

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
WASHINGTON, D.C. 20460

JUL 29 2008

THE ADMINISTRATOR

The Honorable Richard B. Cheney  
President of the Senate  
Washington, DC 20510

Dear Mr. President:

I am pleased to submit the enclosed report entitled, "FY2007 Superfund Five-Year Review Report to Congress," in accordance with the requirements in Section 121(c) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended.

If you have questions or comments regarding this report, please contact Susan Parker Bodine, Assistant Administrator, Office of Solid Waste and Emergency Response, at (202) 566-0200, or your staff may contact Amy Hayden in the Office of Congressional and Intergovernmental Relations at (202) 564-0555.

Sincerely,

A handwritten signature in black ink, appearing to read "S. L. Johnson".

Stephen L. Johnson

Enclosure

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY  
WASHINGTON, D.C. 20460

JUL 29 2008

THE ADMINISTRATOR

The Honorable Nancy Pelosi  
Speaker of the House of Representatives  
Washington, DC 20515

Dear Madam Speaker:

I am pleased to submit the enclosed report entitled, "FY2007 Superfund Five-Year Review Report to Congress," in accordance with the requirements in Section 121(c) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended.

If you have questions or comments regarding this report, please contact Susan Parker Bodine, Assistant Administrator, Office of Solid Waste and Emergency Response, at (202) 566-0200, or your staff may contact Amy Hayden in the Office of Congressional and Intergovernmental Relations at (202) 564-0555.

Sincerely,

A handwritten signature in black ink, appearing to read "S. Johnson".

Stephen L. Johnson

Enclosure

**FY 2007 REPORT TO CONGRESS  
SUPERFUND FIVE-YEAR REVIEWS**

**PURPOSE:**

The U.S. Environmental Protection Agency (EPA) is responsible for reviewing Superfund remedial actions at least every five years where hazardous substances, pollutants, or contaminants will remain on site above levels that allow for unlimited use and unrestricted exposure. EPA is also responsible for preparing a report to Congress on these reviews.

**BACKGROUND:**

Section 121(c) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended, states:

*"If the President selects a remedial action that results in any hazardous substances, pollutants, or contaminants remaining at the site, the President shall review such remedial action no less often than each 5 years after the initiation of such remedial action to assure that human health and the environment are being protected by the remedial action being implemented. In addition, if upon such review it is the judgment of the President that action is appropriate at such site in accordance with section 9604 or 9606 of the Title, the President shall take or require such action."*

CERCLA also requires that EPA report to Congress information regarding these sites for which the reviews are required. This report provides a list of sites, information about sites where additional work is required, and contacts for additional information.

**FINDINGS:**

The attached table presents a list of statutory five-year reviews for non-federal sites and NPL federal sites, including the following:

- Reviews due in FY 2007, currently completed;
- Reviews due in prior or later fiscal years, but completed in FY 2007;
- Reviews due in FY 2007, still pending; and
- Reviews due in prior fiscal years, still pending.

For non-federal sites, a total of 126 sites required five-year reviews in FY 2007. Reviews for 125 of the 126 sites requiring reviews were completed. Another 9 reviews due in other fiscal years also were completed, bringing the total number of non-federal site five-year reviews completed to 134.

For federal sites, a total of 23 sites required five-year reviews in FY 2007. Twenty-two reviews were completed for 21 of the 23 sites requiring reviews. Another 13 reviews for 12 sites due in other fiscal years also were completed, bringing the total number of federal site five-year reviews completed to 35.

In all, the total number of five-year reviews completed for both non-federal and federal sites was 169. The remedies at 19 of these sites (or portions of the sites) required additional work or additional study. For these sites, implementation of the recommendations in the five-year review reports are underway.

For FY 2007, two federal site five-year reviews remain pending. The federal agencies responsible for producing these five-year review reports are aware that these reports are due and we are working with the agencies to complete them. One non-federal site five-year review also is pending. In addition, four five-year reviews (one federal and three non-federal) that were due in fiscal years prior to FY 2007 remain pending. EPA expects that these seven reviews will be completed in the near future.

The five-year reviews contained in this report are publicly available. Additional information for any five-year reviews identified in this report can be obtained by contacting the Office of Superfund Remediation and Technology Innovation at (703) 603-8960, or the Superfund Call Center at (703) 412-9810 or (800) 424-9346. Copies of all five-year review reports also are available on the national Superfund web page (<http://cfpub.epa.gov/fiveyear/>).

10	FAIRCHILD AIR FORCE BASE (4 WASTE AREAS)	*	2006	Pending	

<sup>1</sup> For all sites that require a five-year review, a separate protectiveness determination is generally made for each portion (operable unit) of the site. The statement that is considered "least protective" is used as the general determination for the review in this report. For example, if one operable unit is protective but another operable unit has protectiveness deferred, the determination for the entire review will be protectiveness deferred.

Protective - The remedy is protective of human health and the environment.

Short-Term Protective - The remedy is protective of human health and the environment in the short-term. This statement is generally used when the remedy is protective but requires further actions or institutional controls to remain protective in the long-term.

Will Be Protective - The remedy is expected to be protective of human health and the environment upon completion, and in the interim, exposure pathways that could result in unacceptable risks are being controlled. This statement is generally used for remedies that are under construction.

Protectiveness Deferred - A protectiveness determination of the remedy cannot be made until further information is obtained. Generally, reviews that include this determination identify both the actions and timeframe necessary to obtain the information so a protectiveness determination can be made through an addendum to the five-year review report.

Not Protective - The remedy is not protective of human health and/or the environment. For example, a new exposure pathway may be identified or a remedy may not be able to meet a new cleanup level. Generally, reviews that include this determination identify actions that need to be taken to ensure protectiveness.
