To conduct the seismic shear wave test, the penetration of the cone is stopped and the rods are decoupled from the rig. An automatic hammer is triggered to send a shear wave into the soil. The distance from the source to the cone is calculated knowing the total depth of the cone and the horizontal offset distance between the source and the cone. To calculate an interval velocity, a minimum of two tests must be performed at two different depths. The arrival times between the two wave traces are compared to obtain the difference in time (Δt). The difference in depth is calculated (Δd) and velocity can be determined using the simple equation: $v = \Delta d/\Delta t$

Multiple wave traces can be recorded at the same depth to improve quality of the data.

A complete reference on seismic cone penetration tests is presented by Robertson et al. 1986 and Lunne et al. 1997.

A summary the shear wave velocities, arrival times and wave traces are provided with the report.

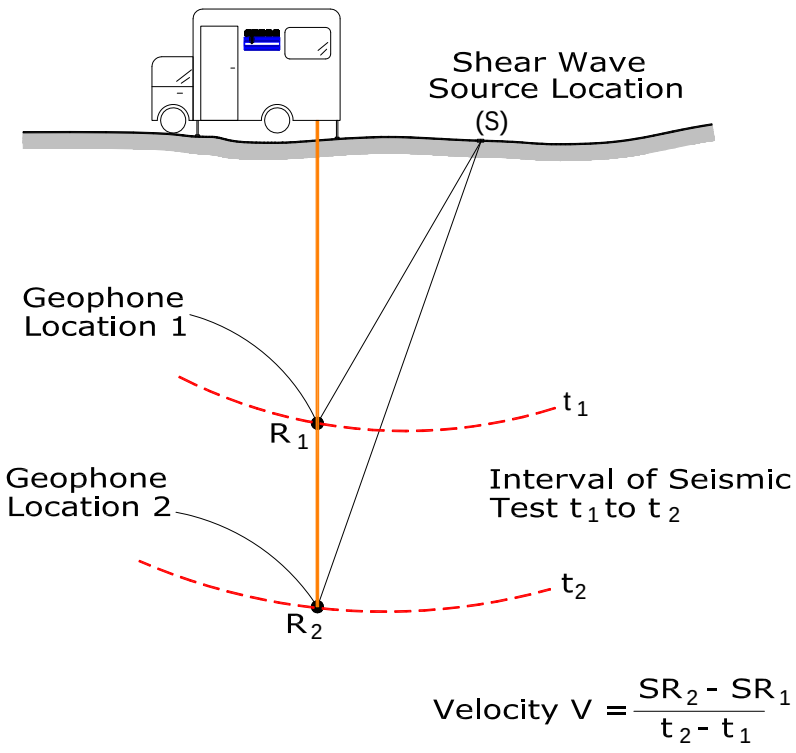

Figure SCPT

Groundwater Sampling

Gregg Drilling & Testing, Inc. conducts groundwater sampling using a sampler as shown in *Figure GWS*. The groundwater sampler has a retrievable stainless steel or disposable PVC screen with steel drop off tip. This allows for samples to be taken at multiple depth intervals within the same sounding location. In areas of slower water recharge, provisions may be made to set temporary PVC well screens during sampling to allow the pushing equipment to advance to the next sample location while the groundwater is allowed to infiltrate.

The groundwater sampler operates by advancing 44.5mm (1¾ inch) hollow push rods with the filter tip in a closed configuration to the base of the desired sampling interval. Once at the desired sample depth, the push rods are retracted; exposing the encased filter screen and allowing groundwater to infiltrate hydrostatically from the formation into the inlet screen. A small diameter bailer (approximately ½ or ¾ inch) is lowered through the push rods into the screen section for sample collection. The number of downhole trips with the bailer and time necessary to complete the sample collection at each depth interval is a function of sampling protocols, volume requirements, and the yield characteristics and storage capacity of the formation. Upon completion of sample collection, the push rods and sampler, with the exception of the PVC screen and steel drop off tip are retrieved to the ground surface, decontaminated and prepared for the next sampling event.

For a detailed reference on direct push groundwater sampling, refer to Zemo et. al., 1992.

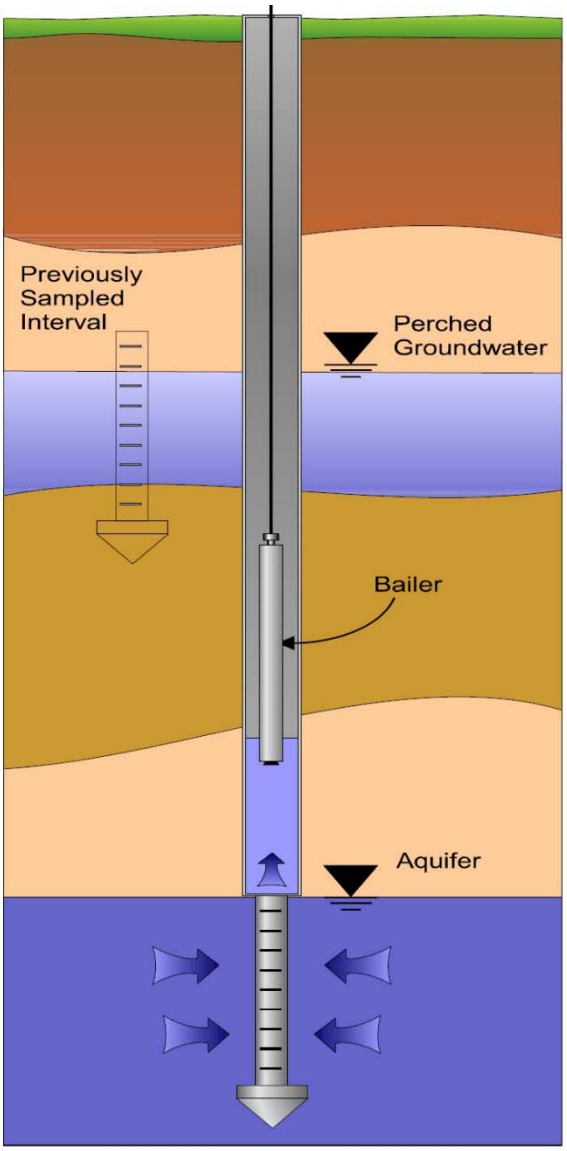

Figure GWS

Soil Sampling

Gregg Drilling & Testing, Inc. uses a piston-type push-in sampler to obtain small soil samples without generating any soil cuttings, *Figure SS*. Two different types of samplers (12 and 18 inch) are used depending on the soil type and density. The soil sampler is initially pushed in a "closed" position to the desired sampling interval using the CPT pushing equipment. Keeping the sampler closed minimizes the potential of cross contamination. The inner tip of the sampler is then retracted leaving a hollow soil sampler with inner 1¼" diameter sample tubes. The hollow sampler is then pushed in a locked "open" position to collect a soil sample. The filled sampler and push rods are then retrieved to the ground surface. Because the soil enters the sampler at a constant rate, the opportunity for 100% recovery is increased. For environmental analysis, the soil sample tube ends are sealed with Teflon and plastic caps. Often, a longer "split tube" can be used for geotechnical sampling.

For a detailed reference on direct push soil sampling, refer to Robertson et al, 1998.

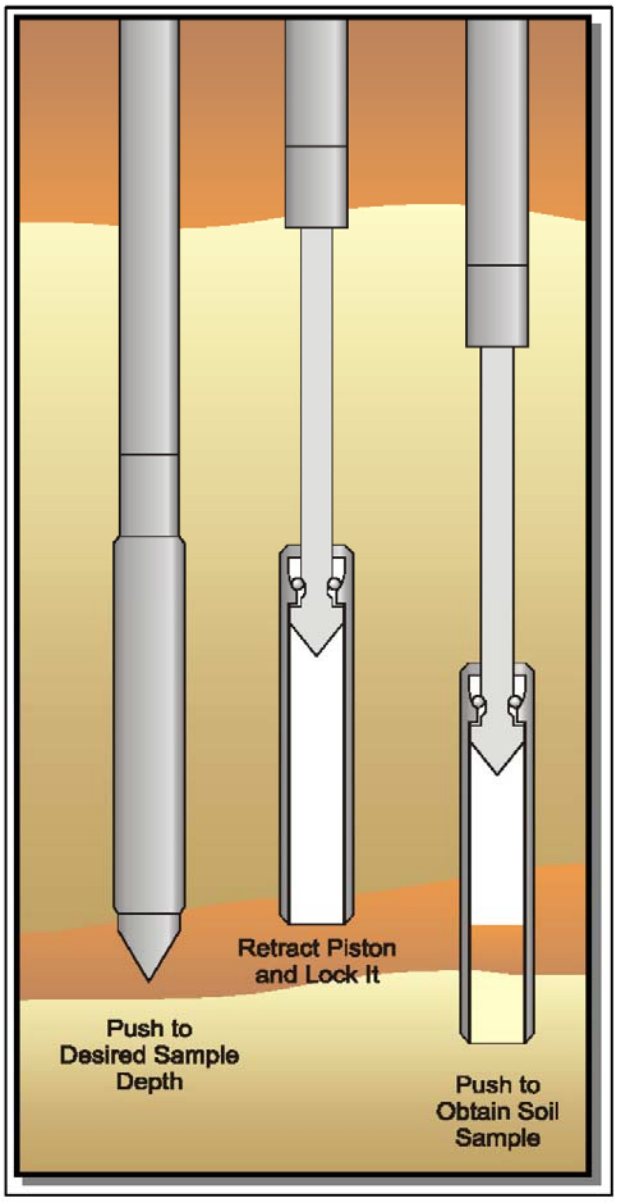

Figure SS

Ultra-Violet Induced Fluorescence (UVOST)

Gregg Drilling conducts Laser Induced Fluorescence (LIF) Cone Penetration Tests using a UVOST module that is located behind the standard piezocone, *Figure UVOST*. The laser induced fluorescence cone works on the principle that polycyclic aromatic hydrocarbons (PAH's), mixed with soil and/or groundwater, fluoresce when irradiated by ultra violet light. Therefore, by measuring the intensity of fluorescence, the lateral and vertical extent of hydrocarbon contamination in the ground can be estimated.

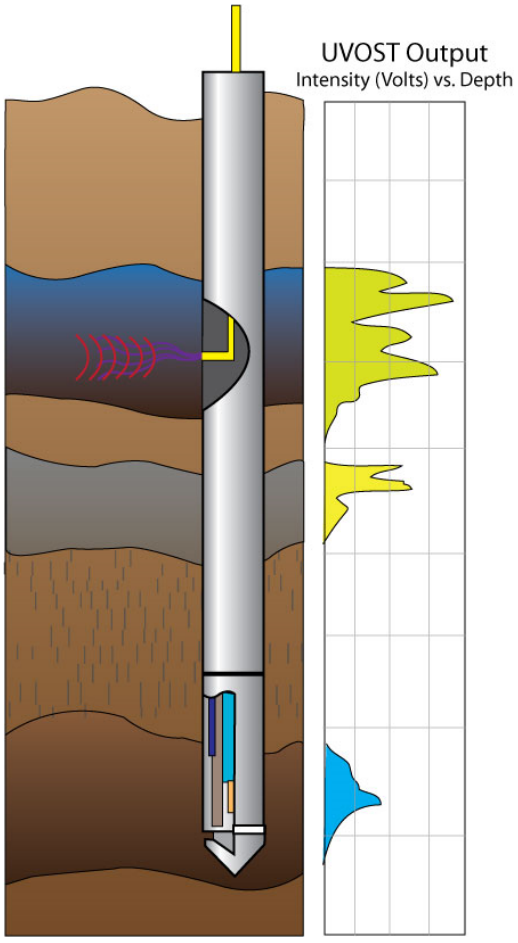

Figure UVOST

The UVOST module uses principles of fluorescence spectrometry by irradiating the soil with ultra violet light produced by a laser and transmitted to the cone through fiber optic cables. The UV light passes through a small window in the side of the cone into the soil. Any hydrocarbon molecules present in the soil absorb the light energy during radiation and immediately re-emit the light at a longer wavelength. This re-emission is termed fluorescence. The UVOST system also measures the emission decay with time at four different wavelengths (350nm, 400nm, 450nm, and 500nm). This allows the software to determine a product "signature" at each data point. This process provides a method to evaluate the type of contaminant. A sample output from the UVOST system is shown in *Figure Output*. In general, the typical detection limit for the UVOST system is <100 ppm and it will operate effectively above and below the saturated zone.

With the capability to push up to 200m (600ft) per day, laser induced fluorescence offers a fast and efficient means for delineating PAH contaminant plumes. Color coded logs offer qualitative information in a quick glance and can be produced in the field for real-time decision making. Coupled with the data provided by the CPT, a complete site assessment can be completed with no samples or cuttings, saving laboratory costs as well as site and environmental impact.

