by a state, city, county or federal government which road is bounded on both sides by site property for any distance, and which is available for public use at all times.
- (y) "Trail" means a pathway (designated by signs or otherwise) across land or water used for recreational activities including hiking, nature walks, backpacking, bicycling, equestrian activities, or water activities.
- (z) "Unloaded", as applied to weapons and firearms means that:
 1. There is no unexpended shell, cartridge; or projectile in any chamber or cylinder of a firearm or in a clip or magazine inserted in or attached to a firearm;
 2. A muzzle-loading weapon does not contain gun powder in the pan, or the percussion cap is not in place; and
 3. Bows, crossbows, spear guns or any implement capable of discharging a missile or similar device by means of a loading or discharging mechanism, when that loading or discharging mechanism is not charged or drawn.
- (aa) "Vehicle" means any wheeled conveyance (except a baby stroller or wheelchair) for the transportation of persons or materials whether:
 - (1) powered or drawn by motor as an automobile, truck, motorcycle or scooter;

- (2) or animal drawn as a carriage, wagon, or cart;
 - (3) or any bicycle or tricycle;
 - (4) or any trailer in tow of any size, kind or description. Recreational or site transportation services specially authorized by the director are excluded from the term "vehicle".
- (bb) "Vessel" means any type of watercraft, including but not limited to boats, canoes, inflatable rafts, and floats used or capable of being used, as a means of transportation on water.
- (cc) "Water" means any fresh or salt water, including lakes, ponds, pools, rivers and creeks.
- (dd) "Weapon" means a firearm, compressed gas or spring-powered pistol or rifle, bow and arrow, crossbow, blowgun, spear gun, hand-thrown spear, slingshot, irritant gas device, explosive device, or any other implement designed to discharge missiles. This definition includes any weapon the possession of which is prohibited or regulated under state law.

History. Original Rule entitled "Definitions" adopted. F. Jun. 30, 1994; eff. July 20, 1994.

Rule 391-5-1-.03. Access to Sites.

(1) Entrance and Hours.

- (a) The director shall establish for each site and facility a reasonable schedule of regular days and hours of operation to permit maximum access by the public consistent with the management and protection of the resource and the health, safety, and welfare of persons using the site. The schedule of regular days and operating hours may vary according to season.
- (b) Regular days and operating hours shall be posted at the entrance of each site and at appropriate facilities within the site.
- (c) Entering or leaving any site except through the designated entrance points is prohibited, except in an emergency.
- (d) No person may enter a site for the purpose of using the resources or facilities therein without paying the appropriate fee, if any, for that site or facility.
- (e) No person shall be allowed entry or exit before opening hours or after closing hours, except in emergency or unusual circumstances. Only those persons

registered as overnight guests at a site facility shall be in the site before opening or after closing hours.

(2) Closures and Public Use Limits.

- (a) Consistent with applicable legislation and board policy, and based upon a determination that such action is necessary for the maintenance of public health and safety, protection of environmental or scenic values, protection of natural, historic, or archaeological resources, aid to scientific research, implementation of management responsibilities, construction and maintenance activities, equitable allocation and use of facilities or the avoidance of conflict among visitor use activities, the director may:
 - 1. Limit visiting hours, impose public use limits or close all or a portion of a site to all public use or to a specific use or activity.
 - 2. Designate areas for a specific use or activity, or impose conditions or restrictions on a use or activity.
 - 3. To implement a public use limit, the director may establish a permit, registration, or reservation system.
- (b) In the case of emergency or unusual conditions such as severe weather, flooding, high fire danger, or other natural conditions, the disruption of utility service, failure of sanitation or treatment facilities, the need for emergency maintenance or construction activities, civil disturbances, or when the site or facility has reached its maximum capacity, the site manager or his authorized representative may, at his discretion, temporarily close the site or facility, or portion thereof, to public use until the condition is rectified.
- (c) Violating a closure, designation, use or activity restriction or condition, schedule of visiting hours, or public use limit is prohibited.
- (d) Public Notice.
 - 1. Whenever the authority of this rule is invoked to restrict or control a public use or activity, to relax or revoke an existing restriction or control, to designate all or a portion of a site as open or closed, or to require a permit to implement a public use limit, the public shall be notified by one or more of the following methods:
 - (i) Signs posted at conspicuous locations, such as normal points of entry and reasonable intervals along the boundary of the affected site locale.

- (ii) Maps available in the site office and other places convenient to the public.
- (iii) Publication in a newspaper of general circulation in the affected area.
- (iv) Other appropriate methods, such as the removal of closure signs, use of electronic media, site brochures, maps and handouts.

(3) **Parking Pass.**

- (a) **Parking Pass Required.** No person shall park a motor vehicle on any site without purchasing and displaying a daily or annual parking pass, except as provided in this section.
- (b) **Exceptions.** The following shall be exempt for the requirement to display a daily or annual parking pass:
 - 1. School groups, including vocational schools, colleges and universities, accompanied by one or more teachers.
 - 2. Daily lodge restaurant users.
 - 3. Individuals attending one-day conferences at lodges (not including overnight guests).
 - 4. Government, delivery, and service vehicles where the drivers or passengers are conducting business with authorized representatives of the department.
 - 5. Visitors to historic sites where admission is charged.
 - 6. Visitors for special events sponsored or co-sponsored by an outside group or community organization, at the discretion of the site manager.
 - 7. Golfers parked at golf course parking lots, where a portion of the greens fees are applied to the parking pass program.
- (c) **Rates.**
 - 1. An annual parking pass shall be available at a cost of \$50.00 per year per pass, except as otherwise provided in these rules. Senior citizens (62 years of age or older) may purchase an annual parking pass at a cost of \$25.00 per year per pass for vehicles with a capacity of 12 passengers or fewer, including the driver. Annual parking passes shall be available at a cost of \$75.00 per year for motor vehicles with a capacity of 13 to 30 passengers,

including the driver; and at a cost of \$250.00 per year for motor vehicles with a capacity of more than 30 passengers, including the driver.

2. A daily parking pass shall be available at a cost of \$5.00 per day per motor vehicle with a capacity of 12 passengers or fewer, including the driver, except at Tallulah Gorge State Park where the daily parking pass shall be available at a cost of \$5.00 per day for each motor vehicle with a capacity of 12 passengers or fewer, including the driver. In all parks, the daily parking pass shall be available at a cost of \$30.00 per day for each motor vehicle with a capacity of 13 to 30 passengers, including the driver; and a cost of \$70.00 per day for each motor vehicle with a capacity of more than 30 passengers, including the driver. The daily parking passes shall be valid at all sites visited on the day of purchase. Overnight guests will be required to purchase only one daily pass per vehicle which shall be valid for the duration of the uninterrupted stay.
3. Georgia residents certified as disabled veterans by the commissioner of veterans service may purchase a daily pass for \$3.75 or an annual pass for \$37.50, when the pass is to be used for his or her own motor vehicle. Certified Georgia active duty military and veterans may purchase a daily pass for \$3.75 or an annual pass for \$37.50, when the pass is to be used for his or her own motor vehicle. Certified Georgia active duty military and veterans 62 years of age and older may purchase a daily pass for \$3.75 or an annual parking pass for \$18.75, when the pass is to be used for his or her own motor vehicle.
4. Where utilized in these Rules to determine the price of a daily or annual parking pass, the capacity of a motor vehicle is determinative of size only, regardless of the number of persons actually occupying the motor vehicle at the time of purchase of the daily or annual parking pass.
5. The Director is authorized to implement a program to encourage visitation and volunteer efforts at state parks by offering discounted rates on parking passes to organizations wishing to purchase significant quantities of parking passes for distribution to their members, employees, and associates. Parking passes purchased at discounted rates shall not be resold at any amount exceeding the original purchase price.

(d) Purchases.

1. Annual passes shall be available at all sites, division offices, and may be purchased online at the division's website.
2. Daily parking passes may be purchased at collection boxes or site offices.

- (e) **Display.** All passes shall be hung from the inside rearview mirror of the vehicle. Vehicles without inside rearview mirrors shall display the pass in another place clearly visible from the exterior of the vehicle.

Rule 391-5-1-.04. Resource Protection.

(1) Natural, Historic, and Archaeological Resources.

- (a) Except as otherwise provided in this chapter, no person shall:
1. Willfully mark, deface, damage, displace, remove or tamper with any site building facility, bridge, table, bench, fireplace, railing, paving or paving material, water line or other utility, permanent or temporary sign, placard or notice, monument, stake, post, boundary marker, or other site structure, equipment, or property.
 2. Walk or climb on or over or enter any building, structure, historic or archaeological resource or natural feature unless such activity is authorized or conducted by the site manager or division associates.
 3. Toss, throw or roll rocks or other items inside or into caves, caverns, valleys, canyons, or gorges, or down hillsides or mountainsides.
 4. Possess, catch, destroy, injure, deface, remove, dig, disturb, buy, sell, give to another or accept as a gift in or from any site:
 - (i) Living or dead mammals, birds, fish, amphibians or reptiles, or the parts or products thereof, such as nests, eggs, and antlers.
 - (ii) Plants or the parts or products thereof.
 - (iii) Paleontological specimens, geological or mineral resources or cave formations.

- (iv) Historical structures, their furnishings or fixtures, or other cultural or archaeological resources.

This section does not apply to animals, birds, fish or plants taken in accordance with law and these rules or commercially purchased foodstuffs otherwise in compliance with law.

5. Introduce into any site any plant or animal species by willful abandonment, negligence or for any other reason without authorization of the director. Authorization shall be granted only in cases where the introduction can be shown to be beneficial to the site and in keeping with natural systems management principles.
6. Feed, touch, tease, frighten or intentionally disturb wildlife nesting, breeding or other activities.
7. Dress or butcher game animals, birds, or fish taken according to Title 27, Official Code of Georgia Annotated, except at facilities specifically designated for that purpose.
8. Ignite or attempt to ignite any fire except in places provided or designated for such purposes, under the continuous care and direction of a responsible person. All fires, matches, and smoldering material must be completely extinguished after use. During periods of high fire danger, the site manager may close all or a portion of a site to lighting or maintaining fires.
9. Use stoves or lanterns, except under conditions that may be established by the site manager.
10. Use or possess wood gathered in the site except dead and fallen wood gathered in an area designated by the site manager or salvaged by site associates as a result of natural causes or authorized construction. Such wood may be used only within the site as fuel in campfires or grills, unless its removal from the site is authorized in writing by the site manager.
12. Smoke in areas designated by the site manager as non-smoking areas.
13. Possess or use a mineral or metal detector, magnetometer, side scan sonar, subbottom profiler, or any other electronic device for the detection of metals, minerals, artifacts, or lost articles or for treasure hunting. This paragraph does not apply to:
 - (i) A device broken down and stored or packed to prevent its use while in site areas.

- (ii) Electronic equipment used only for the navigation and safe operation of boats or the detection of fish.
- (iii) Equipment used for authorized scientific or administrative activities.

14. The restrictions in this chapter do not apply to the properly authorized actions of contractors, concessionaires and associates of the department.

- (b) The site manager may restrict hiking, pedestrian use, or water use activities to a designated trail or walkway system. Leaving a trail or walkway to shortcut between portions of the same trail or walkway, or to shortcut to an adjacent trail or walkway in violation of designated restrictions is prohibited.
- (c) The site manager may designate certain fruits, berries, nuts, or pine needles which may be gathered by hand for personal use or consumption upon a determination that the gathering or consumption will not adversely affect site wildlife, the reproductive potential of a plant species, or otherwise adversely affect site resources. The site manager may limit the size and quantity of the natural products that may be gathered or possessed for this purpose or restrict their consumption to the site. The sale or commercial use of such products is prohibited.
- (d) Collection of natural objects, including plant and animal life and minerals, and historical or archaeological artifacts for scientific and educational purposes may be permitted under conditions specified by the director. Specimen collection shall be permitted only for the purposes of understanding and managing site resources.

(2) **Pets.**

- (a) Pets are allowed in sites only if kept on a leash not longer than six feet or confined to a cage, motor vehicle or trailer. Dogs are permitted in cottages designated by the director as "dog-friendly." Pets shall not be left unattended at any time or tied to any tree, plant, rock, site, structure, facility, or piece of camping equipment.
- (b) Pets are not permitted in swimming areas, cottages other than those designated as "dog-friendly" by the director, lodges, any other site buildings, or areas closed to the possession of pets by the site manager. This section does not apply to guide animals assisting disabled persons.
- (c) If a pet menaces site visitors or associates or makes noise that is unreasonable considering location, time of day or night, impact on site users, and other relevant factors, or frightens wildlife by barking, howling, or making other noise, the site manager or other associates may require the owner to remove the pet from the site.

