

# PORTLAND HARBOR SUPERFUND SITE UPDATES

MARCH 2026

**OVERVIEW** The in-river portion of the Portland Harbor Superfund Site spans about 10 miles of the Lower Willamette River in Portland, OR. EPA released a final cleanup plan (also called the Record of Decision or ROD) in January 2017 to address contamination in the sediment, surface water, and groundwater that poses an unacceptable risk to human health and the environment. All of the acres designated for active in-water remediation at the Site are now in remedial design. This document provides a general project update.

 Red outlines signify that working parties are conducting remedial design with EPA oversight. For unassigned areas and the Cathedral Park Project Area (labeled in orange), EPA is implementing full remedial design. *Please see reverse page for more information.*

 This shaded area indicates areas where only monitored natural recovery is planned to occur, per the Record of Decision.

## QUESTIONS?

Please visit EPA's Portland Harbor website at [www.epa.gov/superfund/portland-harbor](http://www.epa.gov/superfund/portland-harbor)

## WHAT ABOUT SOURCE CONTROL?

The term source control refers to controlling sources of contamination that are entering the Portland Harbor Superfund Site from upriver and lands along the river. **The Oregon Department of Environmental Quality (DEQ)** oversees source control and works closely with EPA. To date, DEQ has completed work on 119 of 175 sites identified as requiring source control within the study area and is currently working on 49 other sites. Visit DEQ's Portland Harbor Upland Source Control website here: <https://www.oregon.gov/deq/Hazards-and-Cleanup/CleanupSites/Pages/Portland-Harbor-Strategy.aspx>.

### Updates on Site-Wide Work:

#### Community Impacts Mitigation Plan (CIMP):

- **Summary:** During the construction phase of the cleanup, there may be impacts to the communities in close proximity to the dredging, capping, and materials handling activities. The Community Impacts Mitigation Plan will identify possible impacts (access to recreation, air quality, etc) and establish specific goals and requirements under which the remedial activities are to be implemented. A draft was released for community and performing party input in June 2024. EPA is currently reviewing comments and anticipates releasing a revised version soon.