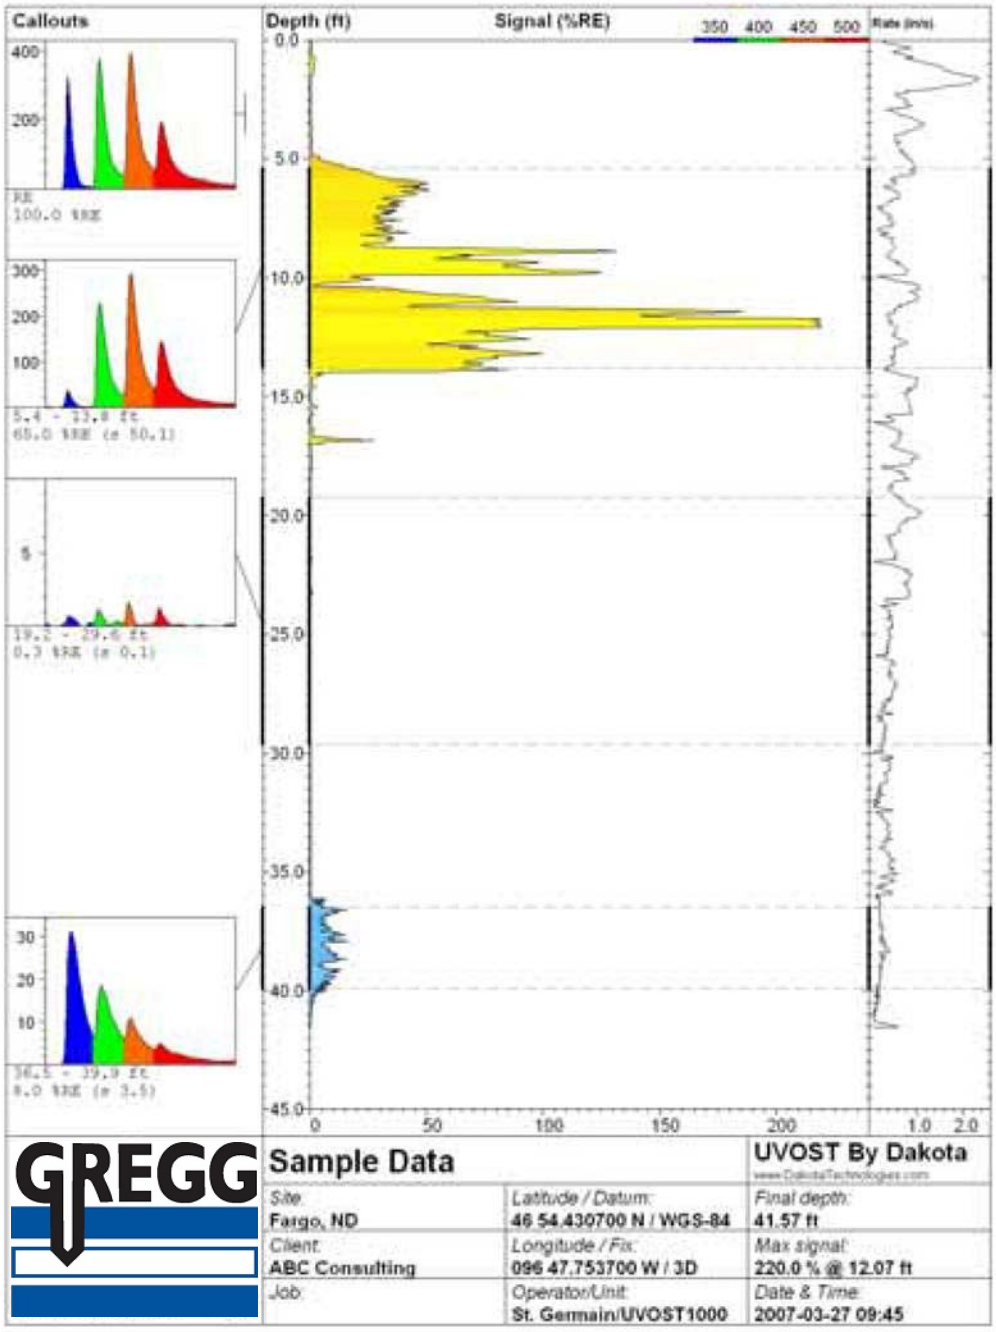

Figure Output

Hydrocarbons detected with UVOST

- Gasoline
- Diesel
- Jet (Kerasene)
- Motor Oil
- Cutting fluids
- Hydraulic fluids
- Crude Oil

Hydrocarbons rarely detected using UVOST

- Extremely weathered gasoline
- Coal tar
- Creosote
- Bunker Oil
- Polychlorinated bi-phenols (PCB's)
- Chlorinated solvent DNAPL
- Dissolved phase (aqueous) PAH's

Potential False Positives (fluorescence observed)

- Sea-shells (weak-medium)
- Paper (medium-strong depending on color)
- Peat/meadow mat (weak)
- Calcite/calcareous sands (weak)
- Tree roots (weak-medium)
- Sewer lines (medium-strong)

Potential False Negatives (do not fluoresce)

- Extremely weathered fuels (especially gasoline)
- Aviation gasoline (weak)
- "Dry" PAHs such as aqueous phase, lamp black, purifier chips
- Creosotes (most)
- Coal tars (most) gasoline (weak)
- Most chlorinated solvents
- Benzene, toluene, zylenes (relatively pure)

Dakota Technologies
UVOST Log Reference

2008-12-12

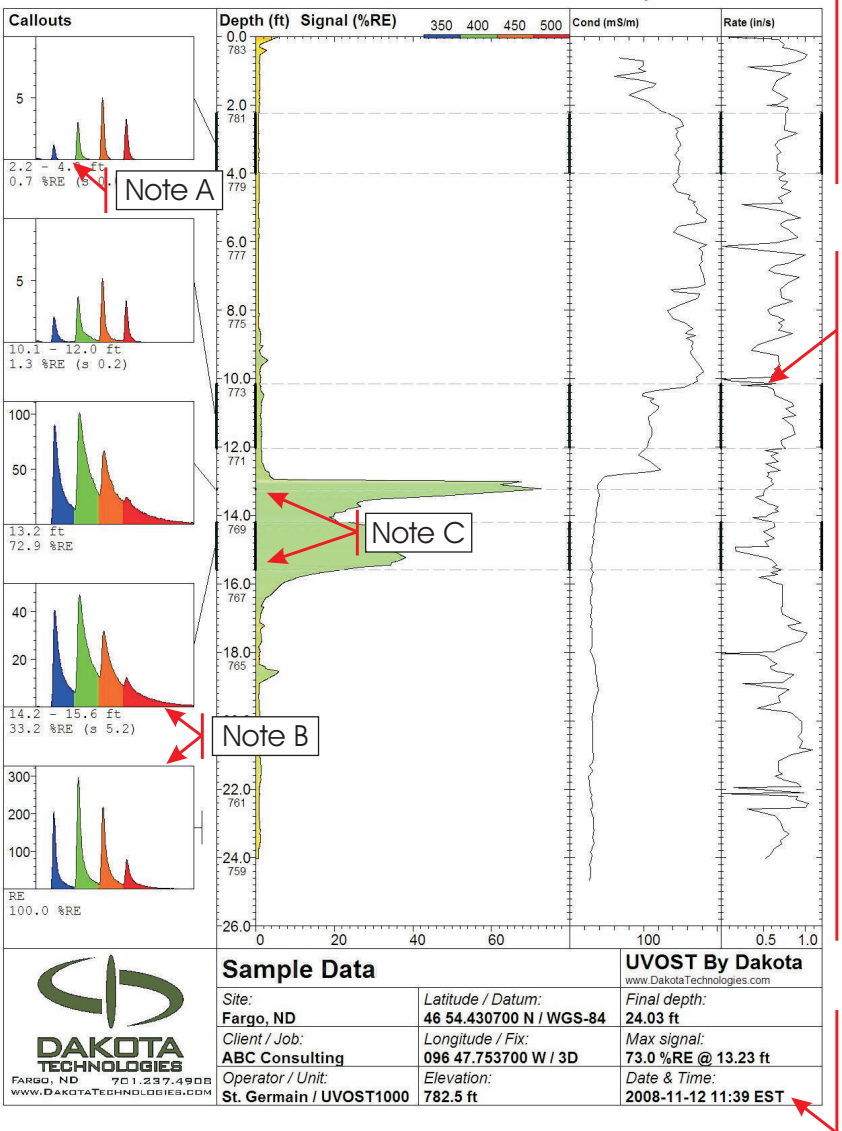
Main Plot :
Signal (total fluorescence) versus depth where signal is relative to the Reference Emitter (RE). The total area of the waveform is divided by the total area of the Reference Emitter yielding the %RE. This %RE scales with the NAPL fluorescence. The fill color is based on relative contribution of each channel's area to the total waveform area (see callout waveform). The channel-to-color relationship and corresponding wavelengths are given in the upper right corner of the main plot.

Callouts :
Waveforms from selected depths or depth ranges showing the multi-wavelength waveform for that depth.

The four peaks are due to fluorescence at four wavelengths and referred to as “channels”. Each channel is assigned a color.

Various NAPLs will have a unique waveform "fingerprint" due to the relative amplitude of the four channels and/or broadening of one or more channels.

Basic waveform statistics and any operator notes are given below the callout.



Conductivity Plot :
The Electrical Conductivity (EC) of the soil can be logged simultaneously with the UVOST data. EC often provides insight into the stratigraphy.
Note the drop in EC from 10 - 13 ft, indicating a shift from consolidated to unconsolidated stratigraphy. This correlates with the observed NAPL distribution.

Rate Plot :
The rate of probe advancement. ~ 0.8in (2cm) per second is preferred.

A noticeable decrease in the rate of advancement may be indicative of difficult probing conditions (gravel, angular sands, etc.) such as that seen here at ~5 ft.

Notice that this log was terminated arbitrarily, not due to "refusal", which would have been indicated by a sudden rate drop at final depth.

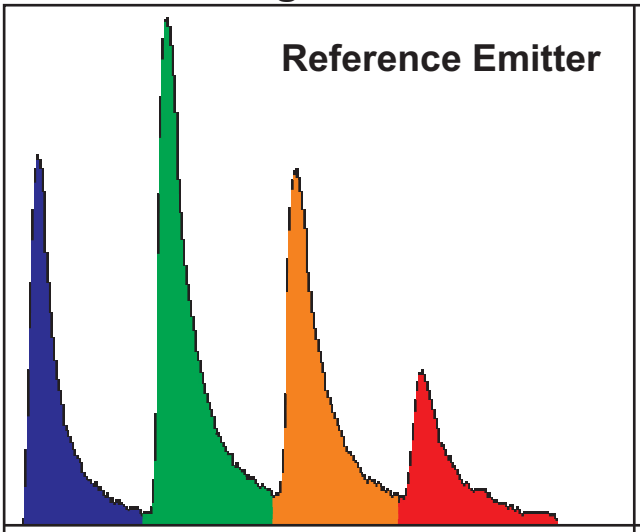
Info Box :
Contains pertinent log info including name and location.

Note A :
Time is along the x axis. No scale is given, but it is a consistent 320ns wide.
The y axis is in mV and directly corresponds to the amount of light striking the photodetector.

Note B :
These two waveforms are clearly different. The first is weathered diesel from the log itself while the second is the Reference Emitter (a blend of NAPLs) always taken before each log for calibration.

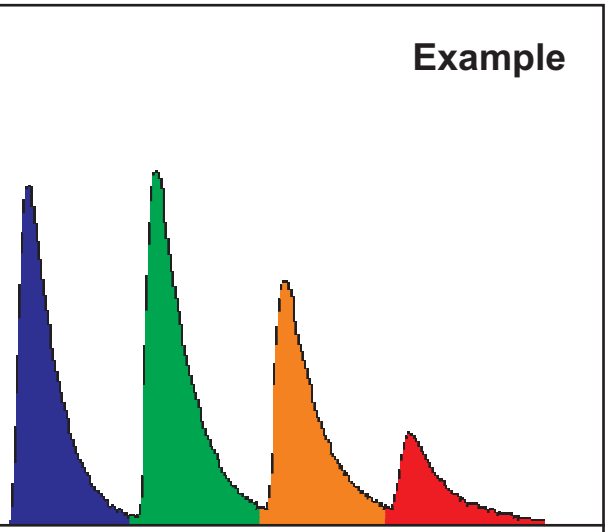
Note C :
Callouts can be a single depth (see 3rd callout) or a range (see 4th callout). The range is noted on the depth axis by a bold line. When the callout is a range, the average and standard deviation in %RE is given below the callout.

