UST	Underground Storage Tank

VAP	Voluntary Action Program
VCP	Voluntary Cleanup Program

URS Corporation (URS) was selected by the City of Cleveland (the City) to conduct a Phase I Environmental Property Assessment (Phase I) of the Tremont Field Property located at West 11th Street in Cleveland, Cuyahoga County, Ohio (the Property). A Site Location Map is included as **Figure 1**.

The Property occupies approximately 41.53 acres and is located at 41° 28' 24.60''North latitude and 81° 41' 11.04'' West longitude. The Property is located on permanent parcel number (PPN) 008-29-002. A Property Boundary Map is included as **Figure 2**.

1.1 PROJECT OBJECTIVE

The purpose of this Phase I is to determine whether there is any reason to believe that a release of hazardous substances or petroleum has or may have occurred on, underlying, or is emanating from the Property including any release from management, handling, treatment, storage, or disposal activities conducted on or off the Property. The Phase I also provides an evaluation of whether or not the Property is eligible for participation in the Ohio Voluntary Action Program (VAP) and is intended to determine the necessity for a Phase II Property Assessment (Phase II). This Phase I Property Assessment was completed in accordance with Ohio Administrative Code (OAC) 3745-300-06.

1.2 REPORT FORMAT

Section 1 is the introduction. **Section 2** defines the scope of services for the Phase I. Physical setting, land use, and adjacent properties are discussed in **Section 3**. **Section 4** includes a discussion of current and historical property uses. **Section 5** provides information gathered during the Property inspection conducted by Ms. Brenda Pratt and Ms. Michelle Wolff or URS. Mr. Michael J. McKim of URS also visited the Property on June 11, 2013. Mr. McKim is a VAP-Certified Professional (No. 249). **Section 6** summarizes information obtained through the environmental database search and Freedom of Information Act (FOIA) requests. Conclusions are presented in **Section 7**. Limitations are discussed in **Section 8**. **Section 9** summarizes the qualifications of the URS personnel that prepared this Phase I. References are listed in **Section 10**.

1.3 USER RELIANCE

This report was prepared in confidence at the request of City of Cleveland. The contents hereof may not be used, relied upon or reproduced in part or in its entirety by any other party without the express written consent of URS and City of Cleveland Department of Economic Development. Any use or reliance by a third party shall be at that party's sole risk.

The required elements of an Ohio VAP Phase I Property Assessment are described in Paragraph (D) of OAC 3745-300-06 and include the following:

- Review of historic and current land uses of the Property,
- Review of the environmental history of the Property and area within ½-mile radius,
- Reconnaissance of the Property, and
- Investigation of the hazardous substance and/or petroleum release history of the Property.

Information collected during the reconnaissance, interview, and records review was used to establish potential areas of environmental concern (referred to as Identified Areas (IAs)), which are associated with previous land usage at or adjacent to the Property. Attempts were made to locate reasonably ascertainable information regarding the Property and surrounding area. Where information sources were not readily available through reasonable inquiry, an explanation as to why the information was not available is provided within the report. Additional information sources used are also discussed, as appropriate, in this Phase I report.

2.1 REVIEW OF HISTORICAL AND CURRENT LAND USES

During the Phase I process, a variety of sources were reviewed to identify the historical and current land uses of the Property and surrounding area. The objective of the review was to make a reasonable due diligence inquiry and identify, if possible, a continuous history of the land uses on the Property and adjacent properties, up to and including the first industrial or commercial land uses. Sources of information included, but were not limited to, the following:

- Cuyahoga County Auditor,
- Topographic Maps,
- Aerial photographs,
- Sanborn Fire Insurance (SFI) Maps,
- City Directories,
- Fire Prevention Bureau (FPB) records,
- Previous Reports, and
- Interviews with knowledgeable persons.

The information collected was used to define potential IAs associated with current or previous land use at or in the vicinity of the Property.

2.2 REVIEW OF ENVIRONMENTAL HISTORY

The objective of the environmental history review was to make a reasonable due diligence inquiry and identify, if possible, a continuous environmental history of the Property and adjacent properties. The review was conducted to determine whether any management, handling, treatment, storage or disposal activities occurred that may have resulted in the release of hazardous substances or petroleum products on, underlying, or emanating from the Property. Sources of information included, but were not limited to, the following:

- United States Environmental Protection Agency (USEPA) Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS),
- USEPA National Priorities List (NPL),
- USEPA Resource Conservation and Recovery Act (RCRA) Treatment, Storage, and Disposal (TSD) Facility List,
- USEPA RCRA Hazardous Waste Generators List,
- USEPA Emergency Release Notification System List (ERNS),
- USEPA National Corrective Action Priority System List (CORRACTS),
- Ohio Bureau of Underground Storage Tank Regulations (BUSTR) Registered Underground Storage Tank (UST) List,
- BUSTR Leaking Underground Storage Tank (LUST) List,
- Division of Environmental Response and Revitalization (DERR) Database,
- OEPA Spill Database,
- Ohio Department of Natural Resources (ODNR) Water Well Log Information,
- ODNR Oil and Gas Well Information,
- Ohio Community Right-to-Know Toxic Release Inventory Reports filed with the Local Emergency Planning Committee (LEPC),
- City of Cleveland FPB Records, and
- Previous investigations at the Property.

URS contracted with Environmental Data Resources, Inc. (EDR), an independent database search service, to search the public regulatory agency records. The search radius was measured from the center of the Property. These databases were reviewed to assess whether current or past land uses may have resulted in Identified Areas, as defined in OAC 3745-300-06(E), at the Property. Agency databases included, but were not limited to, those related to groundwater, surface water, oil and gas, solid and hazardous waste, and USTs.

Public agency staff was contacted, as necessary, to supplement information gathered from the EDR database report. Pursuant to FOIA, URS requested files from public agencies including BUSTR, City of Cleveland FPB, and OEPA's Northeast District Office. Information obtained during the regulatory database review and agency file reviews was used to develop the environmental history summary presented in this Phase I report.

2.3 PROPERTY RECONNAISSANCE

The objective of the property reconnaissance was to perform a reasonable due diligence inquiry and to observe physical evidence to determine whether a release of hazardous substances or petroleum products has or may have occurred on, underlying, or emanating from the Property.

Ms. Brenda Pratt and Ms. Michelle Wolff of URS inspected the Property on May 23, 2013. Ms. Pratt, Mr. McKim, and Ms. Wolff are URS representatives who are experienced in completing VAP Phase I Property Assessments. Mr. Michael J. McKim (Ohio VAP Certified Professional (CP) No. 249) also visited the Property on June 11, 2013.

2.3.1 General Observations

Surface conditions as well as current activities and operations on the Property and surrounding sites were observed during the inspections. The weather during the May 23, 2013 Property reconnaissance was cloudy with a temperature of approximately 60° F.

2.3.2 Potential Environmental Concerns

An inventory of potential contaminant sources on and adjacent to the Property was completed on the basis of visual observations. During the property reconnaissance, attempts were made to collect the following information:

- General property information (location, nearby land use, topography, roads, etc.),
- Current land use,
- Regulatory history,
- Interviews with persons familiar with the history of the Property,
- Activities recently performed on the Property,
- Recorded accidents or spill incidents,
- Chemicals used and/or stored on the Property,
- Areas where hazardous materials or petroleum substances were stored or used,
- Discharge locations of pipes, drains, and sanitary and storm sewers,
- Staining or other evidence of past or present releases of hazardous substances or petroleum,
- Location of electrical equipment potentially containing polychlorinated biphenyls (PCBs),
- Location of known or suspected USTs, aboveground storage tanks (ASTs), pits, ponds, and lagoons, and
- General environmental setting.

The property reconnaissance included inspection of adjacent properties from the public right-of-ways. Observations were conducted to evaluate potential environmental impacts to the Property posed by surrounding land use. Photographs taken during the property reconnaissance are included in **Appendix A**.

The Property is located at West 11th Street in Cleveland, Cuyahoga County, Ohio and occupies approximately 41.53 acres in the Tremont Neighborhood located on the west-side of Cleveland. The center of the Property is located at approximately at 41° 28' 24.60''North latitude and 81° 41' 11.04'' West longitude. **Figure 1** is a portion of the United States Geological Survey (USGS) Cleveland South, Ohio 7.5-minute quadrangle map depicting the location of the Property.

The Property is located on PPN 008-29-002 and owned by the City of Cleveland at the time of this Phase I. A Property Boundary Map is included as **Figure 2**.

Land use surrounding the Property is residential and commercial. Adjacent land use is illustrated on **Figure 2** and summarized as follows:

West: Residential with West 14th Street and Interstate 71 beyond

South: Vacant disturbed land and Clark Avenue beyond

East: Air Products Air Separation Plant (2820 Quigley Road), packaging warehouses (3000 Quigley Road), Cleveland Vehicle Detention Center (3040 Quigley Road), and railroad beyond

North: Interstate 490 and residential and commercial beyond

3.1 CURRENT LAND USE

The Property is improved as a recreational area with five baseball diamonds, a track, a playground, a dog park, and a parking lot. No structures are present on the Property. Current land use details are provided in **Section 5.1**. A current features map is provided as **Figure 2**.

3.2 PHYSICAL SETTING

Physical characteristics of the Property were established based on the information obtained from previous investigations and published references. The following subsections include data on topography, drainage, geology, and hydrogeology.

3.3.1 Topography and Drainage

The Property is located approximately 2½ miles south of Lake Erie and within the Erie Lake Plain physiographic province. This province is characterized by ground surfaces that slope gently toward Lake Erie and are dissected by re-entrant valleys draining northward to Lake Erie (Ford, 1987).

According to the EDR report, the ground surface elevation at the Property is approximately 580 feet above mean sea level (msl). Surface topography in the area is generally flat to sloping gently toward the Cuyahoga River and Lake Erie. According to the Soil Survey of Cuyahoga County,

the Property and surrounding area are predominantly urban land. The urban-land designation indicates that 80 percent of the surface is covered by manmade materials (e.g., buildings, concrete, and asphalt). Therefore, the flow of surface water at the Property is predominantly controlled by the local stormwater system.

3.3.2 Regional Geology

The Erie Lake Plain physiographic province is characterized as Pleistocene to recent-aged sand and gravel (Ford, 1987), described best as "beach ridge" material deposited by ancestral Lake Erie. A buried valley located near the Property is characterized by interbedded alluvial silt and clay. Based on open-file bedrock topography maps, the top of bedrock is located at approximately 500 feet above msl in borings within ½ mile of the Property (ODNR, 1996). Therefore, the top of bedrock is approximately 80 feet below ground surface (bgs).

According to the Soil Survey of Cuyahoga County, the Property and surrounding area contain mostly miscellaneous materials placed as fill and are almost totally covered with roads, buildings, and other structures.

