Re: West Lake Landfill Superfund Site, Operable Unit 2, Waste Separation Evaluation Report –  
Additional Field Investigation

Dear Mr. Rosasco:

The U.S. Environmental Protection Agency has reviewed the response to EPA comments on the West Lake Landfill, Operable Unit 2 (OU-2), Waste Separation Evaluation Report. The response to comments were submitted on September 28, 2020 by Geosyntec Consultants, on behalf of the Respondent, Bridgeton Landfill, LLC.

This document proposes additional field investigation activities to further evaluate the nature and extent of material present between the Inactive Sanitary Landfill portion of OU-2, and the Bridgeton Landfill. As stated in the document, the responses to EPA comments will be addressed in the revised Waste Separation Evaluation Report, which will be submitted within 30 days of completion of the additional field activities. EPA concurs with the additional proposed field activities and the locations of the two proposed borings.

If you have any questions or concerns, please contact me either by phone at (913) 551-7910 or by e-mail at [schwartz.jamie@epa.gov](mailto:schwartz.jamie@epa.gov).

Sincerely,

Jamie Schwartz  
Remedial Project Manager  
Site Remediation Branch  
Superfund and Emergency Management Division

cc: Mr. Ryan Seabaugh, MDNR
