I would like E.P.A. to highly consider Alternative 4/B and offer public health testing/studies to see how acute it is and not assuming that the contamination hasn't affected health matters.

I believe testing (medical) needs to be done for those of us who are lifelong residents to see if we have acute lead/arsenic poisoning affecting our health.

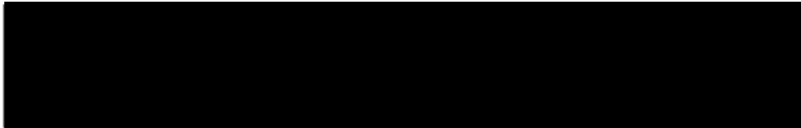

I'm the one who commented on having health symptoms/illnesses that reflect acute poisoning.

Anemia, Lizziness/Vertigo, Stomach/Gastro, diarrhea, Headaches, Lack of Sleep, Fatigue, Bronchitis, Tingling/Numbness of Limbs,

(I have them all!)