3.3.3 Regional Hydrogeology

Shallow groundwater in the vicinity of the Property is commonly located in the beach ridge strata of sand and gravel (Ford, 1987). Regional groundwater flow is likely to the north-northeast, toward Lake Erie and the Cuyahoga River. However, localized divergences in groundwater flow direction are possible, especially in the vicinity of the Cuyahoga River. The Cuyahoga River is located approximately ½ miles east of the Property. Lake Erie is located approximately 2½ miles north of the Property. Based on the local topography of the area, groundwater flow at the Property is assumed to be east towards the Cuyahoga River.

According to the Groundwater Resources Map of Cuyahoga County, the Property is located within a buried valley containing 200 to 300 feet of fine sand, silt and clay (Crowell, 1979). The buried valley appears to have been formed by a north-flowing stream, which had a course that roughly coincided with the present day Cuyahoga River. Drilled wells in this area yield meager groundwater supplies unless thin, isolated sand lenses are encountered.

Recharge to the shallow water bearing zone beneath the Property and surrounding area is derived from direct infiltration of rainfall through the soil in areas not covered by pavement. In Cuyahoga County, 33 to 40 inches of rainfall can be expected annually. Of that amount, approximately 10 inches become surface runoff, 20 inches remain in the unsaturated zone and are returned to the atmosphere via evaporation and transpiration, 2 inches are retained at the surface, and 1 to 7 inches infiltrate to the subsurface water bearing zones (ODNR, 1953). The groundwater discharge area for the Property and vicinity is Lake Erie, located approximately 2½ miles north of the Property.

3.3 GROUNDWATER USES

The City of Cleveland is supplied with community water from Lake Erie. The Cleveland City-Wide Urban Setting Designation (USD) establishes that greater than 90% of all parcels in the City of Cleveland are connected to the community water supply. Additionally, the City of Cleveland Housing Code 369.07 requires all plumbing fixtures to be supplied with municipal water, rendering an increase in the percent of parcels not connected to the municipal water supply unlikely.

Based on this information, the OEPA issued an USD for the City of Cleveland on February 16, 2011. The Property resides within City of Cleveland, therefore, is located within the City of Cleveland USD boundary. Based on the availability of municipally supplied potable water and the USD, groundwater resources in the area are not likely to be developed for future potable use.

The USD specifies that groundwater within its boundaries will not be used for potable use unless the area is identified as a critical resource (i.e., an area with groundwater yields greater than 100 gallons per minute (gpm)). The Property is located in an area where groundwater yields from silt and clay deposits, as well as shale bedrock, are likely to be less than 3 gpm (Crowell, 1979).

3.4 PHYSICAL SETTING SUMMARY

Based on the low to moderate permeability of the soils underlying the Property, transport of potential contaminants is expected to be moderate. In addition, the availability of municipally-supplied potable water indicates groundwater resources in the vicinity of the Property are not likely to be developed for future potable use.

Information regarding historic land uses of the Property and the surrounding area is presented in this section. **Figure 2** shows the most recent use of the Property. Historical information was obtained primarily from the following sources:

- Cuyahoga County Auditor,
- USGS Topographic Maps,
- Aerial Photographs,
- SFI Maps,
- City Directories,
- Interviews, and
- Previous Reports.

Selected photographs taken during the site visits are included in **Appendix A**.

4.1 CHAIN OF TITLE

The Property, as defined in this Phase I, is situated on PPN 008-29-002. Information obtained from the Cuyahoga County Auditor's website search indicates that the City of Cleveland currently owns the Property. Information obtained from the Cuyahoga County Auditor's website is provided in **Appendix B**.

URS requested a Chain of Title from NETR to determine past owners for Parcel Number 008-29-002. Based on NETR's research, it appears the City of Cleveland has owned the Property in its entirety since at least 1940. The Chain of Title is provided in **Appendix B**.

4.2 PROPERTY USE

The Property is currently used as a recreational area with five baseball diamonds, a track, a playground, a dog park, and a parking lot. No structures are present on the Property. The Property has been used as a recreational area for more than 100 years.

4.3 HISTORICAL TOPOGRAPHIC MAPS

Historical USGS topographical maps, obtained by EDR, were reviewed for the Property and vicinity. Historic USGS topographic maps obtained were available for 1903, 1904, 1953, 1963, 1970, 1979, 1984, and 1994. Copies of the historic topographic maps are included in **Appendix C**. A review of the maps is presented below.

1903 and 1904 (Cleveland and Cleveland Vicinity Quads, Scale 1:62,500) The Property is developed with a track and a small structure. The surrounding area is developed with residential streets to the north and west. A multi-track railroad is located to the east.

1953 (Cleveland South Quad, Scale 1:24,000) The Property is located at the base of a hill. The northern portion of the Property is located in a "built-up" area; however, no details are provided on the map. A road is shown entering the Property from the east. An industrial facility and rail spurs are located east adjacent to the Property. Multiple

railroads are located east and south of the Property. The area along the Cuyahoga River is developed with several large industrial facilities. The area appears to be residential to the north and west. The area southwest of the Property along the Cuyahoga River is developed with industrial properties.

1963 **(Cleveland South Quad, Scale 1:24,000)** The Property is identified as a playground and contains a track. The road entering the Property is no longer shown. Four additional structures are located east of the Property. The surrounding areas appear similar to the 1953 map.

1970 **(Cleveland South Quad, Scale 1:24,000)** The Property appears similar to the 1963 map. Four small structures (possible ASTs) and three additional structures are located east of the Property. The existing facility located adjacent to the Property has expanded. Industrial development has increased south of the Property beyond Clark Avenue. Interstate 71 is constructed to the west.

1979 **(Cleveland South Quad, Scale 1:24,000)** The Property and surrounding development are generally as shown on the 1970 map. Interstate 90 is constructed to the west.

1984 **(Cleveland South Quad, Scale 1:24,000)** The Property contains a road located along the southern and eastern property boundaries with an additional road running from east to west. A structure is located adjacent to the Property along the northeastern Property boundary. Several structures and possible ASTs are located east of the Property.

1994 **(Cleveland South Quad, Scale 1:24,000)** The Property appears similar to the 1984 map except the road running east to west is no longer present. Interstate 490 is constructed to the north. The surrounding areas to the south and east are shown as a "built-up" area.

4.4 SANBORN MAPS

URS contracted EDR to conduct a search of their Sanborn Fire Insurance (SFI) Map collection for coverage of the Property and vicinity. SFI Maps were available for 1951, 1965, and 1971. A review of the maps is summarized below. Copies of the maps are included as **Appendix C**.

1951 The western portion of the Property appears on this map and is shown as a vacant area. The Property is located at "the foot of hill". West 11th, Auburn Avenue, Fruit Avenue, and Clarence Court are present. The Property is primarily surrounded by residential properties to the north and west. Adjacent properties to the east and south are not shown on this map. Two auto repair shops are located northwest of the Property. One is located on Auburn Avenue and another on West 11th.

1965 The Property is shown on two separate Sanborn maps for 1965. The western portion appears similar to the 1951 map. Residences have been razed on West 11th Street. The eastern portion of the Property is labeled as "gardens". Residences and storefronts are located to the north. Adjacent properties to the east and south are not shown.

1971 The Property is shown on two separate Sanborn maps for 1971. The Property appears similar to the 1965 maps. Dwellings have been razed along Clarence and West 11th Streets. The Clark Freeway (I-490) is shown partially constructed northwest of the Property.

4.5 AERIAL PHOTOGRAPHS

URS contracted EDR to obtain aerial photographs of the Property and vicinity. Aerial photographs were available for 1938, 1952, 1962, 1970, 1977, 1982, 1991, 1994, 2000, 2005, 2009, 2010, and 2011. A review of the photographs is presented below. Copies of the aerial photographs are included as **Appendix C**.

1938 **(Scale 1" = 500')** The Property appears undeveloped with the exception of the northeastern portion which contains residences. The northern portion of the Property contains a darker contrast and may be densely vegetated or inundated with water. The southern portion appears to contain some land disturbance but does not appear to contain any structures. Residential neighborhoods are located to the north and west. Disturbed land and Clark Avenue are located to the south. Disturbed land and railroad tracks are located to the east. Industrial facilities are located to the northeast and southeast.

1952 **(Scale 1" = 500')** The Property appears to contain small unpaved roads throughout the northern portion of the Property. The area east of the Property is developed with two large adjoining structures. A small structure and/or vehicles are located near the southeast corner of the Property. The area beyond Clark Avenue is developed with two structures.

1962 **(Scale 1" = 500')** The Property is developed with five baseball diamonds, a track, and a parking lot. A small structure is located adjacent to the track. The area east of the Property has increased in development with two additional facilities. The northeastern facility appears to contain several ASTs. The southwestern facility appears to be an automobile junk yard. The property south of Clark Avenue has increased in size and contains two additional structures.

1970 **(Scale 1" = 500')** The Property appears similar to the 1962 aerial photograph with the exception of three square courts located centrally on the Property. Several streets and residences have been razed west of the Property for the construction of I-490.

1977 **(Scale 1" = 750')** The residences located on the northeastern portion of the Property have been razed. Heavy industrial facilities are located east of the railroad tracks.

1982 **(Scale 1" = 1000')** The Property appears similar to the 1977 aerial photograph. The facility with the ASTs appears to have increased in size. The remaining surrounding properties appear similar to the 1977 aerial photograph.

1991 **(Scale 1" = 750')** The Property appears similar to the 1982 aerial photograph. The I-490 freeway is completed north of the Property. A structure is located on the northeast adjacent property. The automobile junkyard site has an increased amount of vehicles in

their lot. The south adjacent site appears to contain heavy land disturbance and may contain large mounds onsite.

1994 **(Scale 1" = 750')** The Property appears similar to the 1991 aerial photograph. Several structures south of Clark Avenue appear to have been razed.

2000 **(Scale 1" = 500')** The Property appears similar to the 1994 aerial photograph. The structure shown adjacent to the track is no longer present. The facility with the ASTs appears to contain four cooling towers and at least four ASTs. The site south of Clark Avenue contains heavy land disturbance.

2005 **(Scale 1" = 500')** The Property appears similar to the 2000 aerial photograph. The site south of Clark Avenue appears graded.

2009-2011 **(Scale 1" = 500')** The Property appears similar to the 2005 aerial photograph. The site south of Clark Avenue appears to contain large mounds of gravel or earth.

4.6 CITY DIRECTORIES

URS contracted EDR to conduct a search of historic city directories for coverage of the Property and vicinity. EDR searched various local historical city directories for the Property and surrounding sites for the years 1930 to 2012. A copy of the EDR City Directory Abstract is provided in **Appendix C.**

The Property was not listed in the City Directories; however, 2883 West 11th Street was listed as the Clark Avenue Playground Field Office in 1961.