- (d) Pet owners must collect, remove and properly dispose of pet excrement.
- (e) Pets or feral animals running-at-large that are observed by site associates in the act of killing, injuring, or molesting humans or wildlife may be destroyed if necessary for public safety or protection of wildlife or other site resources.
- (f) The possession and use of horses is governed by Rule [391-5-1-.06\(6\)](#).
- (g) No other animal may be brought into a site except as part of a site-sponsored interpretive or educational program.
- (h) This section does not apply to dogs used by authorized federal, state and local law enforcement officers in the performance of their official duties.

(3) Sanitation.

- (a) Garbage, trash, rubbish, litter, or any other waste material or waste liquid generated on the site and incidental to authorized uses shall be either removed from the site or deposited in receptacles provided for that purpose. Improper disposal of such waste, human and animal waste included, on the site is prohibited.
- (b) No household, commercial, or industrial garbage, trash, rubbish, debris, dead animals or litter of any kind brought from outside the site shall be disposed of in the site.
- (c) The spilling, pumping or other discharge of contaminants, pollutants or other wastes, including, but not limited to, sewage, petroleum, industrial and commercial products and by-products on site lands or waters is prohibited.
- (d) Bathing, or washing food, clothing, dishes, or other property at public water outlets, fixtures or pools, except at those designated for such purpose, is prohibited.

(4) Memorials.

- (a) The scattering of human ashes from cremation is prohibited, except under conditions established by the site manager.
- (b) The burial of human remains is prohibited except in existing cemeteries or burial grounds located within a site under conditions established by the director.
- (c) The installation of a monument, memorial, tablet, structure, or other commemorative installation in a site without the authorization of the director is prohibited.

History. Original Rule entitled "Resource Protection" adopted. F. Jun. 30, 1994; eff. July 20, 1994.
Amended: F. Mar. 8, 2006; eff. Mar. 28, 2006.

Rule 391-5-1-.05. Safety and General Conditions of Use.

(1) Vehicles.

- (a) **Traffic Control.** Site managers and associates are authorized to direct traffic in sites. All persons shall comply with lawful orders, signals, and direction of such site managers and associates. All persons shall observe and comply with posted traffic control devices and signs.
- (b) **Motor Vehicles.** Motor vehicles are restricted to site roads, through roads, and parking areas. The operation of motor vehicles within a site after normal operating hours is limited to division associates and registered overnight guests, except in an emergency.
- (c) **Bicycles.**
 - 1. Bicycles shall be ridden on designated bicycle trails or roads only. They may be pushed by hand over open spaces, such as lawns or beaches, or paved areas reserved for pedestrian use. Bicycles shall be neither ridden or pushed along designated nature trails or footpaths.
 - 2. Where provided, bicycle racks must be used for parking bicycles. Bicycles shall not be chained and locked to trees or site structures or placed so as to obstruct pedestrian or vehicular movement.
- (d) **Obstructing Traffic.** No person shall cause or permit any vehicle to obstruct traffic by unnecessary stopping. In the event of mechanical difficulties, the driver shall report the occurrence at once to site associates and make arrangements for the expeditious removal of the vehicle. No vehicle shall be left standing or parked on any site road at night without lights visible for at least two hundred feet (200') from both front and rear of the vehicle.
- (e) **Trucks.** No trucks or other vehicles commonly used for carrying freight, merchandise or goods for sale, unless traversing the site on a through highway, shall operate on site roads without obtaining written permission from the site manager, except when such vehicles are used in connection with delivery of supplies, site work, activities, or concessions, or are used for transporting persons to a site for recreational purposes and not for compensation.
- (f) **Towing Other Vehicles.** No person shall operate or park within any site, a vehicle in tow of another vehicle, except boat, camping or travel trailers or recreational vehicles towing auxiliary automobiles.

(g) **Parking.**

1. Parking vehicles at any place within a site, including upon the right of way of any county, state, or federal highway which traverses the site, is prohibited except in designated parking areas in accordance with markings and signs and any instructions given by site associates. Double parking or obstructing traffic is prohibited.
2. No person shall park a motor vehicle in any site without a parking pass except as set forth in Rule [391-5-1-.03\(3\)](#).

(h) **Exemptions.** This subparagraph shall not be applicable to vehicles engaged in official business of the department or law enforcement agencies or used in emergency rescue in accordance with the directions of the site manager.

(2) **Aircraft.**

- (a) No person operating or responsible for any aircraft shall cause such aircraft to land in or take off from any site or deliver by air any person, material or equipment by parachute or other means, except in emergencies threatening human life or when authorized in writing by the director.
- (b) This paragraph shall not be applicable to aircraft engaged in official business of federal, state or local governments or law enforcement agencies, aircraft used in emergency rescue in accordance with the directions of the site manager, or aircraft forced to land due to circumstances beyond the control of the operator.

(3) **Skating, Skateboards, and Similar Devices.** Using roller skates, roller blades, skateboards, roller skis, coasting vehicles, or similar devices is prohibited, except in designated areas.

(4) **Weapons.** The use and possession of weapons are prohibited in all sites except:

- (a) When used, or possessed by authorized federal, state and local law enforcement officers in the performance of their official duties;
- (b) When unloaded and packed, cased or stored in a manner that will prevent their ready use;
- (c) When such use or possession has been authorized in restricted areas and under terms and conditions specified in writing by the director; or
- (d) When a person is a lawful weapons carrier as defined in O.C.G.A. § [16-11-125.1](#), that person may carry a handgun or a long gun (as defined in O.C.G.A. § [16-11-125.1](#)), in all parks, historic sites and recreational areas, except in places where prohibited by federal law.

(5) **Noise.** It is prohibited to operate televisions, radios, tape or compact disk players, public address systems, musical instruments, vehicles, or other noise-making devices or machines at volume levels which are unreasonable, considering the nature and purpose of the actor's conduct, location, time of day or night, purpose for which the area is operated, impact on site users, and other factors that would govern the conduct of a reasonably prudent person under the circumstances.

(6) **Interfering with Agency Functions.** The following are prohibited:

- (a) Threatening, resisting, intimidating, or intentionally interfering with a government employee or agent engaged in an official duty or on account of the performance of an official duty.
- (b) Disobeying any lawful order of a law enforcement official, site manager, or authorized associates.
- (c) Knowingly giving a false or fictitious report or other false information:
 - 1. To a government employee or agent in the conduct of official duties; or
 - 2. On an application, registration form, or other document required by law or regulation.

(7) **First Amendment Activities.**

- (a) Public assemblies, meetings, gatherings, demonstrations, religious activities and other public expressions of views under the First Amendment of the U.S. Constitution, including the distribution of non-commercial printed matter, are allowed within sites, provided a permit therefore has been issued by the director or site manager.
- (b) An application for such a permit shall set forth the name of the applicant; the name of the organization (if any); the date, time, duration, nature and place of the proposed event or activity; the estimated number of persons expected to participate; the equipment and facilities to be used; and any other information required by the permit application form.
- (c) Where the number of persons expected to attend, or participate is ten or fewer, a permit may be issued by the site manager. If more than ten persons are expected to attend or participate, approval of the director is required. Permit applications requiring the director's approval will be approved or denied within five business days. Permit applications submitted to the site manager will be approved or denied within 48 hours.
- (d) The site manager or director shall, within the prescribed time, issue a permit on proper application unless:

1. A prior application for a permit for the same time and place has been made that has been or will be granted and the activities authorized by that permit do not reasonably allow multiple occupancy of that particular area; or
 2. It reasonably appears that the event or activity will threaten the health, safety, and welfare of persons using the site; or
 3. The event or activity is of such nature or duration that it cannot reasonably be accommodated in the particular location applied for, considering such things as damaged to site resources or facilities, impairment of the atmosphere of peace and tranquility in natural or historic areas, interference with interpretive, visitor service, program, or administrative activities, or impairment of public use facilities or services of concessionaires or contractors; or
 4. The event or activity would constitute a violation of an applicable law or regulation.
- (e) The permit may contain such conditions as are reasonably consistent with protection and use of the site for the purposes for which it is operated including limitations on the time, location, number of participants, use and facilities, and number and types of equipment used, but not on the content or the message. Locations which are not appropriate for first amendment activities include but are not limited to: museums; archaeological and interpretive areas, historic structures; ruins; trails; sensitive or fragile natural areas; and the habitats of threatened or endangered species.
- (f) No permit shall be issued for a period in excess of 14 consecutive days, provided that permits may be extended for like periods, upon a new application, unless another applicant has requested use of that same location and multiple occupancy of that location is not reasonably possible.
- (g) If a permit is denied, the applicant shall be so informed in writing, with the reason(s) for the denial set forth.
- (h) It is prohibited for persons engaged in activities covered under this section to obstruct or impede pedestrians or vehicles, or harass site visitors with physical contact or persistent demands.
- (i) Participants in events and activities covered under this section are subject to usual fees for site parking, admission, or use.
- (j) Violation of the terms and conditions of a permit issued in accordance with this section may result in the suspension or revocation of the permit.

(8) Special Events.

- (a) Special events, attractions, and entertainments are allowed, provided there is a meaningful association between the site and the events, or the observance contributes to visitor understanding of the significance of the site, and a permit therefore has been issued by the director. A permit shall be denied if such activities would:
 - 1. have an undesirable impact on site resources; or
 - 2. threaten the health, safety, and welfare of persons using the site; or
 - 3. be contrary to the purposes for which the site is operated or compromise the atmosphere of peace and tranquility maintained in natural or historic areas;
or
 - 4. interfere with normal site usage or operations.
- (b) An application for such a permit shall set forth the name of the applicant, the name of the organization (if any) the date, time, duration, nature and place of the proposed event, an estimate of the number of persons expected to attend, a statement of equipment and facilities to be used, and any other information required by the permit application form. The application shall be submitted so as to reach the director at least thirty days in advance of the proposed event.
- (c) As a condition of permit issuance, the director may require:
 - 1. The filing of a bond payable to the department in an amount adequate to cover costs such as restoration, rehabilitation, and cleanup of the area used, and other costs resulting from the special event. In lieu of a bond, a permittee may elect to deposit cash equal to the amount of the required bond. No interest shall be paid by the department on cash deposits.
 - 2. Compliance with other statutory requirements, including but not limited to bonds for fireworks displays.
 - 3. The acquisition of liability insurance in which the State of Georgia is named as co-insured in an amount sufficient to protect the State of Georgia.
- (d) Permits may contain such conditions as are reasonably consistent with protection and use of the site for the purposes for which it is operated. It may also contain reasonable limitations on the equipment used and the time and area within which the event is allowed.
- (e) Concession agreements.

1. Persons sponsoring or conducting special events at which money will be collected must be covered under a concession agreement signed by the director.
 2. The director may waive the required fees when he deems such waiver to be in the best interest of the division.
- (f) Violation of the terms and conditions of a permit or concession agreement issued in accordance with this section is prohibited and may result in the suspension or revocation of the permit or concession agreement.
- (9) **Solicitation.** No person shall solicit contributions in any site in the form of money, goods, services, or otherwise for any purpose. This paragraph shall not apply to contributions made by members of the public to the department for the benefit of state parks and historic sites.
- (10) **Vending, Advertising, Signs, and Broadcasts.**
- (a) Vending. No person, other than a licensed concessionaire, citizen support group, or authorized site associates, shall offer for sale, lease, rent or hire any goods, perishable or non-perishable, services, property, or merchandise, or engage in any business or erect any building, booth, tent, stall or any other structure whether temporary or permanent in nature for purposes of offering for sale, lease, rent, or hire any goods, services, property or merchandise.
 - (b) Advertising.
 1. No person shall display, distribute, post or fix any handbill, pamphlet, literature, circular, poster or other printed matter containing advertising within any site; provided, however, authorization may be obtained from the site manager to post, at specified locations, announcements of site sponsored or authorized events and gatherings.
 2. This section shall not apply to signs placed or authorized by the site manager advertising goods or services available at the site or to informational brochures published by governmental or non-profit organizations describing natural or historic attractions in Georgia to which admission may be charged.
 3. No person shall operate, park, moor or station in a site any vehicle or vessel displaying a sign advertising goods or services for sale or exchange. This paragraph shall not apply to commercial vehicles making deliveries or providing services to the site.

