Subject: RE: Emergency Detonation, MJU-7 IR Flare

Louie,

The flare weighs 285 grams (10.05 ounces)

The flares initiation system (fuse) is compromised increasing risk of accidental detonation if shipped.

MSgt Keith Bochert or MSgt Jason Miller (cc'd) will supervise the disposal depending on when permit is issued. Environmental can attend if necessary.

V/r,
James

Subject: [Non-DoD Source] RE: Emergency Detonation, MJU-7 IR Flare

Good Afternoon Mr. Lang,

Thank you for providing the information below. Could you please provide the following additional information?

1. Weight of MJU-7 IR Flare (in lbs)
2. Please provide additional detail on reason for disposal through emergency detonation (e.g. is it unsafe for shipment?)
3. Who will be supervising the detonation?

Please let me know if you have any questions.

Sincerely,

Louie A. Cuaderno

Subject: Emergency Detonation, MJU-7 IR Flare

Good morning Louie,

The Air Force Explosive Ordnance Division (EOD) has an MJU-7 IR Flare that it needs to dispose of through emergency detonation.

The flare will be destroyed using a 1.25 lb block of C-4 and an M6 electric blasting cap.

Detonation will occur at the Elmendorf EOD Intentional Detonation Range Bunker (Facility 37719), just north of Six Mile Lake.

Please let me know if you need additional information to approve this action.

Thank you,
James