Surrounding properties included primarily residences. A gas station was located at 1012 Clark Avenue from 1961 through 1974. An auto recycler was located at 1221 Mentor Avenue from 1986 through 1991. An auto repair shop was located at 1403 Mentor Avenue from 1935 to 1941.

4.7 MEDIA SOURCES

The Property was mentioned in a Cleveland Plain Dealer article dated April 24, 1938. The article references the northern portion of the Property as "Clarence Lake" due to the submergence of the baseball fields under 10 feet of water. The "lake" was described as extending 2,000 feet from east to west and 750 feet from north to south. Residents of the community referred to this portion of the Property as the location of the former Valley race track used for harness racing in 1900. The area was described as naturally swampy and according to the article, the lake formed in 1938 due to a natural spring on the side of the hill, heavy run-off, and a clogged storm sewer. A copy of the newspaper article is provided in **Appendix C**.

4.8 SUMMARY OF HISTORIC PROPERTY USE

The Property is located in the Tremont neighborhood in the City of Cleveland. This area has been developed for more than 100 years. The oldest available resource for evaluating historical operations on the Property is a 1903 topographic map. The Property was developed as harness racing track from at least 1903 until at least the 1930s when it was developed with a baseball

field. The northern portion of the Property was inundated with 10 feet of water in 1938 due to a natural spring, heavy run-off, and a clogged storm sewer. The Property has been developed with five baseball diamonds, a track, and a parking lot since at least 1962. The Property was not listed in the City Directories; however, 2883 West 11th Street was listed as the Clark Avenue Playground Field Office in 1961.

Surrounding properties include primarily residential properties to the north and west and industrial properties to the south and east. Facilities to the east include an automobile junkyard and a facility containing multiple ASTs and cooling towers. A gas station was located at 1012 Clark Avenue from 1961 through 1974, an auto recycler was located at 1221 Mentor Avenue from 1986 through 1991, and an auto repair shop was located at 1403 Mentor Avenue from 1935 to 1941.

Ms. Brenda Pratt and Ms. Michelle Wolff inspected the Property on May 23, 2013. The weather was cloudy with a temperature around 60°F during the site visit.

The inspection was performed to identify current Property uses, potential environmental concerns, and hazardous substances on and adjacent to the Property. The reconnaissance included a visual walking inspection of the Property. Surface conditions as well as current activities and operations on the Property and adjacent properties were observed during the inspections. Photographs taken during the reconnaissance are included in **Appendix A**.

5.1 CURRENT CONDITIONS

The Property is developed as a recreational area known as the "Clark Fields". The Property contains five baseball diamonds located throughout the Property. A track is located along the western Property boundary, a playground and a dog park are located centrally, and a parking lot is located along the eastern Property boundary. Dense vegetation is located along the northern, northwestern, and southwestern Property boundaries. The remaining areas are largely mowed grass areas. No structures are present on the Property. An unnamed road follows the southern Property boundary.

Photographs taken of the Property are included in **Appendix A**.

5.2 MATERIAL USE AND STORAGE

No evidence of drums or containers was observed on the Property during the reconnaissance.

5.3 ABOVEGROUND STORAGE TANKS

No evidence of current or former ASTs were observed on the Property during the reconnaissance.

5.4 UNDERGROUND STORAGE TANKS

No evidence of current or former USTs were observed on the Property during the reconnaissance.

5.5 WATER AND WASTEWATER MANAGEMENT

No sanitary wastewater is currently generated at the Property. Stormwater most likely flows into stormwater catch basins located throughout the fields and along the unnamed road located on the Property. Three stormwater catch basins located on the southeastern portion of the Property were in poor condition. One basin contained several tires and another was filled with water and debris. A third basin did not contain a grate and was staked off for safety purposes.

The Property obtains potable water from the City of Cleveland Division of Water. If wastewater is generated at the Property in the future it would be discharged to the Northeast Ohio Regional Sewer District (NEORSD).

No drains or sumps were observed on the Property during the reconnaissance.

5.6 SOLID WASTE MANAGEMENT

Waste receptacles are located throughout the park for general waste. Waste is collected by the City of Cleveland.

5.7 WELLS AND SEPTIC SYSTEMS

No on-site wells or septic systems were reported to be present or observed on the Property during the reconnaissance.

5.8 UTILITIES

Electricity is provided to the Property and surrounding area by the Cleveland Electric Illuminating Co. (CEI). Water is provided by the City of Cleveland, which obtains water from Lake Erie. Sewer services are provided by the NEORSD.

5.9 POLYCHLORINATED BIPHENYLS

Two pole-mounted transformers were located centrally on the Property between the track and the dog park. In addition, one pad-mounted transformer was located at the northeast corner of the Property between the baseball diamonds. The pad-mounted transformer was secured by a fence and was owned by FirstEnergy. Transformer oils may contain PCBs. The transformers appeared to be in good condition with no oil staining observed on or around the transformers.

5.10 ADJACENT AND SURROUNDING PROPERTIES

Residential buildings and industrial properties surround the Property. It is bounded by I-490 to the north with residences beyond. Residences and West 11th Street are located west of the Property. Vacant disturbed land and Clark Avenue are located to the south. Large gravel or asphalt piles and several monitoring wells were located across the vacant site. Air Products, Cleveland Vehicle Detention Center, the City Kennel, and packaging warehouses are located east of the Property. The Air Products site contained several large capacity ASTs and cooling towers. The vehicle detention center is an automobile scrapyard. Adjacent properties are shown on **Figure 2**.

Information obtained regarding the environmental history of the Property is presented in this section. This information includes:

- A review of existing documents related to previous environmental assessments or studies, property assessments, or geologic studies for the Property,
- A review of federal and state databases and records as they relate to the environmental conditions on the Property and surrounding properties and the environmental compliance history of the Property, and
- A review of local records as they relate to the potential release of hazardous substances on, underlying, or emanating from the Property.

The purpose of the records review was to assess the potential presence of hazardous substance contamination on or adjacent to the Property as a result of activities conducted within the study area defined in the Scope of Services section of this report. Information was obtained from sources by database search, direct contact, telephone, or written requests. Information sources included records and database listings maintained by the following agencies:

- USEPA,
- OEPA,
- ODNR,
- BUSTR,
- LEPC,
- Cleveland FPB,
- City of Cleveland Health Department, and
- City of Cleveland Department of Law.

State and federal database listings were searched by EDR. The EDR Database Report is presented in **Appendix D**. Federal, state and local agency FOIA requests are included in **Appendix E**. Results of the records review are summarized in the following subsections. Relevant information obtained from interviews with key Property personnel has also been incorporated.

6.1 FEDERAL AGENCY RECORDS

The subsections below summarize the findings of the EDR search of federal databases.

6.1.1 National Priorities List

The National Priorities List (NPL) is a national listing of hazardous sites that represent a significant threat to public health or the environment and are priorities for remedial action. Neither the Property nor any other sites within a 1 mile radius of the Property were listed in the NPL, Proposed NPL, NPL liens, or Delisted NPL database.

6.1.2 Comprehensive Environmental Response, Compensation and Liability Information System

The Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) contains data on potentially hazardous waste sites that have been reported to the USEPA. CERCLIS contains sites that are proposed NPL sites, NPL sites, or sites that are in the screening and assessment phase for possible inclusion on the NPL. The Property was not listed in the CERCLIS database. One site within a ½ mile radius was listed in the CERCLIS database. The site was greater than ¼ mile and downgradient from the Property; therefore, it is unlikely the operations from this site have adversely impacted the Property.

The CERCLIS No Further Remedial Action Planned (NFRAP) database inventories sites that were removed and archived from the CERCLIS site list. Archived status indicates that assessment was completed, and EPA determined that no further steps would be taken to include the site on the NPL list.

The Property was not listed in in the CERCLIS-NFRAP database. Five sites within a ½ mile radius were listed in the CERCLIS-NFRAP database.

- *Air Products & Chemicals Inc., 2820 Quigley Road* – This facility is located adjacent to the northeastern boundary of the Property. The facility is also listed in the DERR database as completing a site assessment in 1984. The facility received archived status in August 1984. The facility is also listed as a RCRA-Conditionally Exempt Small Quantity Generators (CESQG) with no violations. A violation regarding potentially uncontrolled emissions (<100 tons per year) was reported. The facility appears to be in compliance and achieved attainment. Multiple spills have occurred on the Property including a lube oil spill in 1996, a chlorine spill in 1997, a turbine oil spill in 1997, and a diesel fuel spill in 2003. No additional information regarding the spills was included in the EDR report. Based on the proximity of the facility to the Property, it is possible operations may have adversely impacted the Property.

The remaining sites are located downgradient and greater than ¼ mile from the Property. Based on distance and downgradient location, it is unlikely the operations from these sites have adversely impacted the Property.

6.1.3 Resource Conservation and Recovery Act Databases

According to RCRA, the USEPA maintains records of all RCRA generator facilities of hazardous waste. These include RCRA-Large Quantity Generators (LQG), RCRA-Small Quantity Generators (SQG) and RCRA-CESQG.

The Property is not identified in the RCRA database. Sixteen current and former RCRA Generator sites are identified within ½ mile of the Property.

- *Aircraft Plating Corp., 1106 Clark Avenue* – This facility is located less than ⅛ mile and upgradient of the Property. Wastes generated from the facility include spent cyanide plating

bath solutions from electroplating operations. The site is listed as a LQG with multiple violations. Violations include written informal notices for general facility standards, container use and management, contingency plan and emergency procedures, and pre-transport. According to the EDR report, all violations have achieved compliance. Based on the regulatory status of this site, it is unlikely the operations have adversely impacted the Property.

- *Air Products & Chemicals Inc., 2820 Quigley Road* – This facility is located adjacent and downgradient of the Property. The site is listed as a CESQG with no violations. See section **6.1.2** for information regarding this facility.

The remaining sites are located downgradient or crossgradient or greater than ¼ mile from the Property with no violations. Based on regulatory status and distance or downgradient location, it is unlikely the operations from these sites have adversely impacted the Property.

Five RCRA non-generators were identified within ¼ mile of the Property. Four of the facilities are adjacent and downgradient of the Property. The four facilities do not currently generate hazardous waste and do not have any reported violations. The remaining facility is located over ⅛ mile and downgradient of the Property. It is unlikely the operations from these sites have adversely impacted the Property.

The RCRA Corrective Actions (CORRACTS) database identifies hazardous waste handlers with RCRA corrective action activity. The Property is not identified in the RCRA CORRACTS database. Twelve sites are identified within 1 mile of the Property. All 12 sites are greater than ¼ mile and downgradient or crossgradient of the Property. Based on the distance and downgradient locations, it is unlikely these sites have adversely impacted the Property.

