A. H. Hatthews KB 625

SUBJECT

RECORDS RETENTION REVISION

Attached is a partial revision to the Records Control Manual. It updates only the Legal and Patent Section, Pages 30 through 35A of the Records Schedule Section of this Manual. This is the fourth revision, although only partial, to the Manual since It was originally published in April, 1961. The last revision, partial, was dated 12/72.

Please destroy your existing Legal and Patent Section and replace it with the attached pages.

Also please make the changes indicated below on the existing pages of your manual. The portions to be changed are underlined.

| Page | Schedule No. | Record | Retention |
|--------|-----------------|---|--------------|
| 8 | 100 | Historical file of Kaiser Advertising in all media. | Permanent |
| 8 | 000 | Vendor invoice for advertising - EDT copy | C + 1 yr. |
| 8 8 | 000 | Legal releases from customers and others featured in Kaiser Advertising | C + 1 yr. |
| 8 | 000 | Vendor invoices pertaining to advertising - copy showing payment | c + 1 yr. |
| 24 | 4 94A | Hourly payroll register | c + 4 |
| 29 | 603 | Individual employee folder | Permanent |
| 45 | 930 | Price change or price deviation reports and recommendations | <u>c + 6</u> |

As at the time of our last revision, the field locations, especially, are asked not to destroy any accounting records without a release from R. F. Garavaglia, Room 846 KB, as some of these records may still be required for outside audit after the retention period has expired.

Also, the Product Liability Committee is presently working through the various Divisions to develop guidelines for records definition and retention for those Division's specific products. Until such time as this requirement is formalized and made a part of the Records Control Manual, the Product Liability Committee guidelines should be adhered to.

Limited additional copies of this schedule are available upon request.

Attachment

POLICY AND PROCEDURE

1. POLICY

Corporate policy is to "destroy all records except those specifically authorized to be preserved". Those records "authorized to be preserved" are listed in the attached schedule. This schedule has been approved by the Records Management Committee as the only corporate authority for the retention of records. Official retention periods are as short as possible in order to keep down our records inventory. The longer periods are based upon positive legal, sudit or management requirements.

2. DEFINITIONS

- (a) A positive legal requirement means that: a specific federal or state law requires us to keep the record; important property rights which the company has legal obligations to protect are involved, such as patents, employee pension equities, etc.; or we are sware of a specific, impending claim or begal action. The mere fact that a record is potentially useful in the event of a lawsuit does not constitute a positive legal requirement. Each month the corporation enters thousands of sales, purchase, and freight transactions involving tons of records most of which we would have to save for fifteen years if we wanted to be fully armed against every possible legal problem that could arise. As a practical matter the retention of such records has to be based simply upon the requirements of sound business procedure and they are kept for one to two years - a period long enough to verify performance, to make or receive payment, and to furnish support for the audit of accounts. During this period probable claims or legal situations will normally be recognized and the records directly concerned with the specific transaction set aside. After this time, if unanticipated legal problems still come up, the corporation knowingly assumes the risk of any loss caused by not having records - a loss that should in any event be far less expensive than a massive records storage program.
- (b) Auditing requirements refer to state and federal tax audits, particularly the Federal Government's review of our corporate income tax returns. All records needed for the federal tax audit are retained for "C plus 6 years", a period long enough to cover the statutory three-year limitation on the audit plus extensions which are often arranged by separate agreement.

30003871

(c) <u>Management requirements</u> refer to the needs of corporate departments producing records of proprietary, technical, or economic value to future operations of the company, e.g., technological research and development, market research and analysis, facilities engineering, etc. The mere fact alone that people at higher levels of management "might ask for (certain) records" does not constitute a positive management requirement nor an acceptable reason for saving records that are otherwise disposable.

Most of our company records do not fit into the legal, audit or management requirement classifications described above. They may be vital to current goals and useful for analysis of current operations but are of little or no value to the corporation by the time they are over one year old. Therefore, the Records Management Committee has assigned short-term retention categories of "current plus I year" or less to ninety per cent of the corporation's records.

