The product specified below on the terms and subject to the conditions following:

Product: Lead dross for melting in furnace

Quantity: Twenty-five (25) tons

Price: Lead Dross

Lead plus antimony plus tin content over 1% as determined by wet assay at the St. Louis price for lead date of delivery less a treatment charge of \$68.00 per ton of material delivered f.o.b. truck our plant, East Chicago, Indiana. Any copper contained will be deducted from the payable tin content. For each percent or fraction thereof that the combined lead plus antimony plus tin content falls below 70%, the treatment charge will be increased 1.5%. This price is for delivery to our plant and any freight and transportation tax paid by purchaser will be charged to seller on final settlement. Material is to be loaded loose and not in drums.

BUYER'S WEIGHTS AND ASSAYS TO BE FINAL

Delivery: Via truck to our plant, East Chicago, Indiana

Shipment: Within 30 days

Payment: Buyer to pay shipper's draft based on 75% on the estimated value of material upon arrival of shipment and invoice at our plant, East Chicago, Indiana. Balance due shipper payable promptly after verification of weights and assays.

Price: Lead plus antimony plus tin content as determined by wet assay at the price for lead date of arrival less a treatment charge of \$90.00 per ton of material delivered f.o.b. our plant, East Chicago, Indiana. Any copper contained will be deducted from the payable tin content. For each percent or fraction thereof that the combined lead plus antimony plus tin content falls below 70%, the treatment charge will be increased 1.5%. This price is for delivery to our plant and any freight and transportation tax paid by purchaser will be charged to seller on final settlement. An additional handling charge of \$3.00 per ton will be assessed on material received in drums.

BUYER'S WEIGHTS AND ASSAYS TO BE FINAL

Payment: Payment will be made promptly after verification of weights and assays.