EPA maintains a database of facilities that recycle, treat, store, or dispose of hazardous waste. The Property was not listed in in the RCRA TSD database. One site was listed in the RCRA TSD database within a ½ mile radius. The site is located downgradient of the Property; therefore, it is unlikely the operations from this site have adversely impacted the Property.

6.1.4 Institutional and Engineering Controls

The USEPA maintains records of sites with institutional controls (US INST) or engineering controls (US ENG) in place to eliminate pathways and minimize potential exposures to contaminants that may remain on certain sites. The Property is not identified in the US INST or US ENG databases. No US INST or US ENG sites were identified within a ½ mile of the Property.

6.1.5 Emergency Response Notification System

The Emergency Response Notification System (ERNS) is a national database of reported spills or releases of oils or hazardous substances. The list includes data collected from the Coast Guard, the USEPA, and the National Response Center. The data are recorded by zip code. The Property was not listed in the ERNS database.

Sixteen sites were listed in the ERNS database within a ½ mile radius. Three sites were located upgradient or adjacent to the Property.

- *Air Products & Chemicals Inc., 2820 Quigley Road* – This facility is located adjacent and downgradient of the Property. The site is listed as a CESQG with no violations. See section **6.1.2** for information regarding this facility.

- *Zion United Church, 2716 West 14th Street* – This facility is located within ¼ mile and upgradient of the Property. The site is listed in the database due to a caller from the site reporting that smoke emissions from a local steel mill is deteriorating their building structure.

- *Multiple Site Names, 900 Clark Avenue* – This facility is located south adjacent and upgradient of the Property. It is listed in the EDR report as the Stoneco Inc. Asphalt Plant and Horvitz Co. It is currently owned by Jerome T. Osborne, owner of Osborne Companies Inc., an asphalt provider. The site contains large asphalt or gravel piles and several monitoring wells are located onsite. In 1994, a caller stated diesel fuel was traveling offsite. Based on the distance and upgradient location, it is possible operations from this site may have adversely impacted the Property.

6.1.6 US Brownfields

The Property is not listed in the US Brownfields database. One US Brownfields site was located within ½ mile of the Property. The site is crossgradient from the Property and is listed as the Ukrainian Museum. It is listed as having a Phase I Environmental Assessment completed. No other information was reported. Based on the distance and crossgradient location, it is unlikely operations from this site have adversely impacted the Property.

6.2 STATE AGENCY RECORDS

The subsections below summarize the findings of the EDR search of state databases.

6.2.1 DERR Database

The Ohio EPA maintains the DERR database of sites with known or suspected contamination. The listings on these databases do not necessarily indicate contamination has been identified at the sites.

The Property is not identified in the DERR database. Eighteen sites within 1 mile of the Property are identified in the DERR database.

- *Air Products & Chemicals Inc., 2820 Quigley Road* – See section **6.1.2** for information regarding this facility.

The remaining sites are located greater than ⅛ mile or downgradient of the Property. It is unlikely operations from these facilities have adversely impacted the Property.

6.2.2 Solid Waste Landfill List

Neither the Property nor any other sites within a ½-mile radius of the Property were identified on the solid waste landfill (SWL) list

6.2.3 Leaking Underground Storage Tanks

The Leaking Underground Storage Tanks (LUST) Incident Reports contain an inventory of reported LUST incidents. The causes of the incidents are tank test failures, tank failures, or tank overfills. The Property is not identified in the LUST database. There are five LUST sites identified within ½ mile of the Property.

- *Air Products & Chemicals Inc., 2820 Quigley Road* – This facility is located adjacent and downgradient of the Property. The facility is listed in the LUST database for the closure of a 500-gallon used oil UST in 1994. The facility received No Further Action (NFA) status in 2000. The facility currently has one double-walled, 10,000-gallon diesel UST in use. The UST was installed in 1989. See section **6.1.2** for more information regarding this facility.

The remaining four LUST sites are located over ¼ mile or downgradient of the Property. Therefore, it is unlikely these LUST incidents have adversely impacted the Property.

6.2.4 Underground Storage Tanks

Underground Storage Tanks (USTs) are regulated under Subtitle I of RCRA and must be registered with the state department responsible for administering the UST program. The Property is not listed in the UST database. Seven UST sites are identified within ½ mile of the Property.

- *Air Products & Chemicals Inc., 2820 Quigley Road* – See sections **6.1.2** and **6.2.3** for information regarding this facility.

- *Gas City, 3074 West 14th Street* – This facility is located within ¼ mile and upgradient of the Property. The facility is listed in the UST database for three fiberglass USTs currently in use. The USTs were installed in 1982. The site is also listed as a historical auto station since 1961. The site does not appear to have any reported violations or spills. Based the distance and lack of environmental history, it is unlikely this site has adversely impacted the Property.

- *Clark Avenue Co., 1303 Clark Avenue* – This facility is located within ¼ mile and upgradient of the Property. The facility is listed in the UST database for three fiberglass USTs currently in use. The USTs were installed in 1989. The site is also listed as a historical auto station since 2000. The site does not appear to have any reported violations or spills. Based the distance and lack of environmental history, it is unlikely this site has adversely impacted the Property.

- *3100 West 14th Cleveland LLC., 3100 West 14th Street* – This facility is located within ¼ mile and upgradient of the Property. The facility is listed in the UST database for three fiberglass USTs currently in use. The USTs were installed in 1982. The site is also listed as a historical auto station since 1970. The site is also listed as a CESQG with no reported violations. Based the distance and regulatory status, it is unlikely this site has adversely impacted the Property.

The remaining UST sites are located over ¼ mile or downgradient of the Property. Therefore, it is unlikely these LUST incidents have adversely impacted the Property.

6.2.5 State Voluntary Cleanup Sites

The Voluntary Cleanup Program (VCP) database includes sites that the VCP provides administrative, technical, and legal incentives to encourage the cleanup of contaminated sites. This program is implemented and administered by the state regulatory agency. One state VCP property was located within a ½ mile of the Property. The site is located over ¼ mile and downgradient of the Property. Therefore, it is unlikely this site have adversely impacted the Property.

6.2.6 State Brownfields

The Brownfield Inventory (BROWNFIELDS) database provides a list of sites that are being cleaned using EPA monies. There were no state Brownfield sites located within ½-mile radius of the Property.

6.2.7 State Institutional and Engineering Controls

Neither the Property nor any other sites within ½ mile of the Property are identified in the State Institutional Controls database.

6.2.8 Ohio Spills

The Property was not listed in the SPILLS database. Thirteen SPILLS sites were located within ¼ mile from the Property.

- *Air Products & Chemicals Inc., 2820 Quigley Road* – See sections **6.1.2** and **6.2.3** for information regarding this facility.

The remaining SPILLS sites were located downgradient of the Property or were insignificant to the Property. Therefore, it is unlikely these SPILL incidents have adversely impacted the Property.

6.2.9 BUSTR Information Request

URS conducted an online search for the presence of USTs on the Ohio Tank Tracking & Environmental Regulations (OTTER) website on May 31, 2013. No records were found pertaining to the Property.

6.2.10 OEPA File Review

URS submitted a FOIA request to the OEPA-Northeast Ohio District Office on May 31, 2013. According to Ms. Nicole Patella, no records were located for the Property. A copy of the request and response is provided in **Appendix E**.

6.2.11 Ohio Department of Natural Resources

URS conducted an online search for the presence of water wells and oil and gas wells on the ODNR's website on May 31, 2013. No records were available for monitoring wells located within ½ mile of the Property. Four plugged gas or oil wells were located ½ mile of the Property.

6.3 OTHER DATABASES

Other databases searched by EDR include non-ASTM databases, various records maintained by federal, state and local agencies or EDR proprietary databases (e.g., historical auto stations and historical cleaners).

The Property was not identified in any supplemental databases. One historical dry cleaner and five historical auto stations were identified within ⅛ mile of the Property.

The sites listed in the database were evaluated by URS and determined not to have a significant adverse impact on the Property.

6.4 ORPHAN SUMMARY

Facilities with poor or inadequate address information are listed in the Orphan Summary database. A total of 19 facilities were returned in the Orphan Summary database. URS verified the location of the orphan facilities. All of the sites have either already been discussed within this section, located outside the VAP search distances, or not likely to adversely impact the Property.

6.5 LOCAL RECORDS

Freedom of Information Act (FOIA) requests were submitted to local authorities during the performance of the environmental assessment. The following subsections summarize the information obtained.

6.5.1 Cleveland Fire Prevention Bureau

URS submitted a fax on June 4, 2013, to the Cleveland Fire Prevention Bureau (FPB). According to Ms. Pam Penchoen of the FPB, no documents could be located for the Property. A copy of the request is included in **Appendix E**.

6.5.2 Cuyahoga County Local Emergency Planning Committee

URS submitted an electronic FOIA request to the Cuyahoga County LEPC via their website on May 31, 2013. No response has been received. If a response is obtained and information is provided that alters the conclusions of this report, an addendum will be prepared. A copy of the request is included in **Appendix E**.

6.5.3 Cleveland Health Department

URS submitted a FOIA request to Ms. Rita Wilson of the Cleveland Health Department via email on May 31, 2013. No response has been received. If a response is obtained and information is provided that alters the conclusions of this report, an addendum will be prepared. A copy of the request is included in **Appendix E**.

6.5.4 Cleveland Department of Law

URS submitted a FOIA request to Ms. Kimberly Roberson of the Cleveland Department of Law via email on May 31, 2013. No response has been received. If a response is obtained and information is provided that alters the conclusions of this report, an addendum will be prepared. A copy of the request is included in **Appendix E**.

6.5.5 Cleveland Building Department

URS submitted a FOIA request to Ms. Toni Allen of the Cleveland Building Department via email on May 31, 2013. No response has been received. If a response is obtained and information is provided that alters the conclusions of this report, an addendum will be prepared. A copy of the request is included in **Appendix E**.

6.6 ENVIRONMENTAL HISTORY SUMMARY

The Property was not listed in any of the databases included in the regulatory database report. Multiple facilities in close proximity to the Property were identified in the environmental database review. Two facilities mentioned below may have impacted the Property.

A former asphalt plant located at 900 Clark Avenue is adjacent and upgradient of the Property. It is listed in the EDR report as the Stoneco Inc. Asphalt Plant and Horvitz Co. It is currently owned by Jerome T. Osborne, owner of Osborne Companies Inc., an asphalt provider. The site contains large asphalt or gravel piles and several monitoring wells were observed on the site. In

1994, a caller stated diesel fuel was traveling offsite. Based on the distance and upgradient location, it is possible operations from this site may have adversely impacted the Property.

