SUBJECT

Cliffs Dow Dump Site - Community Relations Plan (CRP)

SUMMARY

- I explained that we develop a community relations Plan (CRP) for all "superfund" sites. As part of the preparation of this plan, we need to ask a few questions.

What sort of community interest has been present?

The local university (Northern Michigan Univ) has an active student body that has expressed concern. A couple of the Professors have been active: Professor Kulshetk in Political Science Dept he is a City Commissioner

Professor Bill Robinson Head of Biology Dept. involved in citizen group:

"Citizens to Save Superior Shoreline"

The main emphasis of the citizen concern seems to be directed at the Plant site. Some confusion between Plant site + City site (City site = Dump Site)

CRP

SUMMARY

What have the Community Relations been to date?

They held a public forum on campus a couple on months ago and discussed various environmental issues. The Cliffs Dow sites were among the issues discussed. A local TV station has done a couple of spots (channel 6). Some local newspaper articles (he will try and send copies to Larry).

Suggested techniques for exchange of information? local repositories are effective.

- 1.) Learning Resources Center at Northern
- 2.) Public Library

Public meetings should have good turnout. Especially if held after classes begin. University has a big hall. City Hall other good meeting spot.

③

SUMMARY

What is most important public issue of site?  
worried about surface water (Lake Superior degradation).

Im Summary:

Why can't federal gov't do something for both sites. Some confusion exists between the two sites.

Mike suggested that we have a meeting before the city commission before any public meetings. They meet every 2<sup>nd</sup> and last Monday of the month. I said that the 2<sup>nd</sup> Monday of July would be the earliest that we could meet with them.

(4.)

SUMMARY

I asked about news article of 4/17/84 in Mining Journal. He ~~conf~~ stated that some of the things appeared to be taken out of context. The city is preparing for the best case & worst case scenarios. I explained that we would <sup>not</sup> decide on a final solution until end of FS. ~~I~~ I suggested that he call me after he reads work plan if he has any questions concerning the basic goals of the RI & FS.