Waveform Signal Calculation



CH1		CH2		CH3		CH4		Total
4820	+	8108	+	6249	+	2984	=	**22161**
21.7		36.6		28.2		13.5		**100%**

Channel Area (pVs) Percent RE



CH1		CH2		CH3		CH4		Total
4923	+	5743	+	4166	+	1735	=	**16587**
22.3		25.9		18.8		7.8		**75%**

Data Files

***.lif.raw.bin**	Raw data file. Header is ASCII format and contains information stored when the file was initially written (e.g. date, total depth, max signal, gps, etc., and any information entered by the operator). All raw waveforms are appended to the bottom of the file in a binary format.
***.lif.plt**	Stores the plot scheme history (e.g. callout depths) for associated Raw file. Transfer along with the Raw file in order to recall previous plots.
***.lif.jpg**	A jpg image of the OST log including the main signal vs. depth plot, callouts, information, etc.
***.lif.dat.txt**	Data export of a single Raw file. ASCII tab delimited format. No string header is provided for the columns (to make importing into other programs easier). Each row is a unique depth reading. The columns are: Depth, Total Signal (%RE), Ch1%, Ch2%, Ch3%, Ch4%, Rate, Conductivity Depth, Conductivity Signal, Hammer Rate. Summing channels 1 to 4 yields the Total Signal.
***.lif.sum.txt**	A summary file for a number of Raw files. ASCII tab delimited format. The file contains a string header. The summary includes one row for each Raw file and contains information for each file including: the file name, gps coordinates, max depth, max signal, and depth at which the max signal occured.
***.lif.log.txt**	An activity log generated automatically located in the OST application directory in the 'log' subfolder. Each OST unit the computer operates will generate a separate log file per month. A log file contains much of the header information contained within each separate Raw file, including: date, total depth, max signal, etc.

Common Waveforms (highly dependent on soil, weathering, etc.)

PART 3: Inventory of Potential Indoor Chemical Sources: Inventario de Posibles Fuentes Químicos en el Interior:

Instructions: List items/products in the building or the attached garage that may contain site compounds of concern. These should be removed prior to sampling. List items/products that that give off significant volatiles as these may interfere with chemical analysis. Include chemicals that may be tracked into the house from an occupant. This could be chemical usage at work or in an attached workshop/garage. A portable instrument, such as a photo-ionization detector (PID) can be used to help locate volatile chemicals. Instrucciones: Lista de artículos / productos en el edificio o en el garaje adjunto que puedan contener compuestos del sitio. Estos deben ser retirados antes del muestreo. Nombrar el / los productos que emiten volátiles importantes que pueden interferir con el análisis químico. Incluya los productos químicos que pueden ser rastreados en la casa de un ocupante. Este podría ser el uso de químicos en el trabajo o en un taller / garaje adjunto. Un instrumento portátil, tal como un detector de fotoionización (PID) se puede utilizar para ayudar a localizar productos químicos volátiles.

Examples of products that may contain trichloroethene (TCE), such as gun cleaner, rubber cement, solvent degreasers, spot removers, correction fluid, electrical motor cleaner (also be aware that older products are more likely to contain TCE): Ejemplos de productos que pueden contener tricloroetileno (TCE) - limpiador de pistola, cemento de caucho, desengrasantes, disolventes, quitamanchas, líquido corrector, limpiador de motor eléctrico (también tenga en cuenta que los productos de mayor edad tienen más probabilidades de contener TCE):

Examples of significant volatile chemical sources such as gas powered equipment, gasoline storage cans, oil- based paint, paint thinner, nail polish remover, moth balls, perfumes, scented decorative items, insecticides: Ejemplos de fuentes químicas volátiles significativas tales como equipos con motor de gasolina, latas de almacenamiento de gasolina, pintura a base de aceite, sacapinturas, quitaesmalte, bolas de naftalina, perfumes, artículos de decoración perfumadas, insecticidas:

Potential chemical source Fuente Potencial de químico	**Location of Product Source** Lugar de origen del producto	**Photograph, ingredients, PID reading?** Fotografía, ingredientes, lectura del PID?

Date: _____ **Site** _____ **EPA Residence Location:** RES02
Fecha: _____ Sitio: _____ EPA Residencia #: _____

PART 3: Inventory of Potential Indoor Chemical Sources: Inventario de Posibles Fuentes Químicos en el Interior:

Instructions: List items/products in the building or the attached garage that may contain site compounds of concern. These should be removed prior to sampling. List items/products that that give off significant volatiles as these may interfere with chemical analysis. Include chemicals that may be tracked into the house from an occupant. This could be chemical usage at work or in an attached workshop/garage. A portable instrument, such as a photo-ionization detector (PID) can be used to help locate volatile chemicals. Instrucciones: Lista de artículos / productos en el edificio o en el garaje adjunto que puedan contener compuestos del sitio. Estos deben ser retirados antes del muestreo. Nombrar el / los productos que emiten volátiles importantes que pueden interferir con el análisis químico. Incluya los productos químicos que pueden ser rastreados en la casa de un ocupante. Este podría ser el uso de químicos en el trabajo o en un taller / garaje adjunto. Un instrumento portátil, tal como un detector de fotoionización (PID) se puede utilizar para ayudar a localizar productos químicos volátiles.

Examples of products that may contain trichloroethene (TCE), such as gun cleaner, rubber cement, solvent degreasers, spot removers, correction fluid, electrical motor cleaner (also be aware that older products are more likely to contain TCE): Ejemplos de productos que pueden contener tricloroetileno (TCE) - limpiador de pistola, cemento de caucho, desengrasantes, disolventes, quitamanchas, líquido corrector, limpiador de motor eléctrico (también tenga en cuenta que los productos de mayor edad tienen más probabilidades de contener TCE):

Examples of significant volatile chemical sources such as gas powered equipment, gasoline storage cans, oil- based paint, paint thinner, nail polish remover, moth balls, perfumes, scented decorative items, insecticides: Ejemplos de fuentes químicas volátiles significativas tales como equipos con motor de gasolina, latas de almacenamiento de gasolina, pintura a base de aceite, sacapinturas, quitaesmalte, bolas de naftalina, perfumes, artículos de decoración perfumadas, insecticidas:

Potential chemical source Fuente Potencial de químico	**Location of Product Source** Lugar de origen del producto	**Photograph, ingredients, PID reading?** Fotografía, ingredientes, lectura del PID?

PART 3: Inventory of Potential Indoor Chemical Sources: Inventario de Posibles Fuentes Químicos en el Interior:

Instructions: List items/products in the building or the attached garage that may contain site compounds of concern. These should be removed prior to sampling. List items/products that that give off significant volatiles as these may interfere with chemical analysis. Include chemicals that may be tracked into the house from an occupant. This could be chemical usage at work or in an attached workshop/garage. A portable instrument, such as a photo-ionization detector (PID) can be used to help locate volatile chemicals. Instrucciones: Lista de artículos / productos en el edificio o en el garaje adjunto que puedan contener compuestos del sitio. Estos deben ser retirados antes del muestreo. Nombrar el / los productos que emiten volátiles importantes que pueden interferir con el análisis químico. Incluya los productos químicos que pueden ser rastreados en la casa de un ocupante. Este podría ser el uso de químicos en el trabajo o en un taller / garaje adjunto. Un instrumento portátil, tal como un detector de fotoionización (PID) se puede utilizar para ayudar a localizar productos químicos volátiles.

Examples of products that may contain trichloroethene (TCE), such as gun cleaner, rubber cement, solvent degreasers, spot removers, correction fluid, electrical motor cleaner (also be aware that older products are more likely to contain TCE): Ejemplos de productos que pueden contener tricloroetileno (TCE) - limpiador de pistola, cemento de caucho, desengrasantes, disolventes, quitamanchas, líquido corrector, limpiador de motor eléctrico (también tenga en cuenta que los productos de mayor edad tienen más probabilidades de contener TCE):

Examples of significant volatile chemical sources such as gas powered equipment, gasoline storage cans, oil- based paint, paint thinner, nail polish remover, moth balls, perfumes, scented decorative items, insecticides: Ejemplos de fuentes químicas volátiles significativas tales como equipos con motor de gasolina, latas de almacenamiento de gasolina, pintura a base de aceite, sacapinturas, quitaesmalte, bolas de naftalina, perfumes, artículos de decoración perfumadas, insecticidas:

Potential chemical source Fuente Potencial de químico	**Location of Product Source** Lugar de origen del producto	**Photograph, ingredients, PID reading?** Fotografía, ingredientes, lectura del PID?
Rustoleum Paint in	rear door window 2	cans -

☐ Air Conditioner?/ acondicionador de aire

☐ Outdoor Air Intake?/ entrada de air exterior

☐ Floor Vents on the first floor? / respiraderos del piso en el primer piso

Location of the Furnace/ ubicación de horno _____

Which rooms have air supply/ ¿Qué habitaciones tienen suministro de aire? _____

Location of air returns/ Ubicación de retornos de aire _____

☑ Centrally located wall heater(s) /calentador de pared (es) localizados centralmente

Natural Gas or Electric?/ Gas Natural o eléctrico? Gas

Location(s)/ Ubicación (s) on wall in living room and another in wall in hallway

☐ Centrally located floor heater(s)/ Calentador de piso situado en el centro

Natural Gas or Electric?/ Gas Natural o eléctrico?

Location(s)/ Ubicación (s) _____

☐ Electrical Radiators/ Radiadores Eléctricos

Location(s)/ Ubicación (s) _____

☐ Water/Steam Radiators/ Radiadores de agua / vapor

Location(s)/ Ubicación (s) _____

☐ Radiant Floor Heat/ Calefaccion radiante de suelo

Location(s) Ubicación (s) _____

Residential Indoor Air Quality Survey Form [CONFIDENTIAL DO NOT RELEASE]

Formulario de la Encuesta Residencial Calidad del Aire Interior [CONFIDENCIAL NO COMPARTIR]

Date: _____ **Site** _____ **EPA Residence Location:** RES08
Fecha: _____ Sitio: _____ EPA Residencia #: _____

☐ Wood Stove(s)/ Horno (s)/Estufa de madera

Location(s) Ubicación (s) _____

☐ Fireplace/ Chimenea

Location(s)/ Ubicación (s) _____

☐ Window /Wall Air Conditioning Units/ Unidades de Ventana / Pared De Aire Acondicionado

Location(s)/ Ubicación (s) _____

Are the outdoor air vents opened (if equipped) Se abren los orificios de ventilación de aire exterior (si está equipado) _____

☐ Other (specify)/ Otro (especificar) _____

Are fans used?/ ¿Se utilizan los Ventiladores/abanicos?

☐ No ☑ Yes

Yes, Ceiling fans/ ventilador del techo ☑ ceiling fans in kitchen and bedrooms

Yes, Room Fans Ventiladores de la habitación ☐

Yes, Kitchen Exhaust colorantes de aire de la cocina ☑

Yes, Bathroom Exhaust cuarto de baño escape ☐

Yes, Attic/Whole house Fans ☐

Other (specify)/ Otro (especificar). _____

Daily Activity Report (DAR)

Project Name: Southgate SAIA	Page 1 of 2
Project No./Task Code: JL3004000 / C.00.FI100000	Date: 1-20-16
Description of Work: Indoor + outdoor air sampling	
Visitors / Subcontractors: Sam Grizik (Gilbane), Heather Parker (EPA)	
Weather: Scattered Clouds, Mild	

Description of Field Activities

0600: Left home office
0715: Arrived at SAIA container. Collected equipment needed for the days sampling to come.
0800: Left the Southgate storeage container to meet Heather Parker of the EPA
0830: Met w/ EPA Heather. Discussed days plan of action.
0900: Arrived at first sample site, Placed Radiello sample unit 918NP in unit after completion of household survey. Gilbane sample ID 5226-IA04-0116 @ 0925. RES 05-1A
1015: After completion of household survey of Res 03-1A, placed Radiello sample unit 917NP. Gilbane sample ID 5226-IA01-0116 @ 1015.
1048: After completion of household survey of RES 02-1A, placed Radiello sample Unit 916NP. Gilbane sampk ID 5215-IA-01-0116 @ 1048.
1100: Placed Radiello sample unit 919NP in the crawl space of RES 02-CS. Gilbane sample ID 5215-CS01-0116 @ 1100.
1140: After completion of household survey of RES01-1A, placed Radiello sample unit 932NP. Gilbane sample ID 5211-IA01-0116.
1150: Placed Radiello sample unit 931NP in the crawl space of RES 01. Gilbane sample ID 5211-CS01-0116 at 1150
1200: Caught up on paperwork
1230: Got a snack to eat.
1250: Returned to RES 08, prepared paperwork & equip
1340: After completion of household survey of RES 08-1A, placed Radiello sample unit 920NP. Gilbane sampk ID 5234-IA01-0116 at 1340.
1345: Placed Radiello sample unit 921NP in the crawl space of RES 08-1A. Gilbane sample ID 5234-CS01-0116 at 1345.
1350: Returned to field vehicle and prepared paperwork for outdoor air sample + dup sample (also outdoor) at RES01.
1415 Returned to RES01 and placed an outdoor sample, under-

Daily Activity Report (DAR)

Project Name: Southgate SAIA	Page 2 of 2
Project No./Task Code: J1630004000/C.00.FI100000	Date: 1-20-16
Description of Work: Indoor + Outdoor Air Sampling	
Visitors / Subcontractors: Sam Grizzle (Gilbane) Heather Parker (EPA)	
Weather: Scattered Clouds, Mild.	