Air Products & Chemicals Inc. located at 2820 Quigley Road is located east adjacent and downgradient of the Property. The facility is listed in the DERR database as completing a site assessment and receiving archived status in 1984. Multiple spills have occurred on the Property including a lube oil spill in 1996, a chlorine spill in 1997, a turbine oil spill in 1997, and a diesel fuel spill in 2003. No additional information regarding the spills was included in the EDR report. Based on the proximity of the facility to the Property, it is possible operations may have adversely impacted the Property.

Information obtained during the historic research, regulatory records review and Property reconnaissance regarding historic and current Property use is summarized in the following subsections. The IAs established during the course of the VAP Phase I Property Assessment are summarized as well.

7.1 SUMMARY OF LAND USE

The Property is located in the Tremont neighborhood in the City of Cleveland and is currently in use as a recreational area known as the "Clark Fields". The Property was developed as harness racing track from at least 1903 until at least the 1930s when it was developed with a baseball field. The Property has been developed with five baseball diamonds, a running track, and a parking lot since at least 1962.

The surrounding area has been developed for residential and commercial use for over 100 years. Current land use surrounding the Property is residential, commercial, and industrial, as summarized below.

West: Residential with West 14th Street and Interstate 71 beyond

South: Vacant disturbed land and Clark Avenue beyond

East: Air Products Air Separation Plant (2820 Quigley Road), packaging warehouses (3000 Quigley Road), Cleveland Vehicle Detention Center (3040 Quigley Road), and railroad beyond

North: Interstate 490 and residential and commercial beyond.

7.2 SUMMARY OF CURRENT CONDITIONS

Five baseball diamonds are located throughout the Property. A running track is located along the western Property boundary, a playground and a dog park are located centrally, and a parking lot is located along the eastern Property boundary. Dense vegetation is located along the northern, northwestern, and southwestern Property boundaries. The remaining areas are largely mowed grass areas. No structures are present on the Property. An unnamed road follows the southern Property boundary.

7.3 SUMMARY OF ENVIRONMENTAL DATA REVIEW

The Property was not listed in any of the databases included in the regulatory database report. A 1938 Cleveland Plain Dealer article stated the Property was a hazard due to the northern portion of the Property being inundated with 10 feet of water likely caused by a natural spring, heavy run-off, and a clogged storm sewer.

Multiple facilities in close proximity to the Property were identified in the environmental database review. Two facilities mentioned below may have impacted the Property.

A former asphalt plant located at 900 Clark Avenue is located south adjacent and upgradient of the Property. It is listed in the EDR report as the Stoneco Inc. Asphalt Plant and Horvitz Co. It is currently owned by Jerome T. Osborne, owner of Osborne Companies Inc., an asphalt provider. The site contains large asphalt or gravel piles and several monitoring wells are located onsite. In 1994, a caller stated diesel fuel was traveling offsite. Based on the distance and upgradient location, it is possible operations from this site may have adversely impacted the Property.

Air Products & Chemicals Inc. located at 2820 Quigley Road is located east adjacent and downgradient of the Property. The facility is listed in the DERR database as completing a site assessment and receiving archived status in 1984. Multiple spills have occurred on the Property including a lube oil spill in 1996, a chlorine spill in 1997, a turbine oil spill in 1997, and a diesel fuel spill in 2003. No additional information regarding the spills was included in the EDR report. Based on the proximity of the facility to the Property, it is possible operations may have adversely impacted the Property.

7.4 IDENTIFIED AREAS

Based on the findings of the Phase I, a release of hazardous substances and/or petroleum may have occurred at the Property from historical uses surrounding the Property. Specific release information such as dates and quantities are unknown. The IA is summarized on **Table 1** and shown on **Figure 3** and includes the following:

- IA-1 – Southern Property Boundary and
- IA-2 – Northeastern Property Boundary.

In order to characterize the impact of historical operations at the Property, a Phase II Property Assessment would be necessary.

7.5 VERIFICATION OF ELIGIBILITY

Based on information obtained during the Phase I Property Assessment and a review of OAC 3745-300-02, the Property is eligible for entry into the Ohio VAP.

The Property is not subject to any other Federal or State permit obligations, enforcement actions, or any RCRA closure obligations. Further evaluation of eligibility will be conducted prior to entry into the VAP.

URS has performed services for this project in accordance with our Agreement with the City of Cleveland. In addition, our scope for the Phase I is limited by the rules specified under the Ohio VAP for Phase I Property Assessments (OAC 3745-300-006); no guarantees are either expressed or implied. The scope of this investigation was limited to visual observation of the Property, interviews with facility and public agency personnel, and a review of facility and readily available database records. No sampling or laboratory analysis was undertaken as part of this investigation. This approach reflects current professional practice.

The records search was limited to information that was reasonably ascertainable from public sources; this information is continually changing and is frequently incomplete. Unless we have knowledge to the contrary, information obtained from interviews or provided to us by EDR has been assumed to be correct and complete. We do not assume any liability for misrepresentation of information or for items not visible, accessible, or present during the property inspections.

URS provided our services in a reasonable and prudent manner in accordance with the customary standards of care and diligence practiced by firms that conduct services of a similar nature. As with any review, this review will be a "snap-shot" of the operations during a limited period of time. All possible operating scenarios may not be observed during the limited time frame the project team is on the Property. Information obtained from sources will be assumed to be correct and complete. URS does not assume any liability for findings or lack of findings based on misrepresentation of information presented to the audit team or for items not identifiable, made available, or accessible during the property inspections.

No investigation is thorough enough to preclude the presence of materials on the Property that presently, or in the future, may be considered hazardous. Because regulatory evaluation criteria are constantly changing, concentrations of contaminants present and considered to be acceptable may, in the future, become subject to different regulatory standards and require remediation.

Opinions and judgments expressed herein, which are based on our understanding and interpretation of current regulatory standards, should not be construed as legal opinions. Unless property conditions change, this document and the information contained herein are valid for a period of 180 days according to the Ohio VAP. This document has been prepared solely for the use by the City of Cleveland. No other third party has the right to rely on URS opinions rendered in connection with services or in this document without URS' written consent and the third party's agreement to be bound to the same conditions and limitations as the client. Services for this project were performed in accordance with the Agreement between the City of Cleveland and URS Corporation. No warranty or guarantee of property conditions is intended or implied.

9.1 CORPORATE

URS was founded in 1905 and, with over 150 offices worldwide, provides professional services in engineering and sciences applied to the earth and its environment. One of the main areas of practice is Environmental Services, which involve the application of science and engineering to contamination assessment and cleanup; the management, minimization, treatment, and disposal of hazardous, solid and industrial waste; and regulatory compliance. Phase I Assessments are a part of this practice area and have been conducted by URS worldwide.

9.2 INDIVIDUAL

Current property inspections were conducted by Ms. Brenda Pratt, Mr. Michael McKim, and Ms. Michelle Wolff. The principal author of this report was Ms. Pratt, Environmental Scientist. Mr. Michael J. McKim reviewed the report and is in good standing as an Ohio VAP Certified Professional (CP No. 249). The qualifications for each member meet the URS corporate requirements for performing environmental site assessments.

TABLES

TABLE 1
IDENTIFIED AREAS
TREMONT FIELDS PROPERTY - CLEVELAND, OHIO

Number	Name	Description	Potential Chemicals of Concern
IA-1	Southern Property Boundary	• Asphalt piles and several monitoring wells are located upgradient at the south adjacent site. The site was a former asphalt plant and has unknown historical uses. The likelihood of surface water runoff entering the southern Property boundary resulting in soil contamination is possible. The presence of monitoring wells at the site may indicate groundwater contamination.	• VOCs • PAHs • Priority Pollutant Metals
IA-2	Northeastern Property Boundary	• Spills from the Air Products facility located near the northeastern boundary of the Property may have impacted the Property.	• BTEX • PAHs • Chlorine

NOTES
VOCs = Volatile Organic Compounds
BTEX = Benzene, Toluene, Ethylbenzene, and Xylenes
PAHs = Polycyclic Aromatic Hydrocarbons

HISTORICAL CHAIN OF TITLE REPORT

CLARK FIELDS (TREMONT PARK)
WEST 11TH STREET
CLEVELAND, OHIO

Submitted to:

URS
1375 Euclid Avenue
Cleveland, Ohio 44115

Attention: Brenda Pratt

Project No. N13-01174

Tuesday, June 11, 2013

NETR - Real Estate Research & Information hereby submits the following ASTM historical chain-of-title to the land described below, subject to the leases/miscellaneous shown in Section 2. Title to the estate or interest covered by this report appears to be vested in:

CITY OF CLEVELAND, OHIO, A MUNICIPAL CORPORATION

The following is the current property legal description:

All that certain piece or parcel of land being 41.53 acres, more or less, situated and lying in the City of Cleveland, Cuyahoga County, State of Ohio

Assessor's Parcel Number(s): 008-29-002

1. HISTORICAL CHAIN OF TITLE

1. The current owner of the subject property is the City of Cleveland, Ohio, a municipal corporation. Based on our research, it appears the City of Cleveland has owned the property in it's entirety since at least 1940.

2. LEASES AND MISCELLANEOUS

1. A search of encumbrances was not part of the scope of work for this report.

LIMITATION

This report was prepared for the use of URS, exclusively. This report is neither a guarantee of title, a commitment to insure, or a policy of title insurance. NETR- Real Estate Research & Information does not guarantee nor include any warranty of any kind whether expressed or implied, about the validity of all information included in this report since this information is retrieved as it is recorded from the various agencies that make it available. The total liability is limited to the fee paid for this report.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1930 through 2012. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 1320 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

FOLLOWS FATHER'S 3D PARTY PRECEPT

Gov. La Follette Starts Ball Rolling in Midwest

MADISON, Wis., April 23.—(AP)—Gov. Philip F. La Follette's move to start the ball rolling in the midwest for a national third party resembles in technique the formation of the Progressive party of Wisconsin, which he has twice led to victory in state elections.

There also is an analogy in the careers of himself and his father, the late Senator Robert M. La Follette, sr., who ran for president on an independent ticket in 1924.

While Gov. La Follette abruptly puts aside any suggestion he might be a presidential candidate in 1940, he has informed close associates that he took a lesson from his father's 1924 campaign. The lesson, he says, was that third party action should be undertaken on a national scale only with a firm foundation in the states.

The Progressive party was organized at Fond du Lac in 1934 when the La Follette following rallied after its defeat in the Republican primaries of 1932.

Instead of going back to the Republican party, the Progressives took the new party path. They have been handicapped legally by lack of a national status.

In much the same way that he brought about the Fond Du Lac meeting La Follette has called a conference of several thousand persons from Wisconsin and other states for next Thursday night in Madison with the apparent intention of expanding the new party movement.

Before taking this step he enlisted support from sympathetic groups in Iowa, Illinois, Minnesota and some eastern states. There has, however, been one noticeable difference in the procedure.