- (c) Signs. No signs or notices of any kind shall be posted in any site without permission of the site manager.
 - (d) Broadcasts. No musical instrument, radio, tape recording, television or sound tract shall be operated or any noise made which demonstrates, advertises or calls attention to any article or service for sale, rent or hire, except as provided for in a written concession agreement approved by the director.
 - (e) Still and Motion Pictures. No person shall take still or motion pictures, either commercial or private, involving the use of special settings or structures or the performance of a cast of persons, either amateur or professional, without first obtaining written permission from the director.
- (11) **Authorization of Special Uses.** Authorization of special uses of government-owned property administered by the division shall be in writing on forms prescribed by the division and must be approved by the director.
- (12) **Property.**
- (a) Unattended and Abandoned Property. No personal property of any kind shall be abandoned or left unattended on site lands or waters. Unattended personal property shall be presumed to be abandoned after a period of 24 hours, or at any time after a posted closure hour, except in locations where longer time periods have been designated or in accordance with conditions established by the site manager.
- (13) **Reporting Accidents.** Accidents involving bodily injury, death, or damage to property shall be reported to site associates as expeditiously as possible.

Amended: F. Mar. 29, 2023; eff. Apr. 18, 2023.

Rule 391-5-1-.06. Facilities and Activities.

- (1) **General.** State parks and historic sites will provide facilities that allow visitors a day use or overnight experience in a natural or historic environment consistent with the management and protection of the resource and the health, safety, and welfare of all persons using the site. The director shall determine which activities are appropriate to each site and establish terms and conditions for the use of site facilities by visitors. Such

terms and conditions shall be made known to users of site facilities by signs, printed materials or other means designed to provide reasonable notice.

- (2) **Fees.** The director is authorized to establish and implement a schedule of reasonable fees for activities and the use and enjoyment of facilities at state parks and historic sites. Rates are established, and from time to time revised, by the director and made available at all sites, upon request. In establishing rates, the division shall consider the discount for certified disabled veterans provided for in the Official Code of Georgia Annotated Section [12-3-9.1](#). The director shall have the authority to waive the imposition of a fee in cases where he deems such waiver to be in the best interest of the division.
- (3) **Reservations and Refunds.** The director is authorized to establish terms and conditions for accepting reservations, collecting deposits and fees, setting check-in and check-out times and procedures, and making refunds for activities and facilities at state parks and historic sites. Such terms and conditions may vary from site to site and shall be made available at all sites, upon request.
- (4) **Boating and Water Use Activities.**
 - (a) Boating.
 1. The authority of the director to establish conditions for the use of site waters shall include, but is not limited to, limiting the type of vessels permitted, prohibiting the use of privately owned vessels, prohibiting the use of motors, or stipulating the type and power of motors permitted and the hours of their use. Conditions established by the director shall not be in conflict with the restrictions specified in the Official Code of Georgia Annotated, Section [12-3-10\(e\) through \(h\)](#).
 2. All vessels using site waters shall be launched and removed at designated water access areas only. No privately-owned vessel shall be left unattended in site waters for longer than 24 hours without authorization from the site manager.
 3. No person, other than a licensed concessionaire or site associates shall rent, hire or operate for charge any vessel in any site. Nor shall any watercraft operating for hire or carrying passengers for a fee land, receive or discharge passengers at any dock, wharf or anchorage within the jurisdiction of the division, except by permit or concession agreement.
 4. No person shall operate any vessel in such a manner as to annoy, frighten or endanger other site visitors or users.
 5. No person, other than authorized site associates, law enforcement officers, or emergency rescue personnel, shall operate any vessel other than a float or inner tube in a site swimming area.

6. The operation of vessels in waters administered by the U.S. Army Corps of Engineers or the U.S. Fish and Wildlife Service shall be in conformity with applicable federal laws and regulations.

(b) Water Skiing.

1. The towing of persons by vessels is prohibited, except in designated waters.
2. Towing or being towed in channels or within 500 feet of areas designated as marinas, swimming beaches, or mooring areas, or within 100 feet of a person fishing or a diver's marker is prohibited.

(c) Swimming.

1. No person shall swim, dive, snorkel, or wade in the waters of any site except in designated areas.
2. All individuals in swimming areas shall comply with posted hours, conditions of use, and instructions given by authorized site associates.

(d) SCUBA Diving.

1. No person shall SCUBA dive in the waters of any site except in designated areas, which shall not include areas reserved for swimming, docking, or mooring.
2. All SCUBA divers must be in possession of a certification card and display a standard diver flag when diving.

(e) Fishing.

1. No person shall fish within areas designated for swimming only.
2. Site managers may prohibit fishing from boat docks or other areas to ensure the safety of those using site facilities.

(5) Horseback Riding.

- (a) Horseback riding is prohibited except in specially designated sites and areas. In sites where riding is prohibited, horses must be confined to a trailer at all times.
- (b) Where permitted, horses shall be thoroughly broken, properly restrained and ridden with due care, and shall not be allowed to graze or go unattended, nor shall they be hitched to any rock, tree or plant.

- (6) **Golf.** No person shall play golf or drive, pitch, putt or otherwise strike a golf ball in any site except in designated areas and under conditions specified by the director.
- (7) **Picnicking.**
- (a) Picnicking is allowed, except in areas closed under Rule [391-5-1.03\(2\)](#). The director may establish conditions for picnicking in areas where picnicking is allowed. Picnicking in violation of established conditions is prohibited.
 - (b) Picnic areas shall not be used for purposes other than picnicking without authorization from the site manager.
 - (c) Use of picnic area facilities including picnic shelters, grills, tables and benches is on a "first come, first served" basis. However, this practice shall not preclude the division from assigning or reserving these facilities for the use of particular persons or groups. No person or group shall use any picnic area, shelter, or facilities to the exclusion of other persons for an unreasonable time if facilities are crowded. The determination of what is unreasonable will be made by site associates based on the number of visitors waiting to use the picnic facilities.
- (8) **Camping.** No person shall erect any temporary shelter, such as a tent, of natural or synthetic material, or prepare a sleeping bag or other bedding material for the purpose of overnight occupancy in any site or bring into any site any movable structure or special vehicle to use for overnight occupancy without registering with site associates, paying the required camping fees, and complying with conditions of use as posted or provided by the site.
- (9) **Games and Athletic Contests.** No games or athletic contests are allowed in any site except in areas designated for such activities or under terms and conditions specified by the site manager. No games or athletic contests shall be engaged in or practiced for either material or financial gain, either directly or indirectly, and there shall be no commercialization or advertising by the participants.
- (10) Other recreational activities may be permitted when the director has determined that they do not:
- (a) have an undesirable impact on site resources;
 - (b) threaten the health, safety, and welfare of persons using the site;
 - (c) interfere with normal site usage or operations;
 - (d) compromise the historic or natural character of the site;
 - (e) cause unwarranted risk to participants due to the nature or the activity, inadequate equipment, lack of qualifications, or weather;

- (f) constitute a consumptive form of use;
- (g) take the form of special events; or
- (h) are not provided primarily for the benefit of spectators.

Rule 391-5-1-.08. Citizen Support Organizations.

- (1) The department is authorized to enter into agreements with citizen support organizations to promote, through financial and other means, the purposes of the State Parks and Historic Sites System.
- (2) The director may terminate any operating agreement with a citizen support organization by written notice after a determination that the organization is in violation of federal, state, or local laws or regulations or the terms of its operating agreement, or the organization has ceased to promote the purposes of the division or the best interests of the state. After such termination or suspension by the director, the organization shall cease to hold itself out as a citizen support organization for the department.

Amended: F. Mar. 22, 2021; eff. Apr. 11, 2021.

Rule 391-5-9-.02. Definitions.

As used in this Chapter, the term:

- (a) "Department" means the Department of Natural Resources, State of Georgia.
- (b) "Exploration" means all activities involving the search for and determination of the nature of submerged cultural resources located on, or imbedded in, the bottoms of the Atlantic Ocean within the three-mile territorial limit of the state or within navigable waters of the state.
- (c) "Operation" means any project, activity, work, exploration, recovery, or conduct for which a permit is required by O.C.G.A. § [12-3-82](#).(a) and these rules.
- (d) "Person" means any association, individual, partnership, corporation, public or private authority or local unit of government and shall include the State of Georgia and all its departments, authorities, and any other governmental agencies or instrumentalities, and any other legal entity.

- (e) "Recovery" means all activities involving the collection, excavation, dislodgement, displacement, disassembly, salvage, or any other removal of submerged cultural resources or associated artifacts from their natural or cultural disposition setting or surroundings.
- (f) "State Archaeologist" means that person appointed by the Department to perform those duties set forth in O.C.G.A. § [12-5-53](#).
- (g) "Submerged Cultural Resources" means all prehistoric and historic sites, ruins, artifacts, treasure, treasure-trove, shipwrecks or vessels and their cargo or tackle which have remained on the bottom for more than 50 years, and similar sites and objects found in the Atlantic Ocean within the three-mile territorial limit of the state or within its navigable waters. This term may include, but not be limited to, sites listed in, or eligible for listing, in the National Register of Historic Places ([16 U.S.C. 470](#)).

[Rule 391-5-9-.04. Requirement for a Permit.](#)

- (1) Except as provided in paragraph (2) below, no person shall conduct exploration, survey, or recovery operations, in the course of which any part of a submerged cultural resource may be endangered, removed, displaced, or destroyed except in accordance with the terms and conditions of a permit issued pursuant to these rules and regulations and applicable Code sections.
- (2) A permit is not required for persons engaged in operations on behalf of the Department, in that the Department is authorized to set by contract such terms and conditions as it deems appropriate.

Authority: O.C.G.A. Sec. [12-3-80](#)*et seq.*

History. Original Rule entitled "Requirement for a Permit" was filed on February 9, 1987; effective March 1, 1987.

Rule 391-5-9-.05. Permit Procedures.

(1) Application for Permit.

- (a) All applications for permits must be on forms prescribed by the State Archaeologist and contain the following information:
1. Applicant's name, address, corporate designation and registered agent for service if applicable;
 2. A description of the location(s) of the proposed operation, including Universal Transverse Mercator (UTM) Grid System coordinates of latitude and longitude;
 3. A U.S. Geological Survey quadrangle (1:24,000 scale) map or a U.S. National Oceanic & Atmospheric Administration "Intra-coastal Waterway (Inside Route) Chart" (1:40,000 scale) depicting the location of the operation;
 4. A brief statement of the purposes and objectives of the operation;
 5. A clear description of the exact nature and scope of the proposed operation, including, but not limited to, research design, methods, techniques, and equipment to be employed;
 6. A description of the methods, materials, and procedures to be used at the conclusion of the operation to stabilize, reclaim, and protect the area of the operation;
 7. Name, and address of the professional archaeologist who will supervise or conduct the operation;
 8. Evidence of financial responsibility to complete the operation and to stabilize, reclaim, and protect the area of the operation;
 9. The name(s) and location(s) of the facility(ies) where all recovered artifacts or other submerged cultural resources will be stored, analyzed, and conserved;
 10. The name(s) and location(s) of the facility(ies) where all recovered submerged cultural resources, artifacts, notes, records, data, photographs,

maps, plans, drawings, or other materials will be curated after conclusion of all conservation, analysis, or other tasks of the operation;

11. An application fee in the amount of \$30.00, by check or money order made payable to the Georgia Department of Natural Resources; and
12. Any and all other relevant data required by the State Archaeologist.

(b) An application is complete when it contains all of the information, documents, forms, fees, and materials required in this Rule.

(2) Consideration of Application.

- (a) Once an application is complete, it shall be submitted to the State Archaeologist for review and consideration. Within 10 days of receipt of a completed application, the State Archaeologist, shall determine in their discretion whether an application presents issues of significant public interest such that public notice and a public hearing should be provided. If no public hearing is deemed necessary, then the State Archaeologist shall formulate a recommendation to the Department on each such application within 45 days of receipt. The Department shall grant, deny, or condition the required permit based upon the standards and criteria set forth in O.C.G.A. § [12-3-82](#)., and as more particularly provided by these rules.
- (b) If a public hearing is scheduled following 30 days' public notice, then the State Archaeologist, or his designee, shall conduct such hearing in the vicinity of the state nearest the subject cultural resources to receive public comments on the application subject to consideration. Any applicant for a permit or other interested person shall be given a reasonable period of time to state their views regarding a pending application. Following this hearing, the State Archaeologist shall consider the public comments and formulate a written recommendation to the Department, along with a summary of the public comments.
- (c) If following the receipt of public comments and the recommendations of the State Archaeologist the Department determines that the public interest will be served in accordance with the standards and criteria established by these rules and O.C.G.A. § [12-3-82](#)., then the Department shall grant, deny, or condition the required permit subject to such terms and conditions as provided by these rules and as are necessary and appropriate for the protection of the public interest and the preservation and protection of submerged cultural resources. All applications shall be acted upon by the Department within 90 days of the filing of a completed application.

(3) Standards and Criteria for Permit Review.

