

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

JAN - 3 2012

THE ADMINISTRATOR

The Honorable John Boehner
Speaker of the House
U.S. House of Representatives
Washington, D.C. 20515

Dear Mr. Speaker:

I am pleased to submit the enclosed report entitled, "FY 2011 Superfund Five-Year Review Report to Congress," in accordance with the requirements of Section 121(c) of the Comprehensive Environmental Response, Compensation and Liability Act.

If you have questions, please contact me or your staff may contact Laura Vaught, Deputy Associate Administrator for Congressional Affairs at (202) 564-0304.

Sincerely,

A handwritten signature in black ink, appearing to read "Lisa P. Jackson", written in a cursive style.

Lisa P. Jackson

Enclosure

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
WASHINGTON, D.C. 20460

JAN - 3 2012

THE ADMINISTRATOR

The Honorable Joseph Biden
President of the Senate
United States Senate
Washington, D.C. 20510

Dear Mr. President:

I am pleased to submit the enclosed report entitled, "FY 2011 Superfund Five-Year Review Report to Congress," in accordance with the requirements of Section 121(c) of the Comprehensive Environmental Response, Compensation and Liability Act.

If you have questions please contact me, or your staff may contact Laura Vaught, Deputy Associate Administrator for Congressional Affairs at (202) 564-0304.

Sincerely,

A handwritten signature in black ink, appearing to read "Lisa P. Jackson", written in a cursive style.

Lisa P. Jackson

Enclosure

**FY 2011 REPORT TO CONGRESS
SUPERFUND FIVE-YEAR REVIEWS**

PURPOSE:

The U.S. Environmental Protection Agency (EPA) is responsible for reviewing Superfund remedial actions at least every five years where hazardous substances, pollutants, or contaminants will remain on site above levels that allow for unlimited use and unrestricted exposure. The EPA is also responsible for preparing a report to Congress on these reviews.

BACKGROUND:

Section 121(c) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended, states:

"If the President selects a remedial action that results in any hazardous substances, pollutants, or contaminants remaining at the site, the President shall review such remedial action no less often than each 5 years after the initiation of such remedial action to assure that human health and the environment are being protected by the remedial action being implemented. In addition, if upon such review it is the judgment of the President that action is appropriate at such site in accordance with section 9604 or 9606 of the Title, the President shall take or require such action."

CERCLA also requires that the EPA report to Congress information regarding these sites for which the reviews are required. This report provides a list of sites, information about sites where additional work is required, and contacts for additional information.

FINDINGS:

The attached table presents a list of statutory, policy and discretionary¹ five-year reviews that were conducted for non-federal sites and federal National Priorities List (NPL) sites, including the following:

¹ Statutory reviews are carried out if both of the following conditions are true: 1) Upon completion of the remedial action, hazardous substances, pollutants, or contaminants will remain on site; and 2) The Record of Decision (ROD) for the site was signed on or after October 17, 1986 (the effective date of SARA) and the remedial action was selected under CERCLA §121. Policy reviews are carried out for the following types of actions: 1) a pre- or post-SARA remedial action that, upon completion, will not leave hazardous substances, pollutants, or contaminants on site above levels that allow for unlimited use and unrestricted exposure, but requires five years or more to complete; 2) a pre-SARA remedial action that leaves hazardous substances, pollutants, or contaminants on site above levels that allow for unlimited use and unrestricted exposures; or 3) a removal-only site on the NPL where a removal action leaves hazardous substances, pollutants, or contaminants on site above levels that allow for unlimited use and unrestricted exposure and where no remedial action has or will take place. Regions may also carry out a discretionary review which is not required by the statute but may be completed at the Region's discretion to help ensure the protectiveness of the remedy.

- Reviews due in FY 2011, currently completed;
- Reviews due in prior or later fiscal years, currently completed;
- Reviews due in FY 2011, still pending completion of the report; and
- Reviews due in prior fiscal years, still pending completion of the report.

For non-federal sites, a total of 177 sites required five-year reviews in FY 2011. One of the 177 reviews was completed in a previous fiscal year but was due in FY 2011. This review is being counted as completed in FY 2011. The five-year review for Burlington Northern (Somers Plant) was due in FY 2011 but was completed in FY 2012 on February 28, 2012. All the reviews due in FY 2011 are currently complete. Another 10 reviews due in prior or later fiscal years were also completed in FY 2011, bringing the total number of non-federal site five-year reviews completed to 187.