In 1934, with the support of his brother, Senator Robert M. La Follette, jr., the governor called openly for new party organization and even went to court to have the organization classed as a legal party.

He has been more mysterious about the current campaign, both as to what he is doing on a national scale and where he fits into the Wisconsin political picture. If he is to run for re-election, as his closest friends believe he will, the announcement may be made at next Thursday's conference.

Radio Series

La Follette sounded out Progressive sentiment in 1934 before the Wisconsin party was organized and he has been doing the same thing for the last three months on extending the third party nationally.

He led up to the final discussion of his plans with a series of four radio broadcasts this week. Authentic sources disclose that the series had been planned weeks ago. Only one of his four talks related to state issues and that dealt with government reorganization, power for which was granted to him by the Progressive Legislature of 1937, but denied to President Roosevelt by Congress.

The other three speeches were concerned with economic problems and involved a direct attack upon the policies of the Roosevelt administration.

15 Rated Perfect in Music Memory

Fifteen of the 276 women who competed in the eighteenth annual music memory and appreciation contest of the Cleveland Orchestra Friday at Severance Hall have won gold medals for perfect papers in the contest, it was announced yesterday.

Previously the women competed by teams, as do pupils, but this year they entered individually.

The gold medals, donated by the Higbee Co., go to:

Mrs. L. H. Clark, Shaker Heights P-T A. Council.
Mrs. Edward G. Walker, Mrs. H. L. Mayer, Mrs. Walter Stephan, Miss Mamie E. Mueller and Miss Alma Eichenbaum, College Club.
Mrs. Robert W. Chamberlain, Lakewood College Club.
Miss Anna Fewsmith, Women's City Club.
Mrs. Frank Roby, Mrs. Tel Berna's special team.
Mrs. Frank W. Friedrich, Mrs. May E. Trexler and Mrs. Floyd Graham, Bay Village Women's Club.
Mrs. Frank B. Meade, Mrs. Ransom G. Miller, jr., and Mrs. E. C. Uphoff, women's committee for the Cleveland Orchestra.

Oversized Pool Is New Flats Menace

'LAKE' IS WORRY TO MOTHERS IN FLATS

Inundated Ball Diamond Presents New Hazard

"I've reared eight children in this very house and always worried about their falling down the hill, and how I have to worry about their getting drowned."

That was the comment made yesterday by a mother who lives on St. Olga Street S. W., overlooking the large "lake" which has been formed in the valley at the foot of the street.

Extending 2,000 feet in an easterly-westerly direction and 750 feet towards the other two main points of the compass, this "lake" has been named Clarence Lake by the children of the neighborhood.

The name comes from the fact that a baseball field now submerged under the invading water was known as Clarence Field because it adjoined Clarence Court S. W., which lies at the foot of the steep hill reaching from St. Olga Avenue to W. 10th Street.

Under Ten Feet of Water

Home plate of the ball diamond is on the north shore of the lake, while the regions of left field are under more than ten feet of water, as proved by several boys in a small, home-made canoe.

This particular section of the valley, said by old residents to be the site of the former Valley race track, famous for its harness racing around 1900, is naturally swampy in parts and always has been a source of mosquitoes in the summer.

But this year the water seeping out of a natural spring on the side of the hill and augmented by heavy runoffs of water from the hill leading up to Starkweather Avenue S. W. and the fact that a storm sewer became clogged early this spring have made a large pool of stagnant water which is a menace not only to children but also to the health of the surrounding area.

Sinks on Maiden Trip

Several weeks ago Martin Gruntkowski, 12, of 2835 W. 11th Street, and several of his chums decided to make a rowboat for use on the lake. Yesterday they made their maiden trip, which ended by the boat sinking through the reeds and mud which coat the surface.

"I guess we aren't good carpenters as we thought we were," Martin said as he and two of his friends slipped and slithered to shore, wet and dirty.

"Imagine what it will be around here when the weather gets hot and the mosquitoes and flies begin to multiply," one of the home owners said.

Samuel Newman, commissioner of parks, questioned about the ball diamond, said the city had erected the backstop for the children, but did so only with the permission of the owner. He said he did not recall the name of the owner and would not be able to determine what it was until tomorrow.

The larger picture shows "Lake Clarence" as it appears at the foot of the hill leading to Starkweather Avenue S. W. between St. Olga Street S. W. and W. 10th Street. The smaller picture shows the condition of the water and the debris which lines its shores, making it a menace not only to the children of the area but also to the health of the neighborhood.

Garfield to Pioneer With Barn Theater

The first barn theater west of the Appalachians will open shortly in Garfield Heights. The glamour of the old melodramatic theater of the nineteenth century, when "After Dark, or Neither Maid, Wife Nor Widow" vied with "Hamlet" for the applause of a less sophisticated public, will breathe again from an old barn at 12806 Granger Road, Garfield Heights.

Louis Miller is director of the Garfield Players, dramatic group which is organizing the barn theater. Miller, at 26, is a veteran of eight years on the professional stage and knows his barn theaters from direct experience in the east.

"In the old days, when the theater was in flower, there weren't enough theaters to accommodate all the troupes that toured the country," he explained yesterday. "Often traveling companies had to play in barns; thence the term 'barnstorming,' and thence the barn theater."

"Today, the most famous barn theaters are the theater in Gloucester, Mass., the Rock Ridge Theater in New York, and the Red Barn Theater on Long Island. Ours will rank with them before we're through."

The barn which is to become the theater is the property of Marco Divincenzo, a member of the Garfield Players. The group plans a house-to-house campaign through Garfield Heights and eventually all over the county, according to Miller, to raise funds to complete the project.

Unlike the barn theaters of other days, however, this one will present, not "ham" thrillers, but "first-string" plays of today. "Winterset" probably will open the season, early this summer.

Miller has been stage director for several Play House productions, was assistant stage director for the Cleveland Summer Opera and was formerly a director of the Federal Theater in Ohio.

T. B. TESTS IN SUBURBS

Fluoroscope Trailer to Visit Chagrin, Orange and Beechwood

The fluoroscope trailer of the Anti-Tuberculosis League will visit Chagrin Falls, Orange and Beechwood Villages Wednesday and Thursday to examine school children and their parents who have reacted positively to tuberculin tests.

Mrs. Virginia Geddes, the league's field nurse, announced that in Chagrin Falls parents will be examined Wednesday from 6:30 to 8 p. m. and pupils Thursday morning. The portable hospital will be stationed in the Chagrin Falls High School yard.

The trailer will be taken to Orange High School Thursday afternoon. Orange and Beechwood children will be fluoroscoped in the afternoon and parents in the evening. Mrs. Geddes said. The service is given by the league through cooperation of the County Board of Health and the American Legion.

TIME MOVES UP TODAY

Clevelanders Advised to Watch Radio Program Change

Clevelanders and all other Ohioans should remember that today is the day daylight saving time starts in New York and many other eastern cities and in Chicago.

This means radio programs originating in daylight time localities will be heard an hour earlier here. Transportation schedules, however, will remain about the same.

CALL MIDDLEBURY ALUMNI

Dr. Paul Dwight Moody, president of Middlebury College, Middlebury, Vt., will address northern Ohio alumni of the college at their annual reunion Wednesday evening at 6:30 in the Allerton Hotel. Motion pictures of college activities will be exhibited by Edgar J. Wiley, alumni secretary. James S. Jackson of Akron is chairman of the committee in charge.

Seek Robber With $1,500 Loan Loot

Police last night expressed the belief that the man who held up and robbed the Public Loan Co., 844 Union Trust Building, of $1,500 yesterday morning was the same robber who held up the Commonwealth Loan Co., 10012 Euclid Avenue, last Saturday and several other loan companies within the last few weeks.

Mitchell M. Crowell, 16810 Dartmouth Avenue, Lakewood, manager of the Public Loan Co., was unlocking the door to the company's suite shortly after 8 when the robber pushed a revolver against his back and forced Crowell into the office ahead of him.

Crowell was forced to open a safe from which the robber, who was described as about 30 years old, 6 feet 2 inches tall and weighing 200 pounds, took the $1,500. The robber left after binding Crowell's wrists and ankles with a clothes line. Fifteen minutes later Crowell was able to work his way to the door. He summoned a passerby who released him.

RAINEY IS DENIED BAIL

Convicted Patrolman Must Stay in Jail Pending Appeal

Bail was denied yesterday to Patrolman John J. Rainey pending his appeal from conviction for second-degree murder in the killing of John Mancuso, proprietor of a fruit stall in the Central Market.

Common Pleas Judge Joy Seth Hurd denied a motion for a new trial made by Rainey's counsel, former Councilman Alfred C. Jones. The motion was based principally on the argument that Judge Hurd had erred when he refused to admit evidence of individual acts of violence by Mancuso on which the defense attempted to base part of its self defense plea.

Jones also asked that Rainey be admitted to bail. Judge Hurd granted a stay of execution of the penitentiary sentence imposed upon Rainey but ruled that he must stay in County Jail pending his appeal.

DENIES WIDOW NEW TRIAL

SPRINGFIELD, O., April 23.—(AP)—Mrs. Grace Bayless, convicted of second-degree murder in the slaying of her husband last July 3, was denied a new trial today. She faces a mandatory sentence of life imprisonment.

SPENDING TO STIR FIGHT IN CONGRESS

Lawmakers Face Heavy Week; Message Monday

WASHINGTON, April 23.—Leaders today arranged a heavy program for Congress next week and set June 1 as an approximate adjournment date.

President Roosevelt intends to complete his legislative recommendations during the week and leave Washington Friday for a fishing trip. Messages are expected from the executive on monopoly and the removal of tax exemptions on salaries of public employes and on income from federal and state securities.

A bitter congressional fight brewed tonight over the New Deal's $4,512,000,000 lending-spending program. The battle will begin in earnest Monday and it will transcend party lines.

Barton Proposal

Charging "political favoritism and pressure" in the administration of relief, Representative Bruce Barton (R.) New York, announced that he would introduce an amendment to the Corrupt Practices Act Monday, fixing a penalty of $5,000 fine and three years imprisonment for any official distributing government funds to influence the political beliefs or acts of a recipient.

Barton said he was timing his amendment to coincide with the drive to push the president's lending-spending program through Congress. Barton's plan to place stringent restrictions on the handling of relief funds was regarded as particularly significant in view of the charges and counter-charges concerning relief administration in Pennsylvania.

The rebellion against granting Mr. Roosevelt a blank check for spending had spread into Democratic ranks. Representative Andrew May, Kentucky, chairman of the House military affairs committee, announced he would seek to earmark $120,834,760 of the recovery funds for the improvement of army posts. Representative John Taber (R.), New York, promised Republican support for proposals for earmarking funds.