- (a) A permit for exploration, survey, etc. of submerged cultural resources shall be issued only when:
1. the proposed operation, including all terms and conditions of any permit, is for the purpose of furthering archaeological or historical knowledge and is in the public interest;
 2. the applicant is a scientific or educational institution or an individual with evidence of financial responsibility sufficient to determine that the operation can be completed as proposed;
 3. state-owned waterbottoms will be restored or stabilized and submerged cultural resources will be utilized in the state's best interest;
 4. the applicant has retained at least one professional archaeologist to supervise the operation with knowledge and experience in the proposed operation;
 5. the proposed operation will utilize professionally accepted techniques for identification, exploration, recovery, recording, conservation, preservation, and analysis of submerged cultural resources or other archaeological resources;
 6. the methods, techniques, and procedures to be utilized will maximize the retrieval of data associated with the operation;
 7. the methods, techniques, and procedures to be utilized at the conclusion of the operation are adequate to protect any residual scientific values associated with any recovered or remaining submerged cultural resource;
 8. adequate measures have been taken to secure facilities and plan for the conservation, analysis, and curation of all artifacts, records, and other materials resulting from the proposed operation; and
 9. the proposed operation is consistent with all other federal, state and local laws, ordinances, and regulations, specifically including relevant provision of the Georgia Water Quality Control Act (O.C.G.A. § [12-5-20](#)., *et seq.*) and the Clean Water Act of 1977 ([33 U.S.C. § 1251](#)., *et seq.*).
- (b) Where there are two or more applications for a permit for explorations, survey, etc., of the same submerged cultural resources, a preference shall be afforded to the first application in hand received by the Department and to the applicant who can demonstrate to the satisfaction of the Department that the applicant first discovered the subject submerged cultural resource.

History. Original Rule entitled "Permit Procedures" was filed on February 9, 1987; effective March 1, 1987.

Amended: F. Mar. 22, 2021; eff. Apr. 11, 2021.

Rule 391-5-9-.06. Permit Conditions.

- (1) The Department may condition any permit as necessary to protect the best interests of the State.
- (2) Each permit shall be conditioned upon the permittee's compliance with all applicable federal, state and local laws and regulations.
- (3) Each permit shall be effective for a period of one year from the date of issuance; provided however, that upon a written request submitted in advance of the date of termination, the Department may in its discretion extend such permit for periods not to exceed 6 months.
- (4) A permit may be conditioned upon the requirement that the permittee maintain and submit copies of a daily log of all activities, including but not limited to, the type of equipment used, site conditions, and other site-specific data.
- (5) Each permit shall be conditioned upon the requirement that the permittee submit a draft report to the Department within 120 days of completion of all field work and analysis which details and describes the significant activities and results of the operation. Such draft report shall be reviewed by the State Archaeologist and returned with any comments to the permittee. A final report acceptable to the Department shall be submitted within one year of the completion of all field work and analysis. All final reports shall become a part of the permanent public record of the permitted activity.
- (6) Each permit shall be conditioned upon the requirement that the permittee agree to indemnify, hold harmless, and defend the State Archaeologist, State of Georgia, Department and its agents, employees or officers from and against all claims, losses, damages, expenses, fines, liabilities, payment of any sum or sums of money to any person whomsoever, damage to property, including property of third person, the Department of Natural Resources, State of Georgia, the permittee(s), arising out of, or in connection with, their performance and prosecution of the operation permitted hereunder, whether caused by the claimed, actual, or sole negligence of the permittee(s). Except that this requirement shall not be applicable to state agencies or the Board of Regents.
- (7) A permit may be conditioned upon an agreement with the permittee that in reasonable consideration of permittee's efforts to further the public interest of exploration, survey, protection, preservation, or recovery of other related submerged cultural resources, the State agrees to allow the permittee to retain a portion of the recovered submerged cultural resources; provided, however, that without such an express agreement, each permit shall require that all specimens, artifacts, materials, copies of field notes and photographs, documents, and information collected or produced as a result of the permitted operation will remain the property of the State of Georgia and shall be kept as a collection in an appropriate facility(ies), available for future study, research, analysis, or display.

- (8) A permit may be conditioned upon the permittee's commencement within a certain period of time from date of issuance, and further conditioned upon the permittee's diligent pursuit of all operations.
- (9) Each permit shall be conditioned upon the right of the Department to enter upon and into all facilities, vessels, or other premises directly associated with the permitted operation for the purpose of inspection and in order to make determinations of compliance with the terms of any permit, these rules, and all other applicable laws and rules.
- (10) Each permit shall be conditioned upon the requirement that if the Department determines that the permittee has violated the permit, these rules, or other applicable laws then the permit may be either immediately suspended or revoked. By accepting a permit the permittee acknowledges that irreparable harm and damage to state property can occur if the terms of the permit are not followed; therefore, all permits are conditioned upon immediate suspension or revocation which the permittee accepts as an express condition to its operation; provided that permittee accepts as adequate protection of its interests that it may appeal any such immediate suspension or revocation in the manner provided in O.C.G.A. § [12-3-52](#).(d) and these rules.
- (11) Each permit shall provide conditions as follows:
 - (a) No permit may be transferred or assigned without the written permission of the Department;
 - (b) The State Archaeologist will be notified by telephone at least 24 hours in advance of commencement of any on-site recovery operations; and
 - (c) The State Archaeologist shall be notified by telephone within three days of completion of all on-site operations.

Rule 391-5-9-.07. Appeal and Enforcement.

- (1) **Appeal Procedures.**
 - (a) Any person who is aggrieved or adversely affected by any action of the Department shall, upon petition within 30 days after the taking of such action, have a right to a hearing before an administrative law judge appointed by the Board of Natural Resources, conducted in accordance with DNR Rule Chapter 391-1-2 and Chapter 13 of Title 50, O.C.G.A., the "Georgia Administrative Procedure Act."

- (b) Any party to such a hearing, including the Department, shall have the right of judicial review thereof in accordance with Chapter 13 of Title 50, O.C.G.A.

(2) Enforcement Procedures.

- (a) If the Department determines that a permittee has violated O.C.G.A. §§ [12-3-80](#) through [12-3-82](#) or permit condition, then such permit may be revoked.
- (b) Any person who violates O.C.G.A. §§ [12-3-80](#) through [12-3-83](#) by failing to obtain a required permit or who intentionally defaces, injures, destroys, displaces, or removes any underwater cultural resources or portion thereof in any manner not in accordance with a permit shall be subject to criminal prosecution by a fine not to exceed \$1,000 or by confinement for a term not to exceed 12 months, or both.

Rule 391-5-9-.08. Consideration (Compensation) for Deadhead Logs.

- (1) The holder of a Salvage Log Permit shall pay the Department compensation of \$1.28 per board foot for deadhead logs removed from the State's rivers as authorized by the Official Code of Georgia Annotated, Title 12, Chapter 3 and any other law, rule, regulation or policy that authorizes this activity.
- (2) The amount of board feet in a recovered log will be determined using the Scribner C log scale, or by another method determined by the Georgia Forestry Commission. Log scaling will be done by Department personnel or their designee.
- (3) Violation of this rule or any other law, rule, regulation or policy may result in revocation of the permit or license to harvest deadhead logs, and may result in additional fines or penalties authorized by any other law, rule, regulation or policy.
- (4) All other procedures for determining the amount due for deadhead logs, methods and time of payment, late fees, and related procedures will be specified by the Department.

Rule 391-5-12-.02. Permits for New Docks.

- (1) **Permits.** All required federal, state and local permits are to be obtained by the property owner.
- (2) **Procedures.** Guidelines and procedures for permits and specifications are available at the High Falls State Park office.
- (3) **Eligibility.** The owner of any contiguous parcel of private property abutting the high water mark of said lake, or the lessee of such parcel with the written consent of the owner, hereinafter referred to as the lakefront property owner and lessees may apply for a permit for one dock only per each single parcel as shown in the county's tax records.
- (4) **Term.** A permit shall be valid for a period of three years from January 1 of the year the permit is issued unless revoked or otherwise terminated in accordance with these rules. Upon the expiration of a permit, the permit holder may apply for a renewal permit which will be valid for 3 additional years. To foster administrative efficiencies, the Director of the Parks Recreation and Historic Sites Division, hereinafter referred to as Director, or designee may issue a onetime initial permit for less than 3 years; provided, said initial permit shall be pro-rated at a rate not to exceed 1/36th per month of the fee for a permit as established in 391-5-12-.02(5).
- (5) **Fee.** The fee for the issuance or transfer of a permit shall be defined by the Director of Parks not to exceed \$50.00 per 3 year period.
- (6) **Transfer of Permits.** Within 120 days of the death of a permit holder, the termination of a lease of a permit holder or sale of lakefront parcel with a permitted dock, the successor in interest to such property or leasehold must apply for a transfer of the permit for the

remainder of its unexpired term. Failure to comply with this requirement may result in the revocation of the permit.

- (7) **Application.** The Director of the Parks, Recreation and Historic Sites Division shall establish procedures for obtaining permits. The High Falls State Park Manager shall make available to lakefront property owners and lessees upon request copies of procedures and forms for obtaining permits. All required permits or licenses (Erosion and Sedimentation Act, 391-3-7 and any other applicable state, Federal or local ordinance) must be obtained by the applicant and attached to the application. Upon receipt of a completed application, the Director or designee shall issue or deny the issuance of the permit within a thirty-day period.
- (8) **Revocation.** The Department of Natural Resources may revoke any permit for failure or refusal to comply with these rules or the specific conditions and requirements of the permit and seek civil penalties under O.C.G.A. [12-3-11](#) which carries a fine of \$1,000.00.
- (9) **Conditions, restrictions, and requirements for the continuation of permits.**
 - (a) The permit holder shall, at all times hereunder, operate and maintain said facilities:
 1. In a safe condition which includes, but is not limited to, keeping walkways (if any), handrails (if any), decking, bracing, and pilings in good condition, replacing as necessary to assure safe use.
 2. In a presentable condition, which includes, but is not limited to, refraining from storing anything on the facility, removing regularly any visible trash or litter from the facility and, if the facility is painted, maintaining its paint in good condition. All loose or unsecured items shall be removed from the facility on a daily basis.
 - (b) The permit holder shall display the Department-assigned dock number. High Falls State Park will provide sign specifications and details for permanent mounting.
 - (c) The permit holder's facilities are subject at all times to inspection by representatives of the Department for compliance with these rules and any terms and conditions of the permit.

History. Original Rule entitled "Permits for New Docks" adopted as ER. 391-5-12-0.27-.02. F. Oct. 28, 1993; eff. Oct. 27, 1993, the date of adoption.

Amended: Permanent Rule of same title adopted. F. May 5, 1994; eff. May 25, 1994.

Repealed: New Rule of same title adopted. F. June 24, 2009; eff. July 14, 2009.

Rule 391-5-12-.03. Existing Docks.

- (1) If over fifty percent of the pilings or bracing of an existing dock require replacement to meet Department of Natural Resources standards, a new permit must be applied for and the dock reconstructed.
- (2) Floor plans of existing docks or boat houses may not be altered; nor may other re-design occur to existing docks or facilities. Owners wishing to make these types of major changes will be able to do so only with a new permit and by reconstruction, in which case the new (re-constructed) dock must conform to the standards for design and construction contained in these rules.
- (3) No new boat houses may be constructed.

Cite as Ga. Comp. R. & Regs. R. 391-5-12-.03

Authority: O.C.G.A. Sec. [12-3-34](#).

History. Original Rule entitled "Existing Docks" adopted as ER. 391-5-12-0.27-.03. F. Oct. 28, 1993; eff. Oct. 27, 1993, the date of adoption.

Amended: Permanent Rule of same title adopted. F. May 5, 1994; eff. May 25, 1994.

Repealed: New Rule of same title adopted. F. June 24, 2009; eff. July 14, 2009.

Rule 391-5-12-.04. Standards for Design and Construction.

All new docks must be constructed in accordance with the Department's standard design criteria. Plans are available at the High Falls State Park office. Any changes to the existing design must receive written approval from the PRHS Central office who will incorporate those changes in to the new plans and provide them to High Falls.

- (a) Dock design shall contain detailed plans as to include width, length, and layout of the dock. Floating docks supported by encapsulated flotation units will be permissible. Individual plans need to be submitted with the application. All docks must be structurally sound.
- (b) The maximum length of the dock shall not exceed a total of 25 feet from the high-water mark. Dock length extensions beyond 25 feet will only be considered on a case by case basis if they meet the following criteria:

Extension Criteria

* At the maximum length of 25 feet, the center end of dock would not reach 2.5 feet of water at full pool.

* If granted the extension, the dock would not block navigation.

* The proposed dock must maintain at least 30 feet distance from existing docks and future parcel dock locations based on projections to reach 2.5 feet of water at full pool.