3. RETENTION AND DISPOSAL PROCEDURE

- (a) The Records Schedule is divided into sections by the company's management functions rather than its organization. Each section applies to the records at all locations where that functional activity is officially performed; some sections such as "Sales" apply to many locations; others such as "Market Research" apply to only a few. Records are listed in the order of permanence, as a general rule. Retention periods are expressed in terms of the number of calendar years plus the current calendar year. If a record is classified as "C plus 2 years", this means that during 1961 all 1960 and 1959 copies will be kept; 1959 copies will be destroyed in January, 1962 and 1960 copies will be thrown out in January, 1963. In other words, there will always be at least two full prior calendar years of a "C plus 2" record on hand, and at least one full prior year of a "C plus 1" record. "Active" means that the record should be kept as long as it is actively used, is pertinent or in effect, and has not been superseded by receipt of more up-to-date material. In a few instances the meaning of "Active" has been alightly changed for a particular record and the modified definition shown in a footnote.
- (b) Annual Records Disposal. The most important records house-keeping job is the year-end disposal. Each January a year's collection of records in all categories except "Permanent" should be discarded by all company offices and locations. The records schedule will be the guide to "Permanent" records, most of which are found in research and technical locations or in certain headquarters departments. Records classified as "Active" should also be culled at year-end even though the life span of "Active" material is not necessarily related to its chronological age. CAUTION: Accounting records should not be destroyed without clearance from the Tax Department at Kaiser Center, Oakland.

4. PROCEDURE FOR AMENDING THE RECORDS SCHEDULE

In order to assist the Records Management Committee to keep abreast of developments that warrant issuing amendments or changes to the records schedule, anyone in the company who feels that the retention period governing his records should be changed because of changes in legal, auditing, or management requirements, or who feels that a new item should be added to the schedule, should submit the following information to the Records Coordinator for referral to the Committee:

- (a) Department or location that has the record.
- (b) Name and present schedule number of record, or simply a brief description if it is a proposed new item on the schedule.
- (c) Proposed retention period.
- (d) Reason for the proposed retention including specific citation to the law or regulation and the government body and an explanation of the need for the record who uses it and for what purposes - going into enough detail to give the Committee a clear picture of the value of the record.

5. FILING

- (

Refer to KACC File Manual issued in January of 1966 for detailed information on the subject of filing.

RECORDS CENTER PROCEDURE

A Kaiser Aluminum Records Center provides a records storage service to offices that do not have file space for long term records. Because the Center has limited room for expansion, only records with retention periods of at least "C plus 2 years" will be accepted. In addition, "Active" records cannot be accepted because, by definition, when these become inactive they should be destroyed.

Procedure for Using Records Center Services

- (a) Consult the records schedule to make sure the material to be transferred is eligible for Records Center storage. Unacceptable records (i.e., "Active" and under "C plus 2") ar∈ identified in the schedule by a three-zero schedule number ("OOO").
- (b) Call the Records Center (Extension 3688) and request the number of records transfer cartons needed - approximately two are required for each full file drawer of records. The Records Center will furnish transfer cartons and copies of the Records Transfer Form (KACC-328).
- (c) Follow instructions on the Records Transfer form for packing records, preparing the form, and delivering records to the Center.
- (d) Assuming the records are eligible for storage, a box number (which is also a shelf location number) will be assigned to each box, and the month and year the records are scheduled for destruction (unless "permanent") will be shown on each box and on the Records Transfer form. One copy of the Transfer Form will be returned. Records received by the Center that are ineligible for storage will be returned to the sender unless they have passed the authorized retention time in which case they will be destroyed.

(continued)

- (e) Accepted records will be held until their retention period expires. During this time, you may obtain reference or charge-out service by giving the box number and name of the record concerned.
- (f) When the destruction month arrives, a ten-day advance notice of the exact date destruction is to occur will be sent to the parent office. This gives the parent office a chance to notify the Center if a legal claim or legal action has arisen. If notice of a special legal claim or action is then given, it will be referred by the Center to the Legal Department, and, if confirmed, the destruction date will be postponed for one year. At the end of such year, if the claim has not been settled, the ten-day notice and postponement procedure will be repeated.
- (g) In the event any record is released from the record center, such action shall be recorded. If within six months this file or box has not been returned, the record center shall automatically be absolved of further responsibility and the record may be placed in the record center only by following the procedure outlined in paragraphs (a) through (d).

Records in the Records Center will be destroyed when the authorized period has expired unless there is a specific claim or legal action pending.
