

## COLLABORATING WITH COLLEGES AND UNIVERSITIES FOR REDEVELOPMENT OPPORTUNITIES

The College/Underserved Community Partnership Program (CUPP) provides a creative approach by partnering and delivering technical assistance from local colleges and universities to small underserved communities at no cost to the communities. EPA Region 4 has successfully collaborated with colleges and universities to assist communities in pursuing redevelopment opportunities and plans at sites in the Region. This webinar will share best practices and lessons learned as well as share the perspectives of the partnered colleges and universities.

### PRESENTERS:

**Frank Avvisato**, EPA Superfund Redevelopment

**Scott Miller**, EPA Region 4