* The dock must not pose any safety threat concerns for to boaters, lake habitat, or recreational users.

Incremental extensions of 3 feet at a time may be granted by the Director for docks of lengths greater than 25 feet which meet the above criteria. These incremental extensions will be determined by the length it takes the center-end of a dock to reach 2.5 feet of water at full-pool.

Procedure for Granting Extension:

Resident must complete a Dock Application Form. If they request a dock extension, the resident must write a short justification for why they believe the property warrants a dock extension.

1. Park staff must conduct a site visit. During the visit, park staff must confirm if the site meets the extension criteria set above.
 2. If dock meets extension criteria, staff must determine how many incremental extensions of 3 feet will be necessary for the dock to reach 2.5 feet of water.
 3. Staff should include findings in a report that is submitted with the resident's dock permit application to the State for review.
 4. State reviews application and report and makes final decision.
- (c) All docks must have a minimum of thirty feet distance between docks of two adjoining parcels. Exceptions must be approved by the Director or designee.
- (d) Electrical outlets will be permitted in accordance with local county codes.
- (e) Bulkheads may be extended up to three feet on one side of the dock and up to 10 feet on the other side of the dock for securing the dock to the property. Rip-rap shall be required on all new bulkheads as per specifications. Bulkheads shall be constructed according to current bulkhead specifications, which can be obtained at High Falls State Park office.
- (f) Lakefront property owners or lessees with written permission of the landowner may request the use of rip-rap to control erosion into the lake. The department will accept requests and review them on a case by-case-basis. The department will approve a request only where obvious erosion issues exist that threatens the water quality of the lake. Construction specifications may be obtained at the park office.
- (g) Once approval for the dock is received, Lakefront property owners or lessees have 90 days to complete the construction. Permit will be revoked if not completed within the 90-day time limit. The Director of Parks, Recreation and Historic Sites Division or designee may grant one 30-day extension. Permit will be revoked and any partial work removed at the owner's expense if not completed within timeframe.

Rule 391-5-12-.06. Removal of Docks.

- (1) Removal of the dock may become necessary if:
 - (a) The dock is in such a state of disrepair that it is unsafe for use and the owner does not repair it as provided in the permit.
 - (b) The owner fails to comply with all terms and conditions of the permit.
 - (c) The owner fails to obtain a permit or fails to renew an existing permit.
 - (d) The permit is revoked.
- (2) Upon determination that a dock must be removed, the Division shall:
 - (a) Notify the owner in writing of a date by which the dock is to be removed.
 - (b) If the dock is not removed by the specified date, the Division shall remove the dock and the owner shall be responsible for all costs.
 - (c) After the dock has been removed, the owner is responsible for restoring said property to its condition as the same existed prior to the construction of the dock.

- (3) The Division may seek civil penalties with fines up to \$1,000 for non-compliance. O.C.G.A. Sec. [12-3-11](#). See [391-5-12-.08](#) for appeals.

Rule 391-5-12-.07. Inspections.

- (1) A formal survey will be made once each year by the Manager or his designee. A dock survey form and repair request form will be completed for each dock and kept on file at the park.
- (2) If minor repair is needed the dock owner will be notified in writing by the High Falls State Park Manager. The park staff will set time limits for the repairs.
- (3) If major repair (over 50% of pillars and bracing) is required to return the dock to usable and safe condition, the dock owner will be notified by letter from the Director or designee that the dock has deteriorated beyond the minor repair stage and, therefore, removal may be required.

Rule 391-5-12-.08. Appeals.

Any lakefront property owner or lessee who believes that the Director of Parks or Designee erroneously denied a permit, erroneously revoked a permit, or erroneously demanded removal or repair of a dock may file an appeal with the Commissioner of DNR within 30 days of the date of the decision. The appeal must be in writing and set forth in detail the reasons for the appeal. The appeal must be postmarked or delivered to the Commissioner at the Commissioner's official address on or before the 30th day; provided that if the 30th day falls on a Saturday, Sunday or state holiday, then the 30th day is deemed to be the first business day after said Saturday, Sunday or state holiday.

Rule 391-5-12-.09. Excavation Dredging, and Filling.

No new excavation, dredging or filling which alters the shoreline or lake bottom will be permitted on state property except dock and adjacent bulkhead construction duly permitted by the Department. Permits for such work may be issued, within the Director's or designee's discretion, on the basis of the applicant's submittal of engineering plans and specifications for such work which demonstrate that it is not adverse to the best interest of the State and upon the permit applicant's agreement to furnish a performance bond and, upon completion, a certification from his engineer that said work was performed and completed in conformance with the engineer's plans and specifications. Once completed in accordance with specifications, the permit holder shall not physically expand or in any manner alter the dimensions, form or shape of the existing facilities without a new permit being issued in accordance with this rule.

Subject 391-5-13. STATE AND FEDERAL GRANTS PROGRAMS.

Rule 391-5-13-.01. Recreation Assistance Fund (RAF).

- (1) **Purpose.** The purpose of the Recreation Assistance Fund (RAF) is to provide grant assistance to eligible applicants for acquisition of real property and/or development of recreation facilities for general purpose public recreation. Funds are appropriated by the Georgia Legislature in the annual or supplemental budget process. Grants are awarded to applicants with proposed projects which will increase the local supply of public recreation lands and/or facilities either through the purchase of real property, facility development or rehabilitation of existing facilities.
- (2) **Eligible Applicants.** All legally constituted entities (cities, counties, recreation commissions or authorities with legislative sanction) may apply for grant funds under this program. Eligible applicants must apply for grants under this program in a manner and format prescribed by the Department. Applications and related instructions for applying may be received by writing to the Department at the following address:

Department of Natural Resources

Grants Administration and Planning

205 Butler Street, S.E.

Suite 1352

Atlanta, Georgia 30334

(3) **Application Procedures.** The typical calendar of an annual funding cycle follows:

- July 1- Public announcement of the Application Process.
- Sept. 1- Applications due.
- Sept.-Oct. Staff reviews, evaluates and ranks applications.
- October- Advisory Committee reviews staff recommendations.
- Late Funding recommendations are presented to the Board of Natural
- October- Resources for action.
- November 1- Announcement of grant awards.
- Nov.-Dec. Staff completes paperwork for formal commitment of funds.

The above schedule may be altered should funds be appropriated in a supplemental budget, although the same basic process will be followed.

Eligible applications shall make application to the Department of Natural Resources by the specified deadline in the manner and format outlined in the program application. Each application package shall include responses to program criteria for which the applicant seeks points, including appropriate justification and supporting documents. All grants are subject to applicable state and federal laws, rules and regulations (including but not limited to environmental compliance specified in NEPA and GEPA and non-discrimination laws.) Applications must be received by the specified deadline. Contact the Department of Natural Resources at the above address for a copy of the criteria and formal grant application procedures.

(4) **Program Criteria.** Each applicant must respond to Minimum Requirements and Evaluation Criteria as follows.

Minimum Requirements

The following minimum requirements apply to all applicants for assistance:

Equal Opportunity. The applicant must comply with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, the Americans with Disabilities Act of 1990 and all other State and Federal laws of non-discrimination. This means that no person shall be discriminated against on the basis of race, religion, color, sex, national origin or disability for recreation programs and facilities sponsored and operated by the applicant.

State and Federal Laws/Regulations. Applicants must comply with existing laws and regulations for receiving and expending state and federal grant money including, but not limited to, public notices, bidding, and purchasing requirements, Georgia Environmental Policies Act, and related environmental rules and regulations.

Operation and Maintenance. The applicant must have a satisfactory track record on the operation and maintenance of public recreation areas and facilities. Those with no track record are exempt from this requirement.

Grant Administration. The applicant must have demonstrated a capability for administering grants. The applicant is not ruled out if a grant has never been awarded. It is possible, however, that applicants who have received grants previously and **have not** demonstrated the capability for administering grants may not be in compliance with the requirement.

User Fees. The applicant agrees that user fees resulting from this application cannot be so large as to be exclusionary.

EVALUATION CRITERIA

Grants will be evaluated based on a numerical score on the following criteria:

Community Priority. The project is identified as a specific priority through the applicant's community planning process, responding to citizen identified needs and furthering the comprehensive planning process.

Points

- 35 The project is identified as a high priority need in the applicant's recreational master plan and in the local government's comprehensive land use plan.
- 25 The project is identified as a high priority need in the applicant's recreational master plan or in the local government's comprehensive land use plan.
- 15 The project has been identified as a high priority need by a community study or citizen's panel.
- 0 The project does not address the community's priority needs.

Severity of Need. The project provides for a new or increased recreational experience within the applicant's service area.

Points

- 50 There are no public recreational facilities within project service area.
- 25 There are limited public recreational facilities available within the project service area.
- 10 There are many and varied recreational facilities and opportunities available, but 100% of the population needs are not being met.
- 0 There are no unmet needs.

Community Partnerships. The project involves a partnership with various private and public sectors. Partnerships are created with other public agencies or with private recreational providers.

Points

- 10 The project involves a partnership with four or more public and/or private groups or agencies.
- 5 The project involves a partnership with two or three public and/or private groups or agencies.
- 0 The project involves no partnerships within the community.

Handicapped Accessibility. The Americans with Disabilities Act (ADA) mandates that all new facilities meet accessibility requirements and that existing facilities be rehabilitated to provide for reasonable accommodations. All recreational projects shall consider accessibility. However, points are rewarded for efforts to provide additional accommodations.

Points

- 30 The proposed project will rehabilitate existing facilities to provide reasonable accommodations.
The proposed project is for construction of new accessible facilities and will also provide 20 three or more accommodations which will link the new construction to other amenities and areas of the park.
The proposed project is for construction of new accessible facilities and will also provide 10 one additional accommodation which will link the new construction to other amenities and areas of the park.
- 0 The project provides no additional accommodation beyond that which is required by law for the construction of new facilities.

Acquisition and Protection of Natural Resources. Priority is given to projects that will acquire real property for recreation, conservation or resource protection that may also be in imminent danger of being lost to the applicant and irretrievable.

Points

- 25 The proposed project will acquire real property for recreation, conservation and/or resource protection which is in imminent danger of being lost to the applicant and may be irretrievable.
- 20 The proposed project will acquire real property for recreation and/or conservation which will protect outstanding natural resources.
- 10 The proposed project will acquire real property for recreational use.
- 0 The proposed project does not address real property acquisition.

Leverage of Grant Funds. The state grant is expanded with additional public or private funds, materials, or services.

Points

- 10 The project involves leveraging of other public and/or private investments equal to the amount of the grant.
- 5 The project involves leveraging of other public and/or private investments equal to one-half the amount of the grant.
- 0 There is no leveraging of additional funds.

Community Benefits. The project will benefit a variety of residents and will provide more than one recreational opportunity.

Points

- 25 The project is for a multi-use development or existing property.
- 10 The project is for a single use development of existing property.

Community Operation and Maintenance Commitment. The project is included as part of the community recreational facilities and will be maintained as part of the community's infrastructure after grant money is no longer available.

Points

- 10 Applicant has made a written commitment (letter, resolution of intent, etc.) to continue full funding for the maintenance of the project.
- 5 Applicant has made a written commitment for the maintenance of the project through private resources.
- 0 Applicant has not committed to implement a maintenance plan.

Authority: O.C.G.A Secs. [12-3-32](#), [12-3-6](#).

History. Original description entitled "Recreation Assistance Fund (RAF)" submitted May 11, 1994.

Submitted: Dec. 27, 1996.

Rule 391-5-13-.02. Land and Water Conservation Fund (L&WCF).

- (1) Purpose. The purpose of the Land and Water Conservation Fund (L&WCF) is to provide no more than fifty percent matching grant assistance to eligible applicants for acquisition of real property and/or development of recreation facilities for general purpose public outdoor recreation. Lands and facilities must be for **outdoor** recreation or directly support outdoor recreation; must be open to the general public without discrimination during reasonable times and hours; must be maintained and operated for public outdoor recreation in perpetuity.

Specific criteria which address recreation issues as identified in the Statewide Comprehensive Outdoor Recreation Plan (SCORP) are used to evaluate the grant applications. Grants are awarded to applicants with proposed projects which will increase

the local supply of public outdoor recreation lands and/or facilities either through the purchase of real property, facility development or rehabilitation of existing facilities.

- (2) Eligible Applicants. All legally constituted entities (cities, counties, recreation commissions, or recreation authorities with legislative sanction) may apply for grant funds under this program. Eligible applicants must apply for grants under this program in a manner and format prescribed by the Department. Applications and related instructions for applying may be received by writing to the Department at the following address:

Department of Natural Resources

Grants Administration Unit

2 Martin Luther King Jr. Drive, Suite 1352

Atlanta, Georgia 30334

- (3) Application Procedures. The typical calendar of a biennial funding cycle follows:

September Public announcement of the Application Process.

