Mr. Paul V. Rosasco
Project Coordinator
Engineering Management Support, Inc.
25923 Gateway Drive
Golden, Colorado 80401

Dear Mr. Rosasco:

On March 4, 2021, Parsons submitted to the U.S. Environmental Protection Agency a revised version of the Field Sampling Plan (FSP) Addendum 1, West Lake Landfill Superfund Site Operable Unit 1 (OU-1) on behalf of the Respondents. The EPA partially approved the original FSP Addendum 1 with modifications except for paragraph 7 of Section 1.4 and the figure titled "*Proposed Additional Borings in ISL and CD Areas*" on February 25, 2021. The EPA has completed a review of the revised addendum.

The EPA appreciates the Respondents' on-time submission of the revised addendum, especially considering the seven-day deadline the EPA imposed. The EPA believes the sampling proposed in this addendum to be a reasonable next step to further delineate the extent of radiologically impacted material (RIM) south of the previously estimated boundary of OU-1 Area 2.

Four of the EPA's required modifications were only partially incorporated or were not incorporated at all. These include modification numbers three, four, five, and seven, regarding the purpose of the additional investigation. The EPA is approving the March 4, 2021 FSP Addendum 1 without requiring further revision in recognition that the work proposed in this addendum is a reasonable next step to further delineate the extent of RIM in this portion of the Site coupled with the Respondents' commitment to conduct further necessary investigation once the results from these additional borings are available.

Please feel free to contact me with any questions or concerns by phone at (913) 551-7141 or by email at jump.chris@epa.gov.

Sincerely,

Christine R. Jump
Remedial Project Manager
Site Remediation Branch
Superfund and Emergency Management Division
