HOW SUPERFUND REDEVELOPMENT IN REGION 6 IS MAKING A
DIFFERENCE IN COMMUNITIES

EPA REGION 6 ECONOMIC PROFILE – DATA SUPPLEMENT (2023 DATA)

: Total number of sites in use per state.

The cleanup and reuse of Superfund sites often restores value to site properties and surrounding communities negatively affected by contamination. Site redevelopment can revitalize local economies with jobs, new businesses, tax revenues and spending. EPA also works to ensure that existing businesses on properties being cleaned up under Superfund can continue operating in a way that protects human health and the environment, enabling these businesses to remain open and serve as a source of jobs and income for local communities. EPA tracks current and former Superfund sites in use across the country. Each year, EPA researches the beneficial effects of redevelopment and continued use of these sites.

This profile looks at how EPA's effort to safely support long-term uses and facilitate redevelopment at Superfund sites makes a difference in communities across Region 6, including communities that experience environmental and economic burdens. It also provides the land values and property taxes associated with Superfund sites returned to use and sites remaining in use throughout the cleanup process.

In Reuse	Part or all of a site is being used in a new, different manner than before Superfund involvement. Or, the property was vacant and cleanup was designed to support a new, specific land use.
In Continued Use	Historical uses at a site remain active, and/or the site is still used in the same general manner as when the Superfund process started at the site.
In Reuse and Continued Use	Part of a site is in continued use and part of the site is in reuse.

¹ Six sites are federal facilities. Federal facility sites are excluded from all other site and business data above.

REGIONAL DATA — TOTAL ANNUAL SALES

TOTAL EMPLOYEES

TOTAL ANNUAL EMPLOYEE INCOME⁴

EPA collected economic data for 355 businesses, government agencies and civic organizations operating at 38 National Priorities List (NPL) sites and four non-NPL sites in reuse and continued use in Region 6. The businesses and organizations at these sites generate about \$1.1 billion in estimated annual sales and employ about 5,203 people who earn an estimated \$302 million in annual employment income. This income injects money into local economies and generates revenue through personal state income taxes.

⁴ Throughout this report, sales and annual employee income may not sum exactly to the totals presented due to rounding.

⁵ Results are based on an EPA Superfund Redevelopment Program effort to collect on-site property values and property taxes for a subset of Superfund sites. Property and tax values in this data supplement may not sum exactly to the totals presented due to rounding.

⁶ Based on total property value amount of \$970 million total property value divided by total acreage of 5,015 acres.