October Applications due (specific deadline assigned each year in the public announcement).

Nov- Jan Staff reviews, evaluates, and ranks applications.

February Funding recommendations are presented to the Board of Natural Resources.

June Applications are submitted to National Park Service for approval.

October Staff completes paperwork for formal commitment of funds.

Eligible applicants shall make application to the Department of Natural Resources by the specified deadline in the manner and format outlined in the program application. Each application package shall include responses to program criteria for which the applicant seeks points, including appropriate justification and supporting documents. All grants are subject to applicable state and federal laws, rules and regulations (including but not limited to environmental compliance specified in NEPA and GEPA and non-discrimination laws) and each application must include appropriate compliance documentation. Applications must be received by the specified deadline. Contact the Department of Natural Resources at the above address for a copy of the criteria and formal grant application procedures. The above schedule may be altered, but the same basic process will be followed.

- (4) Program Criteria. Each applicant must respond to Minimum Requirements and Evaluation Criteria as summarized below:

Minimum Requirements

These are requirements that an applicant must meet in order to be considered for a L&WCF grant. There are no points attached to these requirements. Only one of two situations can occur; (1) Yes-the applicant meets all minimum requirements and is therefore eligible for consideration based on how a proposed project scores under the Evaluation Criteria; (2) No- the applicant does not meet the minimum requirements and is therefore ineligible for consideration of funding. The following minimum requirements apply to all applicants for assistance:

Title VI Compliance

Compliance with the Americans with Disabilities Act of 1990 and the Rehabilitation Act of 1973

Legally constituted entity as sponsor

Satisfactory park operations and maintenance track record

Demonstrated capability for administering grants

Submit a resolution regarding the availability of a 50% match

Non-exclusionary user fees

Compliance with all state and federal regulations, rules and legislation

Significant citizen participation in the planning process

Evaluation Criteria

Below are sections within the Evaluation Criteria. Each section has one or more criteria to which a variable number of points are attached. These criteria are designed to measure the overall concept of the proposed project. Because not all criteria are equally important, the criteria are weighted.

Administrative Criteria

Project Specific

Planning Efforts

Rehabilitation Projects

Development Projects

Acquisition Projects

Grant Match & Partnerships

The above mentioned criteria sections and requirements can be found in their entirety in the Land and Water Conservation Fund Pre-application packet. This package is available from the Department of Natural Resources at the address listed in "(2) Eligible Applicants."

- (5) Review of Grant Applications. Applications received from eligible applicants are reviewed by the grants staff to determine both program eligibility and a ranking score. Specific criteria, as outlined above, are used to evaluate the grant applications. Each application is evaluated according to the criteria and assigned a number score. Grants are recommended for funding on the basis of the score, and normally only one grant per funding cycle per applicant. A grant ceiling is usually set at the beginning of the application cycle based on the level of appropriation. All funds are allocated on a biennial basis.
- (6) Awarding of Grant Funds. Upon completion of the review and ranking of all applications by staff, funding recommendations are presented to the Board of Natural Resources for notification and review. Following notification to and review by the Board, the grants staff completes paperwork including the contracting process with the grant recipients. The grant period is normally not more than two years, and funds will flow to the grant recipient on a reimbursable basis as the work progresses. A grant recipient's land and/or facilities are subject to periodic inspections by grants staff for appropriate operation and maintenance and compliance with applicable state and federal laws.

Rule 391-5-13-.03. Recreational Trails Program (RTP).

- (1) Purpose and Name. The Recreational Trails Program (RTP) of the Georgia Department of Natural Resources (GA DNR) coordinates and administers federal pass through grants for

recreational trails. The U.S. Department of Transportation, Federal Highway Administration (FHWA) provides federal funding to states for grants for both motorized and non-motorized recreational trail projects to construct new recreational trails, improve/maintain existing trails, develop/improve trailhead or trailside facilities, and acquire trail corridors. Funding for this federal grant program is derived from that portion of the federal gasoline tax paid on the gasoline purchased for non-highway recreational vehicles-off-highway motorcycles, ATV's, snowmobiles, and off-highway trucks. The Commissioner of the Georgia Department of Natural Resources, or his designee, is designated as the principal official for coordinating with the FHWA. O.C.G.A. [12-2-6](#) provides the statutory basis for the Georgia Department of Natural Resources to administer this federal pass through grant program.

- (2) Eligible Grant Recipients. All applicants must be currently registered in SAM.gov with a unique Data Universal Numbering System (DUNS) number. Applications from project sponsors not meeting this criterion will be deemed ineligible and will not be reviewed. Eligible grant recipients include:

- * Georgia Qualified Local Governments (counties and municipalities approved by the Georgia Department of Community Affairs), including legally constituted recreation boards, commissions, or authorities with legislative sanction

- * State Agencies

- * Federal Agencies

- * Nonprofit organizations with IRS 501(c)(3) tax exempt status, if applying for eligible educational program grants that promote recreational trail safety and environmental protection

Prospective applicants may be deemed not eligible to apply if they have active or previously awarded grants through GA DNR which are not in full compliance with federal and state requirements. Successful completion of projects in a timely and efficient manner is a key goal of the RTP grant program. RTP staff will review each application for eligibility to determine:

- * Whether the applicant is on schedule with all active GA DNR grant projects, and

- * Whether the applicant is in compliance with all applicable guidelines for current and past projects

Serious instances of non-compliance may result in application denial. Past non-compliance may also be cause for GA DNR to place additional requirements or special conditions on the grant, if selected, and as allowed by [2 CFR 200.207](#).

- (3) RTP Grants General Scope, Terms and Conditions. FHWA funds allocated to States for RTP grants must be distributed as follows: 30 percent for motorized trail uses, 30 percent

for non-motorized trail uses, and 40 percent for diverse trail uses. Funds allocated to the States also include a portion available for educational programs that promote safety and environmental protection as those objectives relate to the use of recreational trails.

The RTP grant program is a reimbursement program. Grant recipients pay for 100 percent of the costs and then submit required documentation for reimbursement for 80 percent of eligible costs, up to the grant award amount. Match requirements can be met by private donations of funds, materials, right-of-ways, and services at fair market value. Applicant must document the availability of the required minimum twenty percent (20%) match for each application.

RTP grant recipients will have 24 months to complete the project from the date of the signed project agreement.

Project costs are eligible for 80% reimbursement only if incurred after the project has been approved for funding by the FHWA, and a project agreement has been signed. Project sponsors cannot be reimbursed for work done prior to the project agreement date.

Due to the competitive process for these grants, upon execution of a project agreement with a grant recipient, any requests for additional funding or significant changes in the scope must be approved by GA DNR staff and the FHWA.

Grant recipients will be required to attend a fiscal briefing before execution of the signed project agreement.

Permitted uses of RTP Grant funds include:

- * Construction of new recreational trails open to the public on state, county, municipal or private lands where a recreational need for such construction is shown.
- * Development and rehabilitation of trailside and trailhead facilities and trail linkages for recreational trails. Trailside and trailhead facilities includes trail components or associated facilities which serve the purpose and safe use of the recreational trail, and may include, but are not limited to, the following: drainage, crossings, stabilization, parking, signage, controls, shelters, hitching rails, water trail vessel launch facilities, bike racks, fencing, motorized access barriers, underpasses, and water, sanitary, and access facilities.
- * Acquisition of easements or fee simple title from a willing seller to property for recreational trails or recreational trail corridors.
- * Maintenance and restoration of existing recreational trails.

* Lease of recreational trail construction and maintenance heavy equipment, and purchase of hand tools.

* Provide access and use of recreational trails by persons with disabilities.

* Redesign, reconstruction, non-routine maintenance or relocation of recreational trails to benefit the natural environment or to mitigate and minimize the impact to the natural environment.

* Construction of new recreation trails crossing federal land if the project is consistent with resources management plans. Approval will be contingent upon compliance with all applicable laws, including the National Environmental Policy Act and the Forest and Rangeland Renewable Resources Planning Act, and the Federal Land Policy and Management Act.

* Educational programs that promote safety and environmental protection as those objectives relate to the use of recreational trails.

Uses not permitted with RTP Grant funds include:

* Condemnation of any kind of interest in property.

* Construction of new recreation trails for motorized use on National Forest or Bureau of Land Management lands that have been recommended for Wilderness designation.

* Upgrading, expanding, or otherwise facilitating motorized use or access to recreational trails predominantly used by non-motorized recreational trail users and on which, as of May 1, 1991, motorized use was prohibited or had not occurred.

* Road construction or sidewalks.

* Purchase of recreational trail construction and maintenance heavy equipment. (Does not include hand tools.)

* Administrative staff time, overhead or indirect charges are not allowable charges.

* Feasibility studies.

* Playground equipment or campground development.

Minimum grantee compliance requirements include:

* Equal Opportunity: The grantee must comply with Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, The Age Discrimination Act of 1975, The Americans with Disabilities Act of 1990 and all other state and federal laws of

non-discrimination. The applicant must certify that no person shall be discriminated against on the basis of race, color, sex, religion, national origin, age, or physical or mental handicap for any program, activity, or facility sponsored, operated, or constructed under the sub-grant project.

* State and Federal Laws / Regulations: Grantee shall comply with all federal, state and local laws, regulations, executive orders and ordinances applicable to the grant agreement or to usage of the grant funds. Key regulations applicable to RTP include but are not limited to:

* 2 CFR 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards

* 2 CFR 1201

* FHWA Recreational Trails Program Interim Guidance

* [23 U.S.C. 206](#) Recreational Trails Program

* [23 U.S.C. 104\(h\)](#), Recreational Trails Program Apportionments

* [23 U.S.C. 106](#), Project Approval and Oversight

* [23 CFR 1.36](#), Compliance with other Federal Laws and Regulations

* 23 CFR 771, Environmental Requirements

* [23 CFR 635.410](#) Buy America

* 49 CFR 29, Suspension and Debarment

* Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970

* [23 U.S.C. 114](#), Convict Labor

* 23 U.S.C. Prevailing Wage Rate (Davis Bacon Act)

* Grantees have statutory responsibilities to provide opportunities for the participation of people with disabilities in recreational trails activities funded under the RTP. Federal laws that affect the design, construction, alteration, and operation of trail facilities include the Architectural Barriers Act of 1968 (ABA), Section 504 of the Rehabilitation Act of 1973, and the Americans with Disabilities Act of 1990 (ADA). The ADA prohibits discrimination and ensures equal opportunity and access for persons with disabilities. Section 504 of the Rehabilitation Act states that no otherwise qualified individual with a disability in the United States, as defined in section 7(20), shall, solely by reason of her or

his disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. The ABA requires that facilities designed, built, altered, or leased with funds supplied by the United States Federal Government be accessible to the public. Current regulations implementing these statutes contain requirements that apply to existing trail construction and program operations and adopt technical standards to guide new trail construction and alterations of existing networks.

* Buildings and facilities newly-constructed or altered with Federal funds are subject to the accessibility requirements contained in the Uniform Federal Accessibility Standards (UFAS), the standard currently referenced in the ABA.

* Accessibility in Federally-assisted programs is governed by the requirements of the United States Department of Transportation regulations (49 CFR Part 27) implementing Section 504 of the Rehabilitation Act ([29 U.S.C. 794](#)).

* The United States Department of Justice's (DOJ) Title II implementing regulations (28 CFR Part 35) describe the obligations of State and local governments for existing facilities and program operations, and require Title II entities (public entities) to comply with either UFAS or the Americans with Disabilities Act Accessibility Guidelines (ADAAG) developed by the United States Architectural and Transportation Barriers Compliance Board when constructing or altering facilities.

- (4) RTP Application Process. RTP will begin each funding cycle in September of odd number calendar years with a public announcement soliciting eligible grant projects from eligible project sponsors, and posting of the specific grant cycle applications and instructions on the GA DNR website. Each funding cycle application announcement will include the following:

* Estimated total dollar amount of grant funding available for that cycle

* Minimum and Maximum grant award amounts available

* Deadlines, application forms, specific requirements, and procedures for submission of the pre and second-level grant applications and required supporting documents

RTP biennial grant opportunities will involve a competitive pre-application process followed by an invitation only second-level application process. The detailed RTP pre-application and second-level application forms, instructions, due dates, format, required forms/documents, required drawings/maps, and project scoring criteria are available at the DNR website at: <https://gadnr.org/grants>.