Description of Field Activities

1415 (cont): a covered front porch. Radiello unit for RES01 outdoor sample was 933 NP. The Gilbane sample ID for this sample was designated 5211-OA01-0116 at 1415. The outdoor air sample duplicate sample for the same location was Radiello unit 924 NP. The Gilbane sample ID for this outdoor air sample duplicate is 5405-OA03-0116 at 1430.

1430 Did community outreach to set up additional sampling appointments.

1500 Left site for the day.

1610 Arrived at home office

1630 Updated time card per Gilbane policy

Gilbane

Daily Activity Report (DAR)

Project Name: Southgate SAIA	Page 1 of 1
Project No./Task Code:	Date: 1-21-16
Description of Work: Indoor Air Sampling	
Visitors / Subcontractors: Heather Parker	
Weather: Light clouds, cool	

Description of Field Activities

0630 Left home office
0740 Arrived in Southgate. Began the days paperwork
0830 Met w/ EPA's Heather Parker
0840 Made contact w/ Resident 7 and schedule an appointment to sample their IA
0915 Sampled RES4. Gilbane sample ID ~~RES04-IA02-0121~~ 5226-IA02-0116@0915 Radiello ID 923NP.
0930 Sampled RES7. Gilbane ID 5230-IA02-0116, Radiello ID 921NP. Sample time 0940
1000 Sampled Res6. Gilbane ID 5227-IA02-0116 collected at 1015. A duplicate sample was placed at the same site w/ Gilbane ID 5406-IA02-0116 w/ sample time as 1030. An outdoor air sample was also collected at RES6 w/ a sample ID of 5227-OA02-0116 w/ a Radiello ID of 927 NP
1120 Finished collecting/placing Radiello samplers. Parted ways w/ Heather Parker of the EPA.
1123 Spoke w/ PM Don Gruber to debrief him on the past two days field work. Off loaded field vehicle@SG Container
1240 Got gas for field vehicle
1330 Stopped at office Max to do some printing of field forms
1400 Returned to home office
1420 QA'd field documentation
1600 Update time card & checked email
1630 Finished work for the day.

Daily Activity Report (DAR)

Project Name: Southgate	Page 1 of 1
Project No./Task Code: J163004000	Date: 1-27-16
Description of Work: Sample Retrieval, Air	
Visitors / Subcontractors: Ronie Duarte (EPA)	
Weather: Overcast, High Clouds	

Description of Field Activities

0715 Left home office
0845 Arrived at coffee shop to meet Ronie Duarte
0918 Retrieved air sample 5211-IA01-0116, Radiello ID# 932NP, from RES 01
0933 Retrieved air sample 5211-OA06-0116, Radiello ID# 933NP from RES 01. Also collected an outdoor air sample there ID 5405-OA03-0116, Radiello ID ~~933NP~~ 924NP SG and designated the sample time as 1601.
0950 Retrieved air sample from the crawl space of RES 01 designated 5211-CS01-0116, Radiello sample ID 931NP
1004 Retrieved air sample from RES 3-1A designated 5226-IA01-0116 w/ Radiello sample ID 917NP.
1035 Retrieved air sample from RES 02-1A designated 5215-IA01-0116, Radiello sample ID 916NP
1045 Retrieved an air sample from the crawl space of RES 02 designated 5215-CS01-0116, Radiello sample ID 919NP
1134 Retrieved an air sample from RES 05-1A designated 5226-IA-04-0116, Radiello sample ID 918NP
1315 Retrieved an air sample from RES 08 1A designated 5234-IA01-0116, Radiello sample ID 920NP
1320 Retrieved an air sample from RES-08-CS designated 5234-CS01-0116, Radiello sample ID 921NP
1400 Left site for the day.
1500 Arrived at home office
1625 Finished up paperwork and QA/QC of same paperwork.
1630 Did timecard and finished for the day

Daily Activity Report (DAR)

Project Name: Southgate SAA	Page 1 of 1
Project No./Task Code: J163004000	Date: 1-28-16
Description of Work: Air Sampling	
Visitors / Subcontractors: Romie Duarte (EPA)	
Weather: Clear + Warm	

Description of Field Activities

0700 Left Home Office
0850 Arrived on site + met Romie Duarte (EPA)
0904 Retrieved air sample 5226-IA02-0116, Radiello ID#923NP from RES 04
0930 Retrieved air sample 5230-IA02-0116, Radiello ID#922NP of RES 07.
1004 Retrieved air sample + duplicate from RES-06. Air sample ID was 5227-IA02-0116 w/ Radiello ID#925NP. The duplicate ID was 5406-IA01-0116, Radiello ID#926NP. Also collected at RES-06 was an outdoor air sample, ID 5227-OA02-0116 w/ Radiello sample ID 927NP
1045 Returned to SAIA site container to prep the samples for shipment to EPA Reg 9 Lab. De-mobilized sampling equip
1200 Left the site for the day
1300 Returned velocimeter to Pine Environmental
1320 Shipped samples from FedEx Hub Irvine
1345 Prepped + QA'd paperwork for project
1500 Got gas for field vehicle
1520 Arrived at FedEx Kinkos for FedEx Shipping + Document reproduction.

PART 2: Factors Impacting Indoor Air Quality/ Factores que impactan la calidad del aire interior

Describe remodeling activities occurred over the last 6 months (what was done, what area, and when)/ Describir las actividades de remodelación que se produjeron durante los últimos 6 meses (lo que se hizo, qué área, y cuando):

floor was replaced with wood (from carpeting)
in June (6 months ago)

Does anyone use/ Hace uso cualquiera:

☐ smokes/ fumadores ☐ candles/ velas ☐ incense/ incienso

☐ air freshener/ ambientador ☐ fireplace/chimenea

☐ dry cleaned clothes/fabricas ropa o telas de la"tintorería" o de lavar en seco

Does anyone work with chemicals (such as a painter, or a mechanic) ¿Alguien trabaja con productos químicos (como un mecánico, o pintor)?

No

Have site chemicals been used or stored in building or adjacent garage (including degreasers, brake fluid cleaners, WD-40, drain cleaner, etc)? /Se han utilizado o almacenado químicos en el edificio o en el garaje adyacente? (incluyendo desengrasante, limpiador de líquido o aceite de los frenos, WD-40, limpiador de desagües, etc)

☐ Yes ☑ No

Please list the chemicals/ Por favor enumera los químicos

Not aware of neighbors having these chemicals, either

Describe any instance of water/groundwater present in the basement/crawlspace (including sumps) Describa cualquier instancia de agua / aguas subterráneas presentes en el sótano o espacio de acceso (incluyendo sumideros):

No

Residential Indoor Air Quality Survey Form [CONFIDENTIAL DO NOT RELEASE]

Formulario de la Encuesta Residencial Calidad del Aire Interior [CONFIDENTIAL NO COMPARTIR]

Date: _____ **Site** _____ **EPA Residence Location:** RES01
Fecha: _____ Sitio: _____ EPA Residencia #: _____

Are there conduits for sewer gases to enter the building (dry p-traps, open clean-outs, abandoned hook-ups, poorly installed/sealed/seated plumbing)?/ ¿Hay conductos para que los gases de las alcantarillas entren en el edificio (tapón de estilo-P seco, tubería abierta, conexiones abandonadas, plomería mal instalados / sellado)?: **Describe/** Describa:
No

Observations *Observaciones:*

What is the temperature relative to outside?/ ¿Cuál es la temperatura en relación con el exterior? Warmer inside

What pathways to the subsurface were observed?/ ¿Qué vías hacia el subsuelo se observaron?
None

Are windows and door kept open?/¿Las ventanas y puertas se mantienen abiertas?
~~Usual~~ windows + doors usually closed up

Ventilation system status and condition?/ El estado y condición del sistema de ventilación

Are intake or exhaust fans being used?/ Se utilizan ventiladores de admisión o de escape?
No

Is there evidence of significant negative pressure?/ ¿Hay evidencia de presión negativa significativa?

Do parts of the indoor environment appear stagnant? /¿Existe alguna parte o cuarto de la casa en donde el aire parece estancado (o en donde no corre el viento)?
No

Residential Indoor Air Quality Survey Form [CONFIDENTIAL DO NOT RELEASE]

Formulario de la Encuesta Residencial Calidad del Aire Interior [CONFIDENCIAL NO COMPARTIR]

Date: _____ **Site** _____ **EPA Residence Location:** RES01
Fecha: _____ Sitio: _____ EPA Residencia #: _____

Describe any strong odors. / Describiré cualquier olor fuerte

No

Olores fuertes podría indicar posible pobre ventilación a su vez esto podrá interferir con los análisis

Building Occupancy **Ocupación del Edificio**

Number of Occupants/ Número de Ocupantes: 1 Adults/ Adultos: 1

Gender ratio/ Sexo relación: 1 male

General Age ranges/ Rangos Generales de Edades: _____

Children/ Niños

Number at Ages/ Número en las Edades: (<2) _____ (2-6)_____ (>7)_____

Other Information (that may be of importance in understanding the indoor air quality in residence) Otra información (que podría ser de importancia para entender la calidad del aire interior en la residencia):

Potential Sampling Locations/ Ubicación posible de muestreo

General notes on potential sample locations and type. / Notas generales sobre los posibles puntos de muestreo y tipo.

~~the~~ sampler ~~placed~~ hung on blinds by front window in living room behind couch

Tentative sampling date(s) and preferred times. / Fecha tentativa de muestreo (s) y los tiempos preferidos.

PART 3: Inventory of Potential Indoor Chemical Sources: Inventario de Posibles Fuentes Químicos en el Interior:

Instructions: List items/products in the building or the attached garage that may contain site compounds of concern. These should be removed prior to sampling. List items/products that that give off significant volatiles as these may interfere with chemical analysis. Include chemicals that may be tracked into the house from an occupant. This could be chemical usage at work or in an attached workshop/garage. A portable instrument, such as a photo-ionization detector (PID) can be used to help locate volatile chemicals. Instrucciones: Lista de artículos / productos en el edificio o en el garaje adjunto que puedan contener compuestos del sitio. Estos deben ser retirados antes del muestreo. Nombrar el / los productos que emiten volátiles importantes que pueden interferir con el análisis químico. Incluya los productos químicos que pueden ser rastreados en la casa de un ocupante. Este podría ser el uso de químicos en el trabajo o en un taller / garaje adjunto. Un instrumento portátil, tal como un detector de fotoionización (PID) se puede utilizar para ayudar a localizar productos químicos volátiles.

Examples of products that may contain trichloroethene (TCE), such as gun cleaner, rubber cement, solvent degreasers, spot removers, correction fluid, electrical motor cleaner (also be aware that older products are more likely to contain TCE): Ejemplos de productos que pueden contener tricloroetileno (TCE) - limpiador de pistola, cemento de caucho, desengrasantes, disolventes, quitamanchas, líquido corrector, limpiador de motor eléctrico (también tenga en cuenta que los productos de mayor edad tienen más probabilidades de contener TCE):

Examples of significant volatile chemical sources such as gas powered equipment, gasoline storage cans, oil- based paint, paint thinner, nail polish remover, moth balls, perfumes, scented decorative items, insecticides: Ejemplos de fuentes químicas volátiles significativas tales como equipos con motor de gasolina, latas de almacenamiento de gasolina, pintura a base de aceite, sacapinturas, quitaesmalte, bolas de naftalina, perfumes, artículos de decoración perfumadas, insecticidas:

Potential chemical source Fuente Potencial de químico	**Location of Product Source** Lugar de origen del producto	**Photograph, ingredients, PID reading?** Fotografía, ingredientes, lectura del PID?

