I wish to formally place a comment into the record on the proposed Plan for OU2 and 6 of the Riverfront Superfund Site New Haven MO.

I would just like to state again that I do not feel that Whole House Filtration is an option, some is based on my recent problems.

I had one of the tops of the filter crack open on 8-22-10 and had water all over the back side of my basement floor, I by-passed the filters that night and let Parsons know it needed to be fixed. They could not get anyone out to my house the next day so I had my plumber remove the broken filter and bill Parsons so I had my water going through at least one filter.

I feel this is something I shouldn't have to take care of.

It has almost been two weeks and they still don't have the part to fix it.

It would seem to me that if this was a long term solution someone would have extra parts to be able to service the filters on a days notice.