Pre-Application Process: Pre-applications are due in November of odd numbered years. The exact due date is included in the grant cycle announcement posting to the DNR website at: <https://gadnr.org/grants>. All aspects of the pre-application must be completed electronically. Pre-applications must be submitted by the deadline stated on the grant

cycle announcement or the application will not be eligible for review. The pre-application should include the following:

- * Cover letter on official letterhead signed by the chief elected official/executive director/president
- * A signed Pre-application Form to include a response to each of the evaluation criterion
- * A resolution adopted by the governing entity of the applicant authorizing the application and committing all matching funds required to complete the proposed project
- * A narrative description of the proposed project
- * Estimate of cost
- * Preliminary site plan
- * Plat and/or legal description of the property proposed for purchase and/or development
- * Location map
- * Letters of commitment from partners providing grant match of any type

All pre-applications are reviewed by the RTP staff to verify applicant eligibility, and priority rank the eligible applications based on project evaluation criteria. The pre-applications, and assigned scores and rankings are also reviewed by the Georgia Recreational Trails Advisory Committee. The highest ranking proposed projects will be invited to submit a second-level application. All applicants will be notified in April in even numbered years whether they have or have not been selected to submit the second-level application.

Second-level Application: Applicants with selected pre-applications will be invited to submit a second-level application. Second-level applications are due in May in even numbered years, and shall contain the following:

- * A cover letter on entity letterhead
- * A signed application cover sheet
- * Detailed project budget
- * Environmental assessment:

_____Concurrence from the Army Corps of Engineers

_____ Concurrence from the U.S. Fish and Wildlife Service

_____ Concurrence from the Historic Preservation Division of the Georgia Department of Community Affairs

If real property is to be acquired with grant funds, land must be surveyed for hazardous materials to avoid acquiring property that is a source of liability.

* Environmental Screening Form and Environmental Checklist

* Copy of Deed to Property

NOTE: If real property is to be acquired with grant funds, the acquisition must comply with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (The Uniform Act). Implementation regulations for the Act are found in 49 CFR Part 24. Do not acquire property until after the grant agreement has been executed and consultation with GA DNR has occurred.

* Signed statement from landowner expressing support (This is applicable if the applicant and landowner are not the same. A recorded easement allowing trail construction will be required from the landowner before construction begins.)

* Approvals to cross a public highway or a public utility right-of-way (if applicable)

* Maps: Property Boundary Area Map

Preliminary Site Map, clearly depicting project components

Site Location Map

* Detailed Project Development Budget

* Local Program Implementation Schedule

Second-level applicants who are unable to meet all requirements for a complete application by the May deadline may be granted an extension by the GA DNR RTP staff, up to August 31 of the same year. Detailed instructions, guidance, specific due dates, applications and required forms are available at: <https://gadnr.org/grants>.

Education Projects - Education projects must have a direct relationship with a recreational trail or trails, and can include: safety education and environmental protection programs, and the production of trail-related educational materials such as information displays, printed materials, video, audio, and interactive computer displays. Parties interested in applying for an education project grant must consult with the Georgia Recreational Trails Program staff prior to submitting an application.

(5) Application Review Process and Timeline.

- * May, odd number calendar years - Georgia DNR announces biennial funding cycle via public announcement and website posting of information
- * September, odd number calendar years - Pre-application period opens
- * November, odd number calendar years- Deadline for Pre-application
- * Pre-applications are reviewed for eligibility, scored and ranked by the GA DNR RTP staff. Georgia RTP Advisory committee also reviews application rankings, and the Georgia DNR Board is informed of the applicant rankings. Copies of the selected pre-applicants are forwarded to the Federal Highway Administration.
- * April, even number calendar years- All pre-applicants are notified, and selected pre-applicants are invited to submit second-level applications. The second-level application process certifies completion of all environmental assessments and required environmental permits, land ownership or easements, and verifies the applicant's financial ability to complete the project as proposed.
- * May, even number years- Deadline for second-level applications
- * Second-level applicants who successfully complete all requirements and submit all necessary documents by the deadline will be recommended for grant approval to FHWA. Second-level applicants who are unable to complete all requirements by the May deadline may be allowed an extension of time until August 31, with approval by the GA DNR RTP staff.
- * Grant funds will be available to successful applicants upon approval by FHWA, a fiscal meeting with the GA DNR RTP staff, and execution of a Project Agreement between GA DNR and the applicant.

(6) Criteria for RTP Grant Awards. The public announcement for each RTP funding cycle, available at the DNR website, <https://gadnr.org/grants>, will contain the specific criteria used in rating the applications. The criteria used to rank applications shall include:

- * Degree to which the proposed project meets the project area's recreational trail needs
- * The population demographics served by the project
- * Trail connectivity to other trails, parks, or greenspaces
- * Project enhancement of economic development opportunities
- * Public support and financial partners for the proposed trail project

- * Long-term management, operations, and maintenance plans and commitments
 - * Americans with Disabilities Act accessibility
 - * Applicant's history in administering and completing grant funded projects
 - * Mitigation of environmental impacts
 - * Ability to fully complete all aspects and requirements of the pre-application and second-level application
- (7) Application Submittal, Program Information- All applications should be submitted electronically.

Complete information on the Georgia Recreational Trails Grant Program, including links to Federal guidelines and complete application instructions, guidance, and required forms are available at: <https://gadnr.org/grants>.

Rule 391-5-13-.11. Georgia Outdoor Stewardship Program.

(1) Definitions. As used in this Rule, the term:

- "Qualified Local Government" means any county or municipality meeting the definition found in paragraph 18 of subsection (a) of Code Section [50-8-2](#).
- "Constituted Recreation Authority" means any recreation authority registered with the Georgia Department of Community Affairs.

- "Nongovernmental Entity" means nonprofit organization primarily concerned with the protection and conservation of land and natural resources, as evidenced by its organizational documents.
- "Natural-resource recreation" means recreation in the form of boating, hiking, camping, fishing, hunting, jogging, biking, walking or similar outdoor activities.
- "GADNR" is the Georgia Department of Natural Resources.
- "GEFA" is the Georgia Environmental Finance Authority.

- (2) Key Provisions. The intent of this chapter is to provide stewardship for state parks, state lands, and wildlife management areas; support local parks and trails; and protect critical conservation land.

Georgia Outdoor Stewardship Trust Fund. O.C.G.A. [12-6A-2](#) authorizes up to 80 percent of all moneys received by the state from the sales and use tax collected by outdoor recreation equipment establishments classified under the 2007 North American Industry Classification Code 451110, sporting goods stores in the immediate preceding fiscal year to be dedicated to the Georgia Outdoor Stewardship Trust Fund for the purpose of funding the protection of conservation land.

Board of Trustees of the Georgia Outdoor Stewardship Trust Fund. O.C.G.A. [12-6A-7](#) establishes the Board of Trustees of the Georgia Outdoor Stewardship Trust Fund. The Board of Trustees shall accept applications for project proposals for eligible funding and shall evaluate and approve these proposals pursuant to the priorities established in this 12-6A-10(d) and any other priorities established by the Board of Trustees.

Administrative Authority. O.C.G.A. Chapter 6A of Title 12 provides the statutory basis for GADNR to administer this grant program. This chapter is enacted pursuant to Article III, Section IX, Paragraph VI(p) of the Constitution.

- (3) Eligible Applicants. All qualified local governments, constituted recreation authorities, state agencies and nongovernmental entities may apply for grant funds under this program.
- (4) Use of Funds. From within the Georgia Outdoor Stewardship Trust Fund, moneys shall be made available each fiscal year for:
- Grants to any qualified local governments, constituted recreation authorities, state agencies and nongovernmental entities of this state having a project proposal with a primary purpose of one of the conservation objectives listed in O.C.G.A. [12-6A-6](#);
 - Grants as authorized in O.C.G.A. [12-6A-12](#);

- Costs incurred by the State in administering the program.

Moneys may be available each fiscal year for loans to any city, county or nongovernmental entity to defray the cost of conservation land or of conservation easements placed upon property to ensure its permanent protection as conservation land.

Before funds from the Georgia Outdoor Stewardship Trust Fund can be disbursed for grants for project proposals for conservation objectives, applications for project proposals must be approved by the Board of Trustees, the Board of Natural Resources, and the appropriations subcommittees of the House of Representatives and Senate maintaining oversight authority over GADNR and GEFA. As set forth in O.C.G.A. § [12-6A-8\(f\)](#), GEFA is responsible for the disbursement of funds following final approval of project proposals.

- (5) Eligible Projects. All eligible projects must take place in the state of Georgia. Eligible project activities fall into three categories:

- Local Parks and Trails of Regional Significance, for local governments, constituted recreation authorities and nongovernmental entities to acquire and/or improve parks, trails and conservation lands.

- State Stewardship, for state agencies and nongovernmental entities for maintenance, restoration or improvement projects to enhance public access, use, or safe enjoyment of permanently protected conservation land and currently owned state parks.

- State Land Acquisition, for state agencies and nongovernmental entities to acquire critical areas for the provision or protection of clean water, wildlife, hunting, fishing, for military installation buffering, or for natural-resource based outdoor recreation.

- (6) General Terms and Conditions. Each funding cycle will begin with a funding cycle announcement. The funding cycle announcement will be posted at <https://gadnr.org/grants>. Each funding cycle announcement will include deadlines, specific requirements, and procedures for submission of the pre-application.

Funding opportunities involve a competitive pre-application process followed by an invitation only second-level application process. The detailed pre-application process and second-level application forms, instructions, deadlines, format, required forms/documents, required drawings/maps, and project ranking criteria are available at <https://gadnr.org/grants>

Grant Cycle. Funds will only be made available for grants or loans to eligible recipients during the grant cycle. The grant cycle timeline will be included in the funding cycle announcement each year. To receive funding, applicants must submit an application before the pre-application deadline.

Project Timeline. All selected applicants will have 24 months to complete the project from the date of the signed Project Agreement.

Match Requirements. Applicants must provide at least 25 percent of the total project cost as match. Match may include cash, in-kind goods and services or volunteer labor. Applicant must document availability of the required 25 percent match for each application. State agencies will be required to provide a 25 percent match, pending appropriations. Exceptions can be made at the discretion of the Board of Trustees.

Funding Amounts. Projects for Local Parks and Trails of Regional Significance must have a grant or loan request between \$500,000 and \$3,000,000. There are no minimum or maximum grant amounts for State Stewardship or State Acquisition projects. Exceptions can be made at the discretion of the Board of Trustees.

Financial Workshop. All selected applicants are required to attend a financial workshop prior to executing the Project Agreement.

Project Agreement. Grant and loan recipients must execute a Project Agreement with GADNR and comply with all its provisions, including maintaining complete financial records for all activities and submitting quarterly progress reports.

Inspections. GADNR Staff will conduct site inspections for all awarded projects before the project begins and after the project's completion. GADNR Staff may conduct site inspections during the project timeline.

Acquisition Projects. All projects involving acquisition or conservation easements shall place protective language provided by GADNR on the deed for the property.

(7) Application Timeline. The calendar for an annual funding cycle:

May - Funding cycle announcement of the upcoming grant cycle

September 1 - Pre-application period opens

October 31 - Pre-applications due (specific deadline assigned each year in the funding cycle announcement)

November - December - Staff reviews, evaluates and ranks pre-applications

January - Board of Trustees prepare and approve proposal of projects; Board of Natural Resources approves proposal of projects; Appropriations subcommittees of the House of Representatives and Senate maintaining oversight authority over the GADNR and GEFA approve proposal of projects

February - All pre-applicants are notified and selected pre-applicants are invited to submit second-level applications

May 30 - Second-level applications due

June - July - Selected applicants attend required financial workshop and sign Project Agreements

- (8) Pre-Application Process: The pre-application can be found online at <https://gadnr.org/grants>. All aspects of the pre-application must be completed online.

All eligible pre-applications shall include:

- * Responses to each of the evaluation criteria
- * Cover letter on official letterhead signed by the chief elected official/executive director/president/agency official
- * A resolution adopted by the governing entity of the applicant authorizing the application and committing or verifying all matching funds required to complete the proposed project
- * A narrative description of the proposed project
- * Estimate of cost
- * Preliminary site plan
- * Plat and/or legal description of the property proposed for purchase and/or development
- * Location map

Pre-applications must be submitted by the deadline stated on the funding cycle announcement or the application will not be eligible for review.

- (9) Review of Grant Applications. All pre-applications received from eligible applicants are reviewed by GADNR Staff. Specific criteria are used to evaluate projects.

Upon completion of the review and ranking process, GADNR Staff will present pre-applications to the Board of Trustees at the first calendar meeting of each year. The Board of Trustees shall prepare and approve a proposal containing approved projects. Upon approval of the proposal, the Board of the of Natural Resources shall review and approve the proposal of the Board of Trustees.