Vandenberg to Fight

Preparing for aggressive action after winning the struggle for retention of the undistributed profits tax principle in the new revenue bill, Mr. Roosevelt will send a new tax message to Congress—probably on Monday.

During the struggle between Senate and House conferees over the undistributed profits tax issue, Mr. Roosevelt intervened directly in a letter to Chairman Pat Harrison of the Senate finance committee.

Senator Arthur H. Vandenberg (R.), Michigan, a potential candidate for the Republican presidential nomination, declared that the president's letter would "kill" the campaign issue over the revised tax bill.

"The letter subscribes unyielding fidelity, to the precise tax philosophy which the country has been so bitterly criticizing," Vandenberg said.

President Roosevelt was expected to put the finishing touches on his message over the week-end as he cruises down the Potomac. The chief executive believes that a constitutional amendment is not necessary for reciprocal taxation of government bonds and salaries.

Mr. Roosevelt also worked on the draft of his congressional message on monopolies, expected to go to Congress next week, which will deal principally with methods of strengthening the government's hands in anti-trust suits, according to well-informed sources.

Administration leaders hoped to send the tax revision measure to the White House next week, obtain Senate approval of the naval expansion bill and clean up a half-dozen odds-and-ends of legislation in the House.

BLIND WILL CELEBRATE

Annual Dance Is Tomorrow at Wade Park Manor

The thirteenth annual entertainment and dance for Cleveland's blind persons will be given by Wade Park Manor in cooperation with the Cleveland Society for the Blind tomorrow night.

CARMELA CAFARELLA

On the musical program will be the following artists: Giacomo Bernardi, baritone; Miss Ruth Marsh, pianist; Miss Carmela Cafarelli, harpist; Al Berardi, accordionist; Don Deshirst, baritone, and the "Shut-In" Gang, from Station WHK and WCLE.

Dancing will follow the entertainment, and dancing partners for the blind will be provided. Automobiles and drivers also will be provided for those who have no other means of getting to the hotel.

SCHOOL HEAD'S WIFE DEAD

UHRICHSVILLE, O., April 23.—

Funeral services will be held here Monday for Mrs. Eva Westhafer Galbraith, wife of Superintendent of Schools H. B. Galbraith. She died in a Columbus hospital, where she had been a patient for three weeks.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 02/04/2013 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
MASTER METALS INC	***2850 WEST THIRD STREET***	***E 1/4 - 1/2 (0.277 mi.)***	***Q78***	***84***

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 02/05/2013 has revealed that there are 5 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 02/12/2013 has revealed that there are 12 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 02/12/2013 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/12/2013 has revealed that there are 3 RCRA-LQG sites within approximately 0.5 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 02/12/2013 has revealed that there are 7 RCRA-SQG sites within approximately 0.5 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 02/12/2013 has revealed that there are 6 RCRA-CESQG sites within approximately 0.5 miles of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Commerce Division of State Fire Marshal's List of Reported Petroleum Underground Storage Tank Release Incidents.

A review of the LUST list, as provided by EDR, and dated 02/18/2013 has revealed that there are 5 LUST sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/12/2013 has revealed that there are 13 RCRA NonGen / NLR sites within approximately 0.5 miles of the target property.

AIRS: A listing of Title V Permits issued by the Division of Air Pollution Control. It is a federal operating permit program adopted and implemented by the state. The basic program elements typically specify that major sources will submit an operating application to the specified state environmental regulatory agency according to a schedule.

A review of the AIRS list, as provided by EDR, and dated 03/29/2013 has revealed that there is 1 AIRS site within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 44 EDR US Hist Auto Stat sites within approximately 0.5 miles of the target property.

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical

Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 28 EDR US Hist Cleaners sites within approximately 0.5 miles of the target property.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

3100 WEST 14TH CLEVELAND LLCC (FORMERLY (Continued) **1004765461**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

US EPA Risk Management Plan (RMP) database stores the risk management plans reported by companies that handle, manufacture, use, or store certain flammable or toxic substances, as required under section 112(r) of the Clean Air Act (CAA).

Environmental Interest/Information System

US EPA RACT/BACT/LAER Clearinghouse (RBLC) database contains case-specific information on the "Best Available" air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). RACT, or Reasonably Available Control Technology, is required on existing sources in areas that are not meeting national ambient air quality standards. BACT, or Best Available Control Technology, is required on major new or modified sources in clean areas. LAER, or Lowest Achievable Emission Rate, is required on major new or modified sources in non-attainment areas.

Used oil transporter: No

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

STEIN INC (Continued) **1004763973**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Alias Comments: Not reported
Site Description: The Master Metals Inc site is located on top of slag fill material that was reportedly deposited throughout the area during industrial development in the early 1900s. On site solid media exhibit significant lead contamination (up to 35,000 mg/kg) to a depth of 3-4 feet. Perimeter solid media proximate to the facility fence exhibit surficial lead concentrations from 1,000 mg/kg - 36,000 mg/kg.

Environmental Interest/Information System

US EPA Air Quality System (AQS) contains ambient air pollution data collected by EPA, State, Local, and Tribal air pollution control agencies from thousands of monitoring stations.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA’s programs. The vision for ICIS is to replace EPA’s independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also

MASTER METALS INC (Continued) **1000401006**

has the capability to track other activities occurring in the Region
that support Compliance and Enforcement programs. These include;
Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

US Geographic Names Information System (GNIS) is the official vehicle for geographic names used by the federal government and the source for applying geographic names to federal maps and other printed and electronic documents.

NCES (National Center for Education Statistics) is the primary federal entity for collecting and analyzing data related to education in the United States and other nations and the institute of education sciences.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is

TREMONT (Continued) **1000451155**

facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Hazardous Waste Summary:
Waste code: D000
Waste name: Not Defined

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

NORTHWAY ENVIRONMENTAL SERVICES (Continued) **1000410345**

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Corrective Action Summary:
Event date: 12/27/1991
Event: RFA Completed

Event date: 12/27/1991
Event: RFA Determination Of Need For An RFI, RFI is Necessary;

Event date: 12/31/1991
Event: CA Prioritization, Facility or area was assigned a high corrective action priority.

Event date: 03/27/1992
Event: Stabilization Measures Evaluation,This facility is not amenable to stabilization activity because of a lack of technical data. An evaluation has been completed, but further data is necessary to determine stabilization measures, feasibility or appropriateness. This status should be changed when data becomes available.

Event date: 11/24/1992
Event: CA Responsibility Referred To A Non-RCRA Federal Authority, Corrective Action at the facility or area referred to CERCLA.

Event date: 07/01/2006
Event: CA002IL

Event date: 08/31/2006

Hazardous Waste Summary:

Waste code:	D000
Waste name:	Not Defined

BUHRER ELEMENTARY SCHOOL (Continued) **1000451137**

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Violation Status: No violations found

Hazardous Waste Summary:
Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System
The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Used oil transfer facility:	No
Used oil transporter:	No

Hazardous Waste Summary:

Waste code:	D001

STONECO CLEVELAND PLANT (Continued) **1001969080**

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Waste code: D040
Waste name: TRICHLOROETHYLENE

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also

LUTZ PROPERTY MANAGEMENT LLC (Continued) **1014823692**

has the capability to track other activities occurring in the Region
that support Compliance and Enforcement programs. These include;
Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

GULF OIL CORP (Continued) **1000227153**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Description:	The Cleveland Plant is located on the east side of Cleveland, Ohio, at the corner of East 131st Street and Taft Avenue. The property being evaluated under the FUDS program is currently utilized as a carpet distribution warehouse and a parking lot. The War Department established the Cleveland Plant in March 1918. In April 1918, an ethylene generator was run for gas production. According to historical information, the plant was taken over by Great Lakes Refining Company. It was assumed that the site was leased by the DoD. Photos document the disposal of military waste materials at the site. Military munitions were produced or demilitarized at this location and therefore may present an explosive hazard.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility

CLEAN HARBORS ENVIRONMENTAL SERVICES INC (Continued) **1000294566**

Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D006
Waste name: CADMIUM

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Biennial Reports:

Last Biennial Reporting Year: 2013

Annual Waste Handled:
Waste code: D006
Waste name: CADMIUM
Amount (Lbs): 296320

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that

ZACLON, INC. (Continued) **1000179723**

discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

HAZARDOUS WASTE BIENNIAL REPORTER

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D018
Waste name: BENZENE

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: D001

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

GASOLINE AND DIESEL PRODUCERS

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

SHELL OIL CO MARKETING (Continued) **1000287878**

US Facility Response Plan (FRP) contains plans for responding, to the maximum extent practical, to worst case discharges of oil.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

LAIDLAW ENVIRONMENTAL SERVICES (Continued) **1000240439**

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Event date: 09/21/1989
Event: RFA Completed

Event date: 09/21/1989
Event: RFA Determination Of Need For An RFI, RFI is Necessary;

Event date: 12/08/1990
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 03/31/1994
Event: CA Prioritization, Facility or area was assigned a low corrective

LAIDLAW ENVIRONMENTAL SERVICES (Continued) **1000240439**

action priority.

Event date: 02/11/2010
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Hazardous Waste Summary:
Waste code: K062
Waste name: SPENT PICKLE LIQUOR GENERATED BY STEEL FINISHING OPERATIONS OF FACILITIES WITHIN THE IRON AND STEEL INDUSTRY (SIC CODES 331 AND 332).

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D009
Waste name: MERCURY

Waste code: D018
Waste name: BENZENE

Waste code: D035
Waste name: METHYL ETHYL KETONE

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Waste code: D040
Waste name: TRICHLOROETHYLENE

Waste code: U210
Waste name: ETHENE, TETRACHLORO-

Waste code: U226
Waste name: ETHANE, 1,1,1-TRICHLORO-

Corrective Action Summary:
Event date: 09/26/1989
Event: RFA Determination Of Need For An RFI, RFI is Necessary;

Event date: 09/26/1989
Event: RFA Completed

Event date: 08/09/1991
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 07/01/2006
Event: CA002IL

JONES & LAUGHLIN STEEL CLEVELAND WKS (Continued) **1000220130**

Event date: 08/28/2006
Event: CA003

Event date: 06/22/2009
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Event date: 06/22/2009
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

US EPA RACT/BACT/LAER Clearinghouse (RBLC) database contains case-specific information on the "Best Available" air pollution technologies that have been required to reduce the emission of air pollutants from stationary sources (e.g., power plants, steel mills, chemical plants, etc.). RACT, or Reasonably Available Control Technology, is required on existing sources in areas that are not meeting national ambient air quality standards. BACT, or Best Available Control Technology, is required on major new or modified sources in clean areas. LAER, or Lowest Achievable Emission Rate, is required on major new or modified sources in non-attainment areas.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance

JONES & LAUGHLIN STEEL CLEVELAND WKS (Continued) **1000220130**

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Event: RFI Workplan Received

Event date: 04/10/2007
Event: RFI Workplan Approved

Event date: 06/10/2009
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 06/10/2009
Event: Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

Corrective Action Summary:
Event date: 09/23/1992
Event: Stabilization Measures Evaluation,This facility is amenable to stabilization activity based on the status of corrective action work at the facility, technical factors, the degree of risk, timing considerations and administrative considerations.

