

Area 40 Operable Unit 10 Aerojet Superfund Site

U.S. Environmental Protection Agency • Region 9 • San Francisco, CA • June 2019

Community Workshop

You are invited to a workshop on July 10, 2019 to learn more about the Area 40 Operable Unit 10 cleanup plan that was approved by the Department of Toxic Substances Control (DTSC) in August 2018 (*workshop details back page*). With oversight by DTSC and the U.S. Environmental Protection Agency (EPA), Aerojet Rocketdyne, Inc. will begin implementing the cleanup plan to address contaminated soil and groundwater at Area 40, Operable Unit 10 (*see Figure 1*) located east of Prairie City Road, in Folsom, CA. This land, owned by Aerojet Rocketdyne, Inc., is included in the Folsom South of Highway 50 Specific Plan Area as the future location of Community Park West, Open Spaces, and a mix of residential and commercial uses development. The cleanup plan below protects public health and the environment for the approved future land use of the property:

- « Removal of contaminated soil and proper disposal,
- « Install raptor perch and owl box to protect burrowing animals,
- « Record land use controls to restrict certain future reuses,
- « Install a subsurface groundwater treatment system, and
- « Install fencing to restrict access to portions of the future Open Space area.

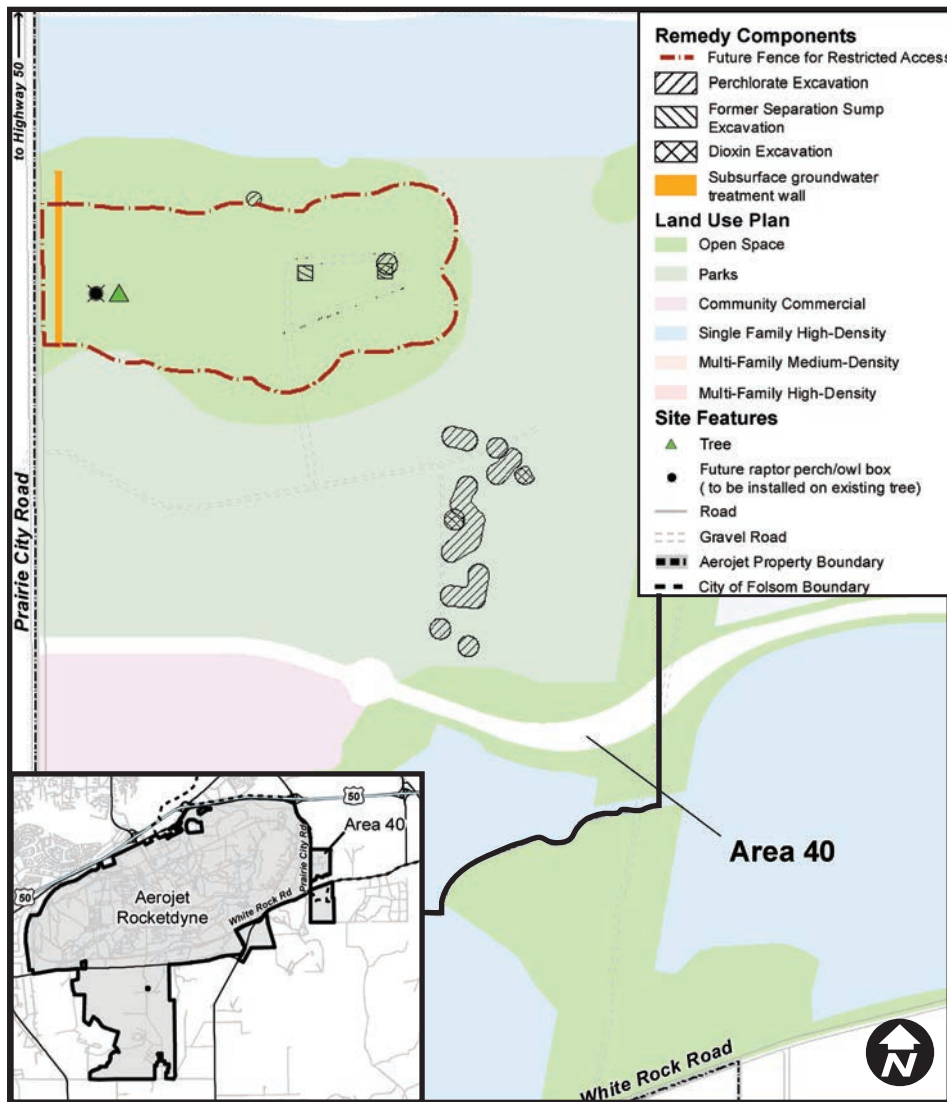

Figure 1: Aerojet Superfund Site

Figure 1 shows the locations of where contaminated soil will be removed, raptor perch and owl box area, and the groundwater treatment system location. The approximate cleanup schedule is below:

- « **August–November 2019:** Begin contaminated soil removal and install raptor perch and owl box
- « **April–November 2020:** Complete soil removal and install groundwater treatment system and fencing
- « Following work completion, record land use restrictions

Ambient air, soil vapor, and groundwater monitoring will commence following each phase of remedy and continue until cleanup objectives are achieved.