Each year's initial proposal shall be submitted by January 31 to the chairpersons of the appropriations subcommittees of the House of Representatives and Senate maintaining

oversight authority over GADNR and GEFA. Upon approval by the appropriations subcommittees, the proposal of projects shall be deemed approved.

- (10) Second-Level Application Process. Approved pre-applicants will be invited to submit a second-level application.

Second-level applications shall contain the following:

- * Signed application cover sheet
- * Detailed project budget
- * Environmental Assessment Package
- * Property Deed Copy
- * Signed statement from landowner expressing support (this is applicable if the applicant are not the same)
- * Approvals to cross a public highway or a public utility right-of-way (if applicable)
- * Maps: Property Boundary Area Map, Preliminary Site map, site location map
- * Detailed Project Development Budget
- * Local Program Implementation Schedule

The second-level application can be found at <https://gadnr.org/grants>. Second-level applicants who are unable to meet all requirements for a complete application by the deadline may be granted an extension by GADNR Staff.

- (11) Awarded Projects. Funds will be available to successful applicants following the financial workshop with GADNR Staff and the execution of a Project Agreement between GADNR and the grantee. The date the Project Agreement is signed is "Day 1" of the project timeline. The grantee will have 24 months to complete the project from "Day 1."

Land Acquisition Projects. For projects involving the acquisition of real property or conservation easements, grantees must submit the following to GADNR no later than seven days before the scheduled date of closing:

- * the final closing statement, which shall reflect the sources and amounts of matching funds and the proper commitment of the grant or loan proceeds to the acquisition of the project; and

* the final draft conveyance instrument and all exhibits thereto that will be used to convey the project to the Grantee.

If the closing statement is satisfactory to GADNR and if all terms and conditions are met, GEFA shall wire the grant or loan proceeds to the Grantee.

Reimbursement Requests. For non-acquisition projects, all grant funds will be made via reimbursements. Grantees cannot be reimbursed for work that is done prior to the Project Agreement. Grantees may make reimbursement requests at any time for costs incurred after "Day 1." Reimbursement requests will be submitted at <https://gadnr.org/grants>. All reimbursement requests will be reviewed and approved by GADNR Staff and forward to GEFA for payment.

Quarterly Reports. Grantees are required to submit quarterly progress reports throughout the project's timeline. Quarterly reports will be submitted at <https://gadnr.org/grants>. Quarterly reports should include any progress made during the quarter and a detailed description of all funds spent.

Extension Requests. Grantees may request timeline extensions if the project is expected to exceed the 24-month deadline. All extension requests will be submitted at <https://gadnr.org/grants>. All formal requests will be reviewed by GADNR Staff and approved by the Chairman of the Board of Trustees. Written notice of the project extension shall be immediately provided to the chairperson of the appropriations subcommittees of the House and Senate maintaining oversight of GADNR and GEFA. Extension requests shall be made at least 90-days prior to the project's completion date. If the extension request is granted, the grantee must sign an Amended Project Agreement.

Change of Scope. Grantees may request to change the scope of the original project. All formal requests will be approved by the Board of Trustees. Change of Scope requests must be made prior to the project's completion date. If the Change of Scope request is granted, the grantee must sign an Amended Project Agreement.

Project Completion Audit. A percentage equivalent to the grantee's match, as identified in the application and grant agreement, will be held in retainage by GADNR. Upon completion of the project, the grantee shall submit a final reimbursement request and identify it as such. Upon receipt of this request, GADNR shall conduct a final project completion audit.

This audit shall include, but may not be limited to:

- * Audit of all paperwork submitted by the grantee for accuracy and completion
- * Audit of all expenditures against the total project budget

- * Audit of all previous reimbursements and requests
- * Verification of a total match submitted by the grantee
- * Final site inspection conducted by GADNR Staff

Once GADNR deems that all requirements of the project agreement have been satisfied, retainage will be dispersed to the grantee per the project agreement and final total expenditures. If total expenditures are less than anticipated, GADNR will adjust the payable retainage amount accordingly. In any instance where an overpayment of either reimbursement or retainage is realized, the grantee is required to refund an amount back to GEFA equivalent to the overage.

- (12) Criteria. Specific criteria will be used to review applications. The criteria are designed to measure the overall concept of the proposed project. Because not all criteria are equally important, the criteria are weighted.

Administrative Criteria - Evaluation criteria in this section are required by all applicants.

- * Matching Funds: Can the applicant provide matching funds greater than 25 percent?
- * Project Need: Does this project satisfy priority needs as identified in a formalized planning document?
- * Pre-Project Planning: Has the pre-project planning occurred and is the project ready to proceed?
- * Leveraging Funds: Will these funds be used as leverage when applying for an external grant?
- * Recreational Opportunity: Will this project provide nature-based recreational opportunities?
- * Water Quality and Quantity Protection- Location: Is this project located in an area identified as high-priority by the Environmental Protection Division?
- * Water Quality and Quantity Protection - Best Management Practices: Will this project protect or restore lands that will improve the quality and quantity of surface water, groundwater, or the flow of springs using best management practices?
- * Historical and Cultural Value: Does this project include the acquisition or development of land with cultural or historical value?
- * Ecological Value: Does this project include the acquisition or development of land with a significant ecological value?

* Maintenance and Management Plan: Can the applicant provide a plan or budget to maintain and manage this property after the project is complete?

Additional Criteria for Local Parks and Trails of Regional Significance - Evaluation criteria in this section are only required for applicants seeking a grant under the Local Parks and Trails for Regional Significance Category.

* Project Completion: Will this project be completed within a two-year timeline?

* Americans with Disabilities (ADA): Project must adhere to all required ADA guidelines.

* Project Impact: Is this project regionally significant?

* Economic Development: Will this project create opportunities to expand or enhance the local economy?

* Recreational Connectivity: Will this project provide access or connections to other outdoor recreation facilities?

* Stewardship: Will this project promote the stewardship of natural resources?

* Water Access: Will this project improve or expand water access?

* Outdoor Recreation Demand: Will this project fill a void for a specific nature-based recreation opportunity in the area?

* Interagency Cooperation: Was this project developed by two or more governmental entities or in conjunction with a nongovernmental entity?

* Partnerships: Will this project receive support from sponsors?

* Public Support: Can the applicant provide documented public support for the project?

* Security: Can the applicant provide a security plan to keep this area protected and secured following the completion of the project?

* State Goals: Does this project overlap with the goals and plans included in Georgia's current State Wildlife Action Plan (SWAP) or State Comprehensive Outdoor Recreation Plan (SCORP)?

Additional Criteria for State Stewardship - Evaluation criteria in this section are only required for applicants seeking a grant under the State Stewardship Category.

* Project Completion: Will this project be completed within a two-year timeline?

* Stewardship: Will this project significantly improve access, use or safety on an existing state-owned property?

Additional Criteria for State Acquisition - Evaluation criteria in this section are only required for applicants seeking a grant under the State Acquisition Category.

* U.S. Military Protection: Will the acquisition of this property help to protect lands, water and habitat as to ensure the sustainability of U.S. Military missions?

- (13) Program Oversight. Following the close of each state fiscal year, GADNR shall submit an annual report of its activities and program administration expenditures for the preceding year, pursuant to this chapter, to the Governor, the Lieutenant Governor, the Speaker of the House, the chairperson of the Ways and Means Committee of the House of Representatives, the chairperson of the Senate Finance Committee, the chairpersons of the Appropriations Committee of the House of Representatives and the Appropriations Committee of the Senate, and the chairpersons of the Natural Resources and Environment Committee of the House of Representatives and the Natural Resources and the Environment Committee of the Senate, and make such report available to the General Assembly.
- (14) Program Information. Complete information on the, Georgia Outdoor Stewardship Program including links to guidelines and complete application instructions, guidance, and required forms are available at: <https://gadnr.org/grants>

Chapter 391-7. THE POLLUTION PREVENTION ASSISTANCE DIVISION.

Subject 391-7-1. GRANT PROGRAM DESCRIPTION.

Rule 391-7-1-.01. Pollution Prevention Action Grant Program.

- (1) **Purpose.** The Pollution Prevention Action Grant Program was established to provide matching grants to business, industry, government, academia, and other organizations to promote and implement pollution prevention concepts, measures, and technologies.
 - (a) Pursuant to O.C.G.A. [12-8-182\(c\)](#) the Board of Natural Resources approved the Action Grant Program.
- (2) **Eligibility.**
 - (a) Only proposals dealing with pollution prevention through source reduction and/or recycling may be considered.
 - (b) Eligible projects shall include, but are not limited to, education, technology transfer, inventory control, improved operating practices, material substitution, process modification, in-process recycling, and reuse.
 - (c) Proposals based on waste treatment, waste disposal, or product development are not eligible.
 - (d) Eligible applicants include, but are not limited to, manufacturing/service companies, trade associations, state agencies, colleges and universities, county and local governments, school systems, and nonprofit organizations.

(3) Selection Process and Criteria.

- (a) Proposals shall be evaluated by the technical and administrative staff of P2AD and such outside experts as requested by the Director of P2AD. Parties evaluating Action Grant proposals shall provide written recommendations to the Director of P2AD.
- (b) Proposals will be evaluated based on the following criteria:
 - (i) technical, scientific, or educational merit
 - (ii) qualifications of key personnel
 - (iii) severity of problem addressed
 - (iv) long-term commitment to goals of project
 - (v) ability to successfully administer the grant, including ability to provide matching funds
 - (vi) transferability of information
 - (vii) potential impact on organizations with similar problems
 - (viii) need for assistance
 - (ix) benefit to the work of P2AD

(4) Funding.

- (a) Projects approved for funding may receive a maximum award of \$40,000.
- (b) Grant recipients shall provide a minimum of one-to-one matching funds either through direct cash or in-kind contributions. In-kind contributions may include staff salary, equipment purchases, laboratory analysis, consultant fees, or other in-kind contributions approved by the Director of P2AD.

(5) Administrative Requirements.

- (a) Grant recipients shall enter into a Cooperative Agreement with P2AD. The Cooperative Agreement shall include financial and technical reporting requirements, a scope of work, rights to technical information, and a schedule for the payment of grant funds.
- (b) Recipients shall submit a Final Report to P2AD at the completion of the project. The Final Report shall include the steps taken to implement the project, lessons learned, and recommendations for implementing the project in other industries and organizations.

History. Original description entitled "Pollution Prevention Action Grant Program" submitted May 17, 1994.

Subject 391-7-2. RADON AWARENESS GRANT PROGRAM.

Rule 391-7-2-.01. Radon Awareness Grant Program.

The Radon Awareness Grant Program was established to provide funds to local governments and community-based organizations to address radon issues in their communities. Funds may be used for any project that promotes radon awareness.

- (a) The Board of Natural Resources has approved the Radon Awareness Grant Program. The grant program is statutorily authorized by O.C.G.A. [12-3-5\(a\) and \(d\)](#).

Cite as Ga. Comp. R. & Regs. R. 391-7-2-.01

Authority: O.C.G.A. Sec. [12-3-5\(a\) and \(d\)](#).

History. Original Grant description entitled "Radon Awareness Grant Program" submitted March 17, 1997.

Rule 391-7-2-.02. Eligibility.

- (a) Any government agency or community-based organization that responds to inquiries or distributes materials to the public on matters relating to health or the environment is eligible for the grant.
- (b) Any project or activity that promotes radon awareness is eligible for the grant, including but not limited to, development and distribution of educational materials, distribution of test kits, conducting speeches, and responding to inquiries from the general public.
- (c) Programs and activities relating to radon mitigation are not eligible for consideration.

Cite as Ga. Comp. R. & Regs. R. 391-7-2-.02

Authority: O.C.G.A. Sec. [12-3-5\(a\) and \(d\)](#).

History. Original Grant description entitled "Eligibility" submitted March 17, 1997.

Rule 391-7-2-.03. Selection Process and Criteria.

- (a) Applications will be reviewed and evaluated by technical and administrative personnel at P²AD. Applications will also be evaluated by the U.S. Environmental Protection Agency's Air and Radiation Technology Branch. The final decision on all grant awards will be made solely by P²AD.

- (6) Applications will be evaluated based on the following criteria:
- * Ability to promote radon awareness,
 - * Evidence of long-term commitment, and
 - * Ability to supply matching funds.
- (c) Upon completion of an initial review by P²AD, applications which have met the selection criteria will be reevaluated and priority given to applicants based on the following factors:
- * Located in EPA Zone 1. (Zone 1 is defined by EPA as counties which have the highest potential for elevated radon levels or levels greater than 4pCi/l. The Zone 1 counties in Georgia are Cobb, Fulton, DeKalb, and Gwinnett),
 - * Ability to reach a high proportion of the population, or
 - * Experience in responding to radon inquiries from the public.