For federal NPL sites, a total of 32 sites required five-year reviews in FY 2011. Two of the 32 reviews were completed in previous fiscal years but were due in FY 2011. Those reviews are being counted as completed in FY 2011. The five-year reviews for the Bangor Naval Submarine Base and Bangor Ordnance Disposal were due in FY 2011 but subsequently completed in FY 2012 on October 14, 2011. An additional 14 reviews due in prior or later fiscal years also were completed in FY 2011, bringing the total number of federal NPL site five-year reviews completed to 46.

Section 2.5 of the EPA's 2001 Comprehensive Five-Year Review Guidance states that the "EPA will either concur with the other federal agency or department protectiveness determination, or the EPA may make an independent finding." In addition, the EPA issued a policy memorandum, entitled "Program Priorities for Federal Facility Five-Year Reviews" in August 2011 to the Regions. The memorandum instructed the EPA to make an independent protectiveness finding if it is determined that "the report is either technically inaccurate or has not been submitted by the federal agency." The EPA issued independent protectiveness findings at nine sites where the federal agency or department did not submit a five-year review report to the EPA on time (including the two Bangor sites). As a result, all 32 sites due in FY 2011 are considered complete but nine of these are based on the EPA's own protectiveness finding. Of the nine sites where the EPA had made its own protectiveness finding, the EPA has since received four final five-year review reports from the federal agencies or departments. The EPA has assurance from the other federal agencies that final five-year review reports will be submitted to the EPA for the remaining five sites.

In all, the total number of five-year reviews completed for both non-federal and federal NPL sites was 233. The reviews determined that eight sites (or portions of the sites) were "not protective" and 22 sites were "protectiveness deferred." Additional work or study will be conducted so that all of these sites will ultimately become protective. The recommendations for each of these sites are tracked in the CERCLIS database and, semi-annually, headquarters monitors the progress in implementing these recommendations to resolve protectiveness-related issues at all sites.

For non-federal sites, three reviews due in prior fiscal years remain pending and the EPA is working to complete them. For federal NPL sites, no reviews due in prior fiscal years are pending. The EPA expects that all reviews will be completed in the near future.

Summary copies of all five-year reviews, including those contained in this report, can be accessed publicly via the national Superfund web page (<http://cfpub.epa.gov/fiveyear/>). These reports contain detailed information regarding the effectiveness of the site remedy and assess whether human and/or ecological exposures are occurring. The information in these reports includes the protectiveness determinations that are ultimately selected and are reported in the following table for each site. For additional information on any of the five-year reviews identified in this report, please contact the Office of Superfund Remediation and Technology Innovation at (703) 603-8960, or the Superfund Call Center at (703) 412-9810 or (800) 424-9346.

* Federal facility site

1 For all sites that require a five-year review, a separate protectiveness determination is generally made for each portion or operable unit (OU) of the site. The determination that is considered "least protective" is used as the general determination for the review in this report. For example, if one operable unit is protective but another operable unit has protectiveness deferred, the determination for the entire review will be protectiveness deferred.

2 For this site, the five-year review completed on 9/30/2011 brings the site into compliance for reports due in both FY 2003 and FY 2008.

Protective - The remedy is protective of human health and the environment.

Short-Term Protective - The remedy is protective of human health and the environment in the short-term. This statement is generally used when the remedy is protective but requires further actions or institutional controls to remain protective in the long-term.

Will Be Protective - The remedy is expected to be protective of human health and the environment upon completion, and in the interim, exposure pathways that could result in unacceptable risks are being controlled. This statement is generally used for remedies that are under construction.

Protectiveness Deferred - A protectiveness determination of the remedy cannot be made until further information is obtained. Generally, reviews that include this determination identify both the actions and timeframe necessary to obtain the information so a protectiveness determination can be made through an addendum to the five-year review report.

Not Protective - The remedy is not protective of human health and/or the environment. For example, a new exposure pathway may be identified or a remedy may not be able to meet a new cleanup level. Generally, reviews that include this determination identify actions that need to be taken to ensure protectiveness.