Event date: 09/26/1992
Event: CA Prioritization, Facility or area was assigned a high corrective

GENERAL ENVIRONMENTAL MANAGEMENT LLC (Continued) **1000200201**

action priority.

Event date: 09/30/1993
Event: CA Prioritization, Facility or area was assigned a medium corrective action priority.

Event date: 10/10/2001
Event: Current Human Exposures under Control, Yes, Current Human Exposures Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

Event date: 02/24/2004
Event: CA Prioritization, Facility or area was assigned a high corrective action priority.

Event date: 07/01/2006
Event: CA002IL

Site Description: Research Oil Co Plt 1 was the original facility name. In April 2006 an explosion occurred at the same location and subsequent fire broke out. The name of this facility is the General Environmental Management (GEM), LLC facility located in an industrial area of the Cleveland "Flats". GEM is a hazardous and non-hazardous wastewater treatment and reclamation facility. Approximately 17,000 gallons of liquid waste was released due to the destruction of 5-6 storage tanks. The facility is an active facility under RCRA. Additional work will be done under that authority.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GENERAL ENVIRONMENTAL MANAGEMENT LLC (Continued) **1000200201**

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

HAZARDOUS WASTE BIENNIAL REPORTER

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

AIRS (AFS):

Airs Minor Details:

EPA plant ID:	110000387206
Plant name:	GENERAL ENVIRONMENTAL MANAGEMENT LLC
Plant address:	2655 TRANSPORT ROAD CLEVELAND, OH 44115
County:	CUYAHOGA
Region code:	05
Dunn & Bradst #:	786381830
Air quality cntrl region:	174
Sic code:	4953
Sic code desc:	REFUSE SYSTEMS
North Am. industrial classf:	562212
NAIC code description:	Solid Waste Landfill
Default compliance status:	IN VIOLATION - NOT MEETING SCHEDULE
Default classification:	POTENTIAL UNCONTROLLED EMISSIONS < 100 TONS/YEAR
Govt facility:	ALL OTHER FACILITIES NOT OWNED OR OPERATED BY A FEDERAL, STATE, OR LOCAL GOVERNMENT
Current HPV:	Not reported

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D004
Waste name: ARSENIC

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans

METALS APPLIED INC FACILITY (Continued) **1000149311**

to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

CRITERIA AND HAZARDOUS AIR POLLUTANT INVENTORY

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

BRANDON PARTNERS AKA NORTH EAST CHEM (Continued) **1000405787**

Classification: TSDF
Description: Handler is engaged in the treatment, storage or disposal of hazardous waste
Classification: Non-Generator
Description: Handler: Non-Generators do not presently generate hazardous waste

Owner/Operator Summary:
Owner/operator name: BRANDON PARTNERS
Owner/operator address: 5801 TRAIN AVE
CLEVELAND, OH 44102
Owner/operator country: Not reported
Owner/operator telephone: (216) 651-9090
Legal status: Private
Owner/Operator Type: Owner
Owner/Op start date: 01/01/0001
Owner/Op end date: Not reported

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Facility name: BRANDON PARTNERS AKA NORTH EAST CHEM
Site name: PURE TECH SOLVENT SERVICES INC
Classification: Large Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D004
Waste name: ARSENIC

Waste code: D005

Corrective Action Summary:
Event date: 03/01/1989
Event: RFA Completed

Event date: 12/08/1990
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Event date: 09/11/1991
Event: RFA Determination Of Need For An RFI, RFI is Necessary;

Event date: 03/31/1994
Event: CA Prioritization, Facility or area was assigned a low corrective action priority.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

The OH-CORE (Ohio - Core) database contains information commonly shared among the Ohio EPA environmental programs. The information is facility-based, general in nature, and used to support specific programmatic systems while simultaneously maintaining an inventory of common facility-related data. Specific programmatic details are maintained in programmatic databases.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 02/01/2013

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 02/01/2013

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/01/2013
Date Data Arrived at EDR: 03/01/2013

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/04/2013
Date Data Arrived at EDR: 03/01/2013

Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

HIST ENG CONTROLS: Operation & Maintenance Agreements Database

Volunteers that complete a voluntary action that relies on the ongoing operation and maintenance (O&M) of an engineered control to make the site protective (e.g" cap systems and ground water treatment systems) must enter into a legally binding agreement with the Ohio EPA before the director issues a covenant not to sue. This O&M Agreement must describe how the remedy is constructed and how itwill be monitored, maintained and repaired. It also lays out inspection opportunities for the agency. Companies must document that they have the financial capability to operate any remedy relied on, before the agency will agree to enter into the O&M Agreement. The statute requires that the agency be notified of any change in ownership. This database is no longer updated or maintained by the state agency.

Date of Government Version: 05/10/2005

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/04/2013

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

USD: Urban Setting Designation Sites
A USD may be requested for properties participating in the VAP when there is no current or future use of the ground water by local residents for drinking, showering, bathing or cooking. In these areas, an approved USD would lower the cost of cleanup and promote economic redevelopment while still protecting public health and safety. If these USDs were to be approved, the ground water cleanup or response requirements for the areas could be lessened. The Ohio EPA director may approve a USD request based on a demonstration that the USD requirements are met and an evaluation of existing and future uses of ground water in the area. The Ohio EPA director's decision on approval or denial of the request is needed before cleanup requirements for the site can be determined.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Child Day Care Facilities
Source: Department of Job & Family Services
Telephone: 614-466-6282

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Department of Natural Resources
Telephone: 614-265-1044

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

TREMONT FIELD PROPERTY
W. 11TH AVENUE
CLEVELAND, OH 44113

TARGET PROPERTY COORDINATES

Latitude (North):	41.4735 - 41° 28' 24.60''
Longitude (West):	81.6864 - 81° 41' 11.04''
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	442686.1
UTM Y (Meters):	4591337.0
Elevation:	580 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	41081-D6 CLEVELAND SOUTH, OH
Most Recent Revision:	1994

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

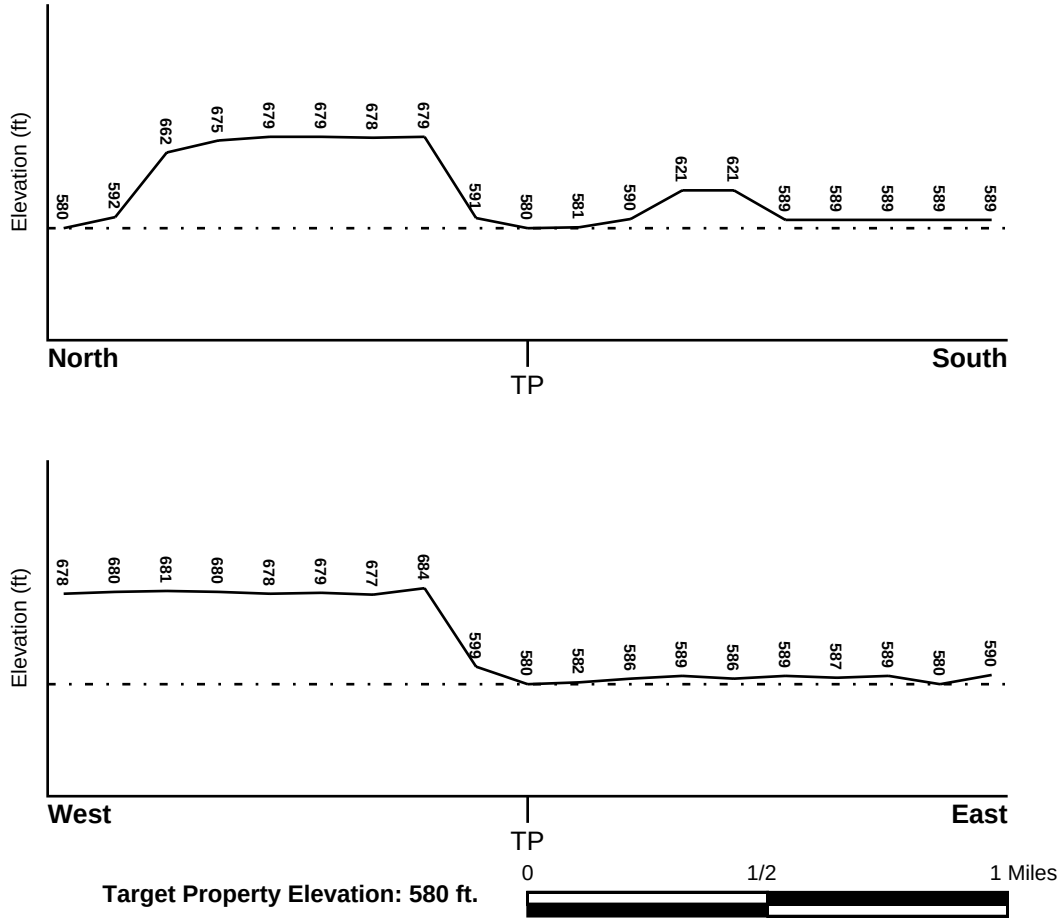
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
CUYAHOGA, OH	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 39035C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CLEVELAND SOUTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
71	1/2 - 1 Mile NNE	VARIES

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 53 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Udorthents

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 54 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Department of Natural Resources
Telephone: 614-265-1044

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Public Water System Data
Source: Ohio Environmental Protection Agency
Telephone: 614-644-2752
The database includes community, transient noncommunity and nontransient noncommunity water wells; and source treatment unit locations.

Water Well Database
Source: Department of Natural Resources
Telephone: 614-265-6740

OTHER STATE DATABASE INFORMATION

RADON

State Database: OH Radon
Source: Department of Health
Telephone: 614-644-2727
Radon Statistics for Zip Code Areas

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Facsimile:	216.664.6681	cc:	
Subject:	**File Review Request**		

Pam,

Pursuant to the Freedom of Information Act, I would like any information your respective department has regarding the following property. We are conducting a Phase I Property Assessment of this location and are trying to identify any historical records you may have for the property.

The property does not contain a formal address; therefore, I have attached a property location map.

Clark Fields (Tremont Park)
West 11th Street
Cleveland, Cuyahoga County, OH 44109
PPN: 008-29-002

Please contact me to schedule a time for the review at your convenience. Thank you in advance for your cooperation with this request.

Sincerely,

Brenda Pratt