PART 3: Inventory of Potential Indoor Chemical Sources: Inventario de Posibles Fuentes Químicos en el Interior:

Instructions: List items/products in the building or the attached garage that may contain site compounds of concern. These should be removed prior to sampling. List items/products that that give off significant volatiles as these may interfere with chemical analysis. Include chemicals that may be tracked into the house from an occupant. This could be chemical usage at work or in an attached workshop/garage. A portable instrument, such as a photo-ionization detector (PID) can be used to help locate volatile chemicals. Instrucciones: Lista de artículos / productos en el edificio o en el garaje adjunto que puedan contener compuestos del sitio. Estos deben ser retirados antes del muestreo. Nombrar el / los productos que emiten volátiles importantes que pueden interferir con el análisis químico. Incluya los productos químicos que pueden ser rastreados en la casa de un ocupante. Este podría ser el uso de químicos en el trabajo o en un taller / garaje adjunto. Un instrumento portátil, tal como un detector de fotoionización (PID) se puede utilizar para ayudar a localizar productos químicos volátiles.

Examples of products that may contain trichloroethene (TCE), such as gun cleaner, rubber cement, solvent degreasers, spot removers, correction fluid, electrical motor cleaner (also be aware that older products are more likely to contain TCE): Ejemplos de productos que pueden contener tricloroetileno (TCE) - limpiador de pistola, cemento de caucho, desengrasantes, disolventes, quitamanchas, líquido corrector, limpiador de motor eléctrico (también tenga en cuenta que los productos de mayor edad tienen más probabilidades de contener TCE):

Examples of significant volatile chemical sources such as gas powered equipment, gasoline storage cans, oil- based paint, paint thinner, nail polish remover, moth balls, perfumes, scented decorative items, insecticides: Ejemplos de fuentes químicas volátiles significativas tales como equipos con motor de gasolina, latas de almacenamiento de gasolina, pintura a base de aceite, sacapinturas, quitaesmalte, bolas de naftalina, perfumes, artículos de decoración perfumadas, insecticidas:

Potential chemical source Fuente Potencial de químico	**Location of Product Source** Lugar de origen del producto	**Photograph, ingredients, PID reading?** Fotografía, ingredientes, lectura del PID?

PART 3: Inventory of Potential Indoor Chemical Sources: Inventario de Posibles Fuentes Químicos en el Interior:

Instructions: List items/products in the building or the attached garage that may contain site compounds of concern. These should be removed prior to sampling. List items/products that that give off significant volatiles as these may interfere with chemical analysis. Include chemicals that may be tracked into the house from an occupant. This could be chemical usage at work or in an attached workshop/garage. A portable instrument, such as a photo-ionization detector (PID) can be used to help locate volatile chemicals. Instrucciones: Lista de artículos / productos en el edificio o en el garaje adjunto que puedan contener compuestos del sitio. Estos deben ser retirados antes del muestreo. Nombrar el / los productos que emiten volátiles importantes que pueden interferir con el análisis químico. Incluya los productos químicos que pueden ser rastreados en la casa de un ocupante. Este podría ser el uso de químicos en el trabajo o en un taller / garaje adjunto. Un instrumento portátil, tal como un detector de fotoionización (PID) se puede utilizar para ayudar a localizar productos químicos volátiles.

Examples of products that may contain trichloroethene (TCE), such as gun cleaner, rubber cement, solvent degreasers, spot removers, correction fluid, electrical motor cleaner (also be aware that older products are more likely to contain TCE): Ejemplos de productos que pueden contener tricloroetileno (TCE) - limpiador de pistola, cemento de caucho, desengrasantes, disolventes, quitamanchas, líquido corrector, limpiador de motor eléctrico (también tenga en cuenta que los productos de mayor edad tienen más probabilidades de contener TCE):

Examples of significant volatile chemical sources such as gas powered equipment, gasoline storage cans, oil- based paint, paint thinner, nail polish remover, moth balls, perfumes, scented decorative items, insecticides: Ejemplos de fuentes químicas volátiles significativas tales como equipos con motor de gasolina, latas de almacenamiento de gasolina, pintura a base de aceite, sacapinturas, quitaesmalte, bolas de naftalina, perfumes, artículos de decoración perfumadas, insecticidas:

Potential chemical source Fuente Potencial de químico	**Location of Product Source** Lugar de origen del producto	**Photograph, ingredients, PID reading?** Fotografía, ingredientes, lectura del PID?

Please list the chemicals/ Por favor enumera los químicos

degreasers, car brake fluid cleaners → kept under kitchen sink and bathroom sink

Describe any instance of water/groundwater present in the basement/crawlspace (including sumps) Describa cualquier instancia de agua / aguas subterráneas presentes en el sótano o espacio de acceso (incluyendo sumideros):

None

Residential Indoor Air Quality Survey Form [CONFIDENTIAL DO NOT RELEASE]

Formulario de la Encuesta Residencial Calidad del Aire Interior [CONFIDENCIAL NO COMPARTIR]

Date: _____ **Site** _____ **EPA Residence Location:** RES07
Fecha: _____ Sitio: _____ EPA Residencia #: _____

Are there conduits for sewer gases to enter the building (dry p-traps, open clean-outs, abandoned hook-ups, poorly installed/sealed/seated plumbing)?/ ¿Hay conductos para que los gases de las alcantarillas entren en el edificio (tapón de estilo-P seco, tubería abierta, conexiones abandonadas, plomería mal instalados / sellado)?: **Describe/** Describa:

No

Observations Observaciones:

What is the temperature relative to outside?/ ¿Cuál es la temperatura en relación con el exterior? usually colder than outside

What pathways to the subsurface were observed?/ ¿Qué vías hacia el subsuelo se observaron?

None

Are windows and door kept open?/ ¿Las ventanas y puertas se mantienen abiertas?

in winter, windows and doors kept closed

Ventilation system status and condition?/ El estado y condición del sistema de ventilación

Are intake or exhaust fans being used?/ Se utilizan ventiladores de admisión o de escape?

have exhaust fan in kitchen, but it doesn't work, also have one in the bathroom that they use

Is there evidence of significant negative pressure?/ ¿Hay evidencia de presión negativa significativa?

Do parts of the indoor environment appear stagnant? / ¿Existe alguna parte o cuarto de la casa en donde el aire parece estancado (o en donde no corre el viento)?

No

Residential Indoor Air Quality Survey Form [CONFIDENTIAL DO NOT RELEASE]

Formulario de la Encuesta Residencial Calidad del Aire Interior [CONFIDENCIAL NO COMPARTIR]

Date: _____ **Site** _____ **EPA Residence Location:** RES07
Fecha: _____ Sitio: _____ EPA Residencia #: _____

Describe any strong odors. / Describiré cualquier olor fuerte

None

Olores fuertes podría indicar posible pobre ventilación a su vez esto podrá interferir con los análisis

Building Occupancy **Ocupación del Edificio**

Number of Occupants/ Número de Ocupantes: 4 Adults/ Adultos: 4

Gender ratio/ Sexo relación: 2

General Age ranges/ Rangos Generales de Edades: 20 - 50

Children/ Niños

Number at Ages/ Número en las Edades: (<2) 0 (2-6) 0 (>7) 0

Other Information (that may be of importance in understanding the indoor air quality in residence) Otra información (que podría ser de importancia para entender la calidad del aire interior en la residencia):

None

Potential Sampling Locations/ Ubicación posible de muestreo

General notes on potential sample locations and type. / Notas generales sobre los posibles puntos de muestreo y tipo.

sampler hung in ~~BR~~ during & room on curtains over front window

Tentative sampling date(s) and preferred times. / Fecha tentativa de muestreo (s) y los tiempos preferidos.

PART 3: Inventory of Potential Indoor Chemical Sources: Inventario de Posibles Fuentes Químicos en el Interior:

Instructions: List items/products in the building or the attached garage that may contain site compounds of concern. These should be removed prior to sampling. List items/products that that give off significant volatiles as these may interfere with chemical analysis. Include chemicals that may be tracked into the house from an occupant. This could be chemical usage at work or in an attached workshop/garage. A portable instrument, such as a photo-ionization detector (PID) can be used to help locate volatile chemicals. Instrucciones: Lista de artículos / productos en el edificio o en el garaje adjunto que puedan contener compuestos del sitio. Estos deben ser retirados antes del muestreo. Nombrar el / los productos que emiten volátiles importantes que pueden interferir con el análisis químico. Incluya los productos químicos que pueden ser rastreados en la casa de un ocupante. Este podría ser el uso de químicos en el trabajo o en un taller / garaje adjunto. Un instrumento portátil, tal como un detector de fotoionización (PID) se puede utilizar para ayudar a localizar productos químicos volátiles.

Examples of products that may contain trichloroethene (TCE), such as gun cleaner, rubber cement, solvent degreasers, spot removers, correction fluid, electrical motor cleaner (also be aware that older products are more likely to contain TCE): Ejemplos de productos que pueden contener tricloroetileno (TCE) - limpiador de pistola, cemento de caucho, desengrasantes, disolventes, quitamanchas, líquido corrector, limpiador de motor eléctrico (también tenga en cuenta que los productos de mayor edad tienen más probabilidades de contener TCE):

Examples of significant volatile chemical sources such as gas powered equipment, gasoline storage cans, oil- based paint, paint thinner, nail polish remover, moth balls, perfumes, scented decorative items, insecticides: Ejemplos de fuentes químicas volátiles significativas tales como equipos con motor de gasolina, latas de almacenamiento de gasolina, pintura a base de aceite, sacapinturas, quitaesmalte, bolas de naftalina, perfumes, artículos de decoración perfumadas, insecticidas:

Potential chemical source Fuente Potencial de químico	**Location of Product Source** Lugar de origen del producto	**Photograph, ingredients, PID reading?** Fotografía, ingredientes, lectura del PID?

PART 4: Building Ventilation Systems/ Construcción de sistemas de ventilación

Type(s) of Cooling/Heating Used (Check appropriate boxes)/ Tipo (s) de refrigeración / calefacción utilizados (Marque las casillas apropiadas)

- ☐ Central Forced Air (dueled)/ Aire central forzado (duelo)
- ☐ Natural Gas Furnace/ Horno de Gas Natural
- ☐ Air Conditioner?/ acondicionador de aire
- ☐ Outdoor Air Intake?/ entrada de air exterior
- ☐ Floor Vents on the first floor? / respiraderos del piso en el primer piso

Location of the Furnace/ ubicación de horno _____

Which rooms have air supply/ ¿Qué habitaciones tienen suministro de aire? _____

Location of air returns/ Ubicación de retornos de aire _____

- ☑ Centrally located wall heater(s) /calentador de pared (es) localizados centralmente

Natural Gas or Electric?/ Gas Natural o eléctrico? gas

Location(s)/ Ubicación (s) one in living room (doesn't work) and one upstairs

- ☐ Centrally located floor heater(s)/ Calentador de piso situado en el centro

Natural Gas or Electric?/ Gas Natural o eléctrico?

Location(s)/ Ubicación (s) _____

- ☑ Electrical Radiators/ Radiadores Eléctricos

Location(s)/ Ubicación (s) in living room

- ☐ Water/Steam Radiators/ Radiadores de agua / vapor

Location(s)/ Ubicación (s) _____

- ☐ Radiant Floor Heat/ Calefaccion radiante de suelo

Location(s) Ubicación (s) _____

Daily Activity Report (DAR)

Project Name: SAIA	Page 1 of 1
Project No./Task Code: 07163.0064	Date: 4/1/13
Description of Work: Soil sampling (direct push)	
Visitors / Subcontractors: Gregg Drilling	
Weather: AM - 66°F, partly cloudy PM - 72°F, Sunny	

Description of Field Activities

0700 Arrive @ Seam Masters property. Get access to bldg from Matt. Conduct H&S tailgate meeting.
0720 Set up rig on SB/SG04 location.
0730 Hand auger to first three sample depths (0.5', 2', 5').
0820 Collect sample SAIA-SB/SG04-0.5.
0830 Collect sample SAIA-SB/SG04-2.
0840 Collect sample SAIA-SB/SG04-5.
0850 Collect sample SAIA-SB/SG04-~~25~~ 15.
0900 Collect sample SAIA-SB/SG04-25.
0905 Collect sample SAIA-SB/SG04-35.
0920 Pull out rods. Install soil vapor sampling point @ 5', 15', 25', 35'. Longest tube designates the deepest sample, shortest tube designates shallow sampling point. This convention will be followed for all soil vapor sampling locations.
1020 Set up rig on SB/SG03 location. Collect sample SAIA-SB/SG03-0.5 PID = 75.2 ppm (measured from w/in ziploc bag).
1025 Collect sample SAIA-SB/SG03-2. PID = 98.7 ppm.
1030 Collect sample SAIA-SB/SG03-~~5~~ 3 ~~PID = 25.8 ppm~~ (duplicate sample)
1040 Collect sample SAIA-SB/SG03-5. PID = 25.8 ppm.
1050 Collect sample SAIA-SB/SG03-15.
1055 Collect sample SAIA-SB/SG03-25.
1100 Collect sample SAIA-SB/SG03-35.
1300 Set up rig on SB/SG02 location.
1305 Collect sample SAIA-SB/SG02-0.5. PID = 22.3 ppm
1310 Collect sample SAIA-SB/SG02-2. PID = 32.1 ppm
1330 Collect sample SAIA-SB/SG02-5. PID = 23.2 ppm
1340 Collect sample SAIA-SB/SG02-15.
1400 Collect sample SAIA-SB/SG02-25. No PCB sample collected @ this location.
1410 Collect sample SAIA-SB/SG02-35. No PCB sample collected @ this location.
1420 Acetate sampling sleeves jamming up @ deep sample locations (25' & 35') Not unable to collect sufficient volume for all analyses. No PCBs.
1440 Leave site. Prep samples for shipping.
1630 Drop off samples @ FedEx.

Description of Work: soil vapor sampling	
Visitors / Subcontractors: H&P	
Weather: AM - 57°F, cloudy, 88% humidity PM - 68°F, partly cloudy	

Description of Field Activities

0700 Arrive @ Seam Masters property. Meet H&P staff & conduct H&S tailgate meeting.
0730 Set up on SG16 location (alley btw Southern & McCallum). Begin purge for 25' & 35' sample depths.
0820 Collect SAIA-SG16-D25 sample. Leak detection compound detected in sample @ concentration slightly exceeding 100 ppbv threshold. Recollect & re-run sample.
0900 Set up on SG15 location (adjacent to SG16). Start purge.
0910 Collect SAIA-SG16-D35 sample.
0945 Complete purge for SG15 sample depths. Set up on SG08 location (NE corner of Seam Masters property).
0950 Collect SAIA-~~SG16~~ SG15 - D05 sample
1014 Collect SAIA-SG15-D15 sample.
1038 Collect SAIA-SG15-D25 sample.
1040 Complete purge for SG08. Set up on SG07 location & start purge.
1104 Collect SAIA-SG15-D35 sample.
1305 Complete purge for SG07 sample depths. Collect SAIA-SG08-D5-E04/13 sample.
1338 Collect ~~SAIA-SG08~~ SAIA-SG08-D15 sample.
1408 Collect SAIA-SG08-D25 sample
1434 Collect SAIA-SG08-D35 sample.
1457 Collect SAIA-SG07-D05 sample.
1545 Secure area. Leave site.

Daily Activity Report (DAR)

Project Name: SAIA RI/FS	Page 1 of 1
Project No./Task Code: 07163.0064.FI0301	Date: April 14, 2014
Description of Work: Soil sampling and installation of temporary soil gas sampling wells	
Visitors / Subcontractors: none/Gregg Drilling and Testing	
Weather: mild to warm	

Description of Field Activities

0700 Complete detailed Health and Safety Briefing, discuss scope of field activities and progression of work with subcontractor. Off load direct push drill rig and move to SAIA-SB/SG23 location.

0800 cut concrete surface with 4-inch diameter solid stem auger flight (concrete approx .8 inches thick). Complete hand auger borehole to 5 ft. bgs for utility clearance. Advance borehole with direct push technique and collect continuous soil samples to 35 feet bgs.

0945 Construct temporary soil gas sampling well with sampling intervals at 4.5 to 5.0 ft. ; 14.5 to 15.0 ft; 24.5 to 25.0 ft.; and 34.5 to 35.5 ft. bgs.

1000 Move to SAIA-SB/SG25, cut concrete surface as described above (approx. 4 in thick). Direct push and sample to 35 ft bgs.

1050 Construct temporary soil gas sampling well with sampling intervals at 4.5 to 5.0 ft.; 14.5 to 15.0 ft.; 24.5 to 25.0 ft. and 34.5 to 35 ft. bgs.

1140 Move direct push drill rig to SAIA-SB/SG27. Cut concrete surface as described above (4 in thick). GDT crew takes lunch.

1230 Complete hand auger borehole to 5 ft bgs for utility clearance. Move well construction supplies to site.

Advance soil boring and collect continuous soil samples to 35 ft. bgs. Construct temporary soil gas sampling well with completions at 4.5 to 5.0 ft.; 14.5 to 15.0 ft.; 24.5 to 25.0 ft. and 34.5 to 35.0 ft. bgs.

1410 Move direct push drill rig to SAIA-SB/SG28 location. This location was moved approximately 20 feet west of the location shown on the Proposed Onsite Soil Gas Sampling Locations figure to more closely match the soil boring location completed for SB12 during the initial phase of site characterization sampling completed at SAIA.

1500 Cut concrete surface as described above (surface approximately 3 inches thick at this location). Complete hand auger boring to 5 ft. bgs for utility clearance. Direct push soil boring and sample to 35 ft. bgs. Move well construction materials to site and construct temporary soil gas sampling well with completions at 4.5 to 5.0 ft.; 14.5 to 15.0 ft.; 24.5 to 25.0 ft.; and 34.5 to 35.0 ft. bgs.

1550 Prepare soil samples and documentation for shipment to analytical laboratories. GDT loaded drilling rig and support equipment, completed paperwork and left site.

1620 Travel to Fed Ex to complete sample shipment documentation

1650 Relinquished soil samples to Fed Ex.

Prepared by: Peter Phillips	Signature:

Daily Activity Report (DAR)

Project Name: SAIA RI/FS	Page 1 of 1
Project No./Task Code: 07163.0064.FI0301	Date: April 15, 2014
Description of Work: Soil sampling and installation of temporary soil gas sampling wells	
Visitors / Subcontractors: none/Gregg Drilling and Testing	
Weather: mild to warm	

Description of Field Activities

0700 Complete tail gate safety meeting, unload direct push, limited access drill rig from trailer, move to SAIA-SB/SG30.

0730 Attempt to complete utility clearance hand auger at identified location, obstruction at approximately 1.5 feet bgs. Move approx. 2 feet north and successfully complete utility clearance hand auger boring to 5 ft. bgs. Drill and continuously sample to 35 ft. bgs. Install temporary soil gas sampling well with completions at 4.5 to 5.0 ft.; 14.5 to 15.0 ft.; 24.5 to 25.0 ft.; and 34.5 to 35.0 ft. bgs (NOTE: all subsequent temporary wells installed during field activities today were constructed with the same completion intervals).

0900 Move drill rig to SAIA-SB/SG31, complete utility hand auger to 5 ft. bgs. Advance direct push boring and collect continuous soil samples to 35 ft. bgs. Construct temporary soil gas sampling well at SAIA-SB/SG31 as described above.

1045 Move drill rig to SAIA-SB/SG32, complete utility hand auger to 5 ft. bgs. Advance direct push boring and collect continuous soil samples to 35 ft. bgs. Construct temporary soil gas sampling well at SAIA-SB/SG32 as described above.

1150 GDT crew lunch break

1225 Move drill rig to SAIA-SB/SG33, complete utility hand auger boring to 5 ft. bgs. Advance direct push boring and collect continuous soil samples to 35 ft. bgs. (NOTE: Moderate to strong petroleum odors were encountered during the advancement of this boring from approximately 12 to 17 ft. bgs. Breathing area PID monitoring values ranging from 0.1 to 0.8 ppm were recorded when odors were first noticed and for the duration of the drilling and temporary soil gas well construction activities at SAIA-SB/SG33. Borehole PID monitoring values ranging from 1.2 to 2.7 ppm were recorded during borehole drilling activities as well.) Construct temporary soil gas sampling well at SAIA-SB/SG33 as described above.

1415 Move drill rig to SAIA-SB/SG34, attempt to complete utility clearance hand auger, encountered buried debris (metal slag, vitrified glass, etc.) at approx. 2 ft. bgs, moved 2 feet north of marked location for this boring and successfully completed utility clearance hand auger to 5 ft. bgs. Advance soil boring and collect continuous soil samples to 35 ft. bgs. Construct temporary soil gas sampling well at SAIA-SB/SG34 as described above.

1545 GDT retuned drill rig to transport trailer, loaded rig, secured support equipment and completed daily activity documentation.

1550 Prepare soil samples for shipment to applicable analytical laboratory.

1615 Load coolers, secure site and transport samples to Fed Ex.

1645 Complete sample shipment transportation documentation and relinquish samples to Fed Ex.

Prepared by: Peter Phillips	Signature:

Daily Activity Report (DAR)

Project Name: SAIA RI/FS	Page 1 of 1
Project No./Task Code: 07163.0064.FI0301	Date: April 16. 2014
Description of Work: Soil sampling and installation of temporary soil gas sampling wells	
Visitors / Subcontractors: none/Gregg Drilling and Testing	
Weather: mild to warm	

Description of Field Activities

0700 Complete tail gate safety meeting, position direct push drill rig over SAIA-SB/SG19 location (boring is approximately 27 inches above the ground surface for the SAIA site on a concrete secondary containment structure for a former above ground storage tank). Complete a utility clearance hand auger boring to 5 feet below the surface elevation of the boring. Advance the borehole using the direct push drilling technique to 43 feet below the surface elevation of boring. Relatively strong petroleum odor encountered at approximately 12 feet below the surface elevation of the boring. PID breathing are measurements did not detect recordable concentrations, borehole measurements ranged from 0.7 to 3.9 ppm. Construct a temporary soil gas sampling well with completion intervals at 4.5 to 5.0; 14.5 to 15.0; 24.5 to 25.0 and 34.5 to 35.0 feet below the surface elevation of the boring. This boring was advcanced an additional 7 feet past the designed target depth of the lowest soil gas sampling interval in an attempt to evaluate the total depth of petroleum hydrocarbon affected soil. Evidence of exposure to petroleum hydrocarbons was still observed in the 43-foot sample collected from this boring.

0920 Move direct push drill rig to SAIA-SB/SG24. This location is approximately 24 inches above the ground surface at SAIA on and elevated surface that runs the entire length of the northern boundary of the Site. Advance a utility clearance hand auger to 5 feet below the elevation of this boring. Drill and collect continuous soil samples to 35 ft bgs. Construct a temporary soil gas sampling well with completion intervals of as described for SAIA-SB/SG19.

1055 Move direct push drill rig to SAIA-SB/SG26 location. This location is also approximately 24 inches above the ground surface at the Site along the northern boundary. Complete a hand auger utility clearance boring to 5 feet below the surface elevation of this boring. Drill and collect continuous soil samples to 28 feet. Saturated conditions were encountered at this depth and the boring was backfilled with bentionite pellets to 25 feet below the surface elevation of this boring and a temporary soil gas sampling well was installed with completions at 4.5 to 5.0; 14.5 to 15.0; and 24.5 to 25.0 feet below the elevation of this boring.

1215 GDT crew takes lunch

1255 Gilbane staff and GDT crew travel to ELG Metals to inspect drilling locations scheduled for completion tomorrow and coordinate planned activities with ELG management.

1340 Move direct push drill rig to SAIA-SB/SG29 location. This boring is also located along the northern boundary of the Site approximately 24 inched above the ground surface for SAIA. Complete a hand auger utility clearance boring to 5 feet below the elevation of the boring. Advance the borehole using the direct push drilling technique to 35 feet below the elevation of the boring. Install a temporary soil gas sampling well with the same sampling intervals as described for SAIA-SB/SG19 above.

1510 GDT crew loads direct push drill rig on transport trailer, secures support equipment, completes daily activity documentation

1530 Prepare soil samples for shipment to applicable analytical laboratories and travel to Fed Ex.

1630 Complete soil sample shipping documentation and relinquish soil samples to Fed Ex.

Prepared by: Peter Phillips	Signature:

Daily Activity Report (DAR)

Project Name: SAIA RI/FS	Page 1 of 1
Project No./Task Code: 07163.0064.FI0301	Date: April 17, 2014
Description of Work: Soil sampling and installation of temporary soil gas sampling wells	
Visitors / Subcontractors: none/Gregg Drilling and Testing	
Weather: mild to warm	

Description of Field Activities

0645 Onsite at ELG Metals. Move limited access direct push drill rig and support equipment onsite. Off load drill rig and move to SAIA-SB/SG36. Complete tailgate safety meeting. Cut concrete surface with solid stem auger cutting head and complete the utility clearance hand auger boring to 5 feet bgs.

Install temporary soil gas sampling well with completions at 4.5 to 5.0; 14.5 to 15.0; 24.5 to 25.0; and 34.5 to 35.0 feet below ground surface. Extremely wet conditions encountered from 12 ft bgs to 35 ft. bgs

1000 Move direct push drill rig to SAIA-SB/SG37 location, cut concrete surface, advance utility clearance hand auger boring. Drill and collect continuous soil samples to 35 feet bgs, encounter extremely wet conditions from approximately 12 ft. bgs to 24 ft bgs. Discuss well installation problems associated with wet to saturated subsurface materials in small boreholes with Don Gruber, Project Manager. Decision made to construct temporary soil gas sampling intervals at 4.5 to 5.0 and 14.5 to 15.0 ft. bgs.

1135 GDT crew takes lunch

1230 Move direct push drill rig to SAIA-SB/SG38 location, cut concrete surface and complete utility clearance hand auger boring to 5 feet bgs. Advance borehole with direct push technique and collect continuous soil samples to 35 ft. bgs.

Install temporary soil gas sampling well with completions as described for SAIA-SB/SB36.

1410 Move direct push drill rig to SAIA-SB/SB39 location, cut concrete surface and complete utility clearance hand auger boring to 5 feet bgs. Construct temporary soil gas sampling well with completion intervals as described for SAIA-SB/SG36.

1530 GDT crew loads direct push drill rig on transport trailer and returns to SAIA staging area to complete daily activity documentation.

1545 Prepare soil samples for shipment to applicable analytical laboratory with appropriate documentation.

1635 Travel to Fed Ex and complete sample shipment documentation

1650 Relinquish soil samples to Fed Ex.

Daily Activity Report (DAR)

Project Name: SAIA RI/FS	Page 1 of 1
Project No./Task Code: 07163.0064.FI0301	Date: April 18, 2014
Description of Work: Soil sampling and installation of temporary soil gas sampling wells	
Visitors / Subcontractors: none/Gregg Drilling and Testing	
Weather: mild	

Description of Field Activities

0645 Tailgate safety meeting, move direct push drill rig and support equipment to SAIA-SB/SG35, complete utility clearance hand auger to 5 feet bgs.

0715 Advance borehole with direct push drilling technique and collect continuous soil samples to 35 ft. bgs. Install temporary soil gas sampling well with completion intervals at 4.5 to 5.0; 14.5 to 15.0; 24.5 to 25.0 and 34.5 to 35.0 ft. bgs.

0830 Move direct push drilling rig and support equipment to SAIA-SB/SG20, cut concrete surface with solid stem auger and advance to 5 ft. bgs. Encounter evidence of petroleum contamination (strong petroleum odor and soil discoloration from approximately 0.5 ft. bgs to 35 ft. bgs.; breathing zone 0.0 ppm, borehole 2.3 ppm)

0845 Advance direct push borehole and collect continuous soil samples to 35 ft. bgs. Construct temporary soil gas sampling well with completion intervals as described for SAIA-SB/SG35. (PID measured volatile constituents in 35 ft bulk soil sample at 12.9 ppm)

1000 Move direct push drill rig to SAIA-SB/SG21. Complete utility clearance hand auger to 5 ft. bg. Advance direct push borehole and collect continuous soil samples to 35 ft. bgs. Construct temporary soil gas sampling well with completion intervals as described for SAIA-SB/SG35. Evidence of petroleum contamination (stained soil and petroleum odor) were encountered from 11 ft. to 35 ft bgs in SB/SG21. (PID measurement of bagged soil from 35 ft. 3.4 ppm)

1145 Move direct push drill rig to SAIA-SB/SG22. GDT crew lunch break

1245 Cut concrete surface with solid stem auger flight. Complete utility clearance hand auger to 5 ft. bgs. Evidence of petroleum contamination and strong petroleum odor from 0.5 ft. to 7 ft. bgs. Breathing zone PID measurement 0.0 ppm, borehole measurement 2.2 ppm. Advance direct push borehole and collect continuous soil samples to 35 ft. bgs. Construct temporary soil gas sampling well with completion intervals as described for SAIA-SB/SG35

1430 GDT crew loads direct push drill rig on transport trailer, loads drilling support equipment and well construction supplies, completes daily activity documentation.

1445 Prepare soil samples for shipment to applicable analytical laboratory, prepare sample shipment documentation

1530 Travel to Fed Ex, complete preparation of shipment documentation

1600 Relinquish soil samples to Fed Ex.

FIELD ACTIVITY REPORT

Project: SAIA		Date: 4-21-14	Page 1 of 1
Client: US EPA	Contract No.:	Project No.: 07163-0064	
Work Description: soil gas sampling			
Subcontractors/Visitors: H&P			
Weather: AM - 57°F, cloudy / PM - 78°F, clear-sunny			

DESCRIPTION OF FIELD ACTIVITIES AND EVENTS

0730 Arrive onsite.

0800 H&P arrives onsite. Conduct H&S meeting. Briefing on project objectives.

0815 Set up on SG-22 to conduct purge volume tests. Purge vol. tests will be conducted @ each interval (5', 15', 25', 35'). Conducting 3 purge volumes (1, 3, 10) tests @ each depth interval.

1500 No significant difference in TCE & PCE concentrations determined between 1, 3, & 10 purge volumes for 5', ~~10'~~, & 15' depth intervals.

1515 No significant difference in TCE & PCE concentrations determined between 1, 3, & 10 purge volumes for 25' & 35' depth intervals

1600 Purge volumes for sampling will be:
3 pv for 5' & 15'
1 pv for 25' & 35'

1620 Complete purge volume tests @ SAIA-SG23.

1630 Secure area, leave site.

Date: 4/22/14

Description of Work: soil gas sampling, soil gas well installation

Visitors / Subcontractors: H&P, Greg Drilling

Weather: AM - 61°F, partly cloudy / PM - 71°F, clear

Description of Field Activities

0700 Arrive @ SAIA property. Meet GOT staff & conduct H&S mtg.
0715 Set up direct push rig @ SAIA-SG40 location (alley between Southern & McCallum).
0755 Meet H&P staff @ ELG Metals. Conduct H&S meeting and brief site walk.
0830 Set up for soil gas sampling @ SAIA-SG39. Start purging.
0850 Complete constructing SAIA-SG40 wells.
0900 Set up direct push rig @ SAIA-SG41 location (~~Duncan~~ McCallum Ave).
1005 Complete constructing SAIA-SG41 wells.
1015 Set up direct push rig on SAIA-SG43 location (Duncan Ave).
1052 Collect split soil gas sample SAIA-SG39-015.
1105 Complete constructing SAIA-SG43 wells.
1120 Set up direct push rig on SAIA-SG42 location (SW corner of Duncan & Adella).
1125 Begin purging SAIA-SG39-25.
1200 Begin purging SAIA-SG39-35.
1250 Complete soil gas sampling @ SAIA-SG39.
1315 Set up soil gas sampling @ SAIA-SG38.
1400 Decommission SAIA-SG39 – Pull out probe/tubes when possible, cut tubing, pour grout seal, and finish surface w/ ~6" concrete.
1440 Set up soil gas sampling @ SAIA-SG37.
1525 Decommission SAIA-SG38.
1555 Complete soil gas sampling @ SAIA-SG37.
1630 Leave ELG metals property.

TAILGATE SAFETY MEETING

Date: 5/2/14 Time: 0800 Page: 1 of 1
Customer: US EPA R9 Project: SAIA Contract #: EP-S9-08-03 Proj. #: 07163.0064
Work Description: soil and soil gas sampling

EMERGENCY PROCEDURES

Emergency Contact: 911 Emergency Number: 911
Hospital/Clinic: St. Francis Medical Center Address: 4264 MLK Blvd, Lynwood, CA
Evacuation Procedures: meet at ITSI field vehicle for head count

OTHER EMERGENCY CONTACTS

Name	Phone	Name	Phone
Lynwood Fire Dept	310-603-5270	Jeremy Sawyer	303-858-0965
Don Gruber	916-853-1839		

SITE HAZARDS

Physical Hazards	Chemical Hazards (include chemical products)
equipment/vehicular traffic, drill rig, pinch points, pressurized lines, noise, head/back/eye injuries	TCE, cis-1,2-DCE, 1,4-Dioxane, metals
noise, head/back/eye injuries, slips/trips/falls	

SITE ENTRY REQUIREMENTS

Check-In Procedures: check-in w/ Gilbane field lead
Training Requirements: HAZWOPER, hazard communication, 1st Aid/CPR
Minimum PPE Required: Level D
Special Precautions:

TODAY'S SPECIFIC SAFETY ISSUES

Today's work:
Specific safety issues/work practices:

Project No./Task Code: J1630064.00	Date: 04/25/2017
Description of Work: Soil gas Investigation + rock	
Visitors / Subcontractors: Greg Drilling	
Weather: Sunny	

Description of Field Activities

7:00 Arrive at site
7:15 Tailgate Safety Meeting
8:00 Start drilling SAIA-SG/SB44 encountered refusal at 13' Proceeded on angle boring
9:20 Installing soil gas probe at 5, ~~15~~, 25, 35
10:00 Moving to SAIA-SG/SB45
10:30 Begin hand augering ie angle
11:10 Bottom of 35 feet
12 50 Install soil gas probe at 5, 15, 25, 35
1330 Sign up paper work
14.00 Take samples to Fedex

EPA Region 9 Laboratory
Canister Shipment Report

Instructions to Samplers:

The canisters listed below are provided per your request. Please note the following conditions for their use:

- Do not mark or attach adhesive labels to the canisters or the canister box.
- Record sample identification on one side of the supplied wire labels. Please leave one side of the sample tag blank for laboratory use.
- Please return all enclosed canister fittings and devices with the canisters. Note that these devices are designed for a single use.
- Return all canisters 30 days after receipt, even if not used. Contact the Region 9 Laboratory for replacement canisters if needed.
- Identify any canisters or devices that are damaged or contaminated.
- Include a copy of this Shipment Report with the return shipment.

	3.					
	4.					

14. Special Handling Instructions and Additional Information

Wear appropriate PPE while handling. Weights or volumes are approximate. 2 x 55 DM
Soil with PCBs
Job#: 33009-14-2 Profile#: CH055886 DW7494669

15. **GENERATOR'S/OFFEROR'S CERTIFICATION:** I hereby declare that the contents of this consignment are fully and accurately described above by the proper shipping name, and are classified, packaged, marked and labeled/placarded, and are in all respects in proper condition for transport according to applicable international and national governmental regulations. If export shipment and I am the Primary Exporter, I certify that the contents of this consignment conform to the terms of the attached EPA Acknowledgment of Consent.
I certify that the waste minimization statement identified in 40 CFR 262.27(a) (if I am a large quantity generator) or (b) (if I am a small quantity generator) is true.

Generator's/Offeror's Printed/Typed Name: [illegible] | Signature | Month 07 | Day 19 | Year 13

Professional's Name:
Armando D. Dupont

Professional's License Type:
Professional Land Surveyor

Professional's License Number:
7780

NOTE:
RISER_HT - RISER HEIGHT
RISER HEIGHT: THE MEASURED DISTANCE FROM GROUND SURFACE TO TOP OF WELL CASING
DD: DECIMAL DEGREES
TOR: TOP OF RIM
TOF: TOP OF FLANGE
TOC: TOP OF CASING
NG: NATURAL GROUND
FS: FINISHED SURFACE

DATE OF SURVEY: AUGUST 16, 2016

BENCHMARK:
THE ELEVATIONS SHOWN HEREON ARE BASED UPON THE CSRC DATA POINT "BKMS"
ELEVATION = 154.6 FEET (NAVD 88)

COORDINATES:
THE COORDINATES SHOWN HEREON ARE BASED UPON THE CALIFORNIA COORDINATE SYSTEM (CCS 83), ZONE 5, 1983 DATUM, DEFINED BY SECTIONS 8801 TO 8819 OF THE CALIFORNIA PUBLIC RESOURCES CODE, HOLDING THE CSRC DATA POINT "BKMS"

Notes:
Detected results shown in bold
ID = identification number
FD = Field duplicate sample results
J = Concentration is estimated because it falls between the method detection limit and laboratory reporting limit.
mg/kg = Milligrams per kilogram
N = Normal sample results
PCB = Polychlorinated biphenyl
R = Rejected results
ug/kg = Micrograms per kilogram
-- = Not analyzed

Notes:
Detected results shown in bold
ID = Identification number
FD = Field duplicate sample results
J = Concentration is estimated because it falls between the method detection limit and laboratory reporting limit.
N = Normal sample results
R = Rejected results
ug/m3 = Micrograms per cubic meter
-- = Not analyzed

Notes:
Detected results shown in bold
ID = identification number
FD = Field duplicate sample results
J = Concentration is estimated because it falls between the method detection limit and laboratory reporting limit.
N = Normal sample results
R = Rejected results
ug/m3 = Micrograms per cubic meter
-- = Not analyzed
< = Analyte not detected at the specified value

Commercial Laboratory Analytical Report

Mobile
Geochemistry Inc.

09 October 2013

Mr. Don Gruber
ITSI Gilbane Company
2934 Gold Pan Court, Ste 12
Rancho Cordova, CA 95670

H&P Project: ITSI040813-A2 Rev (Day 1)
Client Project: 07163.0064.FI0301/5211 Southern Ave

Dear Mr. Don Gruber:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 08-Apr-13 which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody

Unless otherwise noted, all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

Lisa D Erz for

Janis Villarreal
Laboratory Director

H&P Mobile Geochemistry, Inc. operates under CA Environmental Lab Accreditation Program Numbers 2579, 2740, 2741, 2742, 2743, 2745 and 2754. National Environmental Laboratory Accreditation Conference (NELAC) Standards Lab #11845

ANALYTICAL REPORT FOR SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
SG6-5, 1PV, P433cc	E304021-01	Vapor	08-Apr-13	08-Apr-13
SG6-5, 3PV, P1299cc	E304021-02	Vapor	08-Apr-13	08-Apr-13
SG6-5, 10PV, P4330cc	E304021-03	Vapor	08-Apr-13	08-Apr-13
SG6-15, 1PV, P481cc	E304021-04	Vapor	08-Apr-13	08-Apr-13
SG6-25, 1PV, P530cc	E304021-05	Vapor	08-Apr-13	08-Apr-13
SG6-25, 3PV, P1590cc	E304021-06	Vapor	08-Apr-13	08-Apr-13
SG6-15, 3PV, P1443cc	E304021-07	Vapor	08-Apr-13	08-Apr-13
SG6-25, 10PV, P5298cc	E304021-08	Vapor	08-Apr-13	08-Apr-13

On April 8, 2013 the percent recoveries for Naphthalene, p-Isopropyltoluene, and 1,2,4-Trichlorobenzene fell above the method criteria in the continuing calibration verification. The data has been qualified accordingly.

Notes and Definitions

C-High	The percent recovery for this analyte fell above the method criteria in the continuing calibration verification (CCV). Results may be biased high.
DET	Analyte DETECTED
ND	Analyte NOT DETECTED at or above the reporting limit
NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

Appendix

H&P Mobile Geochemistry, Inc. is approved as an Environmental Testing Laboratory (Certification # L11-175) in accordance with the DoD-ELAP program. H&P is approved by the State of Arizona under Certification Numbers AZM758 and AZ0779. H&P is approved as an Environmental Laboratory in conformance with the Environmental Laboratory Accreditation Program (CA) for the category of Volatile and Semi-Volatile Organic Chemistry of Hazardous Waste for the following methods:

Certificate# 2741, 2743, 2579, 2754 & 2740 approved for EPA 8260 and LUFT GC/MS
Certificate# 2742, 2745, & 2741 approved for LUFT
Certificate# 2745 & 2742 approved for EPA 418.1

H&P Mobile Geochemistry, Inc. is approved as an Environmental Laboratory in conformance with the National Environmental Accreditation Conference Standards for the category Environmental Analysis Air and Emissions for the following analytes and methods:

Hexachlorobutadiene by EPA TO-15 & TO-14A
1,2,4-Trichlorobenzene by EPA TO-15 & TO-14A
1,2-Dichlorobenzene by EPA TO-15 & TO-14A
Dichlorotetrafluoroethane by EPA TO-14A
1,4-Dichlorobenzene by EPA TO-15 & TO-14A
Benzene by EPA TO-15 & TO-14A
Chlorobenzene by EPA TO-15 & TO-14A
Ethyl benzene by EPA TO-15 & TO-14A
Styrene by EPA TO-15 & TO-14A
Toluene by EPA TO-15 & TO-14A
Total Xylenes by EPA TO-15
1,1,1-Trichloroethane by EPA TO-15 & TO-14A
1,1,2,2-Tetrachloroethane by EPA TO-15 & TO-14A
1,1,2-Trichloroethane by EPA TO-15 & TO-14A
1,1-Dichloroethane by EPA TO-15 & TO-14A
1,1-Dichloroethene by EPA TO-15 & TO-14A
1,2-Dichloroethane by EPA TO-15 & TO-14A
1,2-Dichloropropane by EPA TO-15 & TO-14A
Benzyl Chloride by EPA TO-15 & TO-14A
Bromoform by EPA TO-15
Bromomethane by EPA TO-15 & TO-14A
Carbon tetrachloride by EPA TO-15 & TO-14A
Chloroethane by EPA TO-15 & TO-14A
Chloroform by EPA TO-15 & TO-14A
Chloromethane by EPA TO-15 & TO-14A
cis-1,2-Dichloroethene by EPA TO-15 & TO-14A
cis-1,3-Dichloropropene by EPA TO-15 & TO-14A
Methylene chloride by EPA TO -15 & TO-14A
Tetrachloroethane by EPA TO-15 & TO-14A
trans-1,2-Dichloroethene by EPA TO-15
trans-1,3-Dichloropropene by EPA TO-15 & TO-14A
Trichloroethene by EPA TO-15 & TO-14A
Vinyl chloride by EPA TO -15
2-Butanone by EPA TO-15
4-Methyl-2-Pentanone by EPA TO-15
Hexane by EPA TO-15
Methyl tert-butyl ether by EPA TO-15
Vinyl acetate by EPA TO-15

1,3-Dichlorobenzene by EPA TO-15 & TO-14A
Trichlorofluoromethane by EPA TO-14A
Naphthalene by H&P SOP TO-15/GC-MS
1,2-Dibromoethane (EDB) by EPA TO-15 & TO-14A
1,2-Dibromo-3-chloropropane by EPA TO-15
1,3-Butadiene by EPA TO-15
1,1,2-Trichlorotrifluoroethane by EPA TO-14A
Carbon disulfide by EPA TO-15
1,4-Dioxane by EPA TO-15

This certification applies to samples analyzed in summa canisters.

H&P Project: ITSI040813-A2 Rev
Client Project: 07163.0064.FI0301 / 5211 Southern Ave

Dear Mr. Don Gruber:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 4/9/2013 -4/18/2013 which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody

Unless otherwise noted, all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

Lisa D Ens for

Janis Villarreal
Laboratory Director

NR	Not Reported
dry	Sample results reported on a dry weight basis
RPD	Relative Percent Difference

Appendix

H&P Mobile Geochemistry, Inc. is approved as an Environmental Testing Laboratory (Certification # L11-175) in accordance with the DoD-ELAP program. H&P is approved by the State of Arizona under Certification Numbers AZM758 and AZ0779. H&P is approved as an Environmental Laboratory in conformance with the Environmental Laboratory Accreditation Program (CA) for the category of Volatile and Semi-Volatile Organic Chemistry of Hazardous Waste for the following methods:

Certificate# 2741, 2743, 2579, 2754 & 2740 approved for EPA 8260 and LUFT GC/MS
Certificate# 2742, 2745, & 2741 approved for LUFT
Certificate# 2745 & 2742 approved for EPA 418.1

H&P Mobile Geochemistry, Inc. is approved as an Environmental Laboratory in conformance with the National Environmental Accreditation Conference Standards for the category Environmental Analysis Air and Emissions for the following analytes and methods:

Hexachlorobutadiene by EPA TO-15 & TO-14A
1,2,4-Trichlorobenzene by EPA TO-15 & TO-14A
1,2-Dichlorobenzene by EPA TO-15 & TO-14A
Dichlorotetrafluoroethane by EPA TO-14A
1,4-Dichlorobenzene by EPA TO-15 & TO-14A
Benzene by EPA TO-15 & TO-14A
Chlorobenzene by EPA TO-15 & TO-14A
Ethyl benzene by EPA TO-15 & TO-14A
Styrene by EPA TO-15 & TO-14A
Toluene by EPA TO-15 & TO-14A
Total Xylenes by EPA TO-15
1,1,1-Trichloroethane by EPA TO-15 & TO-14A
1,1,2,2-Tetrachloroethane by EPA TO-15 & TO-14A
1,1,2-Trichloroethane by EPA TO-15 & TO-14A
1,1-Dichloroethane by EPA TO-15 & TO-14A
1,1-Dichloroethene by EPA TO-15 & TO-14A
1,2-Dichloroethane by EPA TO-15 & TO-14A
1,2-Dichloropropane by EPA TO-15 & TO-14A
Benzyl Chloride by EPA TO-15 & TO-14A
Bromoform by EPA TO-15
Bromomethane by EPA TO-15 & TO-14A
Carbon tetrachloride by EPA TO-15 & TO-14A
Chloroethane by EPA TO-15 & TO-14A
Chloroform by EPA TO-15 & TO-14A
Chloromethane by EPA TO-15 & TO-14A
cis-1,2-Dichloroethene by EPA TO-15 & TO-14A
cis-1,3-Dichloropropene by EPA TO-15 & TO-14A
Methylene chloride by EPA TO -15 & TO-14A
Tetrachloroethane by EPA TO-15 & TO-14A
trans-1,2-Dichloroethene by EPA TO-15
trans-1,3-Dichloropropene by EPA TO-15 & TO-14A
Trichloroethene by EPA TO-15 & TO-14A
Vinyl chloride by EPA TO -15
2-Butanone by EPA TO-15
4-Methyl-2-Pentanone by EPA TO-15
Hexane by EPA TO-15
Methyl tert-butyl ether by EPA TO-15
Vinyl acetate by EPA TO-15

1,3-Dichlorobenzene by EPA TO-15 & TO-14A
Trichlorofluoromethane by EPA TO-14A
Naphthalene by H&P SOP TO-15/GC-MS
1,2-Dibromoethane (EDB) by EPA TO-15 & TO-14A
1,2-Dibromo-3-chloropropane by EPA TO-15
1,3-Butadiene by EPA TO-15
1,1,2-Trichlorotrifluoroethane by EPA TO-14A
Carbon disulfide by EPA TO-15
1,4-Dioxane by EPA TO-15

This certification applies to samples analyzed in summa canisters.

Purge Volume Calculation

Probe ID for PVT, if applicable:	SG6-35 on 4/9/13					
Tubing:	Length:	37	Diameter	1/4"	1 Volume:	179
Sand Pack (if included in purge volume calculation):	Height:	12"	Diameter	2"	1 Volume:	247
Dry Bentonite (if included in purge volume calculation):	Height:	6"	Diameter	2"	1 Volume:	154
PVT Increments:	1PV = **581**		3PV = **1742**		10PV = **5806**	
PV Amount Selected:	10PV		*Selected by:*		Ed Gillera	

Leak Check Information

Leak Check Compound: ☒1,1-DFA ☐1,1,1,2-TFA ☐IPA ☐Other

Procedure: Used gaseous LCC as checked above

Other Notes: * 50cc vapor collected unless otherwise specified.

H&P Project: GIL042114-A1 Rev
Client Project: 9804-07163.0064 South Gate

Dear Mr. Don Gruber:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 4/21/2014 -5/2/2014 which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody

Unless otherwise noted, all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

Lisa D Ems for

Janis Villarreal
Laboratory Director

ANALYTICAL REPORT FOR SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
SAIA-SB/SG-42-35, P578cc	E405007-08	Vapor	02-May-14	02-May-14

April 21, 2014

The percent recovery for Naphthalene fell below the method criteria in the continuing calibration verification (CCV). This analyte has been qualified for all samples analyzed on this date.

April 22, 2014

The percent recovery for Naphthalene fell below the method criteria in the CCV. This analyte has been qualified for all samples analyzed on this date.

The percent recoveries for Bromodichloromethane, 1,1,2-Trichloroethane, and 1,1,1,2-Tetrachloroethane fell above the method criteria in the CCV on this date. Since these analytes weren't detected in any samples, the data is not affected.

April 23 and 24, 2014

The percent recoveries for Naphthalene and 1,2,4-Trichlorobenzene fell below the method criteria in the CCV. These analytes have been qualified for all samples analyzed on this date.

April 25, 2014

The percent recoveries for Carbon Tetrachloride and 1,1,1,2-Tetrachloroethane fell above the method criteria in the CCV. Since these analytes were not present in any samples analyzed on this date, the data is not affected.

April 28 and 29, 2014

The percent recovery for Naphthalene fell below the method criteria in the CCV on these two dates. This analyte has been qualified for all samples analyzed on these dates.

April 30, 2014

The percent recoveries for Naphthalene and 1,2,4-Trichlorobenzene fell below the CCV. These two analytes have been qualified for samples analyzed on this date.

May 1, 2014

The percent recoveries for Carbon Tetrachloride and 1,1,1,2-Tetrachloroethane fell above the method criteria in the CCV. Since these analytes were not present in any samples analyzed on this date, the data should not be affected.
