

**U.S. EPA Region 6 Announces
Proposed Plan and Public Comment Period
Falcon Refining Superfund Site
August 2, 2017**

The U.S. Environmental Protection Agency Region 6 (EPA), in coordination with the Texas Commission on Environmental Quality (TCEQ) will hold a public meeting to inform residents of the proposed cleanup strategy and obtain comments on the EPA's Proposed Plan of the preferred remedy to address the groundwater contamination at the Falcon Superfund site in Aransas Pass, Texas.

EPA is issuing a Proposed Plan of "No Action" as the preferred remedial approach for the Site wide ground water at Operable Unit 1 of the Falcon Refinery Superfund Site. The "No Action" approach is warranted for the Site wide ground water due to the results of the Remedial Investigation (RI) and Alternatives Development Screening Memorandum (ADSM) which indicate that the Site wide ground water does not pose an unacceptable current risk or potential future risk to human health.

The public meeting will be held:

**August 17, 2017
6 pm to 8:30 pm**
Aransas Pass Civic Center
700 Wheeler Avenue
Aransas Pass, TX 78335

The public meeting is being held in a fully accessible facility. Should you have specific needs or questions about the facility, please contact Jason McKinney, Community Involvement Coordinator, at (214) 665-8132 or toll-free (800) 533-3508.

Public comments can be presented at the public meeting or can be submitted during the public comment period from **August 2, 2017, through September 1, 2017**. Written comments should be postmarked no later than **September 1, 2017**. All written comments should be addressed to:

Brian Mueller, Remedial Project Manager
U. S. EPA Region 6 (6SF-RL)
1445 Ross Ave., Suite 1200
Dallas, TX 75202-2733, or email to:
