What Changes Has EPA Made to the Draft CIP?

Between November 2019 – Today, EPA has been:

- ▶ Reviewing informal feedback and comments received and revising the document to reflect as many suggested changes as possible.

Some of the main changes that have occurred include:

- ▶ Improving the introduction sections and overall organization of the document.
- ▶ Reducing redundancy.
- ▶ Improving graphics to make them easier to understand and visually appealing.
- ▶ Creating a Tribal background section, instead of combining it with communities.
- ▶ Creating an Environmental Justice section, instead of an Appendix.
- ▶ Expanding on the Tribal and EJ history.
- ▶ Providing clarity on community involvement during remedial design and remedial action
- ▶ Many others!

How will the EPA Collect Feedback on the Draft CIP?

EPA is utilizing a digital outreach platform called Konveio that takes regular PDFs and turns them into public documents that you can comment on online.

- ▶ Konveio will collect comments and feedback live so that you can see others' comments while you are commenting.
- ▶ EPA will accept comments for up 45 days once the document is released to the public.

What does Konveio Look Like?
